

# Relationships A Dialectical Perspective

## **A Dialectical Perspective on Cohabitational Conflicts in Hispanic Relationships** - Cynthia Sulmaz Divsalar 2007

Abstract not available.

Close Relationship Dialectics - Amy Elizabeth Matten 1999

*The Compass of Friendship* - William K. Rawlins  
2008-08-22

2012 Recipient of the Gerald R. Miller Book Award from the Interpersonal Communication Division of the National Communication Association (NCA) 2009 Recipient of the David R. Maines Narrative Research Award from the Ethnography Division of the National Communication Association (NCA) "The book is

a valuable addition to the literature on friendship. Faculty who teach relationship development will find useful material for themselves and their students. Relationship researchers will find dozens of possible studies in these pages. Finally, any thoughtful person interested in relationship quality could profit from reading this interesting treatment of one of life's most valuable attributes—our friends." - Phil Backlund, University of Denver Exploring how friends use dialogue and storytelling to construct identities, deal with differences, make choices, and build inclusive communities, *The Compass of Friendship* examines communication dialectically across private, personal friendships as well as public, political friendships. Author

William K. Rawlins uses compelling examples and cases from literature, films, dialogue and storytelling between actual friends, student discussions of cross-sex friendships, and interviews with interracial friends. Throughout the book, he invites readers to consider such questions as: What are the possibilities for enduring, close friendships between men and women? How far can friendship's practices extend into public life to facilitate social justice? What are the predicaments and promises of friendships that bridge racial boundaries? How useful and realistic are the ideals and activities of friendship for serving the well-lived lives of individuals, groups, and larger collectives?

*Close Relationship Loss* - Terri L. Orbuch

2012-12-06

Social scientists from various disciplines have been increasingly concerned with the nature, structure, and function of close relationships. Although most of the early work on the topic of close relationships drew attention to the

development of close relationships, since the mid-1970s researchers have begun to investigate the many different aspects connected to the loss of close relationships. Despite the change to a more comprehensive conceptual framework, close relationship research is often criticized for being atheoretical; the research is criticized for being purely descriptive in nature and thus lacking a more theoretical framework. Contrary to this belief, I wish to argue that researchers in the area of close relationship loss employ several critical and prominent theoretical perspectives to describe, explain, and understand the endings of relationships-thus, the fruition of this book. The major aim of this edited book is to present and illuminate, within one volume, some of these major theoretical perspectives. The volume as a whole has several unique qualities. First, within each chapter, the authors provide a general overview of the theoretical perspective or approach within which they examine close relationship loss.

**Maintaining Relationships Through**

**Communication** - Daniel J. Canary 2003-01-30  
Relational maintenance provides a rallying point for those seeking to discover the behaviors that individuals utilize to sustain their personal relationships. Theoretical models, research programs, and specific studies have examined how people in a variety of close relationships choose to define and maintain those relationships. In addition, relational maintenance turns our attention to communicative processes that help people sustain their close relationships. In this collection, editors Daniel J. Canary and Marianne Dainton focus on the communicative processes critical to the maintenance and enhancement of personal relationships. The volume considers variations in maintaining different types of personal relationships; structural constraints on relationship maintenance; and cultural variations in relational maintenance. Contributions to the

volume cover a broad range of relational types, including romantic relationships, family relationships, long-distance relationships, workplace relationships, and Gay and Lesbian relationships, among others. **Maintaining Relationships Through Communication: Relational, Contextual, and Cultural Variations** synthesizes current research in relationship maintenance, emphasizes the ways that behaviors vary in their maintenance functions across relational contexts, discusses alternative explanations for maintaining relationships, and presents avenues for future research. As such, it is intended for students and scholars studying interpersonal communication and personal relationships.

**Close Relationships** - Clyde Hendrick  
2001-11-20

'The authors ...extend the reach of their comprehensive reviews into theoretically driven and innovating explorations. The scope of coverage across and within chapters is striking.

The developmentalist, the methodologist, the feminist, the contextualist, and the cross-culturalist alike will find satisfaction in reading the chapters' - Catherine A Surra, University of Texas, Austin The science of close relationships is relatively new and complex. This volume has 26 chapters organized into four thematic areas: relationship methods, forms, processes, and threats, as well as a foreword and an epilogue.

*Dialectical Approaches to Studying Personal*

*Relationships* - Barbara M. Montgomery

2013-09-13

This book describes many different and useful ways of understanding personal relationships from a dialectical perspective. It is written for scholars in higher education, both faculty and students, across many fields within the social sciences and the humanities who seek answers to questions about how people relate to one another. The book is valuable for all scholars who pursue new ideas because it models a form of scholarly communication in which: \* multiple

voices can be acknowledged as valid; \* the worth of one perspective is not measured by the denigration of another; and \* difference is celebrated as conducive to learning rather than threatening to it. The contributors emphasize the characteristics of their dialectical view that set them apart from other dialectical authors and describe their methods of studying relationships from a dialectical perspective. Following the Bakhtinian perspective, they honor the values of dialogism by respecting different and sometimes contradictory views, assuming that these views can be valid, and joining in a discussion with the editors and other contributors about their emerging work. They also acknowledge that the chapters in this text are part of an ongoing process to frame and reframe emerging ideas, and allow the dialogue that occurs within this frame the freedom to express creative, unique ideas.

**Close Relationships** - Patricia Noller

2013-05-13

by guest

Close Relationships: Functions, Forms and Processes provides an overview of current theory and research in the area of close relationships, written by internationally renowned scholars whose work is at the cutting edge of research in the field. The volume consists of three sections: introductory issues, types of relationships, and relationship processes. In the first section, there is an exploration of the functions and benefits of close relationships, the diversity of methodologies used to study them, and the changing social context in which close relationships are embedded. A second section examines the various types of close relationships, including family bonds and friendships. The third section focuses on key relationship processes, including attachment, intimacy, sexuality, and conflict. This book is designed to be an essential resource for senior undergraduate and postgraduate students, researchers, and practitioners, and will be suitable as a resource in advanced courses

dealing with the social psychology of close relationships.

Relating - Leslie A. Baxter 1996-05-17

Drawing upon the dialogism of social theorist Mikhail Bakhtin, the authors re-conceive the core ideas of interpersonal communication - relationship development; closeness; certainty; openness; communication competence; and the boundaries between self, relationship, and society.

The High-Conflict Couple - Alan Fruzzetti  
2006-12-03

You hear and read a lot about ways to improve your relationship. But if you've tried these without much success, you're not alone. Many highly reactive couples—pairs that are quick to argue, anger, and blame—need more than just the run-of-the-mill relationship advice to solve their problems in love. When destructive emotions are at the heart of problems in your relationship, no amount of effective communication or intimacy building will fix what

*by guest*

ails it. If you're part of a "high-conflict" couple, you need to get control of your emotions first, to stop making things worse, and only then work on building a better relationship. The High-Conflict Couple adapts the powerful techniques of dialectical behavior therapy (DBT) into skills you can use to tame out-of-control emotions that flare up in your relationship. Using mindfulness and distress tolerance techniques, you'll learn how to deescalate angry situations before they have a chance to explode into destructive fights. Other approaches will help you disclose your fears, longings, and other vulnerabilities to your partner and validate his or her experiences in return. You'll discover ways to manage problems with negotiation, not conflict, and to find true acceptance and closeness with the person you love the most.

### **Communication and Personal Relationships**

- Kathryn Dindia 2000-09-11

Focusing particularly on communication processes in relationships, this text presents the

different theories about personal relationships that have emerged from different traditions in communication studies.

**Close Encounters** - Laura K. Guerrero  
2013-03-05

New edition of this popular student introduction, taking a relational approach to the field of interpersonal communication.

### **Understanding Consumer-Brand**

**Relationships** - Marie-Louise Marti 2018

The emotional bond between brands and their consumers becomes more important in today's consumer world, turning consumer-brand relationships into competitive advantages in the marketing field. Most consumer-brand relationship research focuses on how these relationships are formed and their different types, but the factors that have to be considered in the long run to maintain a consumer-brand relationship have not yet been explored. Thus, this thesis examines consumer-brand relationship from a dialectical perspective to

*by guest*

uncover new insights into how relationships can be maintained or even developed over time. In particular, the theory of relational dialectics - which studies the relationship maintenance in interpersonal relationships - is applied to consumer-brand relationships with the aim of revealing the influencing dimensions and their factors to maintain consumer-brand relationships. Based on the results of the study, three dialectical dimensions (autonomy-connection, openness-closedness and predictability-novelty) and five attributes (top of mind, intermediaries, identity effects, time effects and experiencing the brand) are found to influence the development and maintenance of consumer-brand relationships.

**A Relational Theory of World Politics -**

Yaqing Qin 2018-04-05

A reinterpretation of world politics drawing on Chinese cultural and philosophical traditions to argue for a focus on relations amongst actors, rather than on the actors individually.

**The Contemporary American Family -** Teresa Chandler Sabourin 2003-04-07

Written to expand the definition of the contemporary American family to be more inclusive, this text approaches diversity as the norm and does not assume conventional family values. The theoretical position is the dialectical approach, which assumes paradox and relational tension as normal.

Relationships - Robert A. Hinde 2015-01-28

This volume on close relationships in adulthood discusses the central issues in the field and points the way towards the construction of an integrated body of knowledge about human relationships. The self, interactions, relationships and groups are treated as dynamic processes in dialectical relations with each other and with the socio-cultural structure of norms, values, beliefs and institutions.; Early chapters introduce aspects of the self relevant to the dynamics of interactions and relationships: Intrapyschic Processes Of Cognition And

Downloaded from

by guest

Emotion Are Emphasized. These Are followed by chapters discussing the principle characteristics of relationships. Seven further chapters focus on the processes involved in the dynamics of relationships, and later chapters synthesize previous ones in discussions of love and friendship, and the nature of relationship change. The focus throughout the text is on current work and current controversy, placed against a background of knowledge that has been built up in recent decades.

*Individuals in Relationships* - Steve Duck 1993

This volume features the latest scholarship on cognitive processes in interpersonal relationships. It explores such questions as: What special knowledge must a person have to participate in a relationship? What particular language structures do people typically use in entering or conducting relationships? Contributors examine the cognitive processes that individuals bring to relationships, ranging from their thought patterns and attributional

styles to the ways in which they recall relationship events and use shared knowledge.

Close Romantic Relationships - John H. Harvey  
2001-06-01

With contributions from the leading experts on relationships, this book covers important issues, such as love as self-expansion, equity in maintaining close relationships, commitment, social support, self-verification, and minding the relationship. The end result is a comprehensive account of the reasons why close relationships are or are not maintained and the manner in which these principles can be applied to current social issues and clinical interventions. Divided into two sections, Part I describes models developed to characterize how relationships are maintained over time, accounts of specific mechanisms at work in close relationships, and conceptualizations of the maintenance and enhancement of close relationships using existing theoretical paradigms. Part II addresses contemporary social issues, as well as clinical

applications. Close Romantic Relationships will appeal to students, researchers, and professionals due to its broad sampling of theory and research on relationship maintenance and enhancement.

Mediating Relationships with Parasocial Others -

John Marc Cuellar 2020

I explore connections made with mediated others, parasocial relationships, in this study. I was guided by Bakhtinian understandings of mediation between consummated parties. To investigate, I interviewed participants who connected with a parasocial figure(s). Engaging in crystallization, I layered my story onto the stories of others who make mediated connections, using autoethnography as an additional methodological tool. I interpretively categorized the themes using Rawlins' dialectical perspective as a lens through which to analyze the findings. The themes that emerged included three overarching dialectical features: The Dialectic of the Freedom to be

Independent and the Freedom to be Dependent, the Dialectic of Judgment and Acceptance, and the Dialectic of the Ideal and the Real. The first overarching dialectic encompassed three subthemes: the Dialectic of Pride and the Need for Recognition, the Dialectic of Availability and Disengagement, and the Dialectic of Stalker and Fan (Stan). The second overarching theme included two subthemes: the Dialectic of the Freedom to Share and the Freedom to Keep for Oneself and the Dialectic of Satisfaction and Cancellation. Finally, the last overarching theme also comprised two subthemes, which included the Dialectic of Emotionality and Rationality and the Dialectic of the Real and the Unreal. These dialectical features emerged when participants spoke of competing tensions within their mediated connections. When making sense of the dialectical features, I recalled personal stories that resonated with the same tensions experienced by the participants.

Voicing Relationships - Leslie A. Baxter 2011

*Downloaded from  
[legacy.opendemocracy.net](http://legacy.opendemocracy.net) on 2023-05-22  
by guest*

Extending on her 1996 seminal and award-winning book on relational dialectics theory, *Relating Dialogues and Dialectics* (co-authored with Barbara Montgomery), author Leslie Baxter presents the 'next generation' of the theory: relational dialogics theory. This theory, and book, explores a greater nuanced understanding of the unity of opposites concept, presenting a more theoretically complex treatment of this and other key dialogic concepts. The text develops a

rich palette of dialogic concepts useful in the study of communication and relationships and is centered around the following concepts: (1) relationships are profoundly situated process - voices are always embodied in a specific space and time; (2) relationships are constituted in communication - they are voiced through verbal and nonverbal communicative practices; (3) relationships come to mean through the interplay of multiple, differing discourses.
