

Settling Troubled Pupils To Learn Why Relationships Matter In School

Working with Relational Trauma in Schools -

Louise Michelle Bombèr 2020-12-21

Written by experienced clinicians, this book provides an exploration of how educators can easily use Dyadic Developmental Practice (DDP) to help vulnerable pupils to thrive. DDP is an intervention model for children and young people who have experienced trauma in past relationships. Safety and security is increased through offering emotional connection in a variety of ways, helped by the attitude of PACE (playfulness, acceptance, curiosity and empathy). The model gives children the opportunity to experience the relationships

necessary for healthy development, emotional regulation and resilience. This book gives educators all the tools they need to embed DDP into their practice, including building connections with students, partnerships with parents, understanding the theory behind DDP, and overcoming the challenges of implementing it in practice. These principles can be adapted to support pupils at all levels.

Observing Adolescents with Attachment

Difficulties in Educational Settings - Kim Golding

2015-10-21

This easy-to-use tool provides an observation checklist which enables staff to identify

behavioural patterns in children with social and emotional difficulties, analyse the underlying emotional difficulties and establish what kind of help and support the children need. Behavioural responses are categorised within clearly outlined topics, including: * behaviour and relationship with peers * attachment behaviours * emotional state in the classroom * attitude to attendance

Checklists and diagrams identify different 'styles' of relating, to help school staff to respond appropriately to the individual needs of each child. A range of handouts include activities designed to provide emotional support, to focus and regulate behaviour and enable the child to develop important social and emotional skills. Suitable for use with children aged 11+, this tool will be an invaluable resource for teachers, teaching assistants, learning support staff, school counsellors and educational psychologists.

Healing Relational Trauma with Attachment-Focused Interventions: Dyadic Developmental

Psychotherapy with Children and Families - Daniel A. Hughes 2019-01-08

From the founder of DDP, this updated and comprehensive guide is the authoritative text on DDP. DDP is an attachment-focused treatment for children and adolescents who experience abuse and neglect and who are now living in stable foster and adoptive families. Its central interventions are influenced by enhanced knowledge about the structure and functions of the brain, as well as the latest findings regarding developmental trauma and the related attachment problems it brings.

Social Exclusion in the UK - Mel Hughes 2022-10-19

In UK society, there are cultural norms and assumptions that affect many marginalised groups and this book aims to address and challenge these through the lens of the people who have lived these experiences. Social Exclusion in the UK presents a range of lived experiences alongside a critical commentary on

Downloaded from
legacy.opendemocracy.net on
2021-04-22 by guest

the impact of social stigma, exclusion and marginalisation on people's lives. This book's chapters are co-authored by people with lived experience and academics and are all underpinned by the Transformative Learning Theory developed by scholar Mezirow. The marginalised experiences discussed in this book include different types of substance users, care leavers, asylum seekers, offenders, HIV positive, those living in poverty or those who identify as transgender. What makes this book unique is that it gives a voice to those who have been the most affected by inequality - whether it's economic or social and health inequalities. Those affected are the least likely to be involved in shaping and informing responses to it and this lack of involvement risks the further exclusion of those who are already marginalised. A few of the ways this book aims to challenge this include: legitimising and prioritising lived experience expertise; fostering critical reflection of our own beliefs and assumptions and drawing on lived

experience expertise to inform responses and solutions.

Attachment and Emotional Development in the Classroom - David Colley 2017-08-21

As part of preparation for the classroom, it's key for trainee teachers to understand the emotional needs of students. This book provides a clear introduction to emotional development and attachment, offering advice and guidance from a diverse range of professional perspectives including psychology, health and education.

Everyday Parenting with Security and Love - Kim Golding 2017-06-21

Children who have experienced trauma, loss or separation early in life need more than just special care and attention; they need to be parented with love and security in a way that allows them to heal and rebuild emotional bonds. This comprehensive book provides parents and carers with crucial advice and guidance on how to strengthen attachment and trust. Based on Dan Hughes' proven 'PACE'

model of therapeutic parenting, this book explains how to implement PACE techniques to overcome the challenges faced by children who struggle to connect emotionally. Barriers to stable relationships such as a lack of trust, fear of emotional intimacy, and high levels of shame are all explained. It explores techniques to overcome these barriers by teaching how to support the child's behaviour at the same time as building empathy and trust. The practical parenting guidance offered throughout is essential for carers or parents of troubled children, and will help build safe, secure emotional relationships.

The Palgrave Handbook of Biology and Society -
Maurizio Meloni 2017-10-27

This comprehensive handbook synthesizes the often-fractured relationship between the study of biology and the study of society. Bringing together a compelling array of interdisciplinary contributions, the authors demonstrate how nuanced attention to both the biological and

social sciences opens up novel perspectives upon some of the most significant sociological, anthropological, philosophical and biological questions of our era. The six sections cover topics ranging from genomics and epigenetics, to neuroscience and psychology to social epidemiology and medicine. The authors collaboratively present state-of-the-art research and perspectives in some of the most intriguing areas of what can be called biosocial and biocultural approaches, demonstrating how quickly we are moving beyond the acrimonious debates that characterized the border between biology and society for most of the twentieth century. This landmark volume will be an extremely valuable resource for scholars and practitioners in all areas of the social and biological sciences. The chapter 'Ten Theses on the Subject of Biology and Politics: Conceptual, Methodological, and Biopolitical Considerations' is open access under a CC BY 4.0 license via link.springer.com. Versions of the chapters 'The

Transcendence of the Social', 'Scrutinizing the Epigenetics Revolution', 'Species of Biocapital, 2008, and Speciating Biocapital, 2017' and 'Experimental Entanglements: Social Science and Neuroscience Beyond Interdisciplinarity' are available open access via third parties. For further information please see license information in the chapters or on link.springer.com.

What about Me? - Louise Michelle Bombèr 2011

Acclaimed teacher/therapist Louise Bomber takes professionals on a guided journey through the school day for pupils with attachment difficulties; from making the transition to school in the morning to leaving at the end of the day.

Biosocial Education - Deborah Youdell
2018-09-03

In this groundbreaking text, Youdell and Lindley bring together cutting-edge research from the fields of biology and social science to explore the complex interactions between the diverse

processes which impact on education and learning. Transforming the way we think about our students, our classrooms, teaching and learning, Biosocial Education draws on advances in genetics and metabolomics, epigenetics, biochemistry and neuroscience, to illustrate how new understandings of how bodies function can and must inform educational theory, policy and everyday pedagogical practices. Offering detailed insight into new findings in these areas and providing a compelling account of both the implications and limits of this new-found knowledge, the text confronts the mechanisms of interaction between multiple biological and social factors, and explores how educators might mobilize these 'biosocial' influences to enhance learning and enable each child to attain educational success. By seeking out transdisciplinary and multi-factor answers to the question of how education works and how children learn, this book lays the foundations for a step-change in the way we approach learning.

It is an essential read for researchers, teachers and practitioners involved in educational policy and practice at any level.

Behaviour Barriers and Beyond - Rachel Thynne
2021-11-29

This practical resource helps school staff to reframe behaviour as a means of communicating a need, ensuring they can sensitively and effectively support children with a range of Social, Emotional and Mental Health (SEMH) needs and Special Educational Needs and Disabilities (SEND). With case studies and examples woven throughout, the book focuses on relational and strength-based approaches to improve mental health and wellbeing, self-esteem, sense of safety and, in turn, behaviour and educational outcomes. All advice is carefully designed to have the maximum positive impact on the child and minimum impact on teacher time and resources. Key features include: ■ Accessible explorations of a range of difficulties and their effects on school life ■ A variety of

supportive strategies, tips and advice, designed to be easy to implement effectively within a busy classroom ■ A focus on building and maintaining positive relationships, making the classroom a safe learning environment Small adjustments can make a huge difference to wellbeing, whether they are for those with a diagnosis, with SEND, with SEMH needs, with anxiety, or just those having a hard time. This book will be an essential tool for teachers, SENCOs and school leaders in both mainstream and specialist settings.

Supporting Inclusive Practice and Ensuring Opportunity is Equal for All - Gianna Knowles
2017-07-06

This third edition of Supporting Inclusive Practice builds on the successful format of the previous two editions, both in content and structure. It explores many aspects of inclusive practice relevant to those who work with children in schools and other educational settings, aiming to provide the most up-to-date

theoretical knowledge and understanding in the field, and illustrating the theory with examples of good practice in the areas explored. Many of the topics that have appeared in the previous editions, including supporting children for whom English is a second language, children on the autistic spectrum and children with neurodiversity conditions, also appear in this edition. The revised content of this third edition also covers recent and relevant changes in national policy and legislation, particularly, for example, around changes in equality and disability, same-sex parenting and transgender children and parenting policy and legislation. It explores the impact on aspects of inclusive practice legislation such as the Equality Act 2010, Marriage (Same Sex Couples) Act 2013 and the Children and Families Act 2014. It also explores in detail the revised 2014 SEN Code of Practice and the introduction of the pupil premium in 2011, which provides support for the education of children from low income families

or who may be children who are fostered or in care. Throughout, the book is informed by the solution-focused social model of special educational needs and disability, and reflects current national policy that sees inclusive practice as fundamental to ensure equality of educational opportunity is achieved for all children.

Critical Reflections on Women, Family, Crime and Justice - Baldwin, Lucy 2021-05-18
Drawing on research from the Women, Family, Crime and Justice research network, this collection sheds new light on the experiences of women and families who encounter the UK criminal justice system. Contributions demonstrate how these groups are often ignored, oppressed and victimised, and offer insights and practical recommendations for change.

Know Me To Teach Me - Louise Michelle Bombèr 2020

Creating Loving Attachments - Kim S. Golding 2012

Troubled children need special parenting to build attachments and heal from trauma. This book provides a parenting model that parents and carers can follow to incorporate love, play, acceptance, curiosity and empathy into their parenting. These elements are vital to a child's development and will help children to feel confident, secure and happy.

Inside I'm Hurting - Louise Michelle Bombèr 2007

This book provides educational professionals with a much-needed classroom handbook of new strategies, practical tools and the confidence for supporting these children from an attachment perspective, thus promoting inclusion in the school system. Contents include: how

attachment difficulties can affect a child's ability to learn; providing an 'additional attachment figure' in schools; the benefits and challenges of getting alongside children who have experienced trauma and loss; transitions during the school day; permanency and constancy; being explicit; regulating arousal levels; handling conflict; wondering aloud; lowering the effects of shame; working with transition from primary to secondary phase; developing effective home/school partnership (includes a photocopiable initial meeting prompt card); providing staff support; recommendations for future action.

Boarding School Syndrome - Joy Schaverien 2015-06-05

Boarding School Syndrome is an analysis of the trauma of the 'privileged' child sent to boarding school at a young age. Innovative and challenging, Joy Schaverien offers a psychological analysis of the long-established British and colonial preparatory and public

boarding school tradition. Richly illustrated with pictures and the narratives of adult ex-boarders in psychotherapy, the book demonstrates how some forms of enduring distress in adult life may be traced back to the early losses of home and family. Developed from clinical research and informed by attachment and child development theories 'Boarding School Syndrome' is a new term that offers a theoretical framework on which the psychotherapeutic treatment of ex-boarders may build. Divided into four parts, History: In the Name of Privilege; Exile and Healing; Broken Attachments: A Hidden Trauma, and The Boarding School Body, the book includes vivid case studies of ex-boarders in psychotherapy. Their accounts reveal details of the suffering endured: loss, bereavement and captivity are sometimes compounded by physical, sexual and psychological abuse. Here, Joy Schaverien shows how many boarders adopt unconscious coping strategies including dissociative amnesia resulting in a psychological

split between the 'home self' and the 'boarding school self'. This pattern may continue into adult life, causing difficulties in intimate relationships, generalized depression and separation anxiety amongst other forms of psychological distress. Boarding School Syndrome demonstrates how boarding school may damage those it is meant to be a reward and discusses the wider implications of this tradition. It will be essential reading for psychoanalysts, Jungian analysts, psychotherapists, art psychotherapists, counsellors and others interested in the psychological, cultural and international legacy of this tradition including ex-boarders and their partners.

How to Be a Brilliant Teaching Assistant - Susan Bentham 2018-09-03

How to Be a Brilliant Teaching Assistant draws on knowledge from very experienced teaching assistants and Susan Bentham's own extensive research to explore the common denominators that unite all brilliant teaching assistants. The

Downloaded from

book explores becoming a brilliant teaching assistant as a journey and not an end point, and provides support that will help you along the way, whether you're just starting out in your career or you've been an experienced teaching assistant for years. This accessible book covers all aspects of the teaching assistant role, such as: Key roles and responsibilities Meta-cognition and understanding children's learning Delivering high quality lessons alongside teachers Developing useful subject knowledge Undertaking research and professional development Illustrated with activities, discussion points and anecdotes, this book is a source of support, guidance and inspiration for every teaching assistant engaged in the ongoing process of becoming an outstanding professional.

Settling to Learn - Louise Michelle Bombèr 2013
The way we teach our pupils and the way we run our schools is under scrutiny right now. In the midst of all the change going on, we often end

up losing sight of the educative tool that is the most important of all - ourselves Bomber and Hughes' book gives educators permission to engage with pupils relationally. They provide alternative ways to the kinds of behaviourist models, fear-based approaches and increased levels of power, authority and control still exercised in many schools at present, which disturb already troubled pupils and further prevent them from accessing school. Bomber and Hughes have seen pupil attainment increase through their work in supporting school staff by switching their initial focus to the troubled pupil's attachment system, before engaging the pupil's exploratory (learning) system. The authors also challenge the educational myths that somehow relationships are secondary to learning, rather than essential to enabling troubled children's brains to be freed to work at their full capacity.

The Kindness Principle - Dave Whitaker
2021-05-04

Written by Dave Whitaker, *The Kindness Principle: Making relational behaviour management work in schools* advocates a behaviour management approach rooted in values, acceptance and a genuine understanding of children's behaviour. In an education system that too often reaches for the carrot-and-stick approach to dealing with poor pupil behaviour, an approach built on kindness and compassion might just provide the cure. *The Kindness Principle* begins with the idea that relationships should be at the heart of behaviour management and culture, and sets out the ways in which the adoption of relational approaches can help create safer and happier schools. Schools where all staff and learners are valued and understood, where expectations and standards are high, and where kindness and acceptance matter. Dave Whitaker explores why it is so important to

understand children - offering techniques and advice on how to work effectively with all children (even the most challenging and troubled ones) without resorting to zero-tolerance, no-excuses and consequence-driven practices. Dave also shares a wealth of real-life experiences from some of the most challenging schools in the country, along with research-informed insights that will help teachers understand children's behaviour in a new light. To this end he provides a wealth of guidance to help develop effective practice and learn from people who have actually walked the walk and don't just talk the talk. Furthermore, the topics covered in the book include: restorative approaches, unconditional positive regard, building personal resilience, structures and routines, and the ins and outs of rewards and sanctions. Suitable for teachers, school leaders and anyone working with children.
