White Fragility Robin DiAngelo 2019-02-07 The International Bestseller 'With clarity and compassion, DiAngelo allows us to understand racism as a practice not restricted to "bad people." In doing so, she moves our national discussions forward. This is a necessary book for all people invested in societal change' Claudia Rankine Anger. Fear. Guilt. Denial. Silence. These are the ways in which ordinary white people react when it is pointed out to them that they have done or said something that has - unintentionally - caused racial offence or hurt. After, all, a racist is the worst thing a person can be, right? But these reactions only serve to silence people of colour, who cannot give honest feedback to 'liberal' white people lest they provoke a dangerous emotional reaction. Robin DiAngelo coined the term 'White Fragility' in 2011 to describe this process and is here to show us how it serves to uphold the system of white supremacy. Using knowledge and insight gained over decades of running racial awareness workshops and working on this idea as a Professor of Whiteness Studies, she shows us how we can start having more honest conversations, listen to each other better and react to feedback with grace and humility. It is not enough to simply hold abstract progressive views and condemn the obvious racists on social media - change starts with us all at a practical, granular level, and it is time for all white people to take responsibility for relinquishing their own racial supremacy. 'By turns mordant and then inspirational, an argument that powerful forces and tragic histories stack the deck fully against racial justice alongside one that we need only to be clearer, try harder, and do better' David Roediger, Los Angeles Review of Books 'The value in White Fragility lies in its methodical, irrefutable exposure of racism in thought and action, and its call for humility and vigilance' Katy

Media-Mediated Relationships Frank Hoffmann 2023-07-28

Creating a nexus between techno-science and more fundamental disciplines, a phenomenon is emerging in our personal lives: we are beginning to preempt traditional sources for relationship formation; we are becoming more insular and more cautious in starting relationships. The media play an enormous role in our activities, encouraging us to self-advertise in newspapers and magazines, to participate vicariously through pornographic and borderline books, talk radio, and tabloid television, to use our telephones and computers for the ultimate in “safe sex,” to engage in video dating, and to explore many other aspects in the field of technoeroticism. As straight and gay people alike live in a time of reluctant commitments, a period of playtime, and the Age of AIDS, the time has come to chronicle the role of mass communication in our search for interpersonal connections.

Media-Mediated Relationships investigates the historical, economic, psychological, and sociocultural ramifications of the print and broadcast media, motion pictures, music, and new communications technologies (computers, video, interactive media, virtual reality, phone sex) in terms of both our individual and societal concerns. An extension of “cultivation analysis” by means of systems theory, it reports on a baseline survey of over 200 people regarding relationship mediation--demonstrating yet one more example of the symbiosis among and between various media sources. A descriptive case study, *Media-Mediated*

TV Drama in China Ying Zhu 2008-10-01 This collection of essays brings together the first comprehensive study of TV drama in China. Examining in depth the production, distribution and consumption of TV drama, the international team of experts demonstrate why it remains the pre-eminent media form in China. The examples are diverse, highlighting the complexity of producing narrative content in a rapidly changing political and social environment. Genres examined include the revisionist Qing drama, historical and contemporary domestic dramas, anti-corruption dramas, "pink" dramas, Red Classics, stories from the Diaspora, and sit-coms. In addition to genres, the collection explores industry dynamics: how TV dramas are marketed and consumed on DVD, and China's aspirations to export its television drama rights. The book provides an international and cross-cultural perspective with chapters on Taiwanese TV drama in China, the impact of South Korean drama, and trans-border production between the Mainland and Hong Kong.

HBO's Girls Betty Kaklamanidou 2014-03-25 Young women today have achieved as much as, and in many cases far exceeded, males in both educational and occupational terms. While this presents many opportunities, it also creates confusion in terms of re-negotiating traditional gender roles. The fictional representation of young women in recent film and television shows demonstrates how these tensions, created by the specific sociopolitical climate of the post-recession era, are being worked out. One specific television show focused on intelligent young women caught up in these contradictions is *Girls*. The show explores the lives of four female friends living in Brooklyn, two years after their college graduation, as they try to support themselves with low-paying jobs, and deal with various struggles around relationships, careers, and friendships. The HBO half-hour sitcom, created, written by and starring Lena Dunham, premiered on April 15th 2012 after receiving a flood of initial buzz and criticism, both positive and negative. This collection is the first to discuss the cultural, political and social implications of this innovative series. The contributors examine *Girls* through a variety of lenses: sexual, racial, gender, relationships between the male and female characters, as well as friendships between the young women. This variety of perspectives explains why *Girls* has had the profound cultural impact it has made, in the short time it has been on the air.
