*High Quality Care for All* Secretary of State for Health 2008 This review incorporates the views and visions of 2,000 clinicians and other health and social care professionals from every NHS region in England, and has been developed in discussion with patients, carers and the general public. The changes proposed are locally-led, patient-centred and clinically driven. Chapter 2 identifies the challenges facing the NHS in the 21st century: ever higher expectations; demand driven by demographics as people live longer; health in an age of information and connectivity; the changing nature of disease; advances in treatment; a changing health workplace. Chapter 3 outlines the proposals to deliver high quality care for patients and the public, with an emphasis on helping people to stay healthy, empowering patients, providing the most effective treatments, and keeping patients as safe as possible in healthcare environments. The importance of quality in all aspects of the NHS is reinforced in chapter 4, and must be understood from the perspective of the patient's safety, experience in care received and the effectiveness of that care. Best practice will be widely promoted, with a central role for the National Institute for Health and Clinical Excellence (NICE) in expanding national standards. This will bring clarity to the high standards expected and quality performance will be measured and published. The review outlines the need to put frontline staff in control of this drive for quality (chapter 5), with greater freedom to use their expertise and skill and decision-making to find innovative ways to improve care for patients. Clinical and managerial leadership skills at the local level need further development, and all levels of staff will receive support through education and training (chapter 6). The review recommends the introduction of an NHS Constitution (chapter 7). The final chapter sets out the means of implementation.

**Sex and Sexuality in Stuart Britain** Andrea Zuvich 2020-09-19 An expert in Stuart England examines the sexual lives of Britons in the seventeenth and early eighteenth centuries in this frank, informative, and revealing history. Acclaimed Stuart historian Andrea Zuvich explores the sexual mores of Stuart Britain, including surprising beliefs, bizarre practices, and ingenious solutions for infertility, impotence, sexually transmitted diseases, and more. Along the way, she reveals much about the prevailing attitudes towards male and female sexual behavior. Zuvich sheds light not only on the saucy love lives of the Royal Stuarts, but also on the dark underbelly of the Stuart era with histories of prostitution, sexual violence, infanticide, and sexual deviance. She looks at everything from what was considered sexually attractive to the penalties for adultery, incest, and fornication. *Sex and Sexuality in Stuart Britain* touches on the fashion, food, science, art, medicine, magic, literature, love, politics, faith and superstition of the day.

**Menopause** Dr. Louise Newson 2019-09-24 This new Concise Manual takes a straightforward look at menopause. What is it? When does it occur? What can be expected? How can it be managed? Dr Louise Newson is a well-known specialist in menopause and saw the need for a fact-based manual for women and their families. Menopause is a natural condition that affects all women at some stage of their life. At least one in four women have severe symptoms, which detrimentally affect their family, home and work life. This book will explain and clarify the stages and symptoms, and detail what treatments are safe and effective for particular needs. Migraines, depression, anxiety, osteoporosis, low libido, relationships, diet and HRT are just some of the areas covered in this new concise manual.

**Learning Difficulties and Sexual Vulnerability** Andrea Hollomotz 2011-08-15 People with learning difficulties are considerably more likely to experience sexual violence than non-disabled people, and for this reason they are often described as 'vulnerable'. However, the use of this label can in fact increase risk. This book argues that by seeing adults with learning difficulties as vulnerable and in need of protection, they are stripped of their autonomy and left with fewer skills that are needed to protect themselves from harm. Their different treatment, such as segregation and over-protection, can in fact increase their 'vulnerability'. The author discusses a range of social processes, such as sex education, self-determination, friendships, sexual relationships and social inclusion, and examines the risk and benefits associated with each. Drawing on the everyday experiences of 29 adults with learning difficulties, the author illustrates how people with learning difficulties can be capable of safeguarding themselves from harm, and makes a range of suggestions for enabling them to become better equipped at managing risk themselves. This book will be essential reading for practitioners working with people with learning difficulties, as well as students and academics in the fields of disability and social work.

**Lessons in Depravity** E. S. Williams 2013-06-14 Sex education is a highly controversial subject. The British Government believes that the answer to the teenage pregnancy crisis in the UK lies in providing children with yet more explicit sex education, starting at an even earlier age, with clear guidance on contraception and the 'morning-after' pill. And to encourage children to use contraception, the Government allows doctors to prescribe

contraceptives for under-16s without their parents' knowledge or consent. Opponents argue that sex education is not only ineffective in preventing teenage pregnancies, but that it encourages promiscuity. *Lessons in Depravity* examines sex education in a historical context. As the story of the sex education movement unfolds, so the link between the messages of the sex educators and the ideology of the sexual revolution becomes increasingly clear. Dr Williams explains that sex education, which has developed from the ideas of the sexual revolutionaries, is one of the great moral evils of our time in that it demoralises sexual conduct and misleads children with promises of 'safer sex'. Within a framework of moral relativism children are presented with sexual facts and encouraged to make 'informed' choices whether to have sex or not. Those who decide to have sex are helped to negotiate 'safer sex' with a partner. And sex educators oppose the 'moralisers', asserting that 'preaching' makes it less likely that children will make the right sexual choices. *Lessons in Depravity* exposes the moral relativism of sex education to the light of biblical truth. In view of the inherent moral dangers, no parent can afford to stand back and leave the moral instruction of their children in the hands of State sex education

*Dark Night of the Soul* Grant Montgomery Wolfe 2013-08 It is precisely 3:00 a.m. Detective Toni Rome's cell chirps, waking her from a recurring nightmare. "I've been bad again, Detective," the voice on the other end tells her. It is the voice of the Rosary Reaper, christened so by Toronto's media and members of the force. At each crime scene, a black rosary is found around the throats of his victims. It is the fourth call she has received in the past month, and as always, a brutalized body waits to be discovered. No trace and no clues other than the early hour whispers and the bloody taunts Catch me, carved into the victim's torsos. With a grandmother deep in the clutches of dementia to care for and a reawakened passion for the man who has just moved in next door, Toni and her partner Detective Sid Tillman find themselves pitted against a ruthless killer. A mind gone wrong. A vendetta long overdue. \* You, my darlings, are my confidants, my audience, spying while I exact my vengeance. Together we will wait in the woods, scheming, planning. Our hands are treacherous, glorious, guilty weapons. And so the vine ripens. Each of its sacrosanct thorns exacting another prick of blood owed. I am a master of disguise. I am wealthy beyond your imagination. I am thirty-four and will not celebrate my thirty-fifth birthday. My name is Nathan. I am a killer.

**Sexual Health Medicine** Darren Russell 2011 Authoritative coverage is offered of the biological, clinical, laboratory, psychosocial, and public-health aspects of sexual health medicine. A feature of the book is its holistic approach, with the client seen as a whole person, rather than simply the owner of a set of malfunctioning genitalia.

**An Exceptional Children's Guide to Touch** McKinley Hunter Manasco 2012-08-15 The rules of physical contact can be tricky to grasp and children with special needs are at a heightened risk of abuse. This friendly picture book explains in simple terms how to tell the difference between acceptable and inappropriate touch, thereby helping the child with special needs stay safe. Each story covers a different type of touch from accidental to friendly to hurtful and will help children understand how boundaries change depending on the context. It explores when and where it is okay to touch other people, when and where other people can touch you, why self touching sometimes needs to be private, and what to do if touch feels inappropriate. This book is an invaluable teaching resource and discussion starter for parents, teachers and carers working with children with special needs.

*We Love the NHS* Eleanor Levenson 2020-07-05 We are proud of our NHS and the people who work in it. But what does the NHS actually do and why was it founded? We love the NHS answers these questions and gives us glimpses into the lives of staff and patients.

*Analysing Gender in Healthcare* Sarah Cooper 2023-01-01 This book explores regulatory conundrums around adolescent sexual health, abortion and assisted reproductive technologies in the UK. In doing so, it seeks to examine the various stages at which women's reproductive health comes into contact with government action and assesses how these legal and policy fields are shaped through the conceptual lens of policy networks.

Transformed expectations of women's roles, along with developed biological capabilities and understandings of gender and sexuality have driven an increasingly complex politics of sex and reproduction. The book argues that assumed medial control over these issues is overshadowed by government calculations of cost-effectiveness. Moreover, decisions on the design of programmes and levels of access continually reflect traditional family formation. The outcome is unsurprisingly the marginalisation of women in publicly funded healthcare, but with a clear further impact on gender and sex minorities. COVID-19 has disrupted these dynamics further, altering the manner in which previously inhibited patients engage with the NHS. As the pandemic recedes it has become more timely than ever to consider the future of gendered healthcare in the UK, and to question the likelihood of long term change in the ability of patients to inform health policy decisions. The book will appeal to scholars and students of gender and health policy, law and politics, as well as healthcare practitioners.

*In Place of Fear* Aneurin Bevan 2018-01-04 The collective principle asserts that... no society can legitimately call itself civilised if a sick person is denied medical aid because of lack of means. — Aneurin Bevan.

**Ambulatory Gynaecology** Kevin Jones 2008-04 "This book sets out how the concept of ambulatory gynaecology can be applied to the main areas of gynaecological practice. It describes how national guidelines can be integrated into modern gynaecological practice in the context of the Government's National Health Service (NHS) plan and provides an essential guide to all practising clinicians." "A change from traditional care pathways to more cost effective, patient-centred approaches to medical practice lies at the heart of modern health service management. A 'see and treat' management philosophy is growing. 'One stop' clinics and 'day surgery' operations are replacing traditional outpatient consultations and inpatient surgery and the term 'ambulatory gynaecology' is being adopted to describe this philosophy."--BOOK JACKET.

**Critical Care Outreach** Lee Cutler 2006-07-11 Following the publication of the department of health document - Comprehensive Critical Care (2000), the majority of hospitals in England have set up Critical Care Outreach Teams. The Government provided a significant sum of money for hospitals to set up outreach services. There are now calls for an evaluation of their impact. The book is set out in five key sections. Each section features chapters that address the conceptual and real life issues. In each section there is a chapter, set out as a case study example, demonstrating how innovative practices and service developments are going on around critical care outreach. The book will draw upon the knowledge, experience and clinical expertise of senior critical care nurses and doctors from a critical care network. **Making Sense of Sex** Sarah Attwood 2008-05-15 Puberty is a time of huge change in the physical body, in emotional experience and in social relationships. Having an understanding of these developments and learning how to deal with them is essential, and for people with Asperger's syndrome it can be a challenge to get to grips with the social and emotional aspects of puberty, sex and relationships. This book is ideal for those who need clear, detailed explanations and direct answers to the many questions raised by puberty and sexual maturity. Sarah Attwood describes developments in both the male and female body, and explains how to maintain hygiene and personal care, and to promote general good health. She examines emotional changes, including moods and sexual feelings, and provides comprehensive information on sex, sexual health and reproduction. She looks at the nature of friendship, how it changes from childhood to adulthood and its importance as a basis for sexual encounter. She also offers coping strategies for different social experiences, from bullying to dating, and includes essential tips on the politics of mature behaviour, such as knowing the difference between public and personal topics of conversation. Making Sense of Sex is a thorough guide written in unambiguous language with helpful diagrams, explanations and practical advice for young people approaching puberty and beyond.

**Sexuality and Women with Learning Disabilities** Michelle McCarthy 1999 'Sexuality and Women with Learning Disabilities makes a significant contribution to both feminist and disability literature, because it challenges common assumptions about the sexuality of people with learning disabilities, forces a reconsideration of how this group of people are viewed by those around them and links gender and disability in its analysis.' - Tizard Learning Disability Review 'By tackling issues that have received little meaningful attention, McCarthy both makes a valuable contribution to the literature and provides a useful practical guide to those wishing to support their clients more effectively.' - Mental Health and Learning Disabilities Care 'The thoroughness and attention to detail with which McCarthy has investigated and written about the sexual lives of a small number of women with mild to moderate learning difficulties is to be commended. Drawing upon interviews with the women who participated in this study, there is explicit detail about the reality of their sexual lives that overall comes across as sad, poignant and often shocking, with a high level of sexual abuse revealed... however, McCarthy has a strong code of ethics and sensitivity and a reflexive honesty about her role and stance as a feminist researcher that removes any possibility or suggestion of prurient voyeurism or exploitation being a part of this research. McCarthy writes as a woman with and about women, allowing their voices about their sexual experiences to be heard through the medium of in-depth interviews. Within the book, the sexual experiences of women with learning disabilities are set in a wider policy and practice framework and discussed in relation to ideologies surrounding learning disability, gender and sexuality in a cultural context. The book ends with a chapter discussing and listing policy and practice recommendations, including suggestions about changes to the law... Overall, this was a convincing and compelling book that deserves serious attention and I would strongly recommend it to anyone with an interest in learning disability issues, including practitioners, carers, relatives, advocates and counsellors.' - CSPRD Newsletter In this study of women with mild and moderate learning disabilities, Michelle McCarthy investigates how these women experience their sexual lives, basing her research on interviews with the women themselves. She argues the importance of informing the work of those responsible at research, practice and policy levels with the voices of people with learning disabilities. In the interviews, women talk openly about what form their sexual activity takes and what it means for them, the circumstances in which it occurs, and the pleasures (or lack thereof) associated with it. These interviews directly shape the policy and practice recommendations the author makes. Michelle McCarthy's findings suggest that women with learning disabilities commonly find themselves engaged in sexual activity which is not to their liking and not of their choosing. A high level of sexual abuse was also reported. The author discusses this in relation to the cultural forces which have influenced Western perceptions of sexuality, feminism and theories and prejudices about learning disabilities. She also studied the impact of institutional and community settings on the sexuality of women with learning disabilities. In Sexuality and Women with Learning Disabilities, McCarthy makes recommendations for policy and practice which will protect this vulnerable group, and advises on education, support and seeking justice for abused women.

**Desires Reborn** Penny Pepper 2012-08-30 Desires Reborn is a collection of unique erotica. It is different because the central characters are disabled people, and disability sexuality can still make society uncomfortable. Complete with a special exclusive story with a Paralympic twist, the collection is published as the 2012 Paralympic Games hit London. The focus of the world will be on the disabled athletes. But as the sport heats up, what about ordinary disabled people? And sex? And love? Author Penny Pepper leads an extraordinary and dramatic life, not merely because she is disabled. Punk claimed her at an early age, and in the 1990s her own band Spiral Sky made no 2 in the Italian indie charts. For the print version of this book, Penny worked with Tony Cowell, brother of Simon Cowell of X-Factor fame. Winning an 'Erotic Oscar', nude modelling and burlesque performing are a few of the other roles she has found herself in as she strives to break down barriers and discrimination. Desires Reborn takes us on a new journey into the complications and yearnings of lust at its most demanding, and also the delicacy of first love, and of passion never known. 'Summer Lightening Days', recounts Linda deciding to lose her virginity to a hospital porter at a physiotherapy rehab centre, while Jean in 'Postcards for Jean' hears her niece making love and wonders if her own life will ever change. Ellie swelters with forbidden passion for a younger man in 'Lava Lamp,' and in a new exclusive story 'Bound and Devoted' both Adrian and Bethany have kinky secrets to spill against the backdrop of the 2012 Games. Rob Young, award winning writer, says: 'Desires Reborn is an intelligent examination of desire and disabled people. And if it is passion you're after why choose grey when you can have scarlet?' Penny's intelligence and sheer exuberance sing from the page. There is an elegant mind at work here. She distils her passion then filters it through craft without ever losing a drop of its raw emotion. That is a rare skill and should not to be underestimated.' Ultimately, Desires Reborn is a rude, lewd, sad and provocative collection on a subject every human being can relate to.

*The Politics of Pleasure in Sexuality Education* Louisa Allen 2013-12-17 Pleasure and desire have been important components of the vision for sexuality education for over 20 years. This book argues that there has been a lack of scrutiny over the political motivations that underpin research supportive of pleasure and desire within comprehensive sexuality education. In this volume, key researchers in the field consider how discourses related to pleasure and desire have been taken up internationally. They argue that sexuality education is clearly shaped by specific cultural and political contexts, and examine how these contexts have shaped the development of pleasure's inclusion in such programs. Via such discussions, this volume incites a re-configuration of thought regarding sexuality education's approach to pleasure and desire.

*Mind The Gap* Dr Karen Gurney 2020-03-05 'This book taught me so much about female desire. A must read!' Cherry Healey Did you know that there is an orgasm gap of around 30% between heterosexual couples when they have sex? In *Mind The Gap*, Dr Karen Gurney, a clinical psychologist and certified psychosexologist, explores not just this gap, but the gaps in our knowledge of so much of the most important new science around sex and desire. In this book, you will learn that nearly everything that you've been led to believe about female sexuality isn't actually true. And that, despite what you might think, it is possible to simultaneously feel little to no spontaneous desire and have a happy and mutually satisfying sex life long term. Exploring the mismatch between ideas about sex in our society and what the science tells us, *Mind The Gap* also explains how this disconnect lies at the root of many of our sexual problems. Combining science with case studies, practical exercises and tips, this is a book for anyone who wants to better understand the mechanics of desire and futureproof their sex life, for life.
