Atlas Obscura Joshua Foer, Dylan Thuras, Ella Morton, 2016-09-20 It's time to get off the beaten path. Inspiring equal parts wonder and wanderlust, Atlas Obscura celebrates over 700 of the strangest and most curious places in the world. Talk about a bucket list: here are natural wonders—the dazzling glowworm caves in New Zealand, or a baobab tree in South Africa that's so large it has a pub inside where 15 people can drink comfortably. Architectural marvels, including the M.C. Escher-like stepwells in India. Mind-boggling events, like the Baby Jumping Festival in Spain, where men dressed as devils literally vault over rows of squirming infants. Not to mention the Great Stalacpipe Organ in Virginia, Turkmenistan's 40-year hole of fire called the Gates of Hell, a graveyard for decommissioned ships on the coast of Bangladesh, eccentric bone museums in Italy, or a weather-forecasting invention that was powered by leeches, still on display in Devon, England. Created by Joshua Foer, Dylan Thuras and Ella Morton, ATLAS OBSCURA revels in the weird, the unexpected, the overlooked, the hidden and the mysterious. Every page expands our sense of how strange and marvelous the world really is. And with its compelling descriptions, hundreds of photographs, surprising charts, maps for every region of the world, it is a book to enter anywhere,

and will be as appealing to the armchair traveler as the die-hard adventurer. Anyone can be a tourist. ATLAS OBSCURA is for the explorer.

Hidden Geographies Marko Krevs, 2021-10-21 This book defines and discusses the term “hidden geographies” in two ways: systematically and by presenting a variety of examples of the research fields and topics concerning hidden geographies, with the aim of stimulating further basic and applied research in this area. While the term is quite rarely used in the scientific literature (more often as a figure of speech than to illustrate or problematize its deeper meaning), we argue that hidden geographies are everywhere and many of them have significant impacts on (other) natural and social phenomena and processes, subsequently triggering changes, for example in landscape, economy, culture, health or quality of life. The introductory section of the book conceptualises hidden geographies and discusses cognitive geography, symbolization of space, and the hidden geographies in mystical literature. Case studies of hidden environmental geographies address soils, air pollution, coastal pollution and the allocation of an astronomical tourism site. Revealing hidden historical and sacred places is illustrated through examples of the visualisation of the subterranean mining landscape, the analysis of the historical road network and trade, border stones and historical spatial boundaries, and the monastic Carthusian space. Hidden urban geographies are discussed in terms of the urban development of an entire city, presenting the role of geography in rescuing architecture, revealing illegal urbanisation, and the quality of habitation in Roma neighbourhoods. Case studies of hidden population geographies shed light on the ageing of rural populations and the impact of spatial-demographic disparities on fertility variations. Discussions of hidden social and economic geographies problematize recent social changes and conflicts in a country, present the implementation of the fourth industrial revolution and borders as hidden obstacles in the organisation of public transport. Hidden geographies are explicitly linked to perceptions and explanations in case studies that address local responses to perceived marginalisation in a city, the solo women travellers’ perceived risk and safety, and hidden geographical contexts of visible post-war landscapes. The book brings such a diversity of views, ideas and examples related to hidden geographies that can serve both to deepen their understanding and their various impacts on our lives and environment, and to attract further cross-disciplinary interest in considering hidden geographies - in research and in our every-day lives.

**The Map Thief** Michael Blanding, 2014-05-29 The story of an infamous crime, a revered map dealer with an unsavory secret, and the ruthless subculture that consumed him Maps have long exerted a special fascination on viewers—both as beautiful works of art and as practical tools to navigate the world. But to those who collect them, the map trade can be a cutthroat business, inhabited by quirky and sometimes disreputable characters in search of a finite number of extremely rare objects. Once considered a respectable antiquarian map dealer, E. Forbes Smiley spent years doubling as a map thief —until he was finally arrested slipping maps out of books in the Yale University library. The Map Thief delves into the untold history of this fascinating high-stakes criminal and the inside story of the industry that consumed him. Acclaimed reporter Michael Blanding has interviewed all the key players in this stranger-than-fiction story, and shares the fascinating histories of maps that charted the New World, and how they went from being practical instruments to quirky heirlooms to highly coveted objects. Though pieces of the map theft story have been written before, Blanding is the first reporter to explore the story in full—and had the rare privilege of having access to Smiley himself after he'd gone silent in the wake of his crimes. Moreover, although Smiley swears he has admitted to all of the maps he stole, libraries claim he stole hundreds more—and offer intriguing clues to prove it. Now, through a series of exclusive interviews with Smiley and other key individuals, Blanding teases out an astonishing tale of destruction and redemption. The Map Thief interweaves Smiley's escapades with the stories

of the explorers and mapmakers he knew better than anyone. Tracking a series of thefts as brazen as the art heists in Provenance and a subculture as obsessive as the oenophiles in *The Billionaire's Vinegar*, Blanding has pieced together an unforgettable story of high-stakes crime.

**Picturing America** Stephen J. Hornsby, 2017-03-23 Shows maps of the United States of America and other geographical areas of the world.

**Rejected Princesses** Jason Porath, 2016-10-25 Blending the iconoclastic feminism of *The Notorious RBG* and the confident irreverence of *Go the F\*\*ck to Sleep*, a brazen and empowering illustrated collection that celebrates inspirational badass women throughout history, based on the popular Tumblr blog. Well-behaved women seldom make history. Good thing these women are far from well behaved . . . Illustrated in a contemporary animation style, *Rejected Princesses* turns the ubiquitous pretty pink princess stereotype portrayed in movies, and on endless toys, books, and tutus on its head, paying homage instead to an awesome collection of strong, fierce, and yes, sometimes weird, women: warrior queens, soldiers, villains, spies, revolutionaries, and more who refused to behave and meekly accept their place. An entertaining mix of biography, imagery, and humor written in a fresh, young, and riotous voice, this thoroughly researched exploration salutes these awesome women drawn from both historical and fantastical realms, including real life, literature, mythology, and folklore. Each profile features an eye-catching image of both heroic and villainous women in command from across history and around the world, from a princess-cum-pirate in fifth century Denmark, to a rebel preacher in 1630s Boston, to a bloodthirsty Hungarian countess, and a former prostitute who commanded a fleet of more than 70,000 men on China's seas.

**Taste Makers: Seven Immigrant Women Who Revolutionized Food in America** Mayukh Sen, 2021-11-16 A New York Times Editors' Choice pick Named a Best Book of the Year by NPR, Los Angeles Times, Vogue, Wall Street Journal, Food Network, KCRW, WBUR Here & Now, Emma Straub, and Globe and Mail One of the Millions's Most Anticipated Books of 2021 America's modern culinary history told through the lives of seven pathbreaking chefs and food writers. Who's really behind America's appetite for foods from around the globe? This group biography from an electric new voice in food writing honors seven extraordinary women, all immigrants, who left an indelible mark on the way Americans eat today. *Taste Makers* stretches from World War II to the present, with absorbing and deeply researched portraits of figures including Mexican-born Elena Zelayeta, a blind chef; Marcella Hazan, the deity of Italian cuisine; and Norma Shirley, a champion of Jamaican dishes. In imaginative, lively prose, Mayukh Sen—a queer, brown child of immigrants—reconstructs the lives of these women in vivid and empathetic detail, daring to ask why some were famous in their own time, but not in ours, and why others shine brightly even today. Weaving together histories of food, immigration, and gender, *Taste Makers* will challenge the way readers look at what's on their plate—and the women whose labor, overlooked for so long, makes those meals possible.

*Balloon View of London, 1851* Banks & Co.,2013-11-26 This beautiful color view of London looks from the perspective of an aerial balloon, looking southwards from Hampstead. Printed in 1851, it shows the brand new Crystal Palace - erected to house the Great Exhibition - as well as the early London railways, Victorian Oxford Street, the Tower and eight of the city's bridges, many of which were recent constructions. The map is folded within a sleeve in a keepsake portfolio package which features an authentic period cover and an explanation of the map's historical significance.

**Blue Highways** William Least Heat-Moon,2012-04-03 Hailed as a masterpiece of American travel writing, *Blue Highways* is an unforgettable journey along our nation's backroads. William Least Heat-Moon set out with little more than the need to put home behind him and a sense of curiosity about those little towns that get on the map -- if they get on at all -- only because some cartographer has a blank space to fill: Remote, Oregon; Simplicity, Virginia; New Freedom, Pennsylvania; New Hope, Tennessee; Why, Arizona; Whynot, Mississippi. His adventures, his discoveries, and his recollections of the extraordinary people he encountered along the way amount to a revelation of the true American experience.

*Mapping the Nation* Susan Schulten,2012-06-29 “A compelling read” that reveals how maps became informational tools charting everything from epidemics to slavery (*Journal of American History*). In the nineteenth century, Americans began to use maps in radically new ways. For the first time, medical men mapped diseases to understand and prevent epidemics, natural scientists mapped climate and rainfall to uncover weather patterns, educators mapped the past to foster national loyalty among students, and Northerners mapped slavery to assess the power of the South. After the Civil War, federal agencies embraced statistical and thematic mapping in order to profile the ethnic, racial, economic, moral, and physical attributes of a reunified nation. By the end of the century, Congress had authorized a national archive of maps, an explicit recognition that old maps were not relics to be discarded but unique records of the nation’s past. All of these experiments involved the realization that maps were not just illustrations of data, but visual tools that were uniquely equipped to convey complex ideas and information. In *Mapping the Nation*, Susan Schulten charts how maps of epidemic disease, slavery, census statistics, the environment, and the past demonstrated the analytical potential of cartography, and in the process

transformed the very meaning of a map. Today, statistical and thematic maps are so ubiquitous that we take for granted that data will be arranged cartographically. Whether for urban planning, public health, marketing, or political strategy, maps have become everyday tools of social organization, governance, and economics. The world we inhabit—saturated with maps and graphic information—grew out of this sea change in spatial thought and representation in the nineteenth century, when Americans learned to see themselves and their nation in new dimensions.

**Ending the War on Artisan Cheese** Catherine Donnelly, 2019-11-14 A prominent food scientist defends the use of raw milk in traditional artisan cheesemaking. Raw milk cheese—cheese made from unpasteurized milk—is an expansive category that includes some of Europe's most beloved traditional styles: Parmigiano Reggiano, Gruyère, and Comté, to name a few. In the United States, raw milk cheese forms the backbone of the resurgent artisan cheese industry, as consumers demand local, traditionally produced, and high-quality foods. Internationally award-winning artisan cheeses like Bayley Hazen Blue (Jasper Hill, VT) would have been unimaginable just forty years ago when American cheese meant Kraft Singles. Unfortunately the artisan cheese industry faces an existential regulatory threat. Over the past thirty years the US Food and Drug Administration (FDA) has edged toward an outright ban on raw milk cheeses. Their assault on traditional cheesemaking goes beyond a debate about raw milk safety; the FDA has also attempted to ban the use of wooden boards, the use of ash in cheese ripening, and has set stringent microbiological criteria that many artisan cheeses cannot meet. The David versus Goliath existence of small producers fighting crushing regulations is true in parts of Europe as well, where beloved creameries are going belly-up or being bought out because they can't comply with EU health ordinances. Centuries-old cheese styles like Fourme d'Ambert and Cantal are nearing extinction, leading Prince Charles to decry the bacteriological correctness of European regulators. The dirty secret is that Listeria and other bacterial outbreaks occur in pasteurized cheeses more often than in raw milk cheeses, and traditional processes like ash-ripening have been proven safe. In *Ending the War on Artisan Cheese*, Dr. Catherine Donnelly forcefully defends traditional cheesemaking, while exposing government actions in the United States and abroad designed to take away food choice under the false guise of food safety. This book is fundamentally about where and how our food is produced, the values we place on methods of food production, and how the roles of tradition, heritage, and quality often conflict with advertising, politics, and profits in influencing our food choices.

*Yayoi Kusama Covered Everything in Dots and Wasn't Sorry.* Fausto Gilberti, 2020-03-18 Yayoi Kusama dreamed of becoming a famous artist. Day and night she painted hundreds and hundreds of dots onto large canvases. The dots soon came off her pictures and ended up on her dresses, tables, and walls. But she wasn't sorry! An inspiring story about one of the most popular contemporary artists in the world.

Treasures from the Map Room Debbie Hall, 2016 This book explores the stories behind seventy-five extraordinary maps. It includes unique treasures such as the fourteenth-century Gough Map of Great Britain, exquisite portolan charts made in the fifteenth century, the Selden Map of China - the earliest example of Chinese merchant cartography - and an early world map from the medieval Islamic Book of Curiosities, together with more recent examples of fictional places drawn in the twentieth century, such as C.S. Lewis's own map of Narnia and J.R.R. Tolkien's map of Middle Earth. As well as the works of famous mapmakers Mercator, Ortelius, Blaeu, Saxton and Speed, the book also includes lesser known but historically significant works: early maps of the Moon, of the transit of Venus, hand-drawn estate plans and early European maps of the New World. There are also some surprising examples: escape maps printed on silk and carried by pilots in the Second World War in case of capture on enemy territory; the first geological survey of the British Isles showing what lies beneath our feet; a sixteenth-century woven tapestry map of Worcestershire; a map plotting outbreaks of cholera and a jigsaw map of India from the 1850s. Behind each of these lies a story, of intrepid surveyors, ambitious navigators, chance finds or military victories. Drawing on the unique collection in the Bodleian Library, these stunning maps range from single cities to the solar system, span the thirteenth to the twenty-first century and cover most of the world.

Whisky Galore Sir Compton Mackenzie, 1967 In this uproariously funny story, the setting is the enchanting Hebridean islands of Great Todday and Little Todday, in which the inhabitants are more concerned with the replenishment of their supplies of whisky than with the defence of the Islands against the enemy. All our old friends - Sergeant-Major Odd and his charming Peggy (whom he successfully carries off), Captain Waggett, Father Macalister, the Macroons and the MacRuries - are here again, and their activities in connection with the wreck of the S.S. Cabinet Minister, loaded to the gunwales with whisky for America, give full scope to Compton Mackenzie's hilarious wit.
