*The Girl Who Could Fix Anything: Beatrice Shilling, World War II Engineer* - Mara Rockliff 2021-09-28

This true story of a woman whose brilliance and mechanical expertise helped Britain win World War II is sure to inspire STEM readers and fans of amazing women in history. Beatrice Shilling wasn’t quite like other children. She could make anything. She could fix anything. And when she took a thing apart, she put it back together better than before. When Beatrice left home to study engineering, she knew that as a girl she

wouldn’t be quite like the other engineers—and she wasn’t. She was better. Still, it took hard work and perseverance to persuade the Royal Aircraft Establishment to give her a chance. But when World War II broke out and British fighter pilots took to the skies in a desperate struggle for survival against Hitler’s bombers, it was clearly time for new ideas. Could Beatrice solve an engine puzzle and help Britain win the war? American author Mara Rockliff and British illustrator Daniel Duncan team up for a fresh look at a turning point in modern history—and the role of a remarkable woman whose ingenuity, persistence, and way with a wrench (or spanner) made her quite unlike anyone else. An author’s note and a list of selective sources provide additional information for curious readers.

**The Trainable Cat** - John Bradshaw 2016-08-04

'Amazing' Guardian From the on-screen experts for BBC2's Cat Watch, and based on their groundbreaking research - this is the ultimate guide to making your cat a happier, more sociable animal. The idea of a trained cat is a contradiction in terms, isn't it? Naturally solitary, wary, easily threatened by newcomers, they are attached to place rather than people, and much of their 'antisocial' behaviour arises in situations where that attachment is threatened. But, as cat experts Sarah Ellis and John Bradshaw argue, such stress-induced behaviour can be prevented, reduced, even eliminated, by training. A comprehensive and engaging step-by-step guide, *The Trainable Cat* will help you to help your cat negotiate the complexities of everyday life: to enjoy living with humans - including new babies and lively toddlers - and other pets; to answer to their name; settle into a new home; and to overcome the anxiety of a visit to the vet. You can train your cat to do what is in its own best interests - even when its instincts tell it otherwise. 'I doubt you'll find a more well-

informed or scientific book on cats that better shows you how feline thinking works' *The Times*

Mieshelle Nagelschneider has been helping people deal with these dilemmas for two decades, achieving a near-perfect success rate. Central to her approach is a keen understanding of the unique way cats see the world—their need for safety and security, their acute territoriality, and their insatiable desire to catch and kill prey. Her proven C.A.T. cat behavior modification plan is a commonsense course of action that can be specifically tailored to your cat in the context of its behavior problems and its particular household environment. Easy-to-implement solutions help transform even the most anxiety-riddled companions into confident, gregarious, and relaxed cats who live longer, happier, and healthier lives. Inside you'll discover

- how to harness the power of “friendly pheromones” to improve your cat’s appetite, exploration, grooming, and play
- where, when, and how to create a litter box environment that will provide ease of access and reduce anxiety for you and your cat
- how to end aggression in multiple-cat households and help your cats coexist peacefully

Who says you can’t train a cat? In this fascinating and indispensable book, the *Cat Whisperer* takes you inside the mind of a feline to explain why members of one of the world’s most inscrutable species act the way they do—and how you can convince them to change their behaviors for the sake of your peace of mind . . . and theirs.

**Animalkind** - Ingrid Newkirk 2021-01-19

The founder and president of PETA, Ingrid Newkirk, and bestselling author Gene Stone explore the wonders of animal life with “admiration and empathy” (The New York Times Book Review) and offer tools for living more kindly toward them. In the last few decades, a wealth of new information has emerged about who animals are: astounding beings with intelligence, emotions, intricate communications networks, and myriad abilities. In *Animalkind*, Ingrid Newkirk and Gene Stone present these findings in a concise and awe-inspiring way, detailing a range of surprising discoveries, like that geese fall in love and stay with a partner for life, that fish “sing” underwater, and that elephants use their trunks to send subsonic signals, alerting other herds to danger miles away. Newkirk and Stone pair their tour through the astounding lives of animals with a guide to the exciting new tools that allow humans to avoid using or abusing animals as we once did. Whether it’s medicine, product testing, entertainment, clothing, or food, there are now better options to

all the uses animals once served in human life. We can substitute warmer, lighter faux fleece for wool, choose vegan versions of everything from shrimp to marshmallows, reap the benefits of animal-free medical research, and scrap captive orca exhibits and elephant rides for virtual reality and animatronics. *Animalkind* provides a fascinating look at why our fellow living beings deserve our respect, and lays out the steps everyone can take to put this new understanding into action.

**Cat vs. Cat** - Pam Johnson-Bennett 2004-07-06

From the author of *Catwise* and *Think Like a Cat*, the ultimate resource for managing a multi-pet household. Pam Johnson-Bennett, the award-winning author and feline behaviorist, shows how adding another cat to your home does not have to be the start of a kitty apocalypse. Although cats are often misunderstood as natural loners, Johnson-Bennett shows how to plan, set up, and maintain a home environment that will help multiple cats—and their owners—live in peace. *Cat vs. Cat* will help readers understand the importance of territory, the specialized communication cats use to establish relationships and hierarchies, and how to interpret the so-called “bad behavior” that leads so many owners to needless frustration. both seasoned and prospective guardians of cat families large and small. **The Other End of the Leash** - Patricia McConnell, Ph.D. 2009-02-19 Learn to communicate with your dog—using their language “Good reading for dog lovers and an immensely useful manual for dog owners.”—The Washington Post An Applied Animal Behaviorist and dog trainer with more than twenty years’ experience, Dr. Patricia McConnell reveals a revolutionary new perspective on our relationship with dogs—sharing insights on how “man’s best friend” might interpret our behavior, as well as essential advice on how to interact with our four-legged friends in ways that bring out the best in them. After all, humans and dogs are two entirely different species, each shaped by its individual evolutionary heritage. Quite simply, humans are primates and dogs are canids (as are wolves, coyotes, and foxes). Since we each speak a different native tongue, a lot gets lost in the translation. This marvelous guide demonstrates how even the slightest changes in our voices and in the ways we stand can help dogs understand what we want. Inside you will discover: • How you can get your dog to come when called by acting less like a primate and more like a dog • Why the advice to “get

dominance” over your dog can cause problems • Why “rough and tumble primate play” can lead to trouble—and how to play with your dog in ways that are fun and keep him out of mischief • How dogs and humans share personality types—and why most dogs want to live with benevolent leaders rather than “alpha wanna-bes!” Fascinating, insightful, and compelling, *The Other End of the Leash* is a book that strives to help you connect with your dog in a completely new way—so as to enrich that most rewarding of relationships.
