

Nonsexist Research Methods Margrit Eichler

Nonsexist Research Methods Margrit Eichler 1991 In this publication the author provides a systematic approach to identifying, eliminating, and preventing sexist bias in social science research. She begins with a general discussion of the problems and implications of sexism in research, and then identifies four primary sources of bias: androcentricity, overgeneralization, gender insensitivity, and double standards.

Change of Plans Margrit Eichler 1995 *Change of Plans* raises questions that are not commonly posed, suggests new avenues for thought in city planning, and contributes to the growing literature on sustainability by merging it with a feminist approach. The book provides a concrete example of a team of academics, planners, and architects that has struggled to combine an environmental with a non-sexist perspective.

Outside the Lines Liora Salter 1997-01-16 Contributors to this collection address the ways in which interdisciplinarity is defined, positioned, and handled by researchers, universities, and critics, and examine such topics as "myths" of interdisciplinarity, postmodern critiques of interdisciplinarity, interdisciplinarity and research grant allocation, women's studies, Canadian studies, environmental studies, and "emerging" disciplines. The collection combines a theoretical examination of disciplinarity and interdisciplinarity as forms of knowledge production and organization with practical information about the basic difficulties and conundrums involved in the practice of interdisciplinary research.

Sociology John J. Macionis 1993 The title says it all. This tenth edition of the best-selling *Sociology* is a comprehensive book and multimedia package that offers readers a global perspective to help them better understand their own lives, provides a strong focus on social diversity that allows them to see the impact of race, class, and gender, and focuses on critical thinking. With technology integrated throughout, this new edition features hundreds of new research citations, as well as recent data from Census 2000 to present a cutting-edge picture of life both in the United States and around the world. Covering all aspects of sociology, this book describes sociological investigation, culture, society, interaction in everyday life, groups and organizations, deviance, sexuality, social stratification, social class in the United States, global inequality, gender stratification, race and ethnicity, aging, the economy, politics and government, family, religion, education, health and medicine, population and urbanization, collective behavior and social movements, and social change. An excellent resource for professionals in the field of sociology, this book is also an excellent read for non-academic hobbyists and life-long learners.

Social Research Tim May 1997 This revised and expanded edition of a bestselling text incorporates the latest developments in social research. Additions to each chapter do further justice to ideas on the research process in general and aspects of its practice in particular. Chapter summaries, questions for reflection and signposts to further reading are incorporated into a new textbook format. The aim of the book, however, remains the same: to bridge the gap between theory and methods in social research, each of which is essential to understanding the dynamics of social

relations. The style remains clear and accessible and the basic structure, similar. This book will have wide appeals as an introduction for undergraduates studying the methods and techniques of social science, as well as for postgraduate courses in research methods. In addition, it will enable those practising and teaching social research to stay abreast of key developments in the field.

A Life in Balance? Catherine Krull 2011-02-28 Magazine articles, talk shows, and commercials advise us that our happiness and well-being rest on striking a balance between work and family. It goes unsaid, however, that the advice is based on an outmoded and unrealistic ideal. This provocative volume challenges the notion often offered in support of neo-liberal agendas that paid work (employment) and unpaid work (caregiving and housework) are separate and competing spheres, rather than overlapping aspects of a single existence. Alternative approaches to integrating work and family must be taken into account if we hope to build truly equitable family and childcare policies.

Feminist Research Practice: A Primer Sharlene Nagy Hesse-Biber 2007 Provides a hands-on approach to learning feminist research methods. This book provides examples of the range of research questions feminists engage with issues of gender inequality, violence against women, body image issues, as well as issues of discrimination of "other/ed" marginalized groups.

Challenging Times Constance Backhouse 1992 By allowing the reader to draw comparisons between women's movements in Canada and the United States, *Challenging Times* shows that certain political and theoretical issues transcend international borders, ebbing and flowing between the two countries symbiotically. Topics discussed include the origins of "second-stage feminism," the strength of the women's movement within academic structures, and the challenges posed by racial, ethnic, and class diversity; violence against women; the promise and limits of legal reform; reproductive technology; and economic discrimination. Readers who are interested in the recent history of the North American women's movement will find answers to many of their questions about the victories, defeats, and fundamental challenges facing modern feminism. Those who have been active in the current wave of feminism, either as central participants or serious critics, will find *Challenging Times* equally fascinating because it endeavours to provide answers to pressing questions about the nature of feminism, the inter-relationships and tensions between different sectors of the movement, and the prospects for future growth. Many of the contributors to this volume have lived through and personally shaped the unfolding of the rich history of North American feminism. In addition to Backhouse and Flaherty, the contributors are Catharine A. MacKinnon, Greta Hofmann Nemiroff, Monique Bégin, Mariana Valverde, Naomi Black, Marjorie Griffin Cohen, Micheline de Sève, Micheline Dumont, Margrit Eichler, Sara M. Evans, Marianne A. Ferber, Lorraine Greaves, Marjorie Heins, M. Patricia Fernández Kelly, Patricia A. Monture-Okanee, Arun Mukherjee, Jean F. O'Barr, Christine Overall, Glenda Simms, and Jill Vickers.

Political Science Research Methods Janet Buttolph Johnson 1995 This concise introduction to political science tools covers the research process and scholars use of research methods.

Sustainability and the Social Sciences Egon Becker 1999-10 Exploring how the concept of sustainability might be applied in each of the social sciences, this book argues that environmental questions will increasingly dominate humanity in the course of the 21st century. This holds out the opportunity, and practical necessity, to stimulate new lines of theoretical development within the social sciences and new forms of intellectual cooperation across them.

Researching Women's Lives From A Feminist Perspective Mary Maynard 2013-10-11 Women's studies is a rapidly expanding field with a tremendous growth in the number of London courses available. As a result of this there has been increasing debate about the nature of feminist research. Can a specifically feminist methodology be identified? Which research methods are most appropriate in feminist work? What is the difference between a feminist approach and other forms of scholarship.; "Researching Women's Lives" explores these issues by focusing on the dynamics of doing research, rather than engaging in a theoretical discussion about research techniques.

Feminists are now involved in exploring a whole range of wider issues concerned with practical, political and ethical matters in undertaking research. In addition to issues such as violence, sexuality, political activity and popular culture, contributors also examine the impact of race, class, sexual orientation and age.

Philosophical Foundations of Social Research Methods: New strategies in social research

Malcolm Williams 2006 The 'philosophy of social research' is a subset of the philosophy of social science, but also an important subject area spanning methodology and method. The articles in this collection are the best exemplars of key positions in a very wide disciplinary field. Topics covered include science and art in the history of social research, positivism and antipositivism, language and the linguistic turn, realism and anti-realism, theory and theory choice, logic and models, prediction and laws, interpretation, probability and complexity.

Today's Woman in World Religions Arvind Sharma 1994-01-01 This book examines how the women's movement is affecting traditional religions and civilizations throughout the world. It reviews cases of global impact in Hinduism, Buddhism, Taoism, Confucianism, Judaism, Christianity, Islam, and Australian aboriginal religion. This volume completes the trilogy devoted to women in world religions, edited by Arvind Sharma. The second book in the series is entitled *Religion and Women*. The present work surveys the position of women in the religious traditions covered in the first volume of the trilogy, *Women in World Religions*, placing these traditions in contemporary context.

Feminist Research Peta Tancred-Sheriff 1988-10-01 The six parts of *Feminist Research: Prospect and Retrospect* parallel the female life cycle, highlighting themes such as the increasing power of medical definitions of female experience - including conception, pregnancy, childbirth - and the nature of depression in women. New perspectives are offered on the specificity of the female approach to both learning and teaching and are emphasized in considering problems such as dealing with alcohol abuse and wife-battering. For example, Margaret Eichler opens the initial section, "Reproduction and Maternity," with an analysis of the new reproductive technologies. Making use of interviews and quantitative material, Ann Quénairt and Jane Gordon take up the theme of the medicalization of reproduction, suggesting that it has encouraged women to see the foetus as taking priority over the needs of the mother during pregnancy. This section is completed by Martin Thomas' interesting approach to gender distribution. *Feminist Research: Prospect and Retrospect* offers a thorough look at the problems of women today, suggesting that society is encountering a period of strong reaction to the feminist movement of the late sixties and early seventies. Marguerite Anderson argues that only the "dynamite of research" will allow construction of a positive route forward. This collection includes essays in both English and French.

Companion to Women's and Gender Studies Nancy A. Naples 2020-06-08 A comprehensive overview of the interdisciplinary field of Women's and Gender Studies, featuring original contributions from leading experts from around the world. *The Companion to Women's and Gender Studies* is a comprehensive resource for students and scholars alike, exploring the central concepts, theories, themes, debates, and events in this dynamic field. Contributions from leading scholars and researchers cover a wide range of topics while providing diverse international, postcolonial, intersectional, and interdisciplinary insights. In-depth yet accessible chapters discuss the social construction and reproduction of gender and inequalities in various cultural, social-economic, and political contexts. Thematically-organized chapters explore the development of Women's and Gender Studies as an academic discipline, changes in the field, research directions, and significant scholarship in specific, interrelated disciplines such as science, health, psychology, and economics. Original essays offer fresh perspectives on the mechanisms by which gender intersects with other systems of power and privilege, the relation of androcentric approaches to science and gender bias in research, how feminist activists use media to challenge misrepresentations and inequalities, disparity between men and women in the labor market, how social movements continue to change Women's and Gender Studies, and more. Filling a significant gap in contemporary literature in the

field, this volume: Features a broad interdisciplinary and international range of essays Engages with both individual and collective approaches to agency and resistance Addresses topics of intense current interest and debate such as transgender movements, gender-based violence, and gender discrimination policy Includes an overview of shifts in naming, theoretical approaches, and central topics in contemporary Women's and Gender Studies Companion to Women's and Gender Studies is an ideal text for instructors teaching courses in gender, sexuality, and feminist studies, or related disciplines such as psychology, history, education, political science, sociology, and cultural studies, as well as practitioners and policy makers working on issues related to gender and sexuality.

Liberating Method Marjorie L. DeVault 1999 *Liberating Method* reflects the conviction that feminist insights can and should contribute to a sounder, more rigorous social science. In this book, one of the leading practitioners and teachers of feminist methodology examines profound questions about traditional and customary practices of social research. Marjorie DeVault argues that established methods too often ignore social oppression as she charts her quest for approaches that will more adequately represent marginalized groups.

Feminist Epistemology and Philosophy of Science Heidi E. Grasswick 2011-05-16 Having enjoyed more than twenty years of development, feminist epistemology and philosophy of science are now thriving fields of inquiry, offering current scholars a rich tradition from which to draw. In addition to a recognition of the power of knowledge itself and its effects on women's lives, a central feature of feminist epistemology and philosophy of science has been the attention they draw to the role of power dynamics within knowledge-seeking practices and the implications of these dynamics for our understandings of knowledge, science, and epistemology. *Feminist Epistemology and Philosophy of Science: Power in Knowledge* collects new works that address today's key challenges for a power-sensitive feminist approach to questions of knowledge and scientific practice. The essays build upon established work in feminist epistemology and philosophy of science, offering new developments in the fields, and representing the broad array of the feminist work now being done and the many ways in which feminists incorporate power dynamics into their analyses.

Breaking Out Again Liz Stanley 2002-03-11 *Breaking Out* is one of the classics of feminist sociology. In this new edition Liz Stanley and Sue Wise review the main developments in feminist thinking on research issues since the book first appeared.

Handbook of Feminist Research Sharlene Nagy Hesse-Biber 2012 The second edition of the Handbook of Feminist Research: Theory and Praxis, presents both a theoretical and practical approach to conducting social science research on, for, and about women. The Handbook enables readers to develop an understanding of feminist research by introducing a range of feminist epistemologies, methodologies, and methods that have had a significant impact on feminist research practice and women's studies scholarship. The Handbook continues to provide a set of clearly defined research concepts that are devoid of as much technical language as possible. It continues to engage readers with cutting edge debates in the field as well as the practical applications and issues for those whose research affects social policy and social change. It also expands on the wealth of interdisciplinary understanding of feminist research praxis that is grounded in a tight link between epistemology, methodology and method. The second edition of this Handbook will provide researchers with the tools for excavating subjugated knowledge on women's lives and the lives of other marginalized groups with the goals of empowerment and social change.
