An award-winning encyclopaedia written for young people—dubbed the "Dinosaur Bible" by enthusiasts! Written by one of the world's foremost experts on dinosaurs, this award-winning title—honored by the NSTA and the AAAS—is an essential addition to any dinophile's library, regardless of age! Using casual language aimed at young people and non-scientists, it's a guide to all aspects of dinosaur science: how we figure out what dinosaurs looked like, how they lived, how they evolved, how they continue to live among us as birds, and much, much more. It also includes brief entries on all 800+ "named" species of Mesozoic dinosaurs, as well as sidebars by 33 world-famous paleontologists—among them Robert T. Bakker, Jack Horner, Mark Norell, Scott Sampson, and Philip Currie. With 428-pages of lavish, museum-quality illustrations, and an exhaustive Web site maintained by the author of supplemental chapter updates, this the perfect gift that will educate AND entertain for many, many, MANY hours! (And if that isn't enough, the jacket has a spectacular poster printed on the inside.) "Written in a casual language both young and adult paleo-nerds will find readable and enjoyable, this volume is seen as the "Dinosaur Bible" by many enthusiasts of the subject, for its sheer completeness and scienciness." —tvtropes.org

**A Field Guide to Dinosaurs** - Henry Gee 2012-01-30

Sensational discoveries during the past decade have shed new light on the most intimate details of dinosaurs' lives, including their appearance and behavior, their family structures, and their sex lives. The latest dinosaur findings present a far more vivid and complete picture of this extraordinarily successful group of animals than would have been thought possible only a few years ago. Recent findings in South America, Madagascar, Mongolia, China, and Australia have revealed the existence of amazing and exotic dinosaurs. Paleontologist Henry Gee and artist Luis Ray have seamlessly integrated all of the most recent discoveries in the making of this unique book. In *A Field Guide to Dinosaurs*, Renowned dinosaur artist Luis V. Rey and paleontologist and writer Henry Gee use up-to-the-minute research findings to paint a vivid picture of the dinosaurs' world. Their unique approach gives readers lifelike portrayals of dinosaurs similar to that of naturalists in the wild, observing living animals of our own era. Readers will experience dinosaurs as living, breathing creatures, with each kind described "from the field" and shown in breathtaking illustrations. Dinosaur physiology is shown in full-color paintings, anatomical sketches, and a host of fascinating incidental detail, much of it never published outside specialist journals. Readers will understand the dinosaurs' environment in terms of the world's changing face throughout the 180-million-year extent of the dinosaur-dominated Mesozoic Era, with a detailed, full-color chart that relates the time span of each dinosaur group. The book also includes at-a-glance icons that convey information about different dinosaur groups, including size, taxonomy, geological period, and geographical origins.

**Dinosaurs** - Donald F. Glut 2012-06-22

This reference work is the seventh supplement to *Dinosaurs: The Encyclopedia* (a 1998 American Library Association Outstanding Reference Book) and follows the intent and format of the encyclopedia and previous supplements. This supplement, as did its predecessors, offers primarily new information based upon the more recent research of vertebrate paleontologists; also, it corrects previously errors that may have crept into earlier volumes and emends outdated information. Among the many dramatic events discussed and updated are the first record of a dinosaur of any kind from Bulgaria, the first evidence of cannibalism in the genus *Tyrannosaurus*, the first evidence suggesting that some of the most avian dromaeosaurid theropods might have been venomous, the oldest known dinosaurian embryonic specimens recovered to date, and the first relatively complete dinosaur described from Korea. Supplemental volumes do not repeat information from earlier volumes, but build upon them: view all volumes on the series page.
