American Light and Medium Frigates 1794-1836 Mark Lardas 2012-01-20 The 'Original Six' frigates were commissioned by the new-born US Navy at a staggering cost of nearly \$700,000. Designed to be light and fast, these warships enabled America to project its power across the globe. Among the ships Mark Lardas examines is USS Constellation: the first ship to be commissioned by the United States Navy. Alongside stirring accounts of engagements during the Barbary Wars, the author explores the design and development of these frigates, explaining the shortcomings that led to their replacement by larger, heavier 44-gun models by 1800. Packed with contemporary illustrations of US frigates and their British and French rivals, this book follows the escalation of the naval 'arms race' during the 18th century.

U.S.S. Essex Frances Diane Robotti 1999-05 The USS Essex, a thirty-two-gun frigate built in 1799 by the merchants of Salem, was known around the world for her speed and graceful lines, achieving a brilliant series of dramatic firsts for the young American navy.

The Ships of Christopher Columbus Xavier Pastor 2005 1992 marked the 500th anniversary of the European discovery of the Americas by Christopher Columbus. The details of Columbus's ships the Santa Maria, Nina and Pinta remain lost to historians, for the ships were built before the first manuals of shipbuilding were written, and no documentation or illustration has survived. Nevertheless, extensive research has allowed the construction of a number of replicas over the years, and those built for the 1992 celebrations are without doubt the most accurate reconstructions yet. Many years of research by Jose Martinez-Hidalgo and his successors into the Naos and caravels of the 15th and 16th centuries has allowed a whole new insight into the design and construction of the famous ships of Columbus. The Anatomy of the Ship series provides the finest documentation of individual ships and ship types ever published. What makes the series unique is a complete set of superbly executed line drawings, both the conventional type of plan as well as explanatory perspective views, with fully descriptive keys.

The Frigate Surprise Brian Lavery 2009 The HMS "Surprise" starred as the principal ship in Patrick O'Brian's much-celebrated Aubrey-Maturin series of novels. This volume narrates the career of HMS "Surprise" in both her historical and fictional roles.

The 32-gun Frigate Essex Portia A. Takakjian 2005 On the successful completion of the War of Independence, the American navy was disbanded, and it was not until the late 1790s that a regular naval force was reconstituted. Provoked by the need to protect American merchant shipping from the belligerent European nations and the piratical Barbary powers, Congress decided on a programme of frigate building, which included the 32-gun frigate Essex. Designed by William Hackett, Essex was a typical medium frigate of her time. Working from both US and British sources, the author has reconstructed many previously undetermined details of the ship and in passing has rehabilitated the reputation of the designer as one who was responsible for one of the best balanced of that generation's frigates.

In Pursuit of the Essex Ben Hughes 2016-03-31 On 26 October 1812, during the war between Britain and the United States, the frigate USS Essex set sail on the most remarkable voyage in the early history of the US navy. After rounding Cape Horn, she proceeded to systematically destroy the British South Seas whaling fleet. When news reached the Royal Navys South American station at Rio de Janeiro, HMS Phoebe was sent off in pursuit. So began one of the most extraordinary chases in naval history. In Pursuit of the Essex follows the adventures of both hunter and hunted as well as a host of colourful characters that crossed their paths. Traitorous Nantucket whalers, Chilean revolutionaries, British spies, a Peruvian viceroy and bellicose Polynesian islanders all make an appearance. The brilliant yet vainglorious Captain Porter of the Essex, his nemesis Captain James Hillyar of the Phoebe, and two young midshipmen, David Farragut and Allen Gardiner, are the principal narrators. From giant-tortoise turning expeditions on the Galapagos to the perils of rounding Cape Horn, via desperate skirmishes with spear-toting natives on the Marquesas and a defeated duellist bleeding his life out onto black, volcanic sands, the reader is immersed in the fantastical world of the British and American seamen who struggled for supremacy over the worlds oceans in the sunset years of the age of sail. Ben Hughess graphic account is a work of non-fiction, yet reads like a novel, from the opening view of the Essex preparing for her cruise on the Delaware River to the storys bloody denouement in Valparaiso Bay.
