

Homosexual Acts Actors And Identities

Lesbian Mothers - Ellen Lewin 1993

Within a society that long considered "lesbian motherhood" a contradiction in terms, what were the experiences of lesbian mothers at the end of the twentieth century? In this illuminating book, lesbian mothers tell their stories of how they became mothers; how they see their relationships with their children, relatives, lovers, and friends and with their children's fathers and sperm donors; how they manage child-care arrangements and financial difficulties; and how they deal with threats to custody. Ellen Lewin's unprecedented research on lesbian mothers in the San Francisco area captured a vivid portrait of the moment before gay and lesbian parenting

moved into the mainstream of U.S. culture. Drawing on interviews with 135 women, Lewin provided her readers with a new understanding of the attitudes of individual women, the choices they made, and the texture of their daily lives.

The Forbidden Tale - kameel ahmady

Gender is one of the most important aspects of human life. It encompasses sexual identities and roles, sexual orientation, lust, pleasure, intimacy, and reproduction. It can also include people's thoughts, dreams, desires, beliefs, views, values, behaviors, practices, roles, and relationships; but these aspects are not always directly experienced or expressed. Gender is affected by biological, psychological,

social, economic, cultural, moral, legal, historical, religious and spiritual interactions. There is little in the way of media coverage or reports about the Iranian LGBT community, and most of these reports are documentaries about people who have left Iran and live in another country. There has been only limited research on the experience of LGB communities in contemporary Iranian society and their views concerning this community. The research for *Forbidden Tale* seeks to fill this knowledge gap, and is the first research about the LGB community in Iran and the distinctive contexts in which this community functions. The anthropological and fieldwork study of LGB people in Iran by Kameel Ahmady and his team examines the field of gender by looking at the many complex aspects of sexual identity and its intricacies in that community, in the context of an increasing recognition of sexual orientation and the challenges that current practices of LGB and gender in

Iran present. Myths and narratives that have often led to misconceptions about gender, and the mistaken policies and practices which ensue from them, are examined to provide a more holistic approach. This study is complex because it enters the realm of private and public life in today's Iran beyond a simple and general view of sexual orientation and gender-related Impressions. This research first focused on in-depth interviews of over 300 LGB people, 60% male and 40% female, in the three metropolitan cities of Tehran, Mashhad and Isfahan. One specific feature of the research is that it focuses solely on LGB and on trans-sex people who have both male and female sexes, both of which are active at the same time. The focus is on challenges arising from present-day changes in gender relations and interaction in Iran, examining the theoretical and methodological frameworks created by the LGBT community, as well as by universities and research

centers, public and social activists, and students outside that community. The main goals of this research project are to understand LGB community's feelings and beliefs through a critical analysis of their own perspective, and to examine their challenges in living in a religious, class-based, traditional and patriarchal society that rejects LGB as an identity. The vulnerability of LGBT people in Iran has been routinely suppressed. The aim now is to clarify the situation of those who have been deliberately ignored and marginalized. The present study takes advantage of a combination of methods and approaches in order to provide a theoretical method suited for research on LGBT experience and nevertheless, to encompass the feelings and perceptions of the researcher as an 'objectivity' in the research confirmation criteria. This research was conducted between 2017-2018 and field data were collected in summer and autumn, 2017.

*The Health of Sexual
Minorities* - Ilan H. Meyer
2007-03-12

This is the first concise handbook on Lesbian, Gay, Bisexual and Transgender (LGBT) health in the past few years. It breaks the myths, breaks the silence, and breaks new ground on this subject. This resource offers a multidimensional picture of LGBT health across clinical and social disciplines to give readers a full and nuanced understanding of these diverse populations. It contains real-world matters of definition and self-definition, meticulous analyses of stressor and health outcomes, a extensive coverage of research methodology

concerns, and critical insights into the sociopolitical context of LGBT individuals' health and lives.

[Making Sense of Pain: Critical and Interdisciplinary Perspectives](#) - Jane Fernandez 2020-05-18

This conference proceeding provides an attempt to extend the conversation on pain; the boundaries of the word pain are characteristically blurred by connotations of suffering and trauma. The variety of papers in this collection transgress these boundaries knowingly, inviting a more expansive rather than narrow definition of pain.

Homosexual Acts, Actors, and Identities - Lon G.

Nungesser 1983

In a purely biological sense, there is no such thing as a homosexual, simply homosexual acts and actors. Sexual preference is rooted not in genetics but rather in the social, psychological, and political context in which we live, and is derived mainly from how we perceive ourselves and those around us.

Encyclopedia of Homosexuality - Wayne R. Dynes 2016-03-22

First published in 1990, The Encyclopedia of Homosexuality brings together a collection of outstanding articles that were, at the time of this book's original publication, classic, pioneering, and recent.

Together, the two volumes provide scholarship on male and female homosexuality and bisexuality, and, reaching beyond questions of physical sexuality, they examine the effects of homophilia and homophobia on literature, art, religion, science, law, philosophy, society, and history. Many of the writings were considered to be controversial, and often contradictory, at that time, and refer to issues and difficulties that still exist today. This volume contains entries from M-Z.

[Hate Crimes](#) - Kevin Berrill 1991

[Hate Crimes](#) - Gregory M. Herek 1992

Although victimization of

lesbians and gay men is not a new problem, its severity appears to be increasing. After several decades of denial and neglect, the problem of anti-gay violence has begun to receive some measure of societal recognition and response. Not only the lesbian and gay male communit.

At the Edge of Being: The Aporia of Pain - Heather McKenzie 2020-10-12

Stigma and Sexual Orientation - Society for the Psychological Study of Lesbian and Gay Issues 1998

Sponsored by the Society for the Psychological Study of Lesbian and Gay Issues, Division 44 of the American Psychological Association.

Overcoming Heterosexism and Homophobia - James Thomas Sears 1997

Providing strategies that can be adopted by educators, counselors, community activists and leaders, and those working in the lesbian and gay community, the contributors discuss role-playing exercises, suggestions for beginning a

dialogue, methods of "coming out" effectively to family members and coworkers, and outlines for workshops.

The Course of Gay and Lesbian Lives - Bertram J. Cohler 2000-08

The authors argue that there is little support for assuming that homosexuality has a biological basis. Recognizing the many pathways that lead to same-gender sexual orientation, the authors conclude that the cause is much less important than understanding the meaning of being homosexual.

Handbook of Multicultural Measures - Glenn C. Gamst 2010-12-20

Providing readers with cutting-edge details on multicultural instrumentation, theories, and research in the social, behavioral, and health-related fields, this Handbook offers extensive coverage of empirically-supported multicultural measurement instruments that span a wide variety of subject areas such as ethnic and racial identity, racism, disability, and gender roles. Readers learn how to

differentiate among and identify appropriate research tools for a particular project. This Handbook provides clinical practitioners with a useful starting point in their search for multicultural assessment devices they can use with diverse clients to inform clinical treatment.

Moral Regulation and

Governance in Canada -
Amanda Glasbeek 2006

Moral Regulation and Governance in Canada offers an outstanding selection of readings that represents an overview of the key issues in deviance, moral regulation, and governance in Canada from a distinctly Canadian perspective. It effectively tracks the sociology of deviance, from governmentality studies to theories of social control. Of particular note is the focus this book gives to gender issues. It also argues that sometimes what is considered deviant is less related to criminality and more concerned with the perception of normalcy.

Toward Equity in Health -

Barbara C. Wallace, PhD
2007-11-26

This essential collection presents a state-of-the-art framework for how workers in public health and related disciplines should conceptualize health disparities and how they should be addressed worldwide. The contributors, who are leading public health professionals, educators, and practitioners in complimentary fields advance new evidence-based models designed to mobilize and educate the next generation of research and practice. The resulting chapters articulate new theory, procedures, and policies; the legacy of racism; community-based participatory research; new internet technology; training community workers and educators; closing the education and health gap; and addressing the needs of special populations. *Toward Equity in Health* is an essential book for all who are working toward global health equity-whether in health education, health promotion, disease prevention,

public health, the health care delivery system, or patient- and population level health.

Psychological Perspectives on Lesbian, Gay, and Bisexual Experiences - Linda Garnets
2003

This book provides an overview of current thought about the psychological issues affecting lesbians, bisexuals, and gay men.

Lesbian and Gay Psychology - Society for the Psychological Study of Lesbian and Gay Issues
1994-01-05

Theoretical analyses of physical appearance, issues of sexual pride and shame in lesbians, impact of the feminist political movement, and heterosexual attitudes are also provided. A chapter on boundary issues in a lesbian therapist/client relationship adds to the diversity of perspectives contained in this volume.

Homophobic Bullying - Ian Rivers
2011-02-11

Using theories and ideas drawn from various disciplines, the author demonstrates how bullying is a complex social

process wherein perpetrators are supported by active confederates, passive bystanders and indifferent onlookers.

Queer Youth Suicide, Culture and Identity - Rob Cover
2016-05-23

Despite increasing tolerance, legal protections against homophobia, and anti-discrimination policies throughout much of the western world, suicide attempts by queer youth remain relatively high. For over twenty years, research into queer youth suicide has debated reasons and risks, although it has also often reiterated assumptions about sexual identity and youth vulnerability. Understanding the cultural context in which suicide becomes a necessary escape from living an unliveable life is the key to queer youth suicide prevention. This book uses cultural theory to outline some of the ways in which queer youth suicide is perceived in popular culture, media and research. It highlights how the ways in

which we think about queer youth suicide have changed over time and some of the benefits and limitations of current thinking on the topic. Focusing on identity, *Queer Youth Suicide, Culture and Identity* also investigates why queer young men continue to attempt suicide. Drawing on approaches from queer theory, cultural studies and sociology, it explores how sexual identity formation, sexual shame and discrepancies in community belonging and exclusions are implicated in the reasons why some queer youth are resilient while others are vulnerable and at risk of suicide. As such, it will appeal to scholars of sociology, media studies, queer theory and social theory with interests in youth, gender and sexuality, and suicidology.

Invisible Families - Mignon Moore 2011-10-17

Mignon R. Moore brings to light the family life of a group that has been largely invisible—gay women of color—in a book that

challenges long-standing ideas about racial identity, family formation, and motherhood. Drawing from interviews and surveys of one hundred black gay women in New York City, *Invisible Families* explores the ways that race and class have influenced how these women understand their sexual orientation, find partners, and form families. In particular, the study looks at the ways in which the past experiences of women who came of age in the 1960s and 1970s shape their thinking, and have structured their lives in communities that are not always accepting of their openly gay status. Overturning generalizations about lesbian families derived largely from research focused on white, middle-class feminists, *Invisible Families* reveals experiences within black American and Caribbean communities as it asks how people with multiple stigmatized identities imagine and construct an individual and collective sense of self.
