**The Lydian Chromatic Concept of Tonal Organization for Improvisation** George Russell,1959 The Lydian Chromatic Concept is an organization of tonal resources from which the jazz musician may draw to create improvised lines. The Lydian Chromatic Concept of Tonal Organization is a chromatic concept providing the musician with an awareness of the full spectrum of tonal colors available in the equal temperament tuning. Studying the Concept makes the musician aware of the whole chromatic situation surrounding the chord (vertical) or a tonal center (horizontal). This may help the musician liberate their melodic inhibitions and help them to intelligently penetrate and understand the entire chromatic universe.

**Eric Dolphy's Out** Clay Downham,2018 The scope of this thesis is tripartite. It first refines our understanding of what jazz discourse and musicians refer to as playing outside, particularly, improvising with pitches outside of the prevailing key center or harmony. Second, it uses the music of Eric Dolphy to provide a case study for systematic approaches to playing out. Third, it develops George Russell's notions of tonal gravity and outgoing melody, as put forth in the most influential edition of his 'Lydian chromatic concept.' Each of these subjects has received little scholarly attention despite their ubiquitous roles in mid-twentieth-century African American avant-garde music. Methodologically, this thesis draws from extant musicological and music-theoretical scholarship, archival research, interviews I conducted, transcriptions, and my own experience improvising with Russell and Dolphy's musical techniques and compositions--Abstract.

Big Ears Nichole T. Rustin, Sherrie Tucker, 2008-11-07 In jazz circles, players and listeners with “big ears” hear and engage complexity in the moment, as it unfolds. Taking gender as part of the intricate, unpredictable action in jazz culture, this interdisciplinary collection explores the terrain opened up by listening, with big ears, for gender in jazz. Essays range from a reflection on the female boogie-woogie pianists who played at Café Society in New York during the 1930s and 1940s to interpretations of how the jazzman is represented in Dorothy Baker’s novel *Young Man with a Horn* (1938) and Michael Curtiz’s film adaptation (1950). Taken together, the essays enrich the field of jazz studies by showing how gender dynamics have shaped the production, reception, and criticism of jazz culture. Scholars of music, ethnomusicology, American studies, literature, anthropology, and cultural studies approach the question of gender in jazz from multiple perspectives. One contributor scrutinizes the tendency of jazz historiography to treat singing as subordinate to the predominantly male domain of instrumental music, while another reflects on her doubly inappropriate position as a female trumpet player and a white jazz musician and scholar. Other essays explore the composer George Russell’s Lydian Chromatic Concept as a critique of mid-twentieth-century discourses of embodiment, madness, and black masculinity; performances of “female hysteria” by Les Diaboliques, a feminist improvising trio; and the BBC radio broadcasts of Ivy Benson and Her Ladies’ Dance Orchestra during the Second World War. By incorporating gender analysis into jazz studies, *Big Ears* transforms ideas of who counts as a subject of study and even of what counts as jazz. Contributors: Christina Baade, Jayna Brown, Farah Jasmine Griffin, Monica Hairston, Kristin McGee, Tracy McMullen, Ingrid Monson, Lara Pellegrinelli, Eric Porter, Nichole T. Rustin, Ursel Schlicht, Julie Dawn Smith, Jeffrey Taylor, Sherrie Tucker, João H. Costa Vargas

**Rhythm Planet** Tom Schnabel, 1998 Public Radio personality Tom Schnabel spotlights giants of the global genre like the late Sufi singer Nusrat Feteah Ali Kahn and this year's Grammy winner Milton Nascimento, making *Rhythm Planet* both an antidote to the latest flavor of pop and an affirmation of music's power. 125 illustrations, 25 in color.

**Pentatonic Khancepts** Steve Khan, 2002 In this book, Steve takes a potentially very complex subject -- the creation of new, different, and creative melodies -- and shows how using two very simple and very guitaristic pentatonic scales, you can unleash an inexhaustible supply of new colors and ideas. A recording containing most of the music examples, plus numerous play-along tracks is included. This is a must-have for any serious guitarist!

George Russell Duncan Heining, 2010 *George Russell: The Story of an American Composer* is the first biography of one of the greatest figures in jazz, written with Russell's full cooperation. Extensively researched with interviews from friends, family members, musicians, associates, and commentators on jazz, the book contains valuable insights that reveal many previously unknown facts about Russell's life.

**Organic Music Theory** BEN. SCHWENDENER, 2017-12-13 Organic Music Theory facilitates creative choices from naturally occurring-organic-and self-organized universal elements. The author clearly explains theory drawn from the modal period in jazz then expands it into a range of applications. This work addresses anyone sensing the existence of a larger realm of creative choice.

**Freedom Sounds** Ingrid Monson, 2007-10-18 An insightful examination of the impact of the Civil Rights Movement and African Independence on jazz in the 1950s and 60s, *Freedom Sounds* traces the complex relationships among music, politics, aesthetics, and activism through the lens of the hot button racial and economic issues of the time. Ingrid Monson illustrates how the contentious and soul-searching debates in the Civil Rights, African Independence, and Black Power movements shaped aesthetic debates and exerted a moral pressure on musicians to take action. Throughout, her arguments show how jazz musicians' quest for self-determination as artists and human beings also led to fascinating and far reaching musical explorations and a lasting ethos of social critique and transcendence. Across a broad body of issues of cultural and political relevance, *Freedom Sounds* considers the discursive, structural, and practical aspects of life in the jazz world in the 1950s and 1960s. In domestic politics, Monson explores the desegregation of the American Federation of Musicians, the politics of playing to segregated performance venues in the 1950s, the participation of jazz musicians in benefit concerts, and strategies of economic empowerment. Issues of transatlantic importance such as the effects of anti-colonialism and African nationalism on the politics and aesthetics of the music are also examined, from Paul Robeson's interest in Africa, to the State Department jazz tours, to the interaction of jazz musicians such as Art Blakey and Randy Weston with African and African diasporic aesthetics. Monson deftly explores musicians' aesthetic agency in synthesizing influential forms of musical expression from a multiplicity of stylistic and cultural influences--African American music, popular song, classical music, African diasporic aesthetics, and other world musics--through examples from cool jazz, hard bop, modal jazz, and the avant-garde. By considering the differences between aesthetic and socio-economic mobility, she presents a fresh interpretation of debates over cultural ownership, racism, reverse racism, and authenticity. *Freedom Sounds* will be avidly read by students and academics in musicology, ethnomusicology, anthropology, popular music, African American Studies, and African diasporic studies, as well as fans of jazz, hip hop, and African American music.

**French Music and Jazz in Conversation** Deborah Mawer, 2014-12-04 This book explores the historical-cultural interactions between French concert music and American jazz across 1900-65, from both perspectives.

**The Jazz Theory Book** Mark Levine, 2011-01-12 The most highly-acclaimed jazz theory book ever published! Over 500

pages of comprehensive, but easy to understand text covering every aspect of how jazz is constructed---chord construction, II-V-I progressions, scale theory, chord/scale relationships, the blues, reharmonization, and much more. A required text in universities world-wide, translated into five languages, endorsed by Jamey Aebersold, James Moody, Dave Liebman, etc.

**Divisions of the Tetrachord** John H. Chalmers, 1993

Stratusphunk Duncan A Heining, 2020-11-20 Stratusphunk - George Russell was a unique figure in jazz. He was a theoretician, a composer of note, a working musician, and an educator. He began his life's work developing the Lydian Chromatic Concept of Tonal Organization in the mid-forties. One of a rare breed of thinker-musicians, through his ideas and music, Russell had a remarkable influence on the development of jazz after 1950. From his early composition with Dizzy Gillespie of Cubano-Be, Cubano-Bop, through the changes wrought by modal jazz as a consequence of his ideas, to his impact on the Scandinavian and European scenes, his achievements are among the most outstanding in the music. His life story weaves its way through contemporary jazz intersecting with the lives of many of its most colourful characters. Charlie Bird Parker, Dizzy Gillespie, Miles Davis, John Coltrane, Bill Evans, Gerry Mulligan, John Lewis, Gil Evans, Charlie Mingus, and Carla Bley were not just Russell's contemporaries. They were his peers, his colleagues and his friends. He touched their lives and music and, in turn, was encouraged by them. Originally published in 2010 under the title George Russell: The Story of an American Composer, Duncan Heining's biography of George Russell appears in a newly revised paperback edition for the first time.
