Readings in Managerial Psychology Harold J. Leavitt, Louis R. Pondy, David M. Boje, 1989 With more than half the papers new to this book, the fourth edition of *Readings in Managerial Psychology* represents a substantial revision of this popular text. This edition focuses more than ever on the managing process, both within and between organizations, and such soft issues as managing creativity and imagination, managers' values and beliefs, and organizational culture play a larger role than they have before. *Readings in Managerial Psychology* is designed for managers in business and industry, students of management, public and university administrators, and executives in other organizations. The collection can be used independently or as a companion volume to Harold J. Leavitt and Homa Bahrami's *Managerial Psychology: Managing Behavior in Organizations* (5th edition, 1988), also published by the University of Chicago Press.

Personality and Performance Robert Spillane, John Martin, 2005 This book of psychology is written by two psychologists for managers and students of management. It consists of a two-pronged approach. First, it analyzes the work of psychologists who have adopted a scientific perspective. In management, this means treating people as predictable objects. Second, it offers an alternative to scientific psychology that treats people as purposive subjects. The purpose of this psychology is as a psychology of self-determination, to enable working people to gain insight into and mastery of themselves. To achieve this requires new foundations for managerial psychology based on purpose, choice, freedom, and responsibility. This book is an attempt to clarify certain ideas about managerial psychology and to suggest a new direction.

Handbook of Research on Multidisciplinary Perspectives on Managerial and Leadership Psychology Johnson, Rick D., 2021-01-22 The subject of leadership and managerial psychology exists as a sub-branch of psychology within the fields of industrial and organizational psychology. There still appears to be ongoing debate regarding the core pathology for gaining managerial expertise in professional roles relative to having suitable leadership skills and managerial knowledge beyond the direct daily work involved in organizations. Professional organizations inherently include varied levels of sensitive human interactions, which further necessitates their management professionals to have leadership styles that are adjustable contingent on a given situation. Relative to this edited book, managerial psychology is being utilized in a way that may subsequently seek to develop a series of scientific theory principles where the focus is to develop managerial axioms that advance contemporary existing knowledge surrounding professional management logic. The Handbook of Research on

Multidisciplinary Perspectives on Managerial and Leadership Psychology provides value uncovered by a collaboration of generalists and specialists who bring professional managerial and leadership opinions to light through narratives and research inclusive of fundamental theory principles that can be applied in practice and academia. This edited reference is focused on the enhancement of management research through managerial psychology while highlighting topics including business process knowledge, management in diverse discipline situations and professions, corporate leadership responsibility, leadership of self and others, and leadership psychology in a variety of different fields of work. This book is ideally designed for leadership and management professionals, academicians, students, and researchers in the fields of knowledge management, administrative sciences and management, leadership development, education, and organization development sub-branches or specialty practices.

Managerial Psychology Harold J. Leavitt, Kilpatrick Professor of Organizational Behavior and Psychology Emeritus Graduate School of Business Harold J Leavitt, Homa Bahrami, 1988 The overall structure of this edition is the same as in the past. The book moves from the smaller to the larger. We start with the individual as the focal unit, move to two-person relationships, and onward to issues of leadership, power, small groups, and whole organizations. This edition focuses more than ever on the managing process—on whole organizations and on managing relationships with other organizations. To underline that emphasis, we have included a new section called 'The Manager's Job.' That section deals with what managers

do, how they do it, why they do it, and how they should do it.

Improving Managerial Talent Hugh McCredie, 2017-11-22 Aimed at senior HRM and L&D specialists responsible for improving their organisation's managerial talent, *Improving Managerial Talent* covers the core findings of the author's and other published research. It provides a highly participative overview of personality and ability psychometrics, involving the opportunity for self-application. It reveals hard evidence of the extent to which such tests can add value to the prediction of managerial success and their link to requisite competencies. It shows how qualified testers, HR and line managers can each make a unique contribution to the selection process. The book goes on to show how management style is a product of personality and habit and how the acquisition and use of a complementary style can improve persuasiveness and the cultivation of interpersonal skill both for the manager and for those whom the manager might need to coach. It regards job-challenge as the primary engine of managerial growth, both for development in key result areas and for underlying personal competencies. The book provides the reader with some self-insights and an appreciation of validated, powerful, often in-house, methods for selecting and developing better managers. The methods on offer have been validated on a population of over 400 directors of small to medium-sized business units. They include a generic psychometric algorithm for the selection of managers, some unique findings on styles of managing, coaching and persuading based upon close observation of over 200 senior managers and a distinctive and powerful approach to developing interpersonal skills by (1) practice, (2) demonstration of alternatives and (3) reflection.
