Driver Behaviour and Training Dr Lisa Dorn 2012-10-01 Research on driver behaviour over the past two decades has clearly demonstrated that drivers' goals and motivations are important determinants of driver behaviour. The importance of this work is underlined by statistics: WHO figures show that road accidents are predicted to be the number three cause of death and injury by 2020 (currently more than 20 million deaths and injuries p.a.). The objective of the third volume, and of the conference on which it is based, is to describe and discuss recent advances in the study of driving behaviour and driver training. It bridges the gap between practitioners in road safety, and theoreticians investigating driving behaviour, from a number of different perspectives and related disciplines. A major focus is to consider how driver training and education needs to be adapted to raise awareness of the personal characteristics that contribute to unsafe driving behaviour with the aim of developing and reporting interventions to improve road safety. The contributors consider the novice driver problem, emotions and driver behaviour, at-work road safety, technological interventions, human factors and the road environment and rider behaviour. The readership for this volume includes researchers from a variety of different academic backgrounds, senior practitioners in road safety, including regulatory authorities, the police service, and private and public sector personnel working with drivers and motorcyclists.

In the Company of Cars Sarah Redshaw 2017-09-29 It has long been accepted that the social and cultural meanings of the car far exceed the practical need for mobility. This book marks the first attempt to contribute to road safety, considering, in depth, these meanings and the cultures of driving that are shaped by them. *In the Company of Cars* examines the perspectives that young people have on cars, and explores the broader social and cultural meanings of the car, the potential it is supposed to fulfil, and the anticipated benefits it offers to young drivers. From focus-group research conducted in Australia, the book takes up the views of young people on a range of topics, from media to car use to gender performance. The author looks at the ways in which driving has been defined by articulations of the car that emphasize valued features of the car-driver, such as gender, youthfulness, status, age, power, raciness, sexiness, ruggedness and competitiveness. The book takes a global perspective on mobility, considering the impact of cars and road safety policy on quality of life, and the value and significance of other modes of travel, in a range of countries.

Driving Women Diane Ruth Phillips 1999 Investigation into the work experience of a female long-haul truck driver reveals motivations and adaptive strategies utilized in a masculine-identified occupation. Participant observation gives insights into the agendas, strategies, and interpretations of work by a professional long-haul trucker. Economic need and opportunity, the mystique of the truck driver, and occupational thrills attract both women and men to the job. Many women also drive 18-wheelers to preserve a relationship with a male companion. Despite many dangers and inconveniences, many women find satisfaction in this nontraditional occupation.

The Israeli Druze Community in Transition Randa Khair Abbas 2021-03-11 While there are books that describe the history and traditions of the Druze as an ethnic and religious group, this is the first and only academic book of its kind. It gives voice to the Israeli Druze, through in-depth interviews with 120 people, 60 young adults and 60 of their parents' generation. How is this traditional group, bound together through the centuries by their secret religion and strong value system, dealing with modernization? What contradictions and continuity come to light in the stories of this people during a time of transition? Can their religion, and their very identity, survive the

meeting with the modern, technological world? What resources do the young and the not-so-young bring to the task of preserving their community and helping it to flourish as the world changes around them? The people in this text answer these questions through the telling of their stories, in which they express their values, opinions, beliefs and aspirations. The book draws out theoretical, practical, religious and sociological implications from this analysis, in order to shed light on the challenges faced by other traditional societies meeting modernity.

Female Entrepreneurship as a Driving Force of Economic Growth and Social Change Daniel, Ana Dias 2023-04-24 In the last decade, female entrepreneurship has gained considerable attention from both academicians and policymakers. Despite the proliferation of studies, this field of research is characterized by being a highly multidisciplinary and dispersed field, encompassing studies from a wide range of disciplines such as business and management, education, political science, technology, and innovation. To legitimize female entrepreneurship as a distinct field of research, it is important to deepen the scientific reasoning regarding women entrepreneurs while promoting the theoretical consolidation of this area of knowledge. *Female Entrepreneurship as a Driving Force of Economic Growth and Social Change* presents what researchers have learned so far about female entrepreneurship, namely the main motivations that lead women to undertake it and the characteristics of this type of business, as well as the impact of context and technology on the promotion and management of companies by women. In doing so, it contributes to a better understanding of this phenomenon and how it is different from male entrepreneurship, allowing a better delimitation of this field of research. Covering topics such as diversity, innovation, social entrepreneurship, and gender, this premier reference source is ideal for business owners, entrepreneurs, managers, researchers, scholars, academicians, practitioners, instructors, and students.

With contributions from both academics lecturing in motor vehicle engineering and those working in the industry, "An Introduction to Modern Vehicle Design" provides students with an excellent overview and background in the design of vehicles before they move on to specialised areas. Filling the niche between the more descriptive low level books and books which focus on specific areas of the design process, this unique volume is essential for all students of automotive engineering. Only book to cover the broad range of topics for automobile design and analysis procedures Each topic written by an expert with many years experience of the automotive industry

summarizes the state of the art in generalized linear models (GLMs) and their various extensions: GAMs, mixed models and credibility, and some nonlinear variants (GNMs). In order to deal with tail events, analytical tools from Extreme Value Theory are presented. Going beyond mean modeling, it considers volatility modeling (double GLMs) and the general modeling of location, scale and shape parameters (GAMLSS). Actuaries need these advanced analytical tools to turn the massive data sets now at their disposal into opportunities. The exposition alternates between methodological aspects and case studies, providing numerical illustrations using the R statistical software. The technical prerequisites are kept at a reasonable level in order to reach a broad readership. This is the first of three volumes entitled *Effective Statistical Learning Methods for Actuaries*. Written by actuaries for actuaries, this series offers a comprehensive overview of insurance data analytics with applications to P&C, life and health insurance. Although closely related to the other two volumes, this volume can be read independently.

Women in the Hong Kong Police Force Annie Hau-Nung Chan 2017-11-29 This book examines the development of women in the Hong Kong Police Force (HKP) over the past 68 years, beginning from the early colonial years when calls to include women in law enforcement first emerged, to the recruitment of the first female sub-inspector in 1949, and through to the current situation where policewomen constitute 15% of the total HKP establishment. What accounts for these developments and what do they tell us about organisational culture, gender and colonial policing? This interdisciplinary work is relevant to fields including women's studies, gender studies, policing studies, criminology, colonial history, sociology, and organisational studies, and will appeal to academics, students and lay readers interested in the development of women in policing.

Demarketing Nigel Bradley 2013-10-23 We all understand the basic principles underpinning marketing activity: to identify unfulfilled needs and desires and boost demand for the solutions a product is offering. The mantra is always "sell more". De-marketing tries for the very opposite. Why would a company actively try to decrease demand? There are many good reasons to do so: a firm cannot supply large enough quantities, or wants to limit supply to a region of narrow profit margin. Or, crucially, to discourage undesirable customers: those that could be bad for brand reputation, or in the case of the finance sector, high risk. De-marketing can yield effective solutions to these issues, effectively curtailing demand yet (crucially) not destroying it. Nevertheless, the fundamental negativity of de-marketing strategies often causes organisations to hide them from view and, as a result, they are rarely studied. This then is the first book to cast light on the secretive, counterintuitive world of de-marketing, deconstructing its mysteries and demonstrating how to incorporate them into a profit-driven marketing plan. A selection of thought leaders in strategic marketing mix theory with illustrative global cases, providing insight into how these strategies have been employed in practice and measuring their successes and failures. It's a must-read for any student or researcher that wants to think differently about marketing.

Driving Women Deborah Clarke 2007-04-15 Over the years, cars have helped to define the experiences and self-perceptions of women in complex and sometimes unexpected ways. When women take the wheel, family structure and public space are reconfigured and re-generated, creating

a context for a literary tradition in which the car has served as a substitute for, an escape from, and an extension of the home, as well as a surrogate mother, a financial safeguard, and a means of self-expression. *Driving Women* examines the intersection of American fiction—primarily but not exclusively by women—and automobile culture. Deborah Clarke argues that issues critical to twentieth-century American society—technology, mobility, domesticity, and agency—are repeatedly articulated through women's relationships with cars. Women writers took surprisingly intense interest in car culture and its import for modern life, as the car, replete with material and symbolic meaning, recast literal and literary female power in the automotive age. Clarke draws on a wide range of literary works, both canonical and popular, to document women's fascination with cars from many perspectives: historical, psychological, economic, ethnic. Authors discussed include Wharton, Stein, Faulkner, O'Connor, Morrison, Erdrich, Mason, Kingsolver, Lopez, Kadahata, Smiley, Senna, Viramontes, Allison, and Silko. By investigating how cars can function as female space, reflect female identity, and reshape female agency, this engaging study opens up new angles from which to approach fiction by and about women and traces new directions in the intersection of literature, technology, and gender.

Driver Acceptance of New Technology Tim Horberry 2017-06-12 Acceptance of new technology and systems by drivers is an important area of concern to governments, automotive manufacturers and equipment suppliers, especially technology that has significant potential to enhance safety. To be acceptable, new technology must be useful and satisfying to use. If not, drivers will not want to have it, in which case it will never achieve the intended safety benefit. Even if they have the technology, drivers may not use it if it is deemed unacceptable, or may not use it in the manner intended by the designer. At worst, they may seek to disable it. This book brings into a single edited volume the accumulating body of thinking and research on driver and operator acceptance of new technology. Bringing together contributions from international experts from around the world, the editors have shaped a book that covers the theory behind acceptance, how it can be measured and how it can be improved. Case studies are presented that provide data on driver acceptance of a wide range of new and emerging vehicle technology. Although driver acceptance is the central focus of this book, acceptance of new technology by operators in other domains, and across cultures, is also investigated. Similarly, perspectives are derived from domains such as human computer interaction, where user acceptance has long been regarded as a key driver of product success. This book comes at a critical time in the history of the modern motor vehicle, as the number of new technologies entering the modern vehicle cockpit rapidly escalates. The goal of this book is to inspire further research and development of new vehicle technology to optimise user acceptance of it; and, in doing so, to maximise its potential to be useful, satisfying to use and able to save human life.

Evaluation of Female Driver Response to Impaired Driving Messages Douglas Lee Piper 2000
Go, Girl, Go! Carol S Hackett 2011-03-22 *Go, Girl, Go* is the story of the physical, mental, and spiritual challenges Carol faced in her loneliness and anguish following the death of her husband. But we cannot remain in the Valley of the Shadow of Death. This is an inspirational writing and a practical book of how to cope and handle the realities of daily living during the depths of grief when neither the body nor the mind are functioning normally. Carols inconsolable sorrow was born out of a loving marriage of faithfulness, forgiveness, joys and struggles. It is our desire that this book will provide help for others who are not sure which way to turn following the loss of their loved one: From the how to of finances to the various avenues of the healing process through which one becomes whole again. This small book is a delightfully hopeful and helpful writing from one womans heart to the hearts of so many others who have to learn to function in the world alone. Carol writes in the early months of grieving, I would sit down in a chair and stare into the nothingness that had enveloped my life. Who knows how many wasted minutes I sat, lonely and afraid, staring into the emptiness of the space that had been our home. The Holy Spirit began to speak gently to my heart and brought to my mind verses from the Bible that I had hid in my heart. The Bible instructs us to hide the Word in your heart. I might still be sitting and staring into nothingness were it not for the admonition of the Lord: What are you doing here, Elijah? GET UP AND GO, and STAND ON THE MOUNTAIN BEFORE THE LORD YOUR GOD.

The Unfinished Revolution Minky Worden 2012-03-06 "It's a time of change in the world, with dictators toppling and new opportunities rising, but any revolution that doesn't create equality for women will be incomplete. The time has come to realize the full potential of half the world's population." —Christiane Amanpour, from the foreword *The Unfinished Revolution* tells the story of the global struggle to secure basic rights for women and girls, including in the Middle East where the Arab Spring raised high hopes, but the political revolutions are so far insufficient to guarantee progress. Around the world, women and girls are trafficked into forced labor and sex slavery, trapped in conflict zones where rape is a weapon of war, prevented from attending school, and kept from making deeply personal choices in their private lives, such as whom and when to marry. In many countries, women are second-class citizens by law. In others, religion and traditions block freedoms such as the right to work, study or access health care. Even in the United States, women who are victims of sexual violence often do not see their attackers brought to justice. More than 30 writers—Nobel Prize laureates, leading activists, top policymakers, and former victims—have contributed to this anthology. Drawing from their rich personal experiences, they tackle some of the

toughest questions and offer bold new approaches to problems affecting hundreds of millions of women. This volume is indispensable reading, providing thoughtful analysis from a never-before assembled group of advocates. It shows that the fight for women's equality is far from over. As Leymah Gbowee, 2011 Nobel Peace Prize Laureate says, "Women are not free anywhere in this world until all women in the world are free."
