Forbidden History J. Douglas Kenyon, 2005-03-29 Challenges the scientific theories on the establishment of civilization and technology • Contains 42 essays by 17 key thinkers in the fields of alternative science and history, including Christopher Dunn, Frank Joseph, Will Hart, Rand Flem-Ath, and Moira Timmes • Edited by Atlantis Rising publisher, J. Douglas Kenyon In Forbidden History writer and editor J. Douglas Kenyon has chosen 42 essays that have appeared in the bimonthly journal Atlantis Rising to provide readers with an overview of the core positions of key thinkers in the field of ancient mysteries and alternative history. The 17 contributors include among others, Rand Flem-Ath, Frank Joseph, Christopher Dunn, and Will Hart, all of whom challenge the scientific establishment to reexamine its underlying premises in understanding ancient civilizations and open up to the possibility of meaningful debate around alternative theories of humanity's true past. Each of the essays builds upon the work of the other contributors. Kenyon has carefully crafted his vision and selected writings in six areas: Darwinism Under Fire, Earth Changes--Sudden or Gradual, Civilization's Greater Antiquity, Ancestors from Space, Ancient High Tech, and The Search for Lost Origins. He explores the most current ideas in the Atlantis debate, the origins of the Pyramids, and many other controversial themes. The book serves as an excellent introduction to hitherto suppressed and alternative accounts of history as contributors raise questions about the origins of civilization and humanity, catastrophism, and ancient technology. The collection also includes several articles that introduce, compare, contrast, and complement the theories of other notable authors in these fields, such as Zecharia Sitchin, Paul LaViolette, John Michell, and John Anthony West.

From Adam to Omega A.R. Roberts, 2020-09-24 Due to government secrecy, the public never learned of the numerous UFO incursions at strategic nuclear weapons installations where they disabled ICBM missiles and even activated their launch codes. They never heard about UFO encounters reported by police officers, civilian and military pilots and astronauts, and they were never told the real facts of the Roswell event. The volume of evidence suggesting we are not alone, and probably never have been, is overwhelming. It suggests an alien agenda to accelerate the evolution of the human race. To understand what is happening requires knowledge of what is going on today as well as the past, particularly during the biblical era. Much has been learned through the Freedom of Information Act, from whistleblowers, and government and military officials. This book connects the dots suggesting what aliens have been doing for the past several thousand years.

Secret Chamber Revisited Robert Bauval,2014-10-09 A firsthand, behind-the-scene account of the controversies surrounding modern explorations at Giza • Investigates the recent scandals at Giza and claims of secret excavations and tunneling inside the Great Pyramid • Reveals the historical evidence in support of secret chambers in the Great Pyramid and beneath the Great Sphinx • Exposes the secret agendas behind the latest explorations on the Giza plateau Since 1993 Robert Bauval has been embroiled in the many controversies involving the search for the lost treasures of the pyramid builders and the quest for the legendary Hall of Records of Atlantis. The strange but true story that he unfolds implicates American business moguls, the prestigious National Geographic Society, several Ivy League universities, the Edgar Cayce Foundation, the Freemasons, Christian fundamentalists, Zionists, and the Egyptian government. In this fully updated edition of *Secret Chamber*, including new color photographs, Robert Bauval pursues his in-depth investigation of clandestine events at Giza and the role played by the controversial ex-Minister of Antiquities Dr. Zahi Hawass. What lies behind the mysterious doors at the end of the star shafts in the Great Pyramid? What do the mysterious inscriptions found behind the Gantenbrink door mean? What is the real purpose of the Relief Chambers and the red ochre “graffiti” in them? Who is behind the secretly tunneling and excavating in these chambers, and why? Is there really a hidden Hall of Records from Atlantis beneath the Great Sphinx? Is the Great Pyramid just a tomb or does it serve a higher purpose involving a lost science of immortality? Why do the ancient texts ascribe the Pyramid’s design to the supreme god of wisdom Thoth, the writer of the fabled Books of Hermes? Will the Great Pyramid prove to be the “missing link” to our true origins or a “metaphysical machine” to access the world beyond? Providing a firsthand account of the strange events that have taken place at the Giza plateau in the last three decades, Bauval reveals the hidden agendas behind these events and raises important questions about the meaning of Egypt’s ancient structures and the very origins of civilization.

The Secrets of Ancient Egypt Federico Puigdevall,Albert Cañagueral,2017-12-15 Howard Carter's discovery of King Tutankhamen's tomb in 1923 sparked worldwide fascination about ancient Egypt, and the mysteries of the Egyptians still loom large. The Pyramids, the Sphinx, mummies, surviving artwork, and more all hold priceless clues about what life was like in ancient Egypt. This book takes a closer look at the information that archaeology has revealed and the lasting impact of these findings.

Pyramid of Secrets Alan F. Alford,2010

Giza: The Tesla Connection Christopher Dunn,2024-01-30 Reveals how the pyramids of Egypt were sophisticated generators of clean energy • Explains how the pyramids harmonized seismic energy, which enabled the harvesting of electricity and the mitigation of earthquakes • Shares recent cutting-edge research on earthquake lights, acoustic frequency measurements and energy concentration within the Great Pyramid, the shafts of the Queen’s Chamber, the scorch marks that support the King’s Chamber explosion hypothesis, and the significance of the large void above the Grand Gallery • Includes

technical appendices written by experts and top researchers Sharing extensive new evidence and cutting-edge research that the Great Pyramid at Giza was built as an energy-harvesting machine, Christopher Dunn details how the ancient Egyptians were generating clean power for their civilization and reveals how the pyramid builders and the great inventor Nikola Tesla were drawing from the same universal knowledge. Looking at each part of the Great Pyramid, from the internal chambers to its massive stone blocks to the pyramidion on top, Dunn reveals how the pyramids in Egypt served to stimulate the release and collection of electrons in the Earth's crust by harmonizing seismic energy while also attenuating the accumulating stresses. Drawing on exhaustive ongoing research by NASA scientists into the phenomenon known as "earthquake lights," the author shows how the pyramid builders were inspired by this phenomenon and learned to stress igneous rocks similar to tectonic plate movement in order to harvest the resulting electron flow, which also enabled the pyramids to mitigate any impending earthquakes. He looks in depth at recent research that supports the pyramid energy theory, including new explorations of the shafts of the Queen's Chamber, Russian research on how the Great Pyramid can concentrate electromagnetic energy, and analysis of the scorch marks on the ceiling of the Grand Gallery, which supports the King's Chamber explosion hypothesis. He also examines the stunning significance of the large void above the Grand Gallery discovered in 2017. Analyzing the results of extensive acoustic testing and measurements related to specific frequencies within the Great Pyramid, Dunn looks at the vibration and frequency rates found at ancient sacred sites and shows how the pyramids were tuned to the Earth's frequency. He also includes multiple technical appendices written by experts. While the pyramids' sophisticated energy-harvesting abilities are now in disarray and disuse, some remnants of their technologies are still there, waiting to be rediscovered and provide our civilization with an abundance of non-polluting power.

Giza Legacy Rico Paganini, 2010-01-10 This is Virgil's latest publication THE ARMSTRONG REPORT -- ET's & UFO's -- THEY NEED US, WE DON'T NEED THEM. They left us here years ago, thinking we would die on a planet that they polluted, destined for destruction. They advanced technologically to extremes that we cannot imagine at this time. Now they are back because the planet and this solar system is about to make a change in consciousness to a higher dimensional level. While they advanced technologically, we advanced spiritually. Ant spirituality is what they lack. By experimenting with us they are trying to regain that which they have lost, their humanness and spirituality therefore they need us, we don't need them.

Secret Knowledge: Exploring the Boundaries of the Possible J. Douglas Kenyon, Considered by many to be the magazine of record for ancient mysteries, unexplained anomalies, and future science, Atlantis Rising® provides some of the most astounding reading to be found anywhere. Editor J. Douglas Kenyon has culled from the pages of Atlantis Rising® magazine this collection of 36 concise and well-illustrated articles by world-class researchers and authors such as Andrew Collins, Philip Coppens, William Henry, Frank Joseph, Robert M. Schoch, and many others, who offer thought-provoking insights on a variety of topics that challenge conventional wisdom. In these pages the latest discoveries and theories on the

controversial subjects are explored and even more provocative questions are raised. What emerges is a fascinating case in support of a much greater antiquity for civilization, a well-reasoned argument for the existence of advanced technologies in prehistory, and the revelation of secret forces that have been at work throughout time and are still present today.

Disinformation Guide to Ancient Aliens, Lost Civilizations, Astonishing Archaeology & Hidden History Preston Peet, 2013-01-01 If you think the history you were taught in school was accurate, you're in for a big surprise. This group of researchers blows the lid off everything you thought you knew about the origins of the human race and the culture we live in -Cover p. [4].

The Giza Power Plant Christopher Dunn, 1998-08-01 Did a highly advanced civilization exist in prehistory? Is the Giza Pyramid a remnant of their technology? Then, what was the power source that fueled such a civilization? The technology of harmonic resonance, claims renowned master craftsman and engineer Christopher Dunn. In a brilliant piece of reverse engineering based on twenty years of research, Dunn reveals that the Great Pyramid of Giza was actually a large acoustical device! By its size and dimensions, this crystal edifice created a harmonic resonance with the Earth and converted Earth's vibrational energies to microwave radiation. The author shows how the pyramid's numerous chambers and passageways were positioned with the deliberate precision to maximize its acoustical qualities. This may be the same technology discovered by Nikola Tesla and the solution to our own clean energy needs.

Before the Pharaohs Edward F. Malkowski, 2010-04-12 Presents conclusive evidence that ancient Egypt was originally the remnant of an earlier, highly sophisticated civilization • Supports earlier speculations based on myth and esoteric sources with scientific proof from the fields of genetics, engineering, and geology • Provides further proof of the connection between the Mayans and ancient Egyptians • Links the mystery of Cro-Magnon man to the rise and fall of this ancient civilization In the late nineteenth century, French explorer Augustus Le Plongeon, after years of research in Mexico's Yucatán Peninsula, concluded that the Mayan and Egyptian civilizations were related--as remnants of a once greater and highly sophisticated culture. The discoveries of modern researchers over the last two decades now support this once derided speculation with evidence revealing that the Sphinx is thousands of years older than Egyptologists have claimed, that the pyramids were not tombs but geomechanical power plants, and that the megaliths of the Nabta Playa reveal complex astronomical star maps that existed 4,000 years before conventional historians deemed such knowledge possible. Much of the past support for prehistoric civilization has relied on esoteric traditions and mythic narrative. Using hard scientific evidence from the fields of archaeology, genetics, engineering, and geology, as well as sacred and religious texts, Malkowski shows that these mythic narratives are based on actual events and that a highly sophisticated civilization did once exist prior to those of Egypt and Sumer. Tying its cataclysmic fall to the mysterious disappearance of Cro-Magnon culture, *Before the Pharaohs* offers a compelling new view of humanity's past.

Technology of the Gods David Hatcher Childress,2000 Technology of the Gods lays out the mind-bending evidence that long-lost civilizations had attained and even exceeded our modern level of advancement. Westerners have been taught that humankind has progressed along a straight-line path from the primitive past to the proficient present, but the hard, fast evidence (literally written in stone!) proves that the ancients had technologies we cannot even replicate today.

Civilizations development and species origin technologies Vadym Valeriyovych Korpachev,2020-07-07 The origin of life on Earth is the basic view of the world's concept. At present, its origin and development are treated either from the scientific evolutionary theory points of view or religious mythological ones. At the same time, the evolutionary theory fails to provide grounded explanations to a lot of events which have happened and are observed in nature. The data related to the complexity of life processes genetic programming and many biology and palaeontological facts cast doubt on the possibility of spontaneous occurrence of protein organisms during evolutionary transformations. They indicate that the protein life development occurred in the direction of the planned improvement through the complex technology's implementation which requires specific scientific knowledge. Therefore, the necessity to formulate the new technological concept of the life appearance on Earth which is provided by the given book has occurred. It summarizes numerous well-known facts which are being interpreted as the result of the highly developed civilization technological developments. The stated views have more grounds for existence than the evolutionary theory and biblical ideas about the divine creation of the world. The fact that society treats all the ideas of the life creation as religious ones and that they are used by the theologians turns out to be the ideological problem. The book is aimed at overcoming the barrier of such non-perception. The analysis performed allows the reader to understand in which cases random events occur, and in which ones there is a logical purposeful intelligent activity, the result of which is the development of self-replicating protein organisms programmed to perform the work necessary to meet the needs of their creators on Earth. Reflections on the possible material nature of the highly developed mind carriers are given. According to the author, a human being is not a passive observer of random evolutionary changes in nature, but has his mission in the artificially developed system of energy supply of Earth along with other protein organisms. If the protein world, including humans, has been created for a specific purpose, then mankind must not violate its implementation and should follow its mission. A new worldview should introduce changes in the main mankind's activity spheres: science, politics, religion and the human being's personal life. The book is designed for a wide range of readers of various specialties. Conceptually, it is important for people who do not share the evolutionary theory provisions and existing religious beliefs.

Media,2022-04-09T22:59:00Z Please note: This is a companion version & not the original book. Sample Book Insights: #1 The Great Sphinx is a monolith, carved out of the limestone bedrock of the Giza plateau, two hundred and forty feet long, thirty-eight feet wide across the shoulders, and sixty-six feet high. It is worn down and eroded, but nothing else that has reached us from antiquity even remotely matches its power and grandeur

Consuming Ancient Egypt Sally MacDonald,Michael Rice,2016-06-16 Consuming Ancient Egypt examines the influence of Ancient Egypt on the everyday lives of contemporary people, of all ages, throughout the world. It looks at the Egypt tourist sees, Egypt in film and Egypt as the inspiration for opera. It asks why so many books are published each year on Egyptological subjects at all levels, from the austere academic to the riotous celebrations of Egypt as a land of mystery, enchantment and fantasy. It then considers the ways in which Ancient Egypt interacts with the living world, in architecture, museum going, the acquisition of souvenirs and reproductions, design, and the perpetual appeal of the mummy. The significance of Egypt as an adjunct to (and frequently the subject of) marketing in the consumer society is examined. It reveals much about Egypt's immemorial appeal and the psychology of those who succumb to its magic.

The Return of the Gods Erich von Däniken,2002 With more than 140 photographs, maps, models, and drawings, Von Dniken applies the same fact-filled analysis to Nazca—an ancient, isolated settlement deep in the Peruvian desert—that launched his 1968 bestseller Chariots of the Gods. He analyzes aerial views and closeups of extraordinary markings that stretch for miles, forming complex designs noticeable only from the air.

Giza Ian Lawton,Chris Ogilvie-Herald,2000 Giza: The Truth is the definitive work on the real story behind the Giza Plateau: its history, the politics and motives that drive the key players - both alternative and orthodox - in their quest to unlock the secrets of the world's most enigmatic monuments. Ian Lawton and Chris Ogilvie-Herald's wealth of research has lead them behind the scenes to a world of politics, jealousy and ambition.

Giza, the Truth Ian Lawton,Chris Ogilvie-Herald,1999 In this book, authors Ian Lawton and Chris Ogilvie-Herald take a fresh approach to traditional investigations as they follow a path that leads behind the scenes to a world of politics, jealousy and ambition. What is really happening at the Giza Plateau? What is the identity of the group who call themselves 'The Magic Twelve', and what are their motives? What plans are afoot as the Millennium approaches? The answers to these questions

and many more will be explained as this astounding story unfolds. In support of these revelations, *Giza: The Truth* is the only work to feature a fully balanced treatment of the theories surrounding the questions of who built the pyramids, why, how and when. It also uncovers the real motives and findings of the multitude of explorations conducted at the Plateau over the last 35 years to the present day, including those whose aim has been to locate the infamous Hall of Records.

Cosmic Womb Chandra Wickramasinghe, Ph.D., Robert Bauval, 2017-12-19 Compelling evidence that life, intelligence, and evolution on Earth were seeded by comets and cosmic intelligence • Explains how life first came from interstellar dust and comets and how later arrivals of cosmic dust and comets spurred evolution • Explores the possibility that universal knowledge may be stored in human DNA and how ancient cultures may have known a way to retrieve this knowledge • Reveals new discoveries about the dimensions of the Great Pyramid of Giza All ancient cultures link humanity's origins to the heavens. The Egyptians, for example, were adamant that their ancestors came from the stars of Orion and Sirius. Today, however, religion and science assert that life arose spontaneously here on Earth. Did the ancients know our true cosmic origins? Have they left us clues? Expanding on the panspermia theory developed with the celebrated astronomer Sir Fred Hoyle--namely that the building blocks of life were imported to Earth by comets in the distant past--Chandra Wickramasinghe and Robert Bauval explore the latest findings in support of a cosmic origin for humanity. They detail the astrobiological discoveries of organic molecules deep in space, how microbes are incredibly resistant to the harshest conditions of space--enabling the transfer of genes from one star system to another, and the recent recovery of microorganisms from comets still in space. They argue that the universe was "born" and preset with the blueprint of life and that the cosmos must be teeming with lifeforms far older and perhaps far more developed than us. They show how life arrived on our planet in the form of interstellar dust containing alien bacteria approximately 3.8 billion years ago and how later comets, meteoroids, and asteroids brought new bacterial and viral genetic material, which was vital for evolution. Using the latest advances in physics, cosmology, and neuroscience, the authors explore how universal knowledge may be stored in human DNA and cells, and they postulate that ancient cultures, such as the pyramid builders of Egypt and the temple builders of India, may have known a way to retrieve this knowledge. Sharing new discoveries from experienced architects, engineers, and mathematicians, they show how the Great Pyramid is a three-dimensional mathematical equation in stone, bearing a potent message for humanity across time and space about who we are and where we come from.
