Female Sex Worker HIV Prevention Projects - Carol Jenkins 2000

Sex Work, Health, and Human Rights - Shira M. Goldenberg 2021-04-28

This open access book provides a comprehensive overview of the health inequities and human rights issues faced by sex workers globally across diverse contexts, and outlines evidence-based strategies and best practices. Sex workers face severe health and social inequities, largely as the result of structural factors including punitive and criminalized legal environments, stigma, and social and economic exclusion and marginalization. Although previous work has largely emphasized an elevated burden and gaps in HIV and sexually transmitted infection (STI) services in sex work, less attention has been paid to the broader health and human rights concerns faced by sex workers. This contributed volume addresses this gap. The chapters feature a variety of perspectives including academic, community, implementing partners, and government to synthesize research evidence as well as lessons learned from local-level

experiences across different regions, and are organized under three parts: Burden of health and human rights inequities faced by sex workers globally, including infectious diseases (e.g., HIV, STIs), violence, sexual and reproductive health, and drug use Structural determinants of health and human rights, including legislation, law enforcement, community engagement, intersectoral collaboration, stigma, barriers to health access, im/migration issues, and occupational safety and health Evidence-based services and best practices at various levels ranging from individual and community to policy-level interventions to identify best practices and avenues for future research and interventions Sex Work, Health, and Human Rights is an essential resource for researchers, policy-makers, governments, implementing partners, international organizations and community-based organizations involved in research, policies, or programs related to sex work, public health, social justice, gender-based violence, women's health and harm reduction.

The Global HIV Epidemics Among Sex Workers - Deanna Kerrigan 2013

Since the beginning of the epidemic sex workers have experienced a heightened burden of HIV across settings, despite their higher levels of HIV protective behaviors (UNAIDS, 2009).

Unfairly, sex workers have often been framed as 'vectors of disease' and 'core transmitters' rather than workers and human beings with rights in terms of HIV prevention and beyond. By gaining

Downloaded from
legacy.opendemocracy.net on 2020-10-31
by guest

a deeper understanding of the epidemiologic and broader policy and social context within which sex work is set one begins to quickly gain a sense of the complex backdrop for increased risk to HIV among sex workers. This backdrop includes the critical role of stigma, discrimination and violence faced by sex workers, as well as, the importance of community empowerment and mobilization among sex workers to address these regressive forces. The eight country case studies work to highlight the experiences of diverse populations of and contexts for sex work across settings. Given the limited epidemiologic and intervention evaluation data available among male and transgender sex workers, however, our collaborative team (Johns Hopkins University, or JHU, World Bank, United Nations Population Fund (UNFPA), and Global Network of Sex Work Projects, or NSWP) determined that the systematic review, mathematical modeling and cost-effective analyses would focus on female sex workers. Throughout the process of this analysis as a whole, the participation of sex worker perspectives and sex worker organizations such as NSWP and their regional partners has been critical by providing documents and resources, input and consultation throughout the analytical process.

Hotel Ritz - Comparing Mexican and U.S.

Street Prostitutes - R Dennis Shelby

2014-01-02

Explore ways to reduce the rate of HIV infection in street prostitutes--and the inescapable connection between the heroin trade, prostitution, and HIV! This unique book draws on face-to-face interviews that the author conducted on the streets, with heroin-addicted street prostitutes in Southern California and their counterparts in four large Mexican cities. Author David James Bellis illustrates the significant--and surprising--differences in the risk of exposure to HIV and other STDs that exist between street prostitutes in the two countries arising from national differences in the legality, sociology, and economics of sex work. He points out that Mexican prostitutes, for whom sex work is a simple means of livelihood, are "choir girls" compared with their beaten-up, drug-addicted sisters north of the border who perform sex for drug money and are at much greater risk of HIV

and other diseases, like Hepatitis C. This book explores those differences, suggesting new directions for United States prostitution and heroin-control policies--laws currently so interwoven that they reinforce each other, accounting for a deadly circle of crime and disease. In addition to the fascinating results of the author's interviews with 72 female street prostitutes in San Bernardino, California, and 102 more in Tijuana, Cd. Juárez, Cd. Victoria, and Cuernavaca regarding their personal sexual, drug, and health practices, and their criminal histories, *Hotel Ritz-Comparing Mexican and U.S. Street Prostitutes: Factors in HIV/AIDS Transmission* explores: the licensing process for legal prostitutes in Mexico the medical testing that Mexico requires prostitutes to undergo the differences in what United States and Mexican prostitutes know about HIV transmission the difference in condom use between United States and Mexican prostitutes the potential benefits of reforming prostitution and drug laws in both countries the benefits of making methadone maintenance and syringes—and heroin—free for heroin-addicted prostitutes the proportion of United States/Mexican prostitutes who would quit the trade if they learned they had AIDS how the social support system in the United States (housing subsidies, TANF/AFDC money, food stamps, etc.) leads to a greater proportion of drug-addicted prostitutes than are found in Mexico *Hotel Ritz-Comparing Mexican and U.S. Street Prostitutes: Factors in HIV/AIDS Transmission* also provides you with a look at the hierarchy of female sex workers, an explanation of the etiology of AIDS transmission, and a concise history of heroin and prostitution. Helpful tables and an appendix containing the author's survey questions make the data in this well-referenced book easily understandable.

Contemporary Research on Sex Work -

Jeffrey T. Parsons 2014-06-03

Gain important insight and a broader perspective on where, why, and how sex workers conduct their business For years, the focus of sex work research has been on street-based male and female sex workers and the HIV-related risks they pose to their clients. *Contemporary Research on Sex Work* moves beyond the basic association between sex work and unprotected sex to a fuller description of the

varied facets of the industry while still pursuing a better understanding of HIV risk among those working the streets. The diverse approaches in this unique book include targeted sampling, qualitative and quantitative interviews, ethnographic interviews with key informants, using sex workers as recruiters, and quasi-experimental intervention designs.

Contemporary Research on Sex Work dispels the notion that all sex workers are prostitutes working the streets, highlighting instead various aspects of sex work in terms of gender, venue, and context. Social scientists from a variety of disciplines present research collected from across the United States, Cambodia, the Philippines, Argentina, and Canada that reflects the efforts to explore interventions and programs designed to improve the social and physical lives of male, female, and transgender sex workers—and their clients. The book examines how different circumstances determine different issues of power, control, health, social functioning, mental health, and HIV/STI risk each sex worker faces.

Contemporary Research on Sex Work examines: condom use by transgender female sex workers the association between mental health issues and unprotected sex the influence of structural intervention in reducing biologically sexually transmitted infections (STIs) the “hidden” population of women who solicit clients in private locations off the street stigma resistance among male sex workers in Canada the relationship between childhood sexual abuse and subsequent involvement in sex work health services among male sex workers in Argentina how the intersection between race/ethnicity affects female sex workers in Los Angeles how sex workers deal with the negativity that surrounds their profession job-related risk and safety for sex workers in Canada legal concerns and policy issues and much more! Contemporary Research on Sex Work is your guide to the next generation of sex work research, highlighting the need to understand sex work as work. The book is an essential resource for researchers in the fields of sex research, sex work, and HIV/AIDS prevention, and for clinicians who work with those involved in the industry.

On the Decriminalization of Sex Work in China - Jinmei Meng 2013-12-05

This study argues that the decriminalization of sex work in China can contribute to HIV prevention and human rights protection. The argument is supported by six key concepts: the universality of human rights, rights-based approaches to HIV, sex work as work, risk environment for HIV transmission, decriminalization of sex work as a preferred model for HIV prevention, and rights-based responses to HIV and sex work. Three research methods are used, including research methods from law, social science, and public health. Recommendations are provided to reform Chinese law and HIV policy.

Men Who Sell Sex - Peter Aggleton 2006-12-05

Men Who Sell Sex is the first comprehensive international account of male prostitution and AIDS. While much is known about female prostitution and sex work, relatively little is known about men who sell sex - either to women or other men. This book brings together an authoritative collection of essays from different countries and examines sexual behaviour, the reasons men sell sex, the meanings involved, and implications for HIV prevention. The authors are all experts in their fields and individual chapters offer a compelling description of the reasons men sell sex and the pleasures and risks involved.

Sex Work on the Streets - Neil P. McKeganey 1996

* How and why do people sell and buy sex? *
 * What are the risks associated with prostitution? *
 * Should prostitution be legalized? This book is the most detailed study ever provided on street prostitution. It is based on three years' research in which the authors interviewed prostitutes and their clients and spent many months working in a red light area. The book makes extensive use of direct quotes from the women and the men, as well as fieldnotes from the authors based upon their observations in the red light area. Topics covered in the book include the women's negotiations with clients, HIV, drug use and violence. The book also describes the impact of working as a prostitute on women's home life. No attempt is made to moralise about prostitution in the book, instead the authors concentrate on the experiences of the women and men involved in selling and buying sex, and describe prostitution from their standpoint. Sex

Work on the Streets will be of interest to a wide range of students and researchers in sociology, social policy, criminology and women's studies. *Truck Drivers and Casual Sex* - Marzena Kulis 2004-01-01

This publication is based on a survey which examined the practice of casual sex among truck drivers and commercial sex workers in the border areas of Poland and Lithuania, and uses this evidence to extrapolate the potential impact of these practices on the spread of HIV/AIDS in the countries of the Baltic region.

HIV and Sexually Transmitted Infection Prevention Among Sex Workers in Eastern Europe and Central Asia - 2006

This best practice publication describes the experiences of, and challenges faced by, five organizations in Eastern Europe and Central Asia, which developed effective practices and implemented HIV/sexually transmitted infection prevention programmes for sex workers. These organizations operate in low resource settings with little or no support from local and national governments. The experiences drawn from these programmes can be helpful in initiating and moving forward similar projects, thus contributing to greater coverage of sex work populations and improved quality of existing projects.

Female Sex Worker HIV Prevention Projects - 2000

Study drawn from the session on various sex workers projects conducted in the three countries held at Fourth International Congress on AIDS in Asia and the Pacific in October, 1997 in Manila, Philippines.

M is for Mutual, A is for Acts - Dan Allman 1999

This book reviews twenty-five years of Canadian research on prostitutes, their clients, street youth, and injection drug users and discovers data that challenge misconceptions about men who sell sex and the spread of AIDS. Dan Allman looks at how Canadian social theory approached male sex work and how Canadian researchers have defined and measured HIV risks for male sex workers in the past.

Towards a Southern Approach to Sex Work - Habiba Sultana 2020-12-29

This book delves into this almost uncharted territory, documenting the lived experiences of

sex workers in Bangladesh, considering the complex realities of their day-to-day lives and the ways they negotiate their working conditions and relationships. Despite being the most common form of female deviance and criminality globally, we know very little about sex work in Asia and the global south. Drawing on feminist frameworks, it shows that the experiences of sex workers vary widely depending on the ways they enter the sex trade, their modes of operation, and relationships with significant others.

Towards a Southern Approach to Sex Work contributes to feminist scholarship on sex work, by offering a much needed southern perspective, drawing on culturally specific data. It argues that the lived experience of sex workers comprises both victimhood and agency, deception and resilience, and that it is the management of these relationships that enable sex workers to avoid social marginalization and alienation. An accessible and compelling read, this will appeal to students and scholars of criminology, sociology, gender studies, south Asian studies, cultural studies, social theory and policy makers. In addition, it will engage all those interested in learning more about how the sex trade operates in Bangladesh.

Sex, Work and Professionalism - Katie Deverell 2013-01-11

Sex, Work and Professionalism examines what happens when professional concern is defined in terms of sex. Based on original fieldwork with outreach workers in HIV prevention it addresses issues of professionalism, emotion work and boundaries, integrating empirical insights with sociological theory. In most professional relationships sex is not defined as part of the relationship, in fact it is explicitly excluded in guidelines and codes of ethics. HIV prevention outreach workers work in sexual environments with a sexually defined target group and are often employed on the basis of their sexuality. They have to learn how to balance their work and professional lives, overcoming conflicts such as: * professional role V community role * sexual skills V sexual boundaries * personal experiences V professional understanding * professional identity V worldviews. Many of the questions being raised in this book about the meaning of professionalism, the pain and pleasure in emotion work and the management

of boundaries between home, sex and work are being asked more generally by workers in a range of organisations. *Sex, Work and Professionalism* argues for a new understanding of professionalism more appropriate to the human services.

At Risk - Gowri Vijayakumar 2021-07-27

In the mid-1990s, experts predicted that India would face the world's biggest AIDS epidemic by 2000. Though a crisis at this scale never fully materialized, global public health institutions, donors, and the Indian state initiated a massive effort to prevent it. HIV prevention programs channeled billions of dollars toward those groups designated as at-risk—sex workers and men who have sex with men. *At Risk* captures this unique moment in which these criminalized and marginalized groups reinvented their "at-risk" categorization and became central players in the crisis response. The AIDS crisis created a contradictory, conditional, and temporary opening for sex-worker and LGBTIQ activists to renegotiate citizenship and to make demands on the state. Working across India and Kenya, Gowri Vijayakumar provides a fine-grained account of the political struggles at the heart of the Indian AIDS response. These range from everyday articulations of sexual identity in activist organizations in Bangalore to new approaches to HIV prevention in Nairobi, where prevention strategies first introduced in India are adapted and circulate, as in the global AIDS field more broadly. Vijayakumar illuminates how the politics of gender, sexuality, and nationalism shape global crisis response. In so doing, she considers the precarious potential for social change in and after a crisis.

Sex Work in Southeast Asia - Lisa Law
2012-10-12

Southeast Asian sex workers are stereotypically understood as passive victims of the political economy, and submissive to western men. The advent of HIV/AIDS only compounds this image. *Sex Work in Southeast Asia* is a cultural critique of HIV/AIDS prevention programmes targeting sex tourism industries in Southeast Asia.

Sex Workers and the Cost of Safe Sex - Vijayendra Rao 2000

Prostitution is often called the world's oldest

profession, yet economists almost never study it. The practice of safe sex by commercial sex workers is considered central to preventing the transmission of AIDS in Developing countries, yet sex workers in Calcutta who regularly use condoms suffer a 79 percent loss in their average earnings per sex act.

Sex Work and HIV/AIDS. - 2002

To Live Freely in This World - Chi Mgbako
2016-01-08

Sex worker activists throughout Africa are demanding an end to the criminalization of sex work and the recognition of their human rights to safe working conditions, health and justice services, and lives free from violence and discrimination. *To Live Freely in This World* is the first book to tell the story of the brave activists at the beating heart of the sex workers' rights movement in Africa—the newest and most vibrant face of the global sex workers' rights struggle. African sex worker activists are proving that communities facing human rights abuses are not bereft of agency. They're challenging politicians, religious fundamentalists, and anti-prostitution advocates; confronting the multiple stigmas that affect the diverse members of their communities; engaging in intersectional movement building with similarly marginalized groups; and participating in the larger global sex workers' rights struggle in order to determine their social and political fate. By locating this counter-narrative in Africa, *To Live Freely in This World* challenges disempowering and one-dimensional depictions of "degraded Third World prostitutes" and helps fill what has been a gaping hole in feminist scholarship regarding sex work in the African context. Based on original fieldwork in seven African countries, including Botswana, Kenya, Mauritius, Namibia, Nigeria, South Africa, and Uganda, Chi Adanna Mgbako draws on extensive interviews with over 160 African female and male (cisgender and transgender) sex worker activists, and weaves their voices and experiences into a fascinating, richly-detailed, and powerful examination of the history and continuing activism of this young movement.
