High Yield Biochemistry - R. Bruce Wilcox 1999

As part of the popular High-Yield Series, this updated Second Edition provides a succinct, heavily illustrated review in outline format of medical biochemistry for students preparing for USMLE Step 1.

Elsevier's Integrated Review Biochemistry E-Book - John W. Pelley 2011-09-28

Effectively merge basic science and clinical skills with Elsevier's Integrated Review Biochemistry, by John W. Pelley, PhD. This concise, high-yield title in the popular Integrated Review Series focuses on the core knowledge in biochemistry while linking that information to related concepts from other basic science disciplines. Case-based questions at the end of each chapter enable you to gauge your mastery of the material,

and a color-coded format allows you to quickly find the specific guidance you need. This concise and user-friendly reference provides crucial guidance for the early years of medical training and USMLE preparation. This title includes additional digital media when purchased in print format. For this digital book edition, media content is not included. Spend more time reviewing and less time searching thanks to an extremely focused, "high-yield" presentation. Gauge your mastery of the material and build confidence with both case-based, and USMLE-style questions that provide effective chapter review and quick practice for your exams. This title includes additional digital media when purchased in print format. For this digital book edition, media content is not included. Grasp and retain vital concepts more easily thanks to

a color-coded format, succinct, text, key concept boxes, and dynamic illustrations that facilitate learning in a highly visual approach. Effectively review for problem-based courses with the help of text boxes that help you clearly see the clinical relevance of the material.

High-Yield Q&A Review for USMLE Step 1: Biochemistry and Genetics - Michael W. King
2022-11-18

Essential for USMLE Step 1 review! A rigorous full-color review for any biochemistry or medical biochemistry examination This full-color review offers a fast and effective way for you to prepare for regular course examinations in biochemistry and medical biochemistry, as well as medical board exams and the USMLE Step 1. A unique feature of this review is the integration of medical biochemistry with physiology, pathophysiology, pathology, and anatomy, making it perfect for today's rapidly changing medical school curriculum. Important related topics such

as carbohydrate, lipid, protein metabolism, and associated disease/pathologies are incorporated into a concise, focused review of biochemistry. High-Yield Q & A Review for USMLE Step 1 is packed with learning aids: 1,100 multiple-choice questions and thorough explanations for each answer 350 full-color illustrations Detailed clinical boxes with high-yield information concerning diseases and disorders related to defects in the pathways being discussed Every chapter includes: - An outline listing the major topics covered - A list of high-yield terms related to the content - Numerous explanatory figures and tables designed to increase your understanding of must know material - A checklist that recaps important and high-yield concepts

online entitlements included with the product. The biochemistry/USMLE® review you've been waiting for . . . clear, concise, high yield, and clinically relevant INCLUDES AN ONLINE VIDEO LECTURE FOR EVERY CHAPTER! The goal of Fundamentals of Biochemistry: Medical Course & Step 1 Review is to make biochemistry an approachable, clinically relevant subject for your first years of medical school, and, most importantly, when you prepare to take the USMLE® Step 1 examination. The authors believe that when biochemistry is put in a clinical context, learning and understanding it becomes much less complicated, as all the pieces of the "puzzle" fall into place. A SELF-CONTAINED, HIGH-YIELD GUIDE UNLIKE ANY OTHER You will find Fundamentals of Biochemistry: Medical Course & Step 1 Review to be a self-contained guide to high-yield biochemistry, with a strong focus on the topics you are most likely to see on the USMLE® Step 1 exam. You

can select any chapter and find a self-contained summary of the relevant topic. The authors begin with the basics of the cell and DNA, and protein synthesis, then cover the central aspects of metabolism, and finish with nutrition and genetics. EASY-TO-ABSORB CHAPTERS ENHANCED BY COMPANION ONLINE VIDEOS The information is delivered in a simple outline format that pinpoints the high-yield information you need to know. Each chapter is also presented as a lecture, in video format, so you can review the topic in real time and add additional notes as you learn each topic or review them later.

Offering a concise, illustrated summary of biochemistry and its relevance to clinical medicine, Medical Biochemistry at a Glance is intended for students of medicine and the biomedical sciences such as nutrition, biochemistry, sports science, medical laboratory sciences, physiotherapy, pharmacy, physiology, pharmacology, genetics and veterinary science. It also provides a succinct review and reference for medical practitioners and biomedical scientists who need to quickly refresh their knowledge of medical biochemistry. The book is designed as a revision guide for students preparing for examinations and contains topics that have been identified as 'high-yield' facts for the United States Medical Licensing Examination (USMLE), Step 1. This third edition: Has been thoroughly revised and updated and is now in full colour throughout Is written by the author of the hugely successful Metabolism

at a Glance (ISBN 9781405107167) Features updated and improved clinical correlates Expands its coverage with a new section on Molecular Biology Includes a brand new companion website of self-assessment questions and answers at www.ataglanceseries.com/medicalbiochemistry

Case Files - Eugene C. Toy 2005 Review/USMLE/Biochemistry Real-Life clinical cases for the Basic Sciences and USMLE Step 1. Clinical correlations are increasingly emphasized in the teaching of basic medical science. Students, therefore, need exposure to clinical cases to pass course exams and ace the USMLE Step 1. This book presents 46 real-life clinical cases illustrating essential concepts in biochemistry. Each case includes an easy-to-understand discussion correlated to key basic science concepts, definitions of key terms, biochemistry pearls, and USMLE-style review questions. This interactive learning system helps you to learn

instead of memorize; 46 clinical cases correlated to high-yield biochemistry concepts; Biochemistry Pearls highlight key points; USMLE-style comprehension questions with each case; Primer on how to approach the basic sciences; Proven learning system improves exam scores. Case Files: Biochemistry provides students with a compilation of scenarios very similar to those seen on the USMLE Step 1 and standardized tests. The explanations include everything you need to know and more about a particular disease. It is a well-rounded method of reviewing for the boards. - Sunitha J. Moonthungal, 3 the application of basic science knowledge to clinical cases. - Arlene Chung, 4th year medical student, East Carolina University School of Medicine. Understanding key science concepts is more valuable than memorizing formulas and terms. The explanations discuss why the answer is correct and - more importantly - why another answer that may have seemed correct is the wrong choice. These explanations include the foundations and details of important science topics needed to answer related questions on the MCAT. By reading these explanations carefully and understanding how they apply to solving the question, you will learn important biology concepts and the relationships between them. This will prepare you for the biology part of the MCAT and will significantly improve your score. All the questions are prepared by our science editors that possess extensive credentials, are educated in top colleges and universities and have been admitted to medical school with stellar MCAT scores. Our editors are experts on teaching sciences, preparing students for the MCAT and have coached

thousands of premeds on admission strategies. Biology questions: molecular biology: enzymes and metabolism, molecular biology:dna and protein synthesis, molecular biology:eukaryotes, microbiology, generalized eukaryotic cell, specialized eukaryotic cells and tissues, nervous and endocrine systems, circulatory, lymphatic, and immune systems, digestive and excretory systems, muscle and skeletal systems, respiratory system, skin system, reproductive system and development, genetics, evolution (all topics tested on MCAT).
