**Margaret A. Weitekamp**

**Failure Is Not an Option** Gene Kranz, 2009-06-23 The author, flight director in NASA's Mission Control, tells of the challenges in space flight from the very early years to the current time and of his own bold suggestions about what we ought to be doing in space now.--Jacket.

**Animals in Space** Colin Burgess, Chris Dubbs, 2007-07-05 This book is as a detailed, but highly readable and balanced account of the history of animal space flights carried out by all nations, but principally the United States and the Soviet Union. It explores the ways in which animal high-altitude and space flight research impacted on space flight biomedicine and technology, and how the results - both successful and disappointing - allowed human beings to then undertake that same hazardous journey with far greater understanding and confidence. This complete and authoritative book will undoubtedly become the ultimate authority on animal space flights.

Houston, We've Had a Problem Rebecca Rissman, 2018-02-01 In an immersive, exciting narrative nonfiction format, this powerful book follows a selection of people who experienced the events surrounding the Apollo 13 disaster.

**Overachievement** John Eliot, PhD, 2015-12-01 Were you ever advised to just relax before making a big speech? Don't. From Texas A&M professor and celebrity advisor, Dr. John Eliot, this insightful guide takes a sledgehammer to what most of us think we know about doing our best. Eliot explains how mainstream psychology moves us in the wrong direction when it comes to stress management and performance enhancement; techniques like visualization and goal setting, based on pseudoscience rather than empirical evidence, often get in our way rather than propel us forward. Drawing on field-tested experiments and extensive research in neuropsychology, Eliot shares why these "common sense" strategies tend to come up short for the majority of people—and how, instead, great accomplishments are more likely to result from Putting All Your Eggs in One Basket, Thinking Like a Squirrel, and Embracing Butterflies As a Good Thing. These counterintuitive practices not only trigger your full natural talent, but also teach you how to thrive under pressure, not dread it. OVERACHIEVEMENT incorporates Eliot's work with Fortune 500 companies, Olympic athletes, renowned surgeons, military pilots, and Grammy-winning musicians, providing you with a powerful combination of inspiring stories and life-changing tools, offering the skills needed to overcome stress and rise above your peers in the boardroom, on the playing field, or in the normal day-to-day of life.

**Space Craze** Margaret A. Weitekamp,2022-10-18 A space historian's tour through astounding spaceflight history and the Smithsonian's collection of space and science fiction memorabilia Spanning from the 1929 debut of the futuristic Buck Rogers to present-day privatization of spaceflight, Space Craze celebrates America's endless enthusiasm for space exploration. Author Margaret Weitekamp, curator at the Smithsonian's National Air and Space Museum, writes with warmth and personal experience to guide readers through extraordinary spaceflight history while highlighting objects from the Smithsonian's spaceflight collection. Featuring historical milestones in space exploration, films and TV shows, literature and comic strips, toys and games, and internet communities, Space Craze is a sci-fi lover's dream. The book investigates how spaceflight, both real and imagined, has served as the nexus where contemporary American concerns, such as race, gender, sexuality, freedom, and national identity, have been explored and redefined. Chronological chapters include: Chapter 1: Buck Rogers, Ray Guns, and the Space Frontier Chapter 2: Space Forts, Television, and the Cold War Mindset Chapter 3: John Glenn, the Apollo Program, and Fluctuating Spaceflight Enthusiasm Chapter 4: Star Trek, Star Wars, and Burgeoning Fandoms Chapter 5: Generation X, the Space Shuttle, and Promoting Education Chapter 6: Space Stations, Spaceflight Enthusiasm, and Online Fandom Chapter 7: Streaming Services, Battling Billionaires, and Accelerated Change From the almost 650 million viewers who tuned in to watch the first steps on the Moon, to the ardent Star Trek fandom that burgeoned into a cultural force, Space Craze taps into the country's enduring love affair with space.

*Worn on This Day* Kimberly Chrisman-Campbell,2019-11-05 This stunning visual guide is a journey of discovery through fashion's fascinating history, one day at a time. Beginning on January 1st and ending on December 31st, Worn On This Day looks at garments worn on monumental occasions across centuries, offering capsule fashion histories of everything from space suits to wedding gowns, Olympics uniforms, and armor. It creates thought-provoking juxtapositions, like Wallis Simpson's June wedding and Queen Elizabeth's June coronation, or the battered shoes Marie-Antoinette and a World Trade Center survivor wore to escape certain death, just a few calendar days apart. In every case there is a newsworthy narrative behind the garment, whether famous and glamorous or anonymous and humble. Prominent figures like Abraham Lincoln, Marilyn Monroe, and the Duchess of Cambridge are represented alongside ordinary people caught up in extraordinary events. Beautifully illustrated throughout, Worn On This Day presents a revelatory mash-up of styles, stories, and personalities.

Shuttle, Houston Paul Dye,2020-07-14 From the longest-serving Flight Director in NASA's history comes a revealing account of high-stakes Mission Control work and the Space Shuttle program that has redefined our relationship with the universe. A compelling look inside the Space Shuttle missions that helped lay the groundwork for the Space Age, Shuttle, Houston explores the determined personalities, technological miracles, and eleventh-hour saves that have given us human spaceflight. Relaying stories of missions (and their grueling training) in vivid detail, Paul Dye, NASA's longest-serving Flight

Director, examines the split-second decisions that the directors and astronauts were forced to make in a field where mistakes are unthinkable, and where errors led to the loss of national resources -- and more importantly one's crew. Dye's stories from the heart of Mission Control explain the mysteries of flying the Shuttle -- from the powerful fiery ascent to the majesty of on-orbit operations to the high-speed and critical re-entry and landing of a hundred-ton glider. The Space Shuttles flew 135 missions. Astronauts conducted space walks, captured satellites, and docked with the Mir Space Station, bringing space into our everyday life, from GPS to satellite TV. Shuttle, Houston puts readers in his own seat at Mission Control, the hub that made humanity's leap into a new frontier possible.

*Thirteen* Henry S. F. Cooper, 2013-12-31 An "exciting" minute-by-minute account of the Apollo 13 flight based on mission control transcripts from Houston (The New York Times). On the evening of April 13, 1970, the three astronauts aboard Apollo 13 were just hours from the third lunar landing in history. But as they soared through space, two hundred thousand miles from Earth, an explosion badly damaged their spacecraft. With compromised engines and failing life-support systems, the crew was in incomparably grave danger. Faced with below-freezing temperatures, a seriously ill crewmember, and a dwindling water supply, a safe return seemed unlikely. *Thirteen* is the shocking and miraculous true story of how the astronauts and ground crew guided Apollo 13 back to Earth. Expanding on dispatches written for the New Yorker, Henry S. F. Cooper Jr. brings readers unparalleled detail on the moment-by-moment developments of one of NASA's most dramatic missions.

*Pantone: The Twentieth Century in Color* Leatrice Eiseman, Keith Recker, 2011-10-19 Pantone, the worldwide color authority, invites you on a rich visual tour of 100 transformative years. From the Pale Gold (15-0927 TPX) and Almost Mauve (12-2103 TPX) of the 1900 Universal Exposition in Paris to the Rust (18-1248 TPX) and Midnight Navy (19-4110 TPX) of the countdown to the Millennium, the 20th century brimmed with color. Longtime Pantone collaborators and color gurus Leatrice Eiseman and Keith Recker identify more than 200 touchstone works of art, products, decor, and fashion, and carefully match them with 80 different official PANTONE color palettes to reveal the trends, radical shifts, and resurgences of various hues. This vibrant volume takes the social temperature of our recent history with the panache that is uniquely Pantone.

**How Apollo Flew to the Moon** W. David Woods, 2011-08-08 Stung by the pioneering space successes of the Soviet Union - in particular, Gagarin being the first man in space, the United States gathered the best of its engineers and set itself the goal of reaching the Moon within a decade. In an expanding 2nd edition of *How Apollo Flew to the Moon*, David Woods tells the exciting story of how the resulting Apollo flights were conducted by following a virtual flight to the Moon and its exploration of the surface. From launch to splashdown, he hitches a ride in the incredible spaceships that took men to another world, exploring each step of the journey and detailing the enormous range of disciplines, techniques, and

procedures the Apollo crews had to master. While describing the tremendous technological accomplishment involved, he adds the human dimension by calling on the testimony of the people who were there at the time. He provides a wealth of fascinating and accessible material: the role of the powerful Saturn V, the reasoning behind trajectories, the day-to-day concerns of human and spacecraft health between two worlds, the exploration of the lunar surface and the sheer daring involved in traveling to the Moon and the mid-twentieth century. Given the tremendous success of the original edition of *How Apollo Flew to the Moon*, the second edition will have a new chapter on surface activities, inspired by reader's comment on Amazon.com. There will also be additional detail in the existing chapters to incorporate all the feedback from the original edition, and will include larger illustrations.

**Apollo, the Race to the Moon** Charles A. Murray, Catherine Bly Cox, 1989 Describes how a group of men and women accomplished the feat of landing men on the moon and returning them to earth.

*The Last Man on the Moon* Eugene Cernan, Don Davis, 2007-04-01 The basis of the 2014 award-winning feature-length documentary! A revealing and dramatic look at the inside of the American Space Program from one of its pioneers. Eugene Cernan was a unique American who came of age as an astronaut during the most exciting and dangerous decade of spaceflight. His career spanned the entire Gemini and Apollo programs, from being the first person to spacewalk all the way around our world to the moment when he left man's last footprint on the Moon as commander of Apollo 17. Between those two historic events lay more adventures than an ordinary person could imagine as Cernan repeatedly put his life, his family and everything he held dear on the altar of an obsessive desire. Written with New York Times bestselling author Don Davis, *The Last Man on the Moon* is the astronaut story never before told - about the fear, love and sacrifice demanded of the few men who dared to reach beyond the heavens for the biggest prize of all - the Moon.

Andrew Carnegie David Nasaw, 2007-10-30 A New York Times bestseller! "Beautifully crafted and fun to read." —Louis Galambos, *The Wall Street Journal* "Nasaw's research is extraordinary." —San Francisco Chronicle "Make no mistake: David Nasaw has produced the most thorough, accurate and authoritative biography of Carnegie to date." —Salon.com The definitive account of the life of Andrew Carnegie Celebrated historian David Nasaw, whom *The New York Times Book Review* has called a meticulous researcher and a cool analyst, brings new life to the story of one of America's most famous and successful businessmen and philanthropists—in what will prove to be the biography of the season. Born of modest origins in Scotland in 1835, Andrew Carnegie is best known as the founder of Carnegie Steel. His rags to riches story has never been told as dramatically and vividly as in Nasaw's new biography. Carnegie, the son of an impoverished linen weaver, moved to Pittsburgh at the age of thirteen. The embodiment of the American dream, he pulled himself up from bobbin boy in a cotton factory to become the richest man in the world. He spent the rest of his life giving away the fortune he had accumulated and crusading for international peace. For all that he accomplished and came to represent to the American public—a wildly

successful businessman and capitalist, a self-educated writer, peace activist, philanthropist, man of letters, lover of culture, and unabashed enthusiast for American democracy and capitalism—Carnegie has remained, to this day, an enigma. Nasaw explains how Carnegie made his early fortune and what prompted him to give it all away, how he was drawn into the campaign first against American involvement in the Spanish-American War and then for international peace, and how he used his friendships with presidents and prime ministers to try to pull the world back from the brink of disaster. With a trove of new material—unpublished chapters of Carnegie's Autobiography; personal letters between Carnegie and his future wife, Louise, and other family members; his prenuptial agreement; diaries of family and close friends; his applications for citizenship; his extensive correspondence with Henry Clay Frick; and dozens of private letters to and from presidents Grant, Cleveland, McKinley, Roosevelt, and British prime ministers Gladstone and Balfour, as well as friends Herbert Spencer, Matthew Arnold, and Mark Twain—Nasaw brilliantly plumbs the core of this fascinating and complex man, deftly placing his life in cultural and political context as only a master storyteller can.

*Apollo 8* Jeffrey Kluger,2017-05-16 The untold story of the historic voyage to the moon that closed out one of our darkest years with a nearly unimaginable triumph In August 1968, NASA made a bold decision: in just sixteen weeks, the United States would launch humankind's first flight to the moon. Only the year before, three astronauts had burned to death in their spacecraft, and since then the Apollo program had suffered one setback after another. Meanwhile, the Russians were winning the space race, the Cold War was getting hotter by the month, and President Kennedy's promise to put a man on the moon by the end of the decade seemed sure to be broken. But when Frank Borman, Jim Lovell and Bill Anders were summoned to a secret meeting and told of the dangerous mission, they instantly signed on. Written with all the color and verve of the best narrative non-fiction, *Apollo 8* takes us from Mission Control to the astronaut's homes, from the test labs to the launch pad. The race to prepare an untested rocket for an unprecedented journey paves the way for the hair-raising trip to the moon. Then, on Christmas Eve, a nation that has suffered a horrendous year of assassinations and war is heartened by an inspiring message from the trio of astronauts in lunar orbit. And when the mission is over—after the first view of the far side of the moon, the first earth-rise, and the first re-entry through the earth's atmosphere following a flight to deep space—the impossible dream of walking on the moon suddenly seems within reach. The full story of *Apollo 8* has never been told, and only Jeffrey Kluger—Jim Lovell's co-author on their bestselling book about *Apollo 13*—can do it justice. Here is the tale of a mission that was both a calculated risk and a wild crapshoot, a stirring account of how three American heroes forever changed our view of the home planet.

**Racine county in the world war** Walter L Haight,1920

**Forever Young** John W Young,2012-09-16 He walked on the Moon. He flew six space missions in three different

programs--more than any other human. He served with NASA for more than four decades. His peers called him the astronaut's astronaut. Enthusiasts of space exploration have long waited for John Young to tell the story of his two Gemini flights, his two Apollo missions, the first-ever Space Shuttle flight, and the first Spacelab mission. Forever Young delivers all that and more: Young's personal journey from engineering graduate to fighter pilot, to test pilot, to astronaut, to high NASA official, to clear-headed predictor of the fate of Planet Earth. Young, with the assistance of internationally distinguished aerospace historian James Hansen, recounts the great episodes of his amazing flying career in fascinating detail and with wry humor. He portrays astronauts as ordinary human beings and NASA as an institution with the same ups and downs as other major bureaucracies. He frankly discusses the risks of space travel, including what went wrong with the Challenger and Columbia shuttles. Forever Young is one of the last memoirs produced by an early American astronaut. It is the first memoir written by a chief of the NASA astronaut corps. Young's experiences and candor make this book indispensable to everyone interested in the U.S. space program.

**Every Tool's a Hammer** Adam Savage,2020-10-27 In this New York Times bestselling “imperative how-to for creativity” (Nick Offerman), Adam Savage—star of Discovery Channel’s Mythbusters—shares his golden rules of creativity, from finding inspiration to following through and successfully making your idea a reality. Every Tool’s a Hammer is a chronicle of my life as a maker. It’s an exploration of making, but it’s also a permission slip of sorts from me to you. Permission to grab hold of the things you’re interested in, that fascinate you, and to dive deeper into them to see where they lead you. Through stories from forty-plus years of making and molding, building and breaking, along with the lessons I learned along the way, this book is meant to be a toolbox of problem solving, complete with a shop’s worth of notes on the tools, techniques, and materials that I use most often. Things like: In Every Tool There Is a Hammer—don’t wait until everything is perfect to begin a project, and if you don’t have the exact right tool for a task, just use whatever’s handy; Increase Your Loose Tolerance—making is messy and filled with screwups, but that’s okay, as creativity is a path with twists and turns and not a straight line to be found; Use More Cooling Fluid—it prolongs the life of blades and bits, and it prevents tool failure, but beyond that it’s a reminder to slow down and reduce the friction in your work and relationships; Screw Before You Glue—mechanical fasteners allow you to change and modify a project while glue is forever but sometimes you just need the right glue, so I dig into which ones will do the job with the least harm and best effects. This toolbox also includes lessons from many other incredible makers and creators, including: Jamie Hyneman, Nick Offerman, Pixar director Andrew Stanton, Oscar-winner Guillermo del Toro, artist Tom Sachs, and chef Traci Des Jardins. And if everything goes well, we will hopefully save you a few mistakes (and maybe fingers) as well as help you turn your curiosities into creations. I hope this book serves as “creative rocket fuel” (Ed Helms) to build, make, invent, explore, and—most of all—enjoy the thrills of being a creator.

*References no. 25162-28495 / ABD-ZVE* Zdenek Sesták, J. Catský, 2013-12-18 The bibliography includes papers in all fields of photosynthesis research - from studies of model biochemical and biophysical systems of the photosynthesis mechanism to primary production studied by the so-called growth analysis. In addition to papers devoted entirely to photosynthesis, papers on other topics are included if they contain data on photosynthetic activity, photorespiration, chloroplast structure, chlorophyll I and carotenoid synthesis and destruction; etc., or if they contain valuable methodological information (measurement of selected environmental factors, leaf area, etc.). In many branches it has been very difficult to define the limits of interest for photosynthesis researchers. This problem has arisen e. g. in topics dealing with the transport of gases, where- in addition to the papers on CO<sub>2</sub> transfer- some papers on water vapour transfer are included, these being of general application. On the other hand, many papers dealing with the anatomy and physiology of stomata have been omitted, if the aspect of carbon dioxide or water vapour exchange has not been discussed. This volume contains references to papers published in the year 1976, and, similarly to Vol. 6, also addenda including references published in the preceding period (i. e. 1966- 1975). The numbers of these additional references are labelled with an asterisk in the list of references.
