Make Up Test John Adcox,2023-11 It's like . . . like a miracle. Like some kind of weird, freaky miracle. Christmas is a time when anything can happen . . . even if you think the entire idea of a holiday miracle is laughable. Janie Mason just wants to get through the season. She's under enormous pressure at work, her boss is brilliant but self-centered, and the holidays bring up a lot of memories she'd rather leave unremembered. The only thing that's making things tolerable for her right now is that she's getting to work more closely with Bill Sparks, the man she's crushing on, and Jeremy, someone who was just beginning to be a friend pre-lockdown and who has become the only person she can rely on now that everyone is back in the office. January really can't come soon enough. The last thing Janie needs is someone trying to prove to her that Christmas magic is real. So, when a guy claiming to be an elf offers to fulfill a wish for her, Janie off-handedly tells him that she wishes the makeup she just purchased actually did what it claimed to do. When she gets home, strange things begin to happen with the makeup. Blush that turns her whole face scarlet? Clarifying lotion that makes things clearer? Vanishing cream that actually causes things to vanish? And so begins an odyssey that promises to take Janie places she'd long ago stopped imagining. There's magic in the makeup. There's magic in her deepening connection with a certain co-worker. And maybe there's magic in a holiday she'd long ago abandoned. Janie Mason is getting her make-up test. And if she passes, her life will never be the same again.

**The Make-Up Test** Jenny L. Howe,2022-09-13 In this smart, swoony, rom-com debut from Jenny L. Howe, two college exes find themselves battling against each other—and their unresolved feelings—for a spot in a prestigious literature Ph.D. program. Allison Avery loves to win. After acing every academic challenge she's come up against, she's finally been accepted into her dream Ph.D. program at Claymore University, studying medieval literature under a professor she's admired for years. Sure, grad school isn't easy—the classes are intense, her best friend is drifting away, and her students would rather pull all-nighters than discuss *The Knight's Tale*—but she's got this. Until she discovers her ex-boyfriend has also been accepted. Colin Benjamin might be the only person who loves winning more than Allison does, and when they're both assigned to TA for the same professor, the game is on. What starts as a personal battle of wits (and lit) turns into all-out war when their professor announces a career-changing research trip opportunity—with one spot to fill. Competing with Colin is as natural as breathing, and after he shattered her heart two years ago, Allison refuses to let him come out on top. But when a family emergency and a late night road trip—plus a very sexy game of Scrabble—throw them together for a weekend, she starts to wonder if they could be stronger on the same team. And if they fall for each other all over again, Allison will have to choose between a once-in-a-lifetime opportunity and what could be a twice-in-a-lifetime love. In this charmingly bookish debut, *The Make-Up Test* embraces the truth that people can sometimes change and grow, even when you least expect it.

**Practical Aspects of Cosmetic Testing** Joachim W. Fluhr,2020-07-07 Skin physiology assessment is moving from a descriptive approach to a deeper understanding of biophysical and biochemical processes in the stratum corneum, such as epidermal barrier function and stratum corneum hydration. New, non-invasive approaches offer reliable and reproducible methods for product testing in the pharmaceutical and cosmetic industry, as well as in basic research. While standard instruments focus on functional aspects, innovative devices offer a deeper understanding of underlying mechanisms. This book discusses the assessment of skin physiology and of skin functions in clinical studies using non-invasive biophysical instruments, offering readers a comprehensive guide to planning, performing and evaluating the results of scientific studies in skin measurement and the legal framework for these studies. Written by leading experts in the field, it focuses on practical aspects of non-invasive measurements. After introducing the legal aspects of the current framework for clinical cosmetic

The third and main section addresses specific topics in cosmetic testing e.g. skin hydration, and also includes chapters on sensory aspects and in vivo skin structure visualization.
