[Smart Girls](#) - Shauna

Pomerantz 2017-01-03

Are girls taking over the world? It would appear so, based on magazine covers, news headlines, and popular books touting girls' academic success. Girls are said to outperform boys in high school exams, university entrance and graduation rates, and professional certification. As a result, many in Western society assume that girls no longer need support. But in spite of the messages of post-feminism and neoliberal individualism that tell girls they can have it all, the reality is far more complicated. *Smart Girls* investigates how academically successful girls deal with stress, the "supergirl" drive for perfection, race and class issues, and the sexism that is still present in schools. Describing girls' varied everyday experiences,

including negotiations of traditional gender norms, Shauna Pomerantz and Rebecca Raby show how teachers, administrators, parents, and media commentators can help smart girls thrive while working toward straight As and a bright future.

21st Century Media and Female Mental Health -

Fredrika Thelandersson
2022-10-22

This open access book examines the conversations around gendered mental health in contemporary Western media culture. While early 21st century-media was marked by a distinct focus on happiness, productivity and success, during the 2010s negative feelings and discussions around mental health have become increasingly common in that same media landscape. This book traces this turn to sadness in women's media culture and shows that it emerged indirectly as a result of a culture overtly focused on happiness. By tracing the coverage of mental health

issues in magazines, among female celebrities, and on social media this book shows how an increasingly intimate media environment has made way for a profitable vulnerability, that takes the shape of marketable and brand-friendly mental illness awareness that strengthens the authenticity of those who embrace it. But at the same time sad girl cultures are proliferating on social media platforms, creating radically honest spaces where those who suffer get support, and more capacious ways of feeling bad are formed. Using discourse analysis and digital ethnography to study contemporary representations of mental illness and sadness in Western popular media and social media, this book takes a feminist media studies approach to popular discourse, understanding the conversations happening around mental health in these sites to function as scripts for how to think about and experience mental illness and sadness

guide, along with the accompanying workbook materials for youth participants. JJAM addresses the unique gender- and developmental-needs of girls and young women in juvenile justice system, such as the link between relational and physical aggression, the importance of strengthening and repairing damaged relationships, and the need to transfer skills learned in a facility to day-to-day life in the community following discharge. Session activities elicit real-life examples from participants so that activities and content can be tailored to the characteristics, needs, and interests of the specific girls and young women in each group. JJAM was developed through a rigorous research process and is identified as an empirically based program and empirically supported treatment. Studies have shown that JJAM significantly reduced anger and aggression among girls in residential juvenile justice facilities, making it an essential resource for any clinician working on anger

Bullying - Great Britain: Parliament: House of Commons: Education and Skills Committee 2007-03-27

There has been an increasing awareness over the past few decades of bullying and the effect it has on the educational and social achievements of children and young people. The Committee's report examines the progress that has been made to address this problem since the introduction of the 'Don't Suffer in Silence' pack in 1994, the barriers that prevent schools from tackling bullying effectively, issues of prejudice-driven bullying including SEN-related, homophobic and faith-based bullying, and cyber-bullying. The report finds that defining what bullying is and identifying instances of bullying is the first potential barrier to successfully tackling the problem. Teachers and staff, pupils and parents should all be aware of their school's definition of bullying and how this affects their own behaviour, with the attitude and engagement of head

teachers vital to tackling bullying. The focus of anti-bullying guidance should be tackling bullying behaviour and making it clear that such behaviour is not acceptable, rather than attempting to change the behaviour of the victim. The DfES should issue new guidance to local authorities and schools on when the use of exclusion is appropriate. The lack of accurate reliable data on bullying is another barrier to more effective anti-bullying work, and the Government should commission a long-term study of a number of schools, looking at both general trends in bullying and also the effectiveness of different approaches in different circumstances. The report also recommends that the Government needs to foster a culture where schools are encouraged to be open about incidents of bullying, have effective ways of dealing with bullying when it occurs and provide support the victims of bullying, rather than fearing reporting incidents of bullying

will damage their reputation.
