Georg Wilhelm Steller, the Pioneer of Alaskan Natural History Leonhard Stejneger, 1936

Journal of a Voyage with Bering, 1741-1742 Georg Wilhelm Steller, O. W. Frost, 1988 New translation based completely on a surviving copy of Steller's 1743 manuscript that details the exploration of Alaska.

Where the Sea Breaks Its Back Corey Ford, 2003-06-01 Author Corey Ford writes the classic and moving story of naturalist Georg Wilhelm Steller, who served on the 1741-42 Russian Alaska expedition with explorer Vitus Bering. Steller was one of Europe's foremost naturalists and the first to document the unique wildlife of the Alaskan coast. In the course of the voyage, Steller made his valuable discoveries and suffered, along with Bering and the crew of the ill-fated brig St. Peter, some of the most grueling experiences in the history of Arctic exploration. First published in 1966, *Where the Sea Breaks Its Back* was hailed as among this country's greatest outdoor writing by *Field & Stream* magazine, and today continues to enchant and enlighten the new generations of readers about this amazing and yet tragic expedition, and Georg Steller's significant discoveries as an early naturalist.

Eastbound through Siberia Georg Wilhelm Steller, 2020-05-05 In the winter of 1739, Georg Steller received word from Empress Anna of Russia that he was to embark on a secret expedition to the far reaches of Siberia as a member of the Great Northern Expedition. While searching for economic possibilities and strategic advantages, Steller was to send back descriptions of everything he saw. The Empress's instructions were detailed, from requests for a preserved whale brain to observing the child-rearing customs of local peoples, and Steller met the task with dedication, bravery, and a good measure of humor. In the name of science, Steller and his comrades confronted horse-swallowing bogs, leaped across ice floes, and survived countless close calls in their exploration of an unforgiving environment. Not stopping at lists of fishes, birds, and mammals, Steller also details the villages and the lives of those living there, from vice-governors to prostitutes. His writings rail against government corruption and the misuse of power while describing with empathy the lives of the poor and forgotten, with special attention toward Native peoples. What emerges is a remarkable window into life—both human and animal—in 18th century Siberia. Due to the secret nature of the expedition, Steller's findings were hidden in Russian archives for centuries, but the near-daily entries he recorded on journeys from the town of Irkutsk to Kamchatka are presented here in English for the first time.

Island of Memory T. Edward Bak, François Vigneault, Jason Leivian, 2013-06-12 Examines the human condition and obsession within the natural order at the extremes of the unknown. Georg Wilhelm Steller, a Bavarian naturalist, accompanied explorer Vitus Bering on his Second Kamchatka Expedition (also known as the Great Northern Expedition) from St. Petersburg, through Siberia, across the north Pacific, to the shores of Alaska.

Wild Man T. Edward Bak, 2013 Examines the human condition and obsession within the natural order at the extremes of the unknown. Georg Wilhelm Steller, a Bavarian naturalist, accompanied explorer Vitus Bering on his Second Kamchatka Expedition (also known as the Great Northern Expedition) from St. Petersburg, through Siberia, across the north Pacific, to the shores of Alaska.

The Singing Bones Stephen Spotte, 2019-07-15 The Singing Bones recounts the life and times of eighteenth century polymath and explorer Georg Wilhelm Steller, the first European naturalist to visit Alaska. The first to propose that America was originally peopled by migrants from Siberia, Steller was aboard the packet boat St. Peter commanded by Vitus Bering on the Second Great Northern Expedition sponsored by the Russian Admiralty to determine if Asia and North America were connected by land or separated by a sea. When the St. Peter was wrecked on Bering Island in what was later named the Bering Sea, Steller cured the survivors, who were marooned and dying of scurvy, while making remarkable discoveries in natural history. He was first to describe the behavior and biology of the northern fur seal and Steller's sea lion, and his descriptions of the whale-sized Steller's sea cow and spectacled cormorant (both now extinct) are all we know about these exquisite creatures as living beings. The castaways eventually built a small vessel from the St. Peter's wreckage and sailed back to Kamchatka in autumn 1742, where Steller continued his explorations, in part while living with the indigenous Itelmen people. A blend of narrative adventure and biography, this historical first-person novel chronicles the professional visions and conflicted life of a deeply fascinating, flawed, and courageous man who devoted everything to advancing the frontiers of science and improving the lives of the native Siberians.

Sea Cows, Shamans, and Scurvy Ann Arnold, 2008-10-28 On June 4, 1741, Georg Wilhelm Steller set sail from Avacha Bay in Siberia on the St. Peter, under the command of Vitus Bering. The crew was bound for America on the last leg of an expedition whose mission was to explore, describe, and map Russia's vast lands from the Ural Mountains across Siberia to the Kamchatka Peninsula, and possibly lay claim to the northwest coast of America - if they could find it, for no European had ever reached America by this route. Officially, Steller was the ship's mineralogist, but in practice he was its doctor, minister, and naturalist as well. Appointed to the expedition in 1737 by the Academy of Science in St. Petersburg, he was sworn to secrecy concerning any discoveries. Making judicious use of Steller's richly detailed journals and liberal use of illustrations and maps, Ann Arnold allows the reader to join Steller on this fascinating voyage and its final dangerous mission, which left half the crew dead and the rest suffering from scurvy.

Steller's Island Dean Littlepage,2006 History, adventure, and science-the 18th century naturalist, Georg Steller, sailed to the north coast of North America and introduced its biological wonders to the world.

Bering's Voyages: Steller's journal of the sea voyage from Kamchatka to America and return on the second expedition, 1741-1742; translated and in part annotated by L. Stejneger Frank Alfred Golder,1968

De bestiis marinis Georg Steller,2011-03-03 Steller's classic work, published in Latin in 1751 and in German in 1753, contains the only scientific description from life of the Steller's sea cow (*Hydrodamalis gigas*), as well as the first scientific descriptions of the fur seal or sea bear (*Callorhinus ursinus*), Steller's sea lion (*Eumetopias jubatus*), and the sea otter (*Enhydra lutris*). Steller's sea cow was a sirenian, or manatee, inhabiting the North Pacific Ocean and Bering Sea. It was first discovered by Europeans in 1741 and rendered extinct by 1768. It was a 30-foot long, plant-eating aquatic mammal, weighing up to 12 tons, that lived in large herds on the coasts of Alaska and Kamchatka. Steller made his observations as part of Vitus Bering's second voyage, during which the crew was shipwrecked for 9 months on Bering Island, from November 1741 to August 1742.

Where the Sea Breaks Its Back Corey Ford,1992 A splendid account of the final voyage of explorer Vitus Bering and of the life of naturalist Georg Steller (1709-1746), who accompanied Bering on the 1741 crossing into the uncharted North Pacific.

Steller's History of Kamchatka Georg Wilhelm Steller,2003 Everything was of interest to Georg Wilhelm Steller, the Russian Academy of Sciences naturalist on Vitus Bering's second Kamchatka expedition, which discovered Alaska in 1741. Steller composed this manuscript on Kamchatka in 1743 and 1744, but it was published in German only posthumously. This first English translation is most valuable for its extensive descriptions of the natural and human worlds that Steller found in the mid-eighteenth century. He describes over thirty species and two genera of fish, and numerous species of birds, for the first time. Observations of Kamchatka's Native peoples add to the small and invaluable collection of ethnographic and linguistic descriptions made during the initial acculturation process and the growth of a new economy based on the fur trade, which changed Native life forever. He makes unique observations of the economy of Kamchatka and the role of the Cossacks, and was the first scientist to suggest, based on direct observation, similarities in the ethnography and natural history of the Russian Far East and Alaska. Steller's breadth and depth in recording the natural and human world of eighteenth-century Alaska make this translation an important reference for readers interested in all aspects of North Pacific and Russian American history.

After Nature W. G. Sebald,2013-02-07 After Nature is the very first literary work by W. G. Sebald, author of Austerlitz After Nature by W.G. Sebald, author of Austerlitz, is his first literary work and the start of his highly personal and brilliant

writing journey. In this long prose poem, Sebald introduces many of the themes that he explores in his subsequent books. Focusing on the conflict between man and nature, each of the three distinct parts of *After Nature* give centre stage to a different character from a different century - the last being W.G. Sebald himself. 'A deeply intelligent book, but also a marvellously warm, exciting and compassionate one' Andrew Motion 'A début of rare poetic grandeur' Irish Times 'Astonishing writing. A true poet at work' Evening Standard 'Graceful, allusive, serious, but also immensely readable' Sunday Telegraph 'When you read Sebald you are transported to another realm' Literary Review W . G. Sebald was born in Wertach im Allgäu, Germany, in 1944 and died in December 2001. He studied German language and literature in Freiburg, Switzerland and Manchester. In 1996 he took up a position as an assistant lecturer at the University of Manchester and settled permanently in England in 1970. He was Professor of European Literature at the University of East Anglia and is the author of *The Emigrants*, *The Rings of Saturn*, *Vertigo*, *Austerlitz*, *After Nature*, *On the Natural History of Destruction*, *Campo Santo*, *Unrecounted*, *For Years Now* and *A Place in the Country*. His selected poetry is published in a volume called *Across the Land and the Water*.

Ecology and Conservation of the Sirenia Helene Marsh, Thomas J. O'Shea, John Elliott Reynolds, 2011-12 A synthesis of the ecological and related knowledge pertinent to understanding the biology and conservation of dugongs and manatees.

Island of the Blue Foxes Stephen R. Bown, 2017-11-07 The story of the world's largest, longest, and best financed scientific expedition of all time, triumphantly successful, gruesomely tragic, and never before fully told The immense 18th-century scientific journey, variously known as the Second Kamchatka Expedition or the Great Northern Expedition, from St. Petersburg across Siberia to the coast of North America, involved over 3,000 people and cost Peter the Great over one-sixth of his empire's annual revenue. Until now recorded only in academic works, this 10-year venture, led by the legendary Danish captain Vitus Bering and including scientists, artists, mariners, soldiers, and laborers, discovered Alaska, opened the Pacific fur trade, and led to fame, shipwreck, and one of the most tragic and ghastly trials of suffering in the annals of maritime and arctic history.

Encyclopedia of the Arctic Mark Nuttall, 2005-09-23 With detailed essays on the Arctic's environment, wildlife, climate, history, exploration, resources, economics, politics, indigenous cultures and languages, conservation initiatives and more, this Encyclopedia is the only major work and comprehensive reference on this vast, complex, changing, and increasingly important part of the globe. Including 305 maps. This Encyclopedia is not only an interdisciplinary work of reference for all those involved in teaching or researching Arctic issues, but a fascinating and comprehensive resource for residents of the Arctic, and all those concerned with global environmental issues, sustainability, science, and human interactions with the environment.
