Last Couple Standing Matthew Norman 2020-03-17 A couple determined not to end up like their divorced friends try a radical experiment—and get in way over their heads—in this hilarious, heartfelt novel from the author of *We're All Damaged*. New York Post's Best Books to Read in Our Age of Social Isolation •

"[Matthew] Norman's funny and feeling writing makes for an irresistible read."—Esquire (Best Books of 2020) The Core Four

have been friends since college: four men, four women, four couples. They got married around the same time, had kids around the same time, and now, fifteen years later, they've started getting divorced around the same time, too. With three of the Core Four unions crumbling to dust around them, Jessica and Mitch Butler take a long, hard look at their own marriage. Can it be saved? Or is divorce, like some fortysomething zombie virus, simply inescapable? To maximize their chance at immunity, Jessica and Mitch try something radical. Their friends' divorces mostly had to do with sex—having it, not having it, wanting to have it with other people—so they decide to relax a few things. Terms are discussed, conditions are made, and together the Butlers embark on the great experiment of taking their otherwise happy, functional marriage and breaking some very serious rules. Jessica and Mitch are convinced they've hit upon the next evolution of marriage. But as lines are crossed and hot bartenders pursued, they each start to wonder if they've made a huge mistake. What follows is sexy, fun, painful, messy, and completely surprising to them both. Because sometimes doing something bad is the only way to get to the heart of what's really good.

Healing Traditions of the Northwestern Himalayas Pankaj Gupta 2014-06-30 This book discusses the perception of disease, healing concepts and the evolution of traditional systems of healing in the Himalayas of Himachal Pradesh, India. The chapters cover a diverse range issues: people and knowledge systems, healing in

ancient scriptures, concept of sacredness and faith healing, food as medicament, presumptions about disease, ethno-botanical aspects of medicinal plants, collection and processing of herbs, traditional therapeutic procedures, indigenous Materia medica, etc. The book also discusses the diverse therapeutic procedures followed by Himalayan healers and their significance in the socio-cultural life of Himalayan societies. The World Health Organization defines traditional medicine as wisdom, skills, and practices based on theories, beliefs, and experiences indigenous to different cultures, used in the prevention, diagnosis, improvement or treatment of physical and mental illness and maintenance of health. In some Asian and African countries, 80% of the population depends on traditional medicine for primary health care. However, the knowledge of these conventional healing techniques and traditions associated with conveying this knowledge are slowly disappearing. The authors highlight the importance of safeguarding this indigenous knowledge in the cultural milieu of the Himachal Himalayas. This book will be an important resource for researchers in medical anthropology, biology, ethno-biology, ecology, community health, health behavior, psychotherapy, and Himalayan studies.

Fine Boys Eghosa Imasuen 2021-09-28 A coming-of-age tale told from the perspective of Nigeria's Generation X, caught amid the throes of a nascent pro-democracy movement, demoralizing corruption, and campus violence. Ewaen is a Nigerian teenager, bored at home in Warri and eager to flee from his parents' unhappy marriage and incessant quarreling. When Ewaen is admitted to the University of Benin, he makes new friends who, like him, are excited about their newfound independence. They hang out in parking lots, trading gibes in pidgin and English and discovering the pleasures that freedom affords them. But when university strikes begin and ruthlessly violent confraternities unleash mayhem on their campus, Ewaen and his new friends must learn to adapt—or risk becoming the confras' next unwilling

recruits. In his trademark witty, colloquial style, critically acclaimed author Eghosa Imasuen presents everyday Nigerian life against the backdrop of the pro-democracy riots of the 1980s and 1990s, the lost hopes of June 12 (Nigeria's Democracy Day), and the terror of the Abacha years. *Fine Boys* is a chronicle of time, not just in Nigeria, but also for its budding post-Biafran generation.

The Simpsons and Philosophy William Irwin 2001-02-01 This unconventional and lighthearted introduction to the ideas of the major Western philosophers examines The Simpsons — TV's favorite animated family. The authors look beyond the jokes, the crudeness, the attacks on society — and see a clever display of irony, social criticism, and philosophical thought. The writers begin with an examination of the characters. Does Homer actually display Aristotle's virtues of character? In what way does Bart exemplify American pragmatism? The book also examines the ethics and themes of the show, and concludes with discussions of how the series reflects the work of Aristotle, Marx, Camus, Sartre, and other thinkers.

Successes in African Agriculture Haggblade, Steven 2010-01-01 Sub-Saharan Africa is one of the poorest regions of the world. Because most Africans work in agriculture, escaping such dire poverty depends on increased agricultural productivity to raise rural incomes, lower food prices, and stimulate growth in other economic sectors. Per capita agricultural production in sub-Saharan Africa has fallen, however, for much of the past half-century. Successes in African Agriculture investigates how to reverse this decline. Instead of cataloging failures, as many past studies have done, this book identifies episodes of successful

agricultural growth in Africa and identifies processes, practices, and policies for accelerated growth in the future. The individual studies follow developments in, among other areas, the farming of maize in East and Southern Africa, cassava across the middle belt of Africa, cotton in West Africa, horticulture in Kenya, and dairying in East Africa. Drawing on these case studies and on consultations with agricultural specialists and politicians from across sub-Saharan Africa -- undertaken in collaboration with the African Union's New Partnership for Africa's Development -- the contributors identify two key determinants of positive agricultural performance: agricultural research to provide more productive and sustainable technologies to farmers and a policy framework that fosters market incentives for increasing production. The contributors discuss how the public and private sectors can best coordinate the convergence of both factors. Given current concerns about global food security, this book provides timely and important resources to policymakers and development specialists concerned with reversing the negative trends in food insecurity and poverty in Africa.

Handbook of African Medicinal Plants, Second Edition Maurice M. Iwu 2014-02-04 With over 50,000 distinct species in sub-Saharan Africa alone, the African continent is endowed with an enormous wealth of plant resources. While more than 25 percent of known species have been used for several centuries in traditional African medicine for the prevention and treatment of diseases, Africa remains a minor player in the global natural products market largely due to lack of practical information. This updated and expanded second edition of the *Handbook of African Medicinal Plants* provides a comprehensive review of more than 2,000 species of plants employed in indigenous African medicine, with full-color photographs and references from over 1,100 publications. The first part of the book contains a catalog of the plants used as ingredients for the preparation of traditional remedies, including their medicinal uses and the parts of the plant used. This is followed by a pharmacognostical profile of 170 of the major herbs, with a brief description of the diagnostic features of the leaves, flowers, and fruits and monographs with botanical names, common names, synonyms, African names, habitat and distribution, ethnomedicinal uses, chemical constituents, and reported pharmacological activity. The second part of the book provides an introduction to African traditional medicine, outlining African cosmology and beliefs as they relate

to healing and the use of herbs, health foods, and medicinal plants. This book presents scientific documentation of the correlation between the observed folk use and demonstrable biological activity, as well as the characterized constituents of the plants.

INDIA'S NEW CAPITALISTS Harish Damodaran 2018-11-25 It's no secret that certain social groups have predominated India's business and trading history, with business traditionally being the preserve of particular 'Bania' communities. However, the past four or so decades have seen a widening of the social base of Indian capital, such that the social profile of Indian business has expanded beyond recognition, and entrepreneurship and commerce in India are no longer the exclusive bastion of the old mercantile castes. In this meticulously researched book - acclaimed for being the first social history to document and understand India's new entrepreneurial groups - Harish Damodaran looks to answer who the new 'wealth creators' are, as he traces the transitional entry of India's middle and lower peasant castes into the business world. Combining analytical rigour with journalistic flair, India's New Capitalists is an essential read for anyone seeking to understand the culture and evolution of business in contemporary South Asia.

The Psychological Basis of Perfumery J. Stephan Jellinek 2012-12-06 During the many years of its publication and subsequent revisions, Paul Jellinek's book has been the standard work on its subject. This new edition, translated into English for the first time, was conceived in response to the increased interest in recent years in perfumes and the sense of smell. This interest has come not only from within the highly competitive perfumery industry, but also from psychologists and market researchers. The original text has impressively withstood the test of time and the approach of this new book has been to supplement it with chapters that are now of critical importance, but which were only touched upon in the original book. A market researcher looks at why people use perfumes; a psychologist examines the motivation of perfume choice; another psychologist discusses odours and a perfumer looks at the effects of odours on human experience and behaviour. In the final chapter the editor compares the original author's views with those of today's experts and suggests which aspects are still valid and in what areas divergent views now prevail. This book is written principally to provide a scientific basis to the craft of perfumery and to enable formulators and marketers to understand why the smells they create and sell have the effect they do. It allows a systematic approach to the development of these products. Others outside the industry, including psychologists in academia, will find the book an essential reference source.

Lavender, father of three, instructor of women's studies, and self-proclaimed genius who is beginning to think he knows nothing about women. Intelligent and funny, Katie is haunted by a violent childhood. Her husband's "tortured genius" both exhausts and amuses her. The Lavenders' stagnant world is roiled when Katie's pregnant sister, January, moves in. Obsessed with her lost love, '80s rocker Stevie Flame, January is on a quest to reconnect with her glittery, big-haired past. A free spirit to the point of using other people's toothbrushes without asking, she drives Wilson crazy. Perfumes, Cosmetics and Soaps William Arthur Poucher 1942

Poucher's Perfumes, Cosmetics and Soaps H. Butler 2013-06-29

Poucher's *Perfumes Cosmetics and Soaps* has been in print since 1923 and is the classic reference work in the field of cosmetics.

Now in a fully updated 10th edition, this new volume provides a firm basic knowledge in the science of cosmetics (including toiletries) as well as incorporating the latest trends in scientific applications and legislation which have occurred since the 9th edition. This edition will not only be an excellent reference book for students entering the industry but also for those in specialized research companies, universities and other associated institutions who will be able to gain an overall picture of the modern cosmetic science and industry. The book has been logically ordered into four distinct parts. The historical overview of Part 1 contains an essay demonstrating William Arthur Poucher's influence on the 20th Century cosmetics industry as well as a chapter detailing the long history of cosmetics. Part 2 is a comprehensive listing of the properties and uses of common cosmetic types, ranging from Antiperspirants through to Sunscreen preparations. There are an increased number of raw materials in use today and their chemical, physical and safety benefits are carefully discussed along with formulation examples. The many additions since the last edition demonstrate the dramatic recent expansion in the industry and how changes in legal regulations affecting the development, production and marketing of old, established and new products are operative almost worldwide. Information on specialist products for babies and others is included within individual chapters. The chapters in Part 3 support and outline the current guidelines regarding the assessment and control of safety and stability. This information is presented chemically, physically and microbiologically. Part 3 chapters also detail requirements for the consumer acceptability of both existing and new products. Those legal regulations now in force in the EU, the USA and Japan are carefully described in a separate chapter and

the remaining chapters have been extensively updated to explain the technical and practical operations needed to comply with regulations when marketing. This information will be invaluable to European Union and North American companies when preparing legally required product information dossiers. The final chapters in Part 4 contain useful information on the psychology of perfumery as well as detailing methods for the conduct of assessment trials of new products. As ingredient labelling is now an almost universal legal requirement the International Nomenclature of Cosmetics Ingredients (INCI) for raw materials has been used wherever practicable. The advertised volume is the 10th edition of what was previously known as volume 3 of Poucher's Cosmetics and Soaps. Due to changes in the industry there are no plans to bring out new editions of volume 1 and 2.
