Essentials of Sociology George Ritzer 2015-12-10 Join the conversation with one of sociology's best-known thinkers. Essentials of Sociology, Second Edition adapted from George Ritzer's Introduction to Sociology, Third Edition, provides the same rock-solid foundation in a shorter and more streamlined format. Like the original Ritzer text, Essentials of Sociology illuminates traditional sociological concepts and theories, and focuses on some of the most compelling contemporary social phenomena: globalization, consumer culture, the Internet, and the "McDonaldization" of society. As technology flattens the globe, students are challenged to apply a sociological perspective to their world, and to see how "public" sociologists are engaging with the critical issues of today.

Crime, Violence, and Global Warming John P. Crank 2015-05-20 Crime, Violence, and Global Warming introduces the many connections between climate change and criminal activity. Conflict over natural resources can escalate to state and non-state actors, resulting in wars, asymmetrical warfare, and terrorism. Crank and Jacoby apply criminological theory to each aspect of this complicated web, helping readers to evaluate conflicting claims about global warming and to analyze evidence of the current and potential impact of climate change on conflict and crime. Beginning with an overview of the science of global warming, the authors move on to the links between climate change, scarce resources, and crime. Their approach takes in the full scope of causes and consequences, present and future, in the United States and throughout the world. The book concludes by looking ahead at the problem of forecasting future security implications if global warming continues or accelerates. This fresh approach to the criminology of climate change challenges readers to examine all sides of this controversial question and to

formulate their own analysis of our planet's future.

The Abuse Algorithm Shavontana Starr Davis 2021-12-20

Young people should avoid abuse, not simply recover from it.

Sexual abuse is among the most serious issues that children and youth face. The thought of it is terrifying to parents and caring adults. The topic is difficult to discuss. The Abuse Algorithm shares the untold stories of child sexual abuse (CSA) survivors, along with insights from healthcare professionals who work with abuse victims. Author Shavontana Starr Davis, a CSA survivor, explores how CSA is a preventable public health crisis. Through research and interviews, Starr highlights the algorithm, or process, needed to deconstruct the antiquated societal perception of victimization and the misguided beliefs surrounding it. In doing so, she asks readers to: Carefully consider the difficult topics of CSA and Adverse Childhood Experiences (ACEs). Continue learning and exploring the impact of these topics. Pledge to become a trusted adult for young people. The Abuse Algorithm outlines how CSA affects everyone: survivors, those close to them, and the community. Treat this book as a resource guide. Remember that no two experiences are the same, healing is an individual process, and education is the best chance for prevention.

Pimp State Kat Banyard 2016-06-14 Never before have prostitution, strip clubs and pornography been as profitable, widely used or embedded in mainstream culture as they are today. How society should respond to the rise of the sex trade is shaping up to be one of the Twenty-First Century's big questions. Should it be legal to pay for sex? Isn't it a woman's choice whether she strips for money? Could online porn warping the attitudes of a generation of boys? An increasingly popular set of answers maintains that prostitution is just work, porn is fantasy, demand is inevitable; so fully legalise the sex trade and it can be made safe. Kat Banyard contends that these are profoundly dangerous myths. Sexual consent is not a commodity, objectification and abuse are inherent to prostitution, and the sex trade poses a grave threat to the struggle for women's equality. Skilfully weaving together first-hand investigation, interviews and the latest research, Pimp State powerfully argues that sex trade myth-makers will find themselves on the wrong side of history.

Trance Formation of America Cathy O'Brien 1995 This is the documented autobiography of a victim of government mind control. Cathy O'Brien is the only vocal and recovered survivor of the Central Intelligence Agency's MK-Ultra Project Monarch mind control operation. Chiseled deep into the white stone of the CIA's Langley, Virginia headquarters is a partial verse lifted from the Holy Bible and writings of Saint John...""and the truth shall set you free." This statement, like the agency, is total reality. The building that it is engraved upon houses the world's most successful manufacturer of lies to facilitate psychological warfare. The "Company" uses truth and technology as their raw materials to produce "pure" lies for control of you and America's allies.

Queer Sex Work Mary Laing 2015-03-05 Sex work is a subject of significant contestation across academic disciplines, as well as within legal, medical, moral, feminist, political and socio-cultural discourses. A large body of research exists, but much of this focuses on the sale of sex by women to men and ignores other performances, practices, meanings and embodiments in the contemporary sex industry. A queer agenda is important in order to challenge hetero-centric gender norms and to develop new insights into how gender, sex, power, crime, work, migration, space/place, health and intimacy are understood in the context of commercial sexual encounters. Queer Sex Work explores what it

might mean to 'be', 'do' and 'think' queer(ly) in the study and practice of commercial sex. It brings together a multiplicity of empirical case studies - including erotic dance venues, online sex working, pornography, grey sexual economies, and BDSM - and offers a variety of perspectives from academic scholars, policy practitioners, activists and sex workers themselves. In so doing, the book advances a queer politics of sex work that aims to disrupt heteronormative logics whilst also making space for different voices in academic and political debates about commercial sex. This unique and multidisciplinary volume will be indispensable for scholars and students of the global sex trade and of gender, sexuality, feminism and queer theory more broadly, as well as policymakers, activists and practitioners interested in the politics and practice of sex work in local, national and international contexts.

Trafficking in Persons Report (10th Ed.) 2010-11

The Oxford Handbook of Superdiversity Fran Meissner

2023-03-10 "Over the past three decades, there has been a global sea-change in the nature of international migration. In myriad places around the world this kind of deep shift has had significant impacts on the local configurations and dynamics of diversity. Old and new immigration sites across the world have experienced rapid and increasing movements of people from more varied national, ethnic, linguistic and religious backgrounds. These movements have emerged along with a diversification of migration channels and legal statuses and, more broadly, greater societal attention towards identity politics Worldwide, in concurrent but differing ways, these migration-driven trends are deeply transforming societies in complex ways spanning social, demographic, cultural, economic and political structures. Now across a range of disciplines and literatures, such complex transformation processes and patterns are summarized by the concept of superdiversity (Vertovec 2007). As the world emerged from the end of the Cold War and the collapse of the Soviet Union, we saw Western democracies promoting the universalisation of liberal democracy and its values (Fukuyama 1992). The consolidation of the international human rights regime, with human rights becoming the 'lingua franca of global moral thought' (Ignatieff 2001: 53), was part of this process (Douzinas 2007). That move provided the ideological scaffolding for neoliberal economic globalisation which relied on enhanced international circulation and interdependence of capitals, goods, services, and supply chains. With goods and services, also human mobility grew, and with increased material and more recently digital connectivity, new destinations and routes became appealing, available, and affordable (IOM 2021). Meanwhile, the 'end of history' and the consolidation of the post-Cold War geopolitical order didn't come peacefully and triggered a series of regional and international conflicts that in turn led to a growth of international and internal displacement globally, a trend that is

now increasingly fuelled by climate change and environment degradation acting as key factor in migration dynamics (Black et al 2011). International migration is both an effect and a driver of these developments. It crucially contributes to establish and consolidate transnational networks and diasporic communities, while at the same time it is a key contributor to the diversification of host societies. In myriad settings around the world, there are people with more varied ethnic, racial, linguistic, religious, and legal status characteristics than ever before - each set of characteristics intersecting differently with others as well as with age, gender, and class. As a result, "the world is much more diverse on multiple dimensions and at many levels, typified by the salience of differences and their dynamic intersections" (Jones and Dovidio 2018: 45). Contemporary immigration societies have become increasingly diverse, layered, and unequal. Indeed, 'the processes of neoliberal globalization have gradually loosened labour protections, restructured the welfare system, delocalized state borders, and led to widening inequalities' (Gonzales and Sigona 2017: 3), putting pressure on the connection between state, territory and residents, transforming traditional notions of sovereignty and citizenship, while also giving rise to a host of new non-state actors operating transnationally (Sassen 2006; Castles 2001). As evidenced by its ubiquity across the social sciences, superdiversity is one of the most prominent contemporary concepts advancing current understanding of international migration and its social implications. The numerous social scientific debates, approaches and methodologies that have been developed in light of superdiversity speak to each other but have not yet been brought together in a single volume. This handbook fills this gap in the literature, offering students, educators, researchers and practitioners a much sought-after compendium of central advances made in studying complex social transformations in light of superdiversity. The chapters take stock of some of the advances in the field and lay out the importance of

engaging with complex social transformations in light of migration-driven change. In this introduction we frame the discussions that follow by first elaborating the notion of complex social transformations and its resulting complexities, then providing an overview of how we structured the book and the types of chapters you will find in the different sections of this handbook. The Whistleblower Kathryn Bolkovac 2011-01-04 When Nebraska police officer and divorced mother of three Kathryn Bolkovac saw a recruiting announcement for private military contractor DynCorp International, she applied and was hired. Good money, world travel, and the chance to help rebuild a war-torn country sounded like the perfect job. Bolkovac was shipped out to Bosnia, where DynCorp had been contracted to support the UN peacekeeping mission. She was assigned as a human rights investigator, heading the gender affairs unit. The lack of proper training provided sounded the first alarm bell, but once she arrived in Sarajevo, she found out that things were a lot worse. At great risk to her personal safety, she began to unravel the ugly truth about officers involved in human trafficking and forced prostitution and their connections to private mercenary contractors, the UN, and the U.S. State Department. After bringing this evidence to light, Bolkovac was demoted, felt threatened with bodily harm, was fired, and ultimately forced to flee the country under cover of darkness—bringing the incriminating documents with her. Thanks to the evidence she collected, she won a lawsuit against DynCorp, finally exposing them for what they had done. This is her story and the story of the women she helped achieve justice for.

Sex Trafficking Siddharth Kara 2017-08-29 “The best book ever written on human trafficking for sexual exploitation”—the basis for the feature film, *Trafficked*, starring Ashley Judd (Kevin Bales, president of Free the Slaves). into forced prostitution. These trafficked sex slaves form the backbone of one of the world's most profitable illicit enterprises and generate huge profits for their exploiters, for unlike narcotics, which must be grown, harvested, refined, and packaged, sex slaves require no such "processing," and can be repeatedly "consumed." In this book, Kara provides a riveting account of his four-continent journey into this unconscionable industry, sharing the moving stories of its victims and revealing the shocking conditions of their exploitation. He draws on his background in finance, economics, and law to provide the first ever business analysis of contemporary slavery worldwide, focusing on its most profitable and barbaric form: sex trafficking. Kara describes the local factors and global economic forces that gave rise to this and other forms of modern slavery over the past two decades and quantifies, for the first time, the size, growth, and profitability of each industry. Finally, he identifies the sectors of the sex trafficking industry that would be hardest hit by specifically designed interventions and recommends the specific legal, tactical, and policy measures that would target these vulnerable sectors and help to abolish this form of slavery, once and for all. The author will donate a portion of the proceeds of this book to the anti-slavery organization, Free the Slaves. "Sex trafficking is more of a problem than most people realize. Read this well-written book and find out."—Kirk Douglas

Half the Sky Nicholas D. Kristof 2010-06-01 #1 NATIONAL BESTSELLER • A passionate call to arms against our era's most pervasive human rights violation—the oppression of women and girls in the developing world. From the bestselling authors of *Tightrope*, two of our most fiercely moral voices With Pulitzer Prize winners Nicholas D. Kristof and Sheryl WuDunn as our guides, we undertake an odyssey through Africa and Asia to meet the extraordinary women struggling there, among them a Cambodian teenager sold into sex slavery and an Ethiopian woman who suffered devastating injuries in childbirth. on the breadth of their combined reporting experience, Kristof and WuDunn depict our world with anger, sadness, clarity, and, ultimately, hope. They show how a little help can transform the lives of women and girls abroad. That Cambodian girl eventually escaped from her brothel and, with assistance from an aid group, built a thriving retail business that supports her family. The Ethiopian woman had her injuries repaired and in time became a surgeon. A Zimbabwean mother of five, counseled to return to school, earned her doctorate and became an expert on AIDS. Through these stories, Kristof and WuDunn help us see that the key to economic progress lies in unleashing women's potential. They make clear how so many people have helped to do just that, and how we can each do our part. Throughout much of the world, the greatest unexploited economic resource is the female half of the population. Countries such as China have prospered precisely because they emancipated women and brought them into the formal economy. Unleashing that process globally is not only the right thing to do; it's also the best strategy for fighting poverty. Deeply felt, pragmatic, and inspirational, *Half the Sky* is essential reading for every global citizen.

Confronting Commercial Sexual Exploitation and Sex Trafficking of Minors in the United States National Research Council

2013-11-12 Every day in the United States, children and adolescents are victims of commercial sexual exploitation and sex trafficking. Despite the serious and long-term consequences for victims as well as their families, communities, and society, efforts to prevent, identify, and respond to these crimes are largely under supported, inefficient, uncoordinated, and unevaluated. *Confronting Commercial Sexual Exploitation and Sex Trafficking of Minors in the United States* examines commercial sexual exploitation and sex trafficking of U.S. citizens and lawful permanent residents of the United States under age 18.

According to this report, efforts to prevent, identify, and respond to these crimes require better collaborative approaches that build

upon the capabilities of people and entities from a range of sectors. In addition, such efforts need to confront demand and the individuals who commit and benefit from these crimes. The report recommends increased awareness and understanding, strengthening of the law's response, strengthening of research to advance understanding and to support the development of prevention and intervention strategies, support for multi-sector and interagency collaboration, and creation of a digital information-sharing platform. A nation that is unaware of these problems or disengaged from solutions unwittingly contributes to the ongoing abuse of minors. If acted upon in a coordinated and comprehensive manner, the recommendations of *Confronting Commercial Sexual Exploitation and Sex Trafficking of Minors in the United States* can help advance and strengthen the nation's emerging efforts to prevent, identify, and respond to commercial sexual exploitation and sex trafficking of minors in the United States.

The Art of Being Human Michael Wesch 2018-08-07

Anthropology is the study of all humans in all times in all places. But it is so much more than that. "Anthropology requires strength, valor, and courage," Nancy Scheper-Hughes noted. "Pierre Bourdieu called anthropology a combat sport, an extreme sport as well as a tough and rigorous discipline. ... It teaches students not to be afraid of getting one's hands dirty, to get down in the dirt, and to commit yourself, body and mind. Susan Sontag called anthropology a "heroic" profession." What is the payoff for this heroic journey? You will find ideas that can carry you across rivers of doubt and over mountains of fear to find the light and life of places forgotten. Real anthropology cannot be contained in a book. You have to go out and feel the world's jagged edges, wipe its dust from your brow, and at times, leave your blood in its soil. In this unique book, Dr. Michael Wesch shares many of his own adventures of being an anthropologist

Neurofeedback in the Treatment of Developmental Trauma:

Calming the Fear-Driven Brain Sebern F. Fisher 2014-04-21

Working with the circuitry of the brain to restore emotional health and well-being. Neurofeedback, a type of "brain training" that allows us to see and change the patterns of our brain, has existed for over 40 years with applications as wide-ranging as the treatment of epilepsy, migraines, and chronic pain to performance enhancement in sports. Today, leading brain

researchers and clinicians, interested in what the brain can tell us about mental health and well being, are also taking notice. Indeed, the brain's circuitry—its very frequencies and rhythmic oscillations—reveals much about its role in our emotional stability and resilience. Neurofeedback allows clinicians to guide their clients as they learn to transform brain-wave patterns, providing a new window into how we view and treat mental illness. In this cutting-edge book, experienced clinician Sebern Fisher keenly demonstrates neurofeedback's profound ability to help treat one of the most intractable mental health concerns of our time: severe childhood abuse, neglect, or abandonment, otherwise known as developmental trauma. When an attachment rupture occurs between a child and her or his primary caregiver, a tangle of complicated symptoms can set in: severe emotional dysregulation, chronic dissociation, self-destructive behaviors, social isolation, rage, and fear. Until now, few reliable therapies existed to combat developmental trauma. But as the author so eloquently presents in this book, by focusing on a client's brain-wave patterns and "training" them to operate at different frequencies, the rhythms of the brain, body, and mind are normalized, attention stabilizes, fear subsides, and, with persistent, dedicated training, regulation sets in. A mix of fundamental theory and nuts-and-bolts practice, the book delivers a carefully articulated and accessible look at the mind and brain in developmental trauma, what a "trauma identity" looks like, and how neurofeedback can be used to retrain the brain, thereby fostering a healthier, more stable state of mind. Essential clinical skills are also fully covered, including how to introduce the idea of neurofeedback to clients, how to combine it with traditional psychotherapy, and how to perform assessments. In his foreword to the book, internationally recognized trauma expert Bessel van der Kolk, MD, praises Fisher as "an immensely experienced neurofeedback practitioner [and] the right person to teach us how to integrate it into clinical practice." Filled with illuminating client stories, powerful clinical

insights, and plenty of clinical "how to," she accomplishes just that, offering readers a compelling look at exactly how this innovative model can be used to engage the brain to find peace and to heal.

Power Failure Mimi Swartz 2004-03-09 "They're still trying to hide the weenie," thought Sherron Watkins as she read a newspaper clipping about Enron two weeks before Christmas, 2001. . . It quoted [CFO] Jeff McMahon addressing the company's creditors and cautioning them against a rash judgment. "Don't assume that there is a smoking gun." Sherron knew Enron well enough to know that the company was in extreme spin mode... Power Failure is the electrifying behind-the-scenes story of the collapse of Enron, the high-flying gas and energy company touted as the poster child of the New Economy that, in its hubris, had aspired to be "The World's Leading Company," and had briefly been the seventh largest corporation in America. the never-before-published revelations of former Enron vice-president Sherron Watkins, as well as hundreds of other interviews, *Power Failure* shows the human face beyond the greed, arrogance, and raw ambition that fueled the company's meteoric rise in the late 1990s. At the dawn of the new century, Ken Lay's and Jeff Skilling's faces graced the covers of business magazines, and Enron's money oiled the political machinery behind George W. Bush's election campaign. But as Wall Street analysts sang Enron's praises, and its stock spiraled dizzily into the stratosphere, the company's leaders were madly scrambling to manufacture illusory profits, hide its ballooning debt, and bully Wall Street into buying its fictional accounting and off-balance-sheet investment vehicles. The story of Enron's fall is a morality tale writ large, performed on a stage with an unforgettable array of props and side plots, from parking lots overflowing with Boxsters and BMWs to hot-house office affairs and executive tantrums. Among the cast of characters Mimi Swartz and Sherron Watkins observe with shrewd Texas eyes and an insider's perspective are: CEO Ken Lay, Enron's "outside face," who was more interested in playing diplomat and paving the road to a political career than in managing Enron's high-testosterone, anything-goes culture; Jeff Skilling, the mastermind behind Enron's mercenary trading culture, who transformed himself from a nerdy executive into the personification of millennial cool; Rebecca Mark, the savvy and seductive head of Enron's international division, who was Skilling's sole rival to take over the company; and Andy Fastow, whose childish pranks early in his career gave way to something far more destructive. Desperate to be a player in Enron's deal-making, trader-oriented culture, Fastow transformed Enron's finance department into a "profit center," creating a honeycomb of financial entities to bolster Enron's "profits," while diverting tens of millions of dollars into his own pockets. An unprecedented chronicle of Enron's shocking collapse, *Power Failure* should take its place

When an angry, heartbroken girl is forced to be near her rocker ex-boyfriend, only time will tell if the fire between them will consume them both. Pandora, the gothic friend of Brooke (Real, Mine, Remy) and Melanie (Rogue), thought that getting her heart broken by her bad boy rocker ex could only happen once. But now, he’s back in town with the biggest concert of the year. Pandora hates him so much that she gets Melanie to come with her and play a prank on him at his gig. But when they’re caught by security, and her ex himself is summoned, Pandora is not prepared for the feelings that seeing him again—beautiful and in the flesh—awaken in her. She’s also wholly unprepared for the conditions his manager sets in order for her and Melanie to be released; especially since these conditions only allow Melanie to return home, while at the same time, they put Pandora in perilously close contact with her ex again. The torturous physical closeness between them reignites the passion they once shared, and soon no matter how much she wants to hate him, it’s clear she’s still hung up on him. And worse: he knows it too.

The Case for Marriage Linda Waite 2002-03-05 A groundbreaking look at marriage, one of the most basic and universal of all human institutions, which reveals the emotional, physical, economic, and sexual benefits that marriage brings to

individuals and society as a whole. *The Case for Marriage* is a critically important intervention in the national debate about the future of family. Based on the authoritative research of family sociologist Linda J. Waite, journalist Maggie Gallagher, and a number of other scholars, this book's findings dramatically contradict the anti-marriage myths that have become the common sense of most Americans. Today a broad consensus holds that marriage is a bad deal for women, that divorce is better for children when parents are unhappy, and that marriage is essentially a private choice, not a public institution. Waite and Gallagher flatly contradict these assumptions, arguing instead that by a broad range of indices, marriage is actually better for you than being single or divorced- physically, materially, and spiritually. They contend that married people live longer, have better health, earn more money, accumulate more wealth, feel more fulfillment in their lives, enjoy more satisfying sexual relationships, and have happier and more successful children than those who remain single, cohabit, or get divorced. *The Case for Marriage* combines clearheaded analysis, penetrating cultural criticism, and practical advice for strengthening the institution of marriage, and provides clear, essential guidelines for reestablishing marriage as the foundation for a healthy and happy society. "A compelling defense of a sacred union. *The Case for Marriage* is well written and well argued, empirically rigorous and learned, practical and commonsensical." -- William J. Bennett, author of *The Book of Virtues* "Makes the absolutely critical point that marriage has been misrepresented and misunderstood." -- *The Wall Street Journal* www.broadwaybooks.com

Gendered Lives Nadine T. Fernandez 2022-01-01 *Gendered Lives* takes a regional approach to examine gender issues from an anthropological perspective with a focus on globalization and intersectionality. North. Each regional section begins with an overview of the broader historical, social, and gendered contexts, which situate the regions within larger global linkages. These introductions also feature short project/people profiles that highlight the work of community leaders or non-governmental organizations active in gender-related issues. Each research-based chapter begins with a chapter overview and learning objectives and closes with discussion questions and resources for further exploration. This modular, regional approach allows instructors to select the regions and cases they want to use in their courses. While they can be used separately, the chapters are connected through the book's central themes of globalization and intersectionality. The Mending of Lillian Cathleen Linda Brooks Davis 2018-11 1914. While American women are demanding the vote and the first flames of the Great War are igniting Europe, a battle of a different sort rages in Oklahoma. The thermometer registers one hundred six degrees, an out-of-the-ordinary occurrence, even for the twenty-eighth day of July. But this is no ordinary day. The jury has reached a verdict. Lily fidgets in the old church pew. She's lost enough, given more than her share. Hasn't she? The answer rests in the hands of twelve men. Not a single woman sits among the jurors. Lily eyes the judge And the courtroom holds its breath.

The Oxford Handbook of Refugee and Forced Migration Studies

Elena Fiddian-Qasmiyeh 2014 "This Handbook critically traces the birth and development of Refugee and Forced Migration Studies, and vividly illustrates the vibrant and engaging debates that characterize this rapidly expanding field of research and practice. The contributions highlight the key challenges faced by academics and practitioners working with and for forcibly displaced populations around the world, as well as identifying new directions for research in the field. Since emerging as a distinct field of study in the early 1980s, Refugee and Forced Migration Studies has grown from being of concern of a relatively small number of scholars and policy analysts to become a global field with thousands of students worldwide studying displacement, either from traditional disciplinary perspectives or as a core component of newer interdisciplinary programmes across the Humanities and Social and Political Sciences". -- Publisher.

Networks, Labour and Migration among Indian Muslim Artisans

Thomas Chambers 2020-04-30 Networks, Labour and Migration among Indian Muslim Artisans provides an ethnography of life, work and migration in a North Indian Muslim-dominated woodworking industry. It traces artisanal connections within the local context, during migration within India, and to the Gulf, examining how woodworkers utilise local and transnational networks, based on identity, religiosity, and affective circulations, to access resources, support and forms of mutuality. However, the book also illustrates how liberalisation, intensifying forms of marginalisation and incorporation into global production

networks have led to spatial pressures, fragmentation of artisanal labour, and forms of enclavement that persist despite geographical mobility and connectedness. By working across the dialectic of marginality and connectedness, Thomas Chambers thinks through these complexities and dualities by providing an ethnographic account that shares everyday life with artisans and others in the industry. Descriptive detail is intersected with spatial scales of 'local', 'national' and 'international', with the demands of supply chains and labour markets within India and abroad, with structural conditions, and with forms of change and continuity. Empirically, then, the book provides a detailed account of a specific locale, but also contributes to broader theoretical debates centring on theorisations of margins, borders, connections, networks, embeddedness, neoliberalism, subjectivities, and economic or social flux.
