

Ask Someone Out Sentence

Unfinished Sentence Clare Kauter 2017-09-07 Amateur sleuth Charlie Davies is back again, and this time she's taking on a Russian gangster. Well, maybe. Charlie's boss, the less-than-friendly Adam Baxter, has received information that local club owner Lonny Lionel is, in fact, an escaped foreign criminal - but that's not the kind of thing you can just come out and ask someone. Adam wouldn't normally ask Charlie to help him (she's not exactly his star employee), but she happens to have an 'in' - her friend is dating the man in question. As if that's not enough to deal with, James McKenzie - Charlie's on-again, off-again worst enemy - is being strangely friendly towards her, and now her other nemesis (her former best friend, Celia) is back on the scene, looking to befriend her too. If she doesn't watch out, Charlie is going to run out of adversaries. Oh, apart from that gangster she's spying on, who will torture and murder her if he finds out what she's doing. (If he actually does turn out to be a criminal, that is.) When she stumbles upon a dead body at a local construction site, Charlie starts to think that this time she might be in over her head. Not that it would be that hard - she is pretty short.

Illocutionary Acts and Sentence Meaning William P. Alston 2015-05-01 What is it for a sentence to have a certain meaning? This is the question that the distinguished analytic philosopher William P. Alston addresses in this major contribution to the philosophy of language. His answer focuses on the given sentence's potential to play the role that its speaker had in mind, what he terms the usability of the sentence to perform the illocutionary act intended by its speaker. Alston defines an illocutionary act as an act of saying something with a certain "content." He develops his account of what it is to perform such acts in terms of taking responsibility, in uttering a sentence, for the existence of certain conditions. In requesting someone to open a window, for example, the speaker takes responsibility for its being the case that the window is closed and that the speaker has an interest in its being opened. In *Illocutionary Acts and Sentence Meaning*, Alston expands upon this concept, creating a framework of five categories of illocutionary act and going on to argue that sentence meaning is fundamentally a matter of illocutionary act potential; that is, for a sentence to have a particular meaning is for it to be usable to perform illocutionary acts of a certain type. In providing detailed and explicit patterns of analysis for the whole range of illocutionary acts, Alston makes a unique contribution to the field of philosophy of language—one that is likely to generate debate for years to come.

Cognition, Metacognition, and Reading Donna-Lynn Forrest-Pressley 2013-03-12 We had our first conversation about cognition, metacognition, and reading in September of 1976. Our particular concern was with reading and learning to read, and what, if anything, meta cognition might have to do with it all. We didn't really know much about metacognition then, of course, but then most other people were in the same predicament. Some people had been working with interesting approaches and results on metalanguage and reading, among them J. Downing, L. Ehri, L. Gleitman, 1. Mattingly, and E. Ryan, and it also was about that time that people were becoming aware of E. Markman's first studies of comprehension monitoring. Other than that perhaps the most influential item around was the perhaps already "classic" monograph by Kruetzer, Leonard, and Flavell on what children know about their own memory. Also in the air at that time were things like A. Brown's notions about "knowing, knowing about know ing, and knowing how to know," D. Meichenbaum's ideas about cognitive behavior modification, and the work by A. Brown and S. Smiley on the awareness of important units in text. Even though these developments were cited as new and innovative, it was not the case that psychologists had never before been of questions. They certainly interested in, or concerned with metacognitive sorts had, as clearly evidenced by the notion of "metaplans", in Miller, Galanter, and Pribram's Plans and the Structure of Behavior.
