Going Bovine - Libba Bray 2010-09-28

From the author of the Gemma Doyle trilogy and The Diviners series, this groundbreaking New York Times bestseller and winner of the Michael L. Printz Award for literary excellence is "smart, funny, and layered," raves Entertainment Weekly. All 16-year-old Cameron wants is to get through high school—and life in general—with a minimum of effort. It's not a lot to ask. But that's before he's given some bad news: he's sick and he's going to die. Which totally sucks. Hope arrives in the winged form of Dulcie, a loopy punk angel/possible hallucination with a bad sugar habit. She tells Cam there is a cure—if he's willing to go in search of it. With the help of a death-obsessed, video-gaming dwarf and a yard gnome, Cam sets off on the mother of all road trips through a twisted America . . . into the heart of what matters most. From acclaimed author Libba Bray comes a dark comedic journey that poses the questions: Why are we here? What is real? What makes microwave popcorn so good? Why must we die? And how do we really learn to live? "A hilarious and hallucinatory quest."—The New York Times "Sublimely surreal."—People "Libba Bray's fabulous new book will, with any justice, be a cult classic. The kind of book you take with you to college, in the hopes that your roommate will

turn out to have packed their own copy, too. Reading it is like discovering an alternate version of The Phantom Tollbooth, where Holden Caulfield has hit Milo over the head and stolen his car, his token, and his tollbooth. There's adventure and tragedy here, a sprinkling of romance, musical interludes, a battle-ready yard gnome who's also a Norse God, and practically a chorus line of physicists. Which reminds me: will someone, someday, take Going Bovine and turn it into a musical, preferably a rock opera? I want the sound track, the program, the T-shirt, and front row tickets."—Kelly Link, author of Get in Trouble, finalist for the Pulitzer Prize

The Pandemic Century - Mark Honigsbaum 2019-03-09

Like sharks, epidemic diseases always lurk just beneath the surface. This fast-paced history of their effect on mankind prompts questions about the limits of scientific knowledge, the dangers of medical hubris, and how we should prepare as epidemics become ever more frequent. Ever since the 1918 Spanish influenza pandemic, scientists have dreamed of preventing catastrophic outbreaks of infectious disease. Yet, despite a century of medical progress, viral and bacterial disasters continue to take us by surprise, inciting panic and dominating news cycles. From the Spanish

flu and the 1924 outbreak of pneumonic plague in Los Angeles to the 1930 'parrot fever' pandemic and the more recent SARS, Ebola, and Zika epidemics, the last 100 years have been marked by a succession of unanticipated pandemic alarms. Like man-eating sharks, predatory pathogens are always present in nature, waiting to strike; when one is seemingly vanquished, others appear in its place. These pandemics remind us of the limits of scientific knowledge, as well as the role that human behaviour and technologies play in the emergence and spread of microbial diseases.

The Aeneid - Virgil 2022-09-04

DigiCat Publishing presents to you this special edition of "The Aeneid" by Virgil. DigiCat Publishing considers every written word to be a legacy of humankind. Every DigiCat book has been carefully reproduced for republishing in a new modern format. The books are available in print, as well as ebooks. DigiCat hopes you will treat this work with the acknowledgment and passion it deserves as a classic of world literature.

The Times Index - 2010

Indexes the Times, Sunday times and magazine, Times literary supplement, Times educational supplement, Times educational supplement Scotland, and the Times higher education supplement.

The Christian Science Monitor Index - 1998

Backpacker - 2007-09

Backpacker brings the outdoors straight to the reader's doorstep, inspiring and enabling them to go more places and enjoy nature more often. The authority on active adventure, Backpacker is the world's first GPS-enabled magazine, and the only magazine whose editors personally test the hiking trails, camping gear, and survival tips they publish.

Backpacker's Editors' Choice Awards, an industry honor recognizing design, feature and product innovation, has become the gold standard against which all other outdoor-industry awards are measured.

The Wall Street Journal - 2008

Animalkind - Ingrid Newkirk 2021-01-19

The founder and president of PETA, Ingrid Newkirk, and bestselling author Gene Stone explore the wonders of animal life with "admiration and empathy" (The New York Times Book Review) and offer tools for living more kindly toward them. In the last few decades, a wealth of new information has emerged about who animals are: astounding beings with intelligence, emotions, intricate communications networks, and myriad abilities. In *Animalkind*, Ingrid Newkirk and Gene Stone present these findings in a concise and awe-inspiring way, detailing a range of surprising discoveries, like that geese fall in love and stay with a partner for life, that fish "sing" underwater, and that elephants use their trunks to send subsonic signals, alerting other herds to danger miles away.

Newkirk and Stone pair their tour through the astounding lives of animals with a guide to the exciting new tools that allow humans to avoid using or abusing animals as we once did. Whether it's medicine, product testing, entertainment, clothing, or food, there are now better options to all the uses animals once served in human life. We can substitute warmer, lighter faux fleece for wool, choose vegan versions of everything from shrimp to marshmallows, reap the benefits of animal-free medical research, and scrap captive orca exhibits and elephant rides for virtual reality and animatronics. *Animalkind* provides a fascinating look at why our fellow living beings deserve our respect, and lays out the steps everyone can take to put this new understanding into action.

Meat - Simon Fairlie 2010-12-17

Meat: A Benign Extravagance is a groundbreaking exploration of the difficult environmental, ethical and health issues surrounding the human consumption of animals. Garnering huge praise in the UK, this is a book that answers the question: should we be farming animals, or not? Not a simple answer, but one that takes all views on meat eating into account. It lays out in detail the reasons why we must indeed decrease the amount of meat we eat, both for the planet and for ourselves, and yet explores how different forms of agriculture--including livestock--shape our landscape and culture. At the heart of this book, Simon Fairlie argues that society needs to re-orient itself back to the land, both physically and spiritually, and explains why an agriculture that can most readily achieve

this is one that includes a measure of livestock farming. It is a well-researched look at agricultural and environmental theory from a fabulous writer and a farmer, and is sure to take off where other books on vegetarianism and veganism have fallen short in their global scope.

Brucellosis in Humans and Animals - Michael J. Corbel 2006

Brucellosis, also known as undulant fever, Mediterranean fever, or Malta fever, is an important human disease in many parts of the world. It is a zoonosis and the infection is almost invariably transmitted to people by direct or indirect contact with infected animals or their products. These Guidelines are designed as a concise, yet comprehensive, statement on brucellosis for public health, veterinary and laboratory personnel without access to specialized services. They are also to be a source of accessible and updated information for such others as nurses, midwives and medical assistants who may have to be involved with brucellosis in humans. Emphasis is placed on fundamental measures of environmental and occupational hygiene in the community and in the household as well as on the sequence of actions required to detect and treat patients.

The Bad Bug Book - FDA 2004

The Bad Bug was created from the materials assembled at the FDA website of the same name. This handbook provides basic facts regarding foodborne pathogenic microorganisms and natural toxins. It brings together in one place information from the Food & Drug Administration, the Centers for Disease Control & Prevention, the USDA Food Safety Inspection Service, and the National Institutes of Health.

The Global Guide to Animal Protection - Andrew Linzey 2013-06-01

Raising awareness of human indifference and cruelty toward animals, The Global Guide to Animal Protection includes more than 180 introductory articles that survey the extent of worldwide human exploitation of animals from a variety of perspectives. In addition to entries on often disturbing examples of human cruelty toward animals, the book provides inspiring accounts of attempts by courageous individuals—including Jane Goodall, Shirley McGreal, Birute Mary Galdikas, Richard D. Ryder, and Roger Fouts—to challenge and change exploitative practices. As concern for animals and their welfare grows,

this volume will be an indispensable aid to general readers, activists, scholars, and students interested in developing a keener awareness of cruelty to animals and considering avenues for reform. Also included is a special foreword by Archbishop Desmond Tutu, urging readers to seek justice and protection for all creatures, humans and animals alike.

An Alien Harvest - Linda Moulton Howe 2014-06-21

Los Angeles Magazine - 2003-11

Los Angeles magazine is a regional magazine of national stature. Our combination of award-winning feature writing, investigative reporting, service journalism, and design covers the people, lifestyle, culture, entertainment, fashion, art and architecture, and news that define Southern California. Started in the spring of 1961, Los Angeles magazine has been addressing the needs and interests of our region for 48 years. The magazine continues to be the definitive resource for an affluent population that is intensely interested in a lifestyle that is uniquely Southern Californian.

Sustainable Energy - David J. C. MacKay 2009

Fast Food Nation - Eric Schlosser 2012

Explores the homogenization of American culture and the impact of the fast food industry on modern-day health, economy, politics, popular culture, entertainment, and food production.

Mad Cowboy - Howard F. Lyman 2001-07-07

Told by the man who kicked off the infamous lawsuit between Oprah and the cattlemen, Mad Cowboy is an impassioned account of the highly dangerous practices of the cattle and dairy industries. Howard Lyman's testimony on The Oprah Winfrey Show revealed the deadly impact of the livestock industry on our well-being. It not only led to Oprah's declaration that she'd never eat a burger again, it sent shock waves through a concerned and vulnerable public. A fourth-generation Montana rancher, Lyman investigated the use of chemicals in agriculture after developing a spinal tumor that nearly paralyzed him. Now a vegetarian, he blasts through the propaganda of beef and dairy interests—and the

government agencies that protect them—to expose an animal-based diet as the primary cause of cancer, heart disease, and obesity in this country. He warns that the livestock industry is repeating the mistakes that led to Mad Cow disease in England while simultaneously causing serious damage to the environment. Persuasive, straightforward, and full of the down-home good humor and optimism of a son of the soil, Mad Cowboy is both an inspirational story of personal transformation and a convincing call to action for a plant-based diet—for the good of the planet and the health of us all.

CDC Yellow Book 2018: Health Information for International Travel -

Gary W. Brunette 2017

An up-to-date, definitive guide to staying safe and healthy anywhere in the world. Completely updated for 2018 with expanded guidelines for Zika virus, cholera vaccine, and more.

Scientific American - 1881

Monthly magazine devoted to topics of general scientific interest.

[Gulp: Adventures on the Alimentary Canal](#) - Mary Roach 2014-04

The humorous science writer offers a tour of the human digestive system, explaining why the stomach doesn't digest itself and whether constipation can kill you.
