Anjasa Between Dungeons Collection J.M. Keep 2013-05-12 A sensual trip through the depraved life of an elven slut. She had been beaten and bruised, raped and enslaved, and it shaped her in ways she couldn't possibly comprehend. All she knew was that she only felt whole when someone was touching her; fucking her. She craved it, every minute of every day. The more exotic the men, the bigger they were, the harder they handled her, the more she came. Anjasa will be sure to have you squirming before she's done. It answers the question, "Just what do my characters do between dungeons?" This bundle contains the entire Anjasa Between Dungeons collection of three high fantasy, erotic shorts.

Dragon's Lair: Anjasa was fucked, but not in the way she liked. At least, not until she tempts the dragon-born jailor to come her way. Still, when she finds out he's too big, even for her, she has to get creative.

Cutting a Deal: Anjasa finds herself in a new, sprawling city, yet already she has two men watching her every movement. When they try to extract her to see their employer, she won't be going quietly. Even though they're all strangers, that

doesn't mean Anjasa won't fuck them - after all, she was made for this. Holographic Reprocessing Lori S. Katz 2012-08-06 Holographic Reprocessing (HR) is a cognitive-experiential psychotherapy based on Seymour Epstein's theory of personality, cognitive experiential self-theory (CEST). According to CEST, people have a natural adaptive system for processing information. If an emotionally distressing event is not fully processed, people may attempt to resolve the stuck point, known as emotional blockage, by unconsciously setting up situations that recreate the original experience. A reenactment can facilitate a healthy confrontation of the issue, but it is not uncommon that this reenactment serves to reinforce negative perceptions and behavioral reactions. HR gives clients an opportunity to gain a new awareness and understanding of their re-enactments, thereby facilitating a constructive reorganization of their perceptual, emotional and

behavioral tendencies. The hologram is used as a model for describing a pattern of these re-enactments - as each experience is a whole experience unto itself as well as being a part of a larger whole, and each experience contains information consistent with the larger pattern. The experience is holographic, and is termed an experiential hologram. These experiential holograms are holistic, integrative, and unique in terms of existing constructs such as a schema, belief, expectation, self-fulfilling prophecy, sensitivity, or script - constructs that are largely cognitive and only part of the holographic picture. The hologram also activates an experiential reaction including affect, sensations, and associations. The model of the experiential hologram is intended to more closely explain human experience, as it is assumed that experience itself is processed in a complex array of cognitions, affective reactions, sensations and associations. Written by a clinical psychologist specializing in the trauma therapy, this volume will guide mental health professionals through the use of holographic reprocessing in their treatment of trauma victims, from sufferers of PTSD to rape victims.
