Inventive Geniuses Who Changed the World John Bailey,2021-11-24 This book describes the life and times of fifty-three great British scientists and engineers - male and female inventive geniuses who changed the world, improving the lives of mankind, and propelling humanity forward. Their stories abound with personal ingenuity, brilliance and scientific or engineering wizardry, and with the ambition to satisfy fundamental human needs. The author aspires to set these individual achievements in the socio-political context of their place in history, sometimes embracing the activities of others to round off the story and scientific contribution. Avoiding overly technical language, he nonetheless succeeds in making complex theories and technologies more comprehensible and accessible to a lay audience. This book is a must for all those interested in the prehistory and history of the steam engine, transport, communication technology, public health services, and many topics from the natural sciences. Many of the inventions described in its pages have helped shape the modern world.

*Specific Impulse* Charles Justiz,2011-04-18 *Specific Impulse* is a Clarion Book of the Year Award Finalist. Great energy a fun and engaging read! DR. BONNIE DUNBAR, FORMER NASA ASTRONAUT AND CEO OF SEATTLE MUSEUM OF FLIGHT Space scientist Carin Gonzales and former submarine commander Jake Sabio are two strangers drifting separately through life when a thunderous explosion above the giant Barringer Meteor Crater inexplicably brings them together, transforming

both in unpredictable ways. Now able to see and smell more precisely and move in ways that are clearly impossible, Gonzales and Sabio soon realize that these kinds of life-changing alterations do not come without a price. Worse yet, they soon notice that others who witnessed the explosion are now dead from a seemingly incurable infection. The CDC wants nothing more than to lock them up in a lab for study. Special Agent Will Greenfield wants them for questioning. Contract killer Antonio Crubari would be happy if they would just hurry up and die, but he is willing to speed up the process if need be. Time is running out for Gonzales and Sabio. But even as they struggle to survive and find a cure for the deadly infection, they uncover a secret of monumental proportions that changes everything including the future.

*Arrive at Easterwine* R. A. Lafferty, 2016-01-29 'This, I believe, is the first autobiography of a machine,' writes Epikt, a Ktistec machine. In the resulting mindbending, at times hilarious, work of the imagination, the careful and attentive reader realizes that Epikt is not only presiding at its own birth at the Institute for Impure Science, but it is also addressing itself to the interpretation of mankind's most profoundly puzzling problems.

**Silicon States** Lucie Greene, 2019-04-10 With outsize supplies of cash, talent, and ambition, a small group of corporations including Amazon, Apple, Facebook, and Google have been gradually seizing leadership - and consumer confidence - around the world. In *Silicon States*, renowned futurist Lucie Greene offers an unparalleled look at the players, promises, and potential problems of Big Tech. Through interviews with corporate leaders, influential venture capitalists, scholars, journalists, activists, and more, Greene explores the tension inherent in Silicon Valley's global influence. If these companies can invent a social network, how might they soon transform our political and health-care systems? If they can revolutionize the cell phone, what might they do for space travel, education, or the housing market? As Silicon Valley faces increased scrutiny over its mistreatment of women, cultural shortcomings, and its role in widespread Russian election interference, we are learning where its interests truly lie, and about the great power these companies wield over an unsuspecting citizenry.

*Working the Garden* William Conlogue, 2003-01-14 In 1860 farmers accounted for 60 percent of the American workforce; in 1910, 30.5 percent; by 1994, there were too few to warrant a separate census category. The changes wrought by the decline of family farming and the rise of industrial agribusiness typically have been viewed through historical, economic, and political lenses. But as William Conlogue demonstrates, some of the most vital and incisive debates on the subject have occurred in a site that is perhaps less obvious--literature. Conlogue refutes the critical tendency to treat farm-centered texts as pastorals, arguing that such an approach overlooks the diverse ways these works explore human relationships to the land. His readings of works by Willa Cather, Ruth Comfort Mitchell, John Steinbeck, Luis Valdez, Ernest Gaines, Jane Smiley, Wendell Berry, and others reveal that, through agricultural narratives, authors have addressed such wide-ranging subjects as

the impact of technology on people and land, changing gender roles, environmental destruction, and the exploitation of migrant workers. In short, Conlogue offers fresh perspectives on how writers confront issues whose site is the farm but whose impact reaches every corner of American society.

**Geniuses at War** David A. Price, 2021-06-22 The dramatic, untold story of the brilliant team whose feats of innovation and engineering created the world's first digital electronic computer—decrypting the Nazis' toughest code, helping bring an end to WWII, and ushering in the information age. • Winner, Institute of Electrical and Electronics Engineers Middleton Award for a book ... that both exemplifies exceptional scholarship and reaches beyond academic communities toward a broad public audience. • A Kirkus Best Book of 2022 • Planning the invasion of Normandy, the Allies knew that decoding the communications of the Nazi high command was imperative for its success. But standing in their way was an encryption machine they called Tunny (British English for “tuna”), which was vastly more difficult to crack than the infamous Enigma cipher. To surmount this seemingly impossible challenge, Alan Turing, the Enigma codebreaker, brought in a maverick English working-class engineer named Tommy Flowers who devised the ingenious, daring, and controversial plan to build a machine that would calculate at breathtaking speed and break the code in nearly real time. Together with the pioneering mathematician Max Newman, Flowers and his team produced—against the odds, the clock, and a resistant leadership—Colossus, the world's first digital electronic computer, the machine that would help bring the war to an end. Drawing upon recently declassified sources, David A. Price's *Geniuses at War* tells, for the first time, the full mesmerizing story of the great minds behind Colossus and chronicles the remarkable feats of engineering genius that marked the dawn of the digital age.

Hyperbole and a Half Allie Brosh, 2013-10-29 #1 New York Times Bestseller “Funny and smart as hell” (Bill Gates), Allie Brosh's *Hyperbole and a Half* showcases her unique voice, leaping wit, and her ability to capture complex emotions with deceptively simple illustrations. FROM THE PUBLISHER: Every time Allie Brosh posts something new on her hugely popular blog *Hyperbole and a Half* the internet rejoices. This full-color, beautifully illustrated edition features more than fifty percent new content, with ten never-before-seen essays and one wholly revised and expanded piece as well as classics from the website like, “The God of Cake,” “Dogs Don't Understand Basic Concepts Like Moving,” and her astonishing, “Adventures in Depression,” and “Depression Part Two,” which have been hailed as some of the most insightful meditations on the disease ever written. Brosh's debut marks the launch of a major new American humorist who will surely make even the biggest scrooge or snob laugh. We dare you not to. FROM THE AUTHOR: This is a book I wrote. Because I wrote it, I had to figure out what to put on the back cover to explain what it is. I tried to write a long, third-person summary that would imply how great the book is and also sound vaguely authoritative—like maybe someone who isn't me wrote it—but I soon discovered

that I'm not sneaky enough to pull it off convincingly. So I decided to just make a list of things that are in the book: Pictures Words Stories about things that happened to me Stories about things that happened to other people because of me Eight billion dollars\* Stories about dogs The secret to eternal happiness\* \*These are lies. Perhaps I have underestimated my sneakiness!

*History of a Pipe Dream* Susan Miller,2011-12 Growing up on a farm in Wyoming taught Susan Miller perseverance. Her parents, hard-working and inspiring, taught her that life is full of obstacles-and one has to choose how she will overcome them. *History of a Pipe Dream* is the story of her struggle to overcome the prejudice that existed (and to a certain degree, continues to exist) regarding women in the field of industrial construction. She started out as a common laborer and worked her way up to journeyman, and along the way, she got to know people from all walks of life. Some amused her, some inspired her, but most just stood in her way. And then there was Jack, one of the most helpful men she ever met—who was also, at the same time, the most destructive force she'd ever know in her life. Through it all, she fought hard to stay focused on her goal: to be accepted as an equal. She chose to pursue a career that challenged her as fiercely as it challenged the perceptions and prejudices of others. The art of survival she learned so well as a child and young woman would soon be the key to her success. Hers is a journey into a world that few women have known, but all women can relate to.

**An Abundance of Katherines** John Green,2012-06-28 From the bestselling author of *Turtles All the Way Down* and *The Fault in Their Stars*, a beautiful tale of love, loss and not so fool proof mathematic equations. When it comes to relationships, Colin Singleton's type is girls named Katherine. And when it comes to girls named Katherine, Colin is always getting dumped. Nineteen times, to be exact. On a road trip miles from home, this anagram-happy, washed-up child prodigy has ten thousand dollars in his pocket, a bloodthirsty feral hog on his trail, and an overweight Judge Judy-loving best friend riding shotgun - but no Katherines. Colin is on a mission to prove The Theorem of Underlying Katherine Predictability, which he hopes will predict the future of any relationship, avenge Dumpees everywhere, and finally win him the girl. Love, friendship, and a dead Austro-Hungarian archduke add up to surprising and heart-changing conclusions in this ingeniously layered comic novel about reinventing oneself.
