**The Art of Fashion** Deb Salisbury 2016-09-04 "To increase the beauty of the female person, by a gracefully made attire, is not only not wrong, but absolutely commendable; and the woman who neglects it pays the penalty of being called a sloven, if not a fright." Peterson's Magazine, April 1852 During the 1850s, the art of fashion was studied by every woman who wanted to create her own wardrobe. Ladies magazines were scrutinized and dissected, scoured for details on how each effect was created, how many seams were used, and how the pleats were formed. She learned why changes were made, when they went out of date, and how to recreate the styles she liked. Most of all, she studied what the current rules were, even though they seemed to change monthly, especially for the most fashion conscious women. This book compiles sewing and fashion advice given in books and magazines during the 1850s, given in the words of writers of that time. Each entry shows the name and date of the periodical quoted. It has

three sections: 1) Sewing tips and fashion advice 2) Fabric cleaning and care. 3) Bibliography of magazines and books I found useful. I've included over 490 black and white period engravings to help show the details of their work.

### **Gender as a Political Instrument Forming New Boundaries by Ethnic and Religious Diasporas in European Union**

Konstantin S. Sharov 2022-03-19 This book considers gender as a convenient tool for making new boundaries within the European Union. It offers a political analysis based on sociological surveys conveyed by the author in 2008–2021. It emphasises the utmost necessity of a proper understanding of specific gender political technologies applied in ethnic and religious diasporas within the EU borders, by EU ruling elites, to avoid ideological collapse in relations with diaspora political groups and general members. The book demonstrates that uncritical application of EU gender equality programs within diasporas may transform gender to a dangerous political force destabilising the European Union. The monograph will be of interest for political science researchers, legislators, and administrators that work with political dimension of gender.

**All dressed up** Mireille Tembouret 2021-05-01 History, function, codes and characteristics of all the dresses. Corsets, panniers, crinolines or bustles are words that no longer have significance today. But at various times throughout the history of clothing, women wore these essential pieces under their dresses and often needed help to put them on. Depending on the fashions of each period, certain parts of the body were highlighted as elements of seduction (a tiny waist, extremely wide hips, an exaggerated bottom,...). Women sought what they believed to be an ideal of perfection while obeying the strict, often extravagant codes of Fashion and social norms. It was the events surrounding World Wars I and II and then the Women's Liberation Movement of the 1970s that finally introduced dresses which did not restrict the body. But even today, dresses still assert a woman's femininity.

*Exploring Gender and Sikh Traditions* Doris R. Jakobsh

2021-09-01 This volume gathers scholars who focus on gender through a variety of disciplines and approaches to Sikh Studies. The intersections of religion and gender are here explored, based on an understanding that both are socially constructed. Far from being static, as so often presented in world religions textbooks, religious traditions are constantly in flux, responding to historical, cultural and social contexts. So too is 'the' Sikh tradition in terms of practices, ideologies, rituals, and notions of identity. We here conclude that 'a' Sikh tradition does not exist; instead, there are numerous forms thereof. In this volume, Sikhism is presented as a collection of 'Sikh traditions'. Gender studies—in line with women's liberation, masculine and feminist studies have long examined and have long deconstructed the patriarchy, but also move to identify other subordinate-dominant relations between individuals. Indeed, there are numerous forms of discrimination and power structures that simultaneously create a multiplicity of oppression. Intersectionality has become the basis of an increasingly systematized production of contemporary discourses on feminism and gender analysis, as is evidenced by the varied contributions in this volume.

**French Fashion, Women & the First World War** Maude Bass-Krueger 2019 "An unprecedented examination of the impact of fashion on society in France throughout the Great War. This fascinating exploration of French women's fashion during World War I is the first in-depth consideration of the role that fashion played in the upheaval of French society between 1914 and 1918. As the fashion industry-the second largest industry in the country-mobilized to help the war effort, Parisian couture houses introduced new styles, aggressively disseminated information through magazines, and strengthened their propaganda efforts overseas. Women of all social classes adapted their garments to the wartime lifestyle, and practicality was increasingly introduced in the form of pockets and "sportswear" textiles like jersey. While women were heralded for contributing to the war effort, the clothes they wore while doing so often provoked debates, particularly when their attire was seen as too masculine or militaristic. With focused studies of wartime garments such as skirt suits, nurse's uniforms, work overalls, and mourning clothes, this volume brings to life the passionate debates that roiled the French fashion industry and reveals the extent to which fashion was a hotly contested topic and a barometer for social tensions throughout this tumultuous era. Maude Bass-Krueger is postdoctoral fellow at the Center for the Arts in Society at Leiden University. Sophie Kurkdjian is a research fellow at l'Institut
