Impact Parameter and Other Quantum Realities Geoffrey Landis,2001 A collection of hard science fiction stories.

Mars Crossing Geoffrey A. Landis,2001-11-19 By the middle of the 21st century, humanity has finally landed men on Mars-only to watch helplessly as the first two missions end in catastrophe and death. With resources running out, a third-and perhaps final-mission to Mars is hastily mounted, with a crew of four men and two women. But from the moment of their arrival on Mars, everything begins to go wrong. The fuel tanks that were to have supplied their return trip are found corroded and empty. Their supplies are running out and their life support systems are beginning to fail. And any rescue mission won't reach them for months, or even years-if at all. The crew's only hope for survival lies in a desperate plan: an agonizing trek halfway across the surface of Mars to a ship designed to carry only half their number. Torn by conflict and dissent, and troubled by secrets that endanger them all, they must embark on an ordeal that will test them to the limits of endurance.

Mars Crossing Geoffrey A. Landis,2016-12-06 From Hugo and Nebula Award-winning author, Geoffrey A. Landis, comes an epic of near-future exploration of Mars in his debut Nebula Award nominated novel, Mars Crossing. By the middle of the 21st century, humanity has finally landed men on Mars-only to watch helplessly as the first two missions end in catastrophe and death. With resources running out, a third-and perhaps final-mission to Mars is hastily mounted, with a crew of four men and two women. But from the moment of their arrival on Mars, everything begins to go wrong. The fuel tanks that were to have supplied their return trip are found corroded and empty. Their supplies are running out and their life support systems are beginning to fail. And any rescue mission won't reach them for months, or even years-if at all. The crew's only hope for survival lies in a desperate plan: an agonizing trek halfway across the surface of Mars to a ship designed to carry only half their number. Torn by conflict and dissent, and troubled by secrets that endanger them all, they must embark on an ordeal that will test them to the limits of endurance.

Seeing Like a Rover Janet Vertesi, 2015-04-22 Seeing Like a Rover brings the Mars Exploration Rover mission to vivid life through the author's years of immersion with the team during routine operations on Mars. In the book, Janet Vertesi explores the social and technical achievements of making knowledge about Mars based on iterative digital representations of its surface. We see how scientists on the Rover mission both perform the digital transformations that bring new features in their images to light, enabling discovery, as well as how they collectively interpret images to determine where the Rovers are located on Mars and what they should do next. Using her close study of digital imaging, which exhibits a sensitivity to the social context of scientific work, Vertesi discusses how representation on the mission is never about finding a single way of truthfully representing Mars. Representation is instead, she argues, a question of using image processing techniques strategically to reveal and conceal different features of the planet's surface, and of bringing these multiple representations together to make both knowledge and collective decisions about exploration on the Red Planet. Seeing Like a Rover speaks to many themes that are familiar to historians, sociologists, and philosophers of science. Issues such as trust among knowledge-making teams, the different epistemic status and practices of the lab and the field, and the heritage of visual languages in an emerging discipline are just as relevant in other periods and places. Moreover, by revealing how representational practices craft social visions, Vertesi develops a framework that can be applied to scientific imaging across a variety of time periods and scientific contexts.

Maximum Performance Nick Forster,2005-01-01 This is a big book in more ways than one. . . a detailed and illuminating exploration of leadership qualities, attributes, skills and competencies. . . the mixture of theory, reflective questions, stories, tools and practical exercises demand a level of thoughtful engagement and self-reflection rarely required by books on leadership. . . the Australian content is refreshing, as is the lack of evangelistic promises of immediate transformation. . . this book is firmly grounded in supporting the learning and skill development needed for maximum performance. (Boss magazine, August p.55). The Australian Financial Review AFR Boss If we were giving a graduate-level class in leadership and people management skills (I m a UCLA Business and Management Program instructor) I would choose this book as the text. If a client asked for a great book to enhance his/her leadership skills, (we consult in organization, compensation and performance management) this would be one of first books I would suggest. It s that good! The book offers a comprehensive guide for developing leadership and people management skills. It s a powerful, broad-spectrum leadership toolkit with a wealth of information about skills and practices, and hundreds of suggestions and opinions from business and political leaders, consultants, and academics. This book is an outstanding resource for leaders and aspiring leaders. It is filled with an abundance of insights: the distinction it makes between a leader and a manager is one of the best, if not the best, we ve read. Just a few of the subjects covered are: the leadership-as-servant philosophy; leaders as coaches and mentors; communication; motivation; leading and managing teams; women as leaders; managing power, politics and conflict; leading organizational and cultural change; creating an innovative organization; leadership and people management in high-tech, networked; and virtual organizations. Throughout the book are bullet-point lists, exercises, and to-the-point conclusions. It is clearly written and superbly organized. An excellent bibliography and subject index top off this outstanding work. We highly recommend this book. Yvette Borcia and Gerry Stern, Stern s Management Review *Maximum Performance* is a comprehensive business tome. Although it is designed for students, busy executives who use the chapter summaries or chapter sections to focus on topics

that interest them will find the book useful. Organizations with large collections on management or leadership will want to buy it. Business researchers with limited library space or who are looking for a good summary of current management topics may also find the book of value. . . The strength of *Maximum Performance* is its breadth. Forster touches on everything from whether leaders are born or made to Machiavellian strategies for dealing with toxic work environments. Anyone interested in ideas on leadership will likely find several sections of interest. Those sections that are particularly strong include the discussions on the different roles and organizational context of leadership, key issues in motivating employees, the team development process, and best practices in leading organizational change. Scott R. Jenkins, *Business Information Alert* Nick Forster's large text is for MBA students. He writes in a clean, clear style and frankly admits that leadership and people-management skills cannot adequately be learned from books. He knows however that good books can help, and also that clichés of management can be inspirational and will be used widely though they call for close analysis of substance or context. He is in this a modern-day Samuel Smiles, equipped with a variety of diagnostic tools. The Australian In my experience a major shortcoming of most how to books on leadership and management is that they purport to offer Silver Bullets magical solutions that, once revealed, will enrich and transform the reader and his or her organisation. Regrettably

Being Michael Swanwick Alvaro Zinos-Amaro,2023-11-21 In 2001, Michael Swanwick published the book-length interview *Being Gardner Dozois*. Now Swanwick himself becomes the subject of inquiry. During a year of conversations, Alvaro Zinos-Amaro (*Traveler of Worlds: Conversations with Robert Silverberg*) set about discussing with Swanwick his remarkable career, with a particular focus on his extraordinary short fiction. The resulting collection of transcribed interviews is a tribute to the similarly-named book that inspired it, a discussion of writing craft, an anecdotal genre history, and a chronological survey of the work of a modern master.

Deep Space Probes Gregory L. Matloff,2005-04-25 The Space Age is nearly 50 years old but exploration of the outer planets and beyond has only just begun. *Deep-Space Probes Second Edition* draws on the latest research to explain why we should explore beyond the edge of the Solar System and how we can build highly sophisticated robot spacecraft to make the journey. Many technical problems remain to be solved, among them propulsion systems to permit far higher velocities, and technologies to build vehicles a fraction of the size of today's spacecraft. Beyond the range of effective radio control, robot vehicles for exploring deep space will need to be intelligent, 'thinking' craft - able to make vital decisions entirely on their own. Gregory Matloff also looks at the possibility for human travel into interstellar space, and some of the immense problems that such journeys would entail. This second edition includes an entirely new chapter on holographic message plaques for future interstellar probes - a NASA-funded project.

Visions of Mars Howard V. Hendrix,,George Slusser,Eric S. Rabkin,2011-02-21 Seventeen wide-ranging essays explore the evolving scientific understanding of Mars, and the relationship between that understanding and the role of Mars in

literature, the arts and popular culture. Essays in the first section examine different approaches to Mars by scientists and writers Jules Verne and J.H. Rosny. Section Two covers the uses of Mars in early Bolshevik literature, Wells, Brackett, Burroughs, Bradbury, Heinlein, Dick and Robinson, among others. The third section looks at Mars as a cultural mirror in science fiction. Essayists include prominent writers (e.g., Kim Stanley Robinson), scientists and literary critics from many nations.

Going Interstellar Les Johnson, Jack McDevitt, 2012-06-01 Essays by space scientists and engineers on the coolest ways and means to get humanity to the stars along with stories by an all-star assortment of talespinners abounding with Hugo and Nebula award winners: Ben Bova, Mike Resnick, Jack McDevitt, Michael Bishop, Sarah A. Hoyt and more. Some humans may be content staying in one place, but many of us are curious about what's beyond the next village, the next ocean, the next horizon. Are there others like us out there? How will we reach them? Wonderful questions. Now get ready for some highly informative and entertaining answers. At the publisher's request, this title is sold without DRM (Digital Rights Management).

Bridges to Science Fiction and Fantasy Gregory Benford, Gary Westfahl, Howard V. Hendrix, Joseph D. Miller, 2018-02-23 The J. Lloyd Eaton Conferences on Science Fiction and Fantasy Literature—long held at the University of California, Riverside—have been a major influence in the study of science fiction and fantasy for thirty years. The conferences have attracted leading scholars whose papers are published in Eaton volumes found in university libraries throughout the world. This collection brings together 22 of the best papers—most with new afterwords by the authors—presented in chronological order to show how science fiction and fantasy criticism has evolved since 1979.

Shaping Science Janet Vertesi, 2020-11-06 In *Shaping Science*, Janet Vertesi draws on a decade of immersive ethnography with NASA's robotic spacecraft teams to create a comparative account of two great space missions of the early 2000s. Although these missions featured robotic explorers on the frontiers of the solar system bravely investigating new worlds, their commands were issued from millions of miles away by a very human team. By examining the two teams' formal structures, decision-making techniques, and informal work practices in the day-to-day process of mission planning, Vertesi shows just how deeply entangled a team's local organizational context is with the knowledge they produce about other worlds. Using extensive, embedded experiences on two NASA spacecraft teams, this is the first book to apply organizational studies of work to the laboratory environment in order to analyze the production of scientific knowledge itself. Engaging and deeply researched, *Shaping Science* demonstrates the significant influence that the social organization of a scientific team can have on the practices of that team and the results they yield.

Fermi's Question John Cramer, 2023-06-06 It has been 15 years since the events of Einstein's Bridge. George and Alice Griffin and Roger Coulton have established the Iris Foundation, a powerful island-isolated research organization tasked with exploiting the technologies learned from the Makers, re-learning Maker techniques for creating wormholes, reestablishing

contact with the Makers, and protecting Earth from Hive invasions. Sparked by a new idea from Roger, Iris researchers finally master wormhole technology and use accelerated wormholes to create Fermi Station in the Oort Cloud. Contact is established with the Makers and the Centaurs, a justice-seeking robotic civilization in our galaxy. The triple alliance mounts a three-pronged attack on the Hive world, destroying the Hive and one of its colonies. A second Hive colony cannot be located and could pose a future problem. Iris launches an armada of accelerated wormholes to probe nearby star systems and establishes a colonization base on Orca, an Earth-like moon of Bowhead, a giant planet in the Tau Ceti system. Mankind has reached the stars. At the publisher's request, this title is sold without DRM (Digital Rights Management).

Dawn M.B. Wood, 2020-07-22 "In this fast-paced, lively, and enjoyable finale, Wood offers a wide array of intrigues, battles, and retreats." —Kirkus Reviews The long-awaited finale to the epic Clash of the Aliens science fiction saga. When a Hoo-Lii invasion fleet unexpectedly arrives and attacks, they cripple Earth's space defenses. The Space Force retreat to an asteroid based fortress. The human space fleet suffers terrible damage and on the brink of defeat, dissident aliens and exiled humans arrive to join the battle as the Hoo-Lii drop a small asteroid on Earth. Do the new allies arrive in time?

The Blue Gem M.B. Wood, 2020-02-24 In the third book of this sci-fi saga, a new alien species comes to earth and when humans try to help, the future of the planet hangs in the balance. The struggle for survival and control takes a new turn in this third book in the Clash of the Aliens series. The previous novel, Stranger, left the human race devastated by an apocalypse of their own making. They are picking up the pieces of their civilization and preparing for an outside threat—the alien race of Qu'uda. As Blue Gem unfolds, the humans do not know that a third alien species, the Hoo-Lii, are on their way to Earth. The strange, exotic Hoo-Lii Hive-Mother, Suh-Joh, seeks a new world because the ruling priest class has sentenced her to death. She sends her counselor to investigate Earth as a new home. When the Hoo-Lii ship arrives, it suffers major damage at the hands of the Qu'uda. The humans set out to help the Hoo-Lii with a gift of water. As the old saying goes, "No good deed goes unpunished." This benevolent gesture may have inadvertently sold out the human race. Will this gift of water seal Earth's fate?
