Handbook of the Brief Psychotherapies - Richard A. Wells 2013-11-22

The last two decades have seen unprecedented increases in health care costs and, at the same time, encouraging progress in psychotherapy research. On the one hand, accountability, cost-effectiveness, and efficiency have now become commonplace terms for providers of mental health services whereas, on the other hand, an increasingly voluminous literature has emerged supporting the effectiveness of a number of types of psychotherapies. There now exists the possibility for the design and delivery of mental health services that-drawing upon this literature-more closely approximate empirically established data concerning the appropriateness and effectiveness of psychotherapy. The Handbook of the Brief Psychotherapies is intended to capture one major thrust of this movement: the development of a group of empirically grounded, time-limited therapies all sharing a common interest in the clinical utilization of a structured focus and an emphasis on time and action. For many years, professional self-interest, competing theoretical paradigms, and the vagaries of practice, wisdom, and clinical myth have influenced the practice of psychotherapy. A critical questioning of the resulting, predominantly nondirective, open-ended, and global therapies has led to a growing emphasis on action-oriented, problem-focused, time-limited therapies. Yet, ironically, this interest in the brief psychotherapies has not so much involved a radical departure from traditional therapeutic modalities as it has emphasized a new pragmatism about how time, action, and structure operate in life as well as in therapy.

The Story of a Daughter ,My New Mother - Geeta Singh 2021-05-03

This is the moving story of a mother who carried the agonizing tag of an unwanted child of her parents since her birth around her neck. It was just because she was a baby girl, and they desperately wished for a baby boy. Down the line, the list included her siblings and all the relatives. Her mother had conceived her after such long years of waiting even after that girl's birth failed to bring delight into their life. And they all went into the great depression along with her grandmother. The narrator could not give the same statement about the other relatives. Because they were jealous of her parents. But they were undoubtedly showing off being dejected. The parents were engulfed in their sorrows. They strongly considered that the daughter's birth made their position inferior in society and the house as well. And they all had been worried and

struggling with their own fears. The narrator's mother feared that she would be taken out of the house if she did not deliver the baby boy the other time. Her father was worried that society would make fun of him and pity his wretched fate. And her grandmother was worried that the bloodline of his son would get extinct forever. One more group in the family was rejoicing at heart and making all the benefits of that situation. Her birth created chaos and shattered everything in both her parents' life. Her mother's life was riddled with problems and difficulties. And her father, all the love for his wife, disappeared into the air forever. He went into a profound depression and drank to subside his pains. To release his frustration and anger, he used to give an excellent thrash to her mother. Her mother tried her best to convince her father that everything would be all right, but when she could not be the baby boy's mother, the second time, too, they reduced her position to a house maid. She was shifted to a compact room filled with odors, pestered along with her two daughters, and supposed to do all the domestic chores. It was not enough; one day, her father brought him a new wife who was half his age. The narrator called her new mother. She was an amazing lady and took good care of the narrator. She was kind to the narrator's biological mother too, but, unfortunately, the narrator's real mother was jealous of her. Her extreme poverty obligated the narrator's new mother to get married to my father. However, she detested her father at heart and constantly disrespected him. Over and above all, she did not stay behind to insult her father to his face only. Her father was always scared of her new mother and always remained in constant fear that she would abandon him if he dared to mess up with her and it continues

Husbands, Wives, and Concubines - Emlyn Eisenach 2004-05-25

Emlyn Eisenach uses a wide range of sources, including the richly detailed and previously unexplored records of nearly two hundred marriage-related disputes from the bishop's court of Verona, to illuminate family and social relations in early modern northern Italy. Arguing against the common emphasis on the growth of law and

government in this period, her study emphasizes the fluidity of the principles that governed marriage and its dissolution, and deepens our understanding of the patriarchal family and its complex relationship with gender and status during the sixteenth century. Peopled by characters from across the social spectrum of the city of Verona and its contado, Eisenach's study moves between stories about specific individuals—serving girls seeking honorable marriage through the unlikely route of concubinage, peasant men in search of independence from their fathers, and aristocratic wives seeking revenge against adulterous husbands—and broader analyses of social, economic, and geographical patterns of behavior. She shows how the Veronese at all social levels attempted to better their familial and personal fortunes by creatively molding wedding rituals to fit their particular circumstances, or engaging in the significant but until now little understood practices of concubinage, clandestine marriage, or informal marriage dissolution. Eisenach also evaluates the first half-century of religious reforms in Verona as the leading pre-Tridentine bishop Gian Matteo Giberti and his successors challenged common practices and understandings in sermons, treatises, confessionals, and court. Emphasizing the limitations of what the religious authorities could impose on the people, she explores how learned and popular notions of marriage, family, and gender shaped each other as they were put into action in the strategies of individual Veronese.

A Journey to the Mother of the Sea - Maliaraq Vebk 2019-10

The sea animals have disappeared, and people are starving. An old couple, once great shamans, are asked to journey to the Mother of the Sea to find out what happened to the animals. But the journey is dangerous and the old woman does not know if she will be able to please the Mother of the Sea and convince her to free the animals the people of her community so desperately need. The Mother of the Sea is an important character in Inuit traditional stories shared across the circumpolar region. Known by many names across various regions of the Arctic, the Mother of the Sea is a powerful woman who can withhold the animals humans need to survive if she is displeased by human behaviour.

Only a shaman is able to appease the Mother of the Sea and convince her to release the animals that the hunters so desperately need. This tale shares the specific traditional story of the Mother of the Sea told and retold in Greenland for generations.

Understanding the Borderline Mother - Christine Ann Lawson 2002

The first love in our lives is our mother. Recognizing her face, her voice, the meaning of her moods, and her facial expressions is crucial to survival. Dr. Christine Ann Lawson vividly describes how mothers who suffer from borderline personality disorder produce children who may flounder in life even as adults, futilely struggling to reach the safety of a parental harbor, unable to recognize that their borderline parent lacks a pier, or even a discernible shore. Four character profiles describe different symptom clusters that include the waif mother, the hermit mother, the queen mother, and the witch. Children of borderlines are at risk for developing this complex and devastating personality disorder themselves. Dr. Lawson's recommendations for prevention include empathic understanding of the borderline mother and early intervention with her children to ground them in reality and counteract the often dangerous effects of living with a "make-believe" mother. Some readers may recognize their mothers as well as themselves in this book. They will also find specific suggestions for creating healthier relationships. Addressing the adult children of borderlines and the therapists who work with them, Dr. Lawson shows how to care for the waif without rescuing her, to attend to the hermit without feeding her fear, to love the queen without becoming her subject, and to live with the witch without becoming her victim.
