This is a 3-book bundle, which addresses various subtopics, including but not limited to these: Book 1: What is the psychology behind body language? What can we learn from what people aren't saying? These are common questions. But although they are often asked, they aren't always clearly answered. Today, this book can change all that. It can give you precise guidelines on how to read people's signs and nonverbal cues. Book 2: Body language can be used for many things. After some basic techniques that involve mirroring and adjusting to people's moods, the book gets a bit more specific. Several situations are highlighted in which nonverbal communication and social cues can be extremely useful. The first one is negotiations. Imagine if you could read all the signs of the person you are negotiating with. Could you get a better deal if you could read his or her mood? You bet. Do you think you could sense how far they are willing to go better? Sure. Body language is so important during negotiations because nobody typically puts all his or her cards on the table. Book 3: This book focuses on three important aspects of body language: Leadership, reading hints, and making eye contact. It sounds so simple, but these are three of the most important factors in conversations between two people, or in a group, and they define who we are, what message we convey, and how to interpret those messages every day. What is a person thinking when he or she raises their eyebrows, lets shoulders slump, or crosses their arms? What does eye contact signify in different situations? Learn more. Find out what we are saying when we are not saying anything.

The Body Language Project: Dating, Attraction and Sexual Body Language -

Love Signals - David Givens 2006-01-10

A world renowned anthropologist explores the nonverbal signs, signals, and cues human beings exchange to attract and keep their mates. As a medium of communication, Love's silent language predates speech by millions of years. Today, we still express emotions and feelings largely apart from words. The postures, gestures, and facial cues of attraction are universal, in all societies and cultures. According to Dr. Givens, courtship moves slowly through five distinct phases: attracting attention, recognition phase, conversation phase, touching phase, making love. Since potential mates "test" each other before uniting as one, courtship is a choreographed give and take of signs granting physical and emotional closeness. Love Signals is part ethnography and part how-to. Dr. Givens documents the little courting rituals witnessed in elevators, on subways, and in the workplace. He examines the essential role the face plays in courtship and how it can be optimally displayed. He decodes the body to find silent messages given off by shoulders, neck, arms, hands, waist, calves, ankles, feet, and toes. Dr. Givens analyzes expressive shapes, colors, and markings encoded in arm wear, shoulder wear, leg wear, and shoes. He deciphers the background messages of spaces, places and interiors to learn how environs help or hinder in the meeting process. Chemical cues emanating from aromas, tastes, steroids, sterols, and hormones strongly shape a partner's feelings, so they are explored as well. The book suggests ways to gaze, ways to read eyes across a room, and ways to sit, stand, align, walk dress, and lift a drink to participate in the fascinating adventure of finding, winning, and keeping a mate. Knowing the unspoken vocabulary of love signals will give readers an edge. What this means for courtship is that the reader becomes able to read unspoken motives, emotions, and feelings with great clarity and precision. The more readers know about the nonverbal idiom of attraction, the more likely they will find a loving, lasting partner.
