X-Rated! Marcel Danesi 2016-04-29 Many attack pop culture as a crude 'sexual' and 'celebrity-based' culture that is purportedly bringing about the end of moral values. Renowned semiotician Marcel Danesi adds his signature insight to the debate by delving deep into pop culture through a consideration of symbols. Danesi's treatment of letters, such as the X in 'X-Rated,' the 'i' in 'iPod,' and other such symbols, reveals an ancient mythic structure that blends the sacred and profane dimensions of human psychic life. Danesi takes the reader on a remarkable exploration of the radical turns in American society, a society in which the search for pleasure and sexual expression often reign supreme. X-Rated! is a fascinating trip through what gives pop culture its secret appeal.

Creating Climate Wealth Jigar Shah 2013 "Creating Climate Wealth is about how climate change, the biggest challenge of our time, can be turned into a \$10 trillion dollar wealth-creating opportunity. Author Jigar Shah, internationally recognized for revolutionizing the now multi-billion-dollar solar energy industry, outlines how entrepreneurs and investors can unlock the massive potential that climate change represents. Shah argues that, while new technical innovation is valuable, deployment of existing technologies are the key to reaching our near-term climate targets. Rather than waiting for yet to be developed technology, business model innovation is the key to attract mainstream capital and unlock transformational change... Unlocking our next economy will be driven by thousands of companies deploying existing clean and resource-efficient technologies in electricity-supply (like solar), transportation, building materials, industry, forestry, waste, and agriculture."--

Beyond Charlottesville: Taking a Stand Against White Nationalism Terry McAuliffe 2019-07-30 THE INSTANT NEW YORK TIMES BESTSELLER The former governor of Virginia tells the behind-the-scenes story of the violent "Unite the Right" rally in Charlottesville—and shows how we can prevent other Charlottesvillees from happening. When Governor Terry McAuliffe hung up the phone on the afternoon of the violent "Unite the Right" rally in Charlottesville, he was sure Donald Trump would do the right thing as president: condemn the white supremacists who'd descended on the college town and who'd caused McAuliffe to declare a state of emergency that morning. He didn't. Instead Trump declared there was "hatred, bigotry and violence on many sides." Trump was condemned from many sides himself, even by many Republicans, but the damage was done. He'd excused and thus egged on the terrorists at the moment when he could have stopped them in their tracks. In *Beyond Charlottesville*, McAuliffe looks at the forces and events that led to the tragedy in Charlottesville, including the vicious murder of Heather Heyer and the death of two state troopers in a helicopter accident. He doesn't whitewash Virginia history and discusses a KKK protest over the removal of a statue of Robert E. Lee. He takes a hard real-time behind-the-scenes look at the actions of everyone on that fateful August 12, including himself, to see what could have been done. He lays out what was done afterwards to prevent future Charlottesvillees—and what still needs to be done as America in general and Virginia in particular continue to grapple with their history of racism. *Beyond Charlottesville* will be the definitive account of an infamous chapter in our history, seared indelibly into memory, sure to be cited for years as a crucial reference point in the long struggle to fight racism, extremism and hate.

Perception, Design and Ecology of the Built Environment Mainak Ghosh 2020-01-24 This edited volume is a compilation of the 'built environment' in response to many investigations, analyses and sometimes mere observations of the various dialogues and interactions of the built, in context to its ecology, perception and design. The chapters concentrate on various independent issues, integrated as a holistic approach, both in terms of theoretical perspectives and practical approaches, predominantly focusing on the Global South. The book builds fabric knitting into the generic understanding of environment, perception and design encompassing 'different' attitudes and inspirations. This book is an important reference to topics concerning urbanism, urban developments and physical growth, and highlights new methodologies and practices. The book presumes an understanding unearthed from various dimensions and again woven back to a common theme, which emerges as the reader reads through. Various international experts of the respective fields working on the Global South contributed their latest research and insights to the different parts of the book. This trans-disciplinary volume appeals to scientists, students and professionals in the fields of architecture, geography, planning, environmental sciences and many more.

Meaningful Relationships Steve Duck 1994-05-11 *Meaningful Relationships* challenges the reader to step off traditional academic pathways in the pursuit of understanding the nature of human relationships and plunge into this most important theoretical advance in the field to date. The author, Steve Duck, argues that relationships are never "done deals" but, rather, are continually unfolding and in need of perpetual responsive action and construction. Central to this discussion is the author's contention that relationships are solidly based in the recognition of shared meaning discovered in the way we metaphorically represent the world to ourselves and to others through everyday talk and symbols. Theories presented in *Meaningful Relationships* do not unfold in a sequential manner but rather are approached from different angles showing simultaneous relationships in different contexts. An outstanding addition to the Sage Series on Close Relationships, this book is stimulating in its novel approach and will be of interest to scholars and students in close relationships, psychology, interpersonal communication, sociology, family studies, and social work.

Rise of the Videogame Zinesters Anna Anthropy 2012-03-20 "Anna Anthropy is a key personality in the ongoing paradigm shift that is slowly changing the way videogames are understood, by creators and players, and by the wider culture." —Patrick Alexander, Eagra.com "Equal parts autobiography, ethnography, and how-to manual, this book concisely makes the case for the unique power of 'zinester' games." —Adam Parrish, NYU's Interactive Telecommunication Program (Tisch School of the Arts), and author of the ZZT game "Winter" "These days, everybody can make and distribute a photograph, or a video, or a book. *Rise of the Videogame Zinesters* shows you that everyone can make a videogame, too. But why should they? For Anna Anthropy, it's not for fame or for profit, but for the strange, aimless beauty of personal creativity." —Ian Bogost, Director, Graduate Program in Digital Media, Georgia Institute of Technology "Rise is a great guidebook to understanding—and more importantly, participating in—this dynamically evolving culture." —Jim Munroe, co-founder of the Hand Eye Society and the Difference Engine Initiative "Here, Anna Anthropy demonstrates how people from every background and walk of life are breaking free of the commercial cowardice of major publishers, and bringing their individual visions of the game to life. . . . If game design is to be an art, as those of us who love games fervently hope, it must be rescued from its crushing commercial pressures. You can be a part of its future." —Greg Costikyan, author of *I Have No Mouth and I Must Scream* "Anna gives the world of video games a crucial perspective from her seat of authority within outsider culture, and illustrates how essential it is for the space to empower voices of all kinds if it is to evolve." —Leigh Alexander, editor-at-large of *Gamasutra*

Health Promotion in Health Care - Vital Theories and Research Gørill Haugan 2021-03-11 This open access textbook represents a vital contribution to global health education, offering insights into health promotion as part of patient care for bachelor's and master's students in health care (nurses, occupational therapists, physiotherapists, radiotherapists, social care workers etc.) as well as health care professionals, and providing an overview of the field of health science and health promotion for PhD students and researchers. Written by leading experts from seven countries in Europe, America, Africa and Asia, it first discusses the theory of health promotion and vital concepts. It then presents updated evidence-based health promotion approaches in different populations (people with chronic diseases, cancer, heart failure, dementia, mental disorders, long-term

ICU patients, elderly individuals, families with newborn babies, palliative care patients) and examines different health promotion approaches integrated into primary care services. This edited scientific anthology provides much-needed knowledge, translating research into guidelines for practice. Today's medical approaches are highly developed; however, patients are human beings with a wholeness of body-mind-spirit. As such, providing high-quality and effective health care requires a holistic physical-psychological-social-spiritual model of health care is required. A great number of patients, both in hospitals and in primary health care, suffer from the lack of a holistic oriented health approach: Their condition is treated, but they feel scared, helpless and lonely. Health promotion focuses on improving people's health in spite of illnesses. Accordingly, health care that supports/promotes patients' health by identifying their health resources will result in better patient outcomes: shorter hospital stays, less re-hospitalization, being better able to cope at home and improved well-being, which in turn lead to lower health-care costs. This scientific anthology is the first of its kind, in that it connects health promotion with the salutogenic theory of health throughout the chapters. The authors here expand the understanding of health promotion beyond health protection and disease prevention. The book focuses on describing and explaining salutogenesis as an umbrella concept, not only as the key concept of sense of coherence.

The Initiatic Path in the Arcana of Tarot and Kabbalah Samael Aun Weor 2006-12 In this cornerstone work, Samael Aun Weor explains in clear terms the entire basis of all esoteric work: Kabbalistic symbology. This is the language of the Internal Worlds. "In these studies of Kabbalah, we need to be practical; there are authors who write marvels, but when one looks at them, one realizes that they have not lived what they have written; they did not experience it in themselves, and that is why they are mistaken. I understand that one must write what one has directly experienced by oneself. I have proceeded in this way on my part." This book is no mere repetition of what others have written: it is the direct experience of the author. This revolutionary work examines the Tarot and Kabbalah as never before, with brilliant revelations about the mysterious sphere of Daath, whose true nature was never before discussed publicly. In Five Parts: 1: Description and Study of the Esoteric Tarot 2: Initiation through the Arcana of the Tarot 3: The Kabbalah 4: Numerology and Esoteric Mathematics 5: Predictive Kabbalah

English Learning Made Easy- Strategies and Approaches Dr Reena Mittal 2015-04-03 Books are always our best companion. The idea of writing or editing a book remains always in our mind. Our students come from semi-urban background and not very fluent in English reading, writing and speaking. English is not just a Second language to them, but it is completely a foreign language to the rural background pupils. So, we research innovative techniques to make them familiar. This continuous research motivates us to edit a book on the topic. We can well see the potential of the book as it is not just about the 'Teaching' of English but basically about 'Learning' English as such. But of course it will be very helpful for ELT, per se. The book making is a long process and it needs a careful study of area, topics and research methodologies, along with very intensive and extensive genuine research work before we start. The very first thing which struck our mind was to choose the topic which could be beneficial for students and teachers both. Our undergraduate students, who actually lack Basic English speaking, reading and writing standard, gave us many new topics to write. They and their problems motivated us to collect opinions of our fellow colleagues on the wider perspectives of the chosen topic and edit a book on the subject. We have endeavored to cover many areas which need to be given emphasize when we teach or learn English. Our main focus is to give tricks and useful tips to enhance and learn English as a second language.

Acid Dreams Martin A. Lee 1992 Provides a social history of how the CIA used the psychedelic drug LSD as a tool of espionage during the early 1950s and tested it on U.S. citizens before it spread into popular culture, in particular the counterculture as represented by Timothy Leary, Allen Ginsberg, Ken Kesey, and others who helped spawn political and social upheaval.

Social Context and Relationships Steve Duck 1993-08-17 with Graham Allan, Irwin Altman, Leslie A. Baxter, Niall Bolger, Barbara B. Brown, Joseph Ginat, Shannon Kelleher, Renate Klein, Robert M. Milardo, Catherine H. Stein, Carol M. Werner & Julia T. Wood Social Context and Relationships moves beyond exploring the personal factors involved in relationships and reveals the impact of outside forces--culture, society, values, economics, and more--on the conduct of relationships. Confronting practical realities, this compelling volume focuses on how such issues as limited opportunity, restraints on freedom, compulsions of coercive family norms, responsibilities, poverty, bigotry, gender, physical separation, and limited geographic mobility influence personal relationships. Because the contributors successfully argue for the redirection of research--from the over-application of an individual perspective to the inclusion of contextual features--students and scholars in social psychology, communication studies, family studies, sociology, and gender studies will discover much of value in this fascinating volume.

Green Illusions Ozzie Zehner 2012 We don't have an energy crisis. We have a consumption crisis. And this book, which takes aim at cherished assumptions regarding energy, offers refreshingly straight talk about what's wrong with the way we think and talk about the problem. Though we generally believe we can solve environmental problems with more energy—more solar cells, wind turbines, and biofuels—alternative technologies come with their own side effects and limitations. How, for instance, do solar cells cause harm? Why can't engineers solve wind power's biggest obstacle? Why won't contraception solve the problem of overpopulation lying at the heart of our concerns about energy, and what will? This practical, environmentally informed, and lucid book persuasively argues for a change of perspective. If consumption is the problem, as Ozzie Zehner suggests, then we need to shift our focus from suspect alternative energies to improving social and political fundamentals: walkable communities, improved consumption, enlightened governance, and, most notably, women's rights. The dozens of first steps he offers are surprisingly straightforward. For instance, he introduces a simple sticker that promises a greater impact than all of the nation's solar cells. He uncovers why carbon taxes won't solve our energy challenges (and presents two taxes that could). Finally, he explores how future environmentalists will focus on similarly fresh alternatives that are affordable, clean, and can actually
