Clinical Management of Sex

Addiction - Patrick Carnes  
2013-06-17

This is the first comprehensive volume of the clinical management of sex addiction. Collecting the work of 28 leaders in this emerging field, the editors provide a long-needed primary text about how to approach treatment with these challenging patients. The book serves as an excellent introduction for professionals new to the field as well as serving as a useful reference tool. The contributors are literally the pioneers of one of the last frontiers of addiction medicine and sex therapy. With a growing awareness of sex addiction as a problem, plus the advent of cybersex compulsion, professional clinicians are being confronted

with sexual compulsion with little clinical or academic preparation. This is the first book distilling the experience of the leaders in this emerging field. With a focus on special populations, it also becomes a handy problem-solving tool. Readable, concise, and filled with useful interventions, it is a key text for a problem clinicians must be able to identify. It is destined to be a classic reference.

**Ethics and Professional Issues in Couple and Family Therapy** - Lorna Hecker  
2012-07-26

While on some issues couple and family therapists have an exquisitely clear direction from professional codes of ethics, others fall under gray areas that instead rely on therapists making reasoned ethical decisions. Therapists need to develop ethical sensitivity to potential ethical issues in order to decrease their risk in practice, and increase their

maneuverability in the therapy room. In *Ethics and Professional Issues in Couple and Family Therapy*, Lorna Hecker and her contributing authors address various clinical scenarios that demonstrate the complex ethical situations couple and family therapists face every day. Some points discussed in this holistic book include boundary, power, and privilege issues, along with unique ethical issues in practicing therapy with children. Risk issues when working with potential danger, suicide, and partner violence are also explored. Each chapter sensitizes readers to potential ethical issues and provides a model for ethical decision making that best promotes good on behalf of clients. Couple and family therapists will find this text an invaluable and inexhaustible resource.

**Boundary Issues and Dual**

**Relationships in the Human**

**Services** - Frederic G. Reamer

2020-11-24

Should a therapist disclose personal information to a client, accept a client's gift, or provide a former client with a job? Is it appropriate to exchange e-mail or text messages with clients or correspond with them on social networking websites? Some acts, such as initiating a sexual relationship with a client, are clearly prohibited, yet what about more subtle interactions, such as hugging or accepting invitations to a social event? Is maintaining a friendship with a former client or a client's relative a conflict of interest? Frederic G. Reamer offers a frank analysis of a range of boundary issues that human-service practitioners may confront. He confronts the ethics of intimate relationships with clients and former clients, the healthy parameters of practitioners' self-disclosure, the giving and receiving of gifts and favors, and the unavoidable and unanticipated circumstances of social

encounters and geographical proximity. With case studies addressing challenges in the mental health field, school contexts, child welfare, addiction programs, home health care, elder services, and prison, rural, and military settings, Reamer offers effective, practical risk-management models that prevent problems and help balance dual relationships. Since the publication of the previous edition of *Boundary Issues and Dual Relationships in the Human Services* in 2012, digital technology has transformed how human-service professionals deliver services to clients. This third edition brings the book up to date, adding discussion of the ways in which practitioners' online communications and technology-based relationships with clients can violate ethical standards and providing practical advice for how to resolve boundary issues.

**The Wages of Seeking Help** -

Carol Bohmer 2000-03-30

Because women are more likely to seek professional help, and

because they are more likely to be the victims of abuse by people in positions of power, women who do seek professional assistance may end up being victims of sexual exploitation by the very people from whom they seek help.

Unlike other problems which primarily affect women, such as rape and domestic violence, this issue has received little public attention and has had little success in building a social movement to combat it.

Bohmer analyzes the social construction of this unique problem and the response it has received from individuals, groups, and various institutions, such as the law and the regulatory process.

Bohmer explains why this problem has a different history from other problems facing primarily women, and why it has not had much success in stirring social movement for addressing the problem. Using other issues of feminist concern, Bohmer connects the problem of professional sexual exploitation to issues of gender and power and shows the ways

in which women seeking help are punished for doing so. In addition, the available self-help groups and organizations are examined in light of their benefits and relative lack of success in combating the problem. The legal and regulatory systems in place are also discussed in terms of the ways in which society responds to new social problems as they receive public attention.

*The New Harvard Guide to Women's Health* - Karen J. Carlson M.D. 2004-04-06

With the publication in 1996 of *The Harvard Guide to Women's Health*, women seeking answers to questions about their health had access to the combined expertise of physicians from three of the world's most prestigious medical institutions: Harvard Medical School, Massachusetts General Hospital, and Brigham and Women's Hospital. With complete information on women's health concerns, physical and behavioral, this A to Z reference quickly became a definitive resource, praised especially for its coverage of

topics not previously considered under the umbrella of women's health. The New Harvard Guide to Women's Health reunites the authors to bring a valued health reference up to date for a new generation--and for those women who have come to rely on the Harvard Guide and are now wondering what to do about their health as they enter a new stage of life, asking questions like the following: I've been on hormone replacement therapy. Should I stop? How? Could this rash be lupus? I've been on the Pill. What is my risk for stroke? Fat is bad, fat is good: What should I believe? And what's left to eat? When does ordinary worry become chronic anxiety? What screening tests do I need now? In addition to revised recommendations reflecting the current medical thinking on menopause and hormone replacement therapy, the New Harvard Guide includes updated recommendations about cardiac health and heart disease--the #1 killer of women in the United States entries

reflecting recent advances in the understanding and treatment of autoimmune diseases better coverage of health concerns throughout a woman's life span, from her first period to menopause and beyond, with a new entry on perimenopause expanded nutritional recommendations, including a unique chart of the U.S. government's Daily Reference Intakes for micronutrients, broken down for teens and women whose needs may differ because they are pregnant, breastfeeding, or postmenopausal updated information on over-the-counter medications, prescription drugs, procedures, screenings, and diagnostic tests

*The Psychology of Women* - Margaret W. Matlin 2004

Appropriate for students from a wide variety of backgrounds, this comprehensive text captures women's own experiences through direct quotations and an emphasis on empirical research.

Profiles current research on women's emotional health while offering advice about preventing, recognizing, and treating the particular psychological disturbances and disorders that affect women.

**None so Fit to Break the Chains: Marx's Ethics of Self-Emancipation** - Dan Swain 2019-09-02

In *None so Fit to Break the Chains* Dan Swain offers an interpretation of Marx's ethics that foregrounds his commitment to working class self-emancipation and uses it as a guiding thread to interpret the different aspects of Marx's ethical thought.

**and Professional Development of the Substance Abuse Counselor**

- U.S. Department of Health and Human Services  
2019-11-23

This Treatment Improvement Protocol (TIP) is a companion to TIP 51, Substance Abuse Treatment: Addressing the Specific Needs of Women. These two volumes look at how gender-specific treatment strategies can improve outcomes for men and women, respectively. The physical, psychological, social, and spiritual effects of substance use and abuse on men can be quite different from the effects on women, and those differences have implications for treatment in behavioral health settings. Men are also affected by social and cultural forces in different ways than women, and physical differences between the genders influence substance use and recovery as well. This TIP, *Addressing the Specific Behavioral Health Needs of Men*, addresses these distinctions. It provides

practical information based on available evidence and clinical experience that can help counselors more effectively treatment with substance use disorders
