No More Headaches - Juli Slattery 2011-09-09

Both husbands and wives can be extremely frustrated by the differences in sexual needs and expectations between them. This frustration manifests itself as fighting, resentment, feelings of either guilt or rejection, and general marital strife. There are few safe and appropriate places to ask the questions about sex that frustrate and confuse women most. In *No More Headaches*, Juli Slattery provides that place with honest answers that target women's specific needs. Her warm and compassionate style comes through as she examines the underlying issues that prevent couples from having a satisfying sex life. Helping husbands and wives understand and address the sexual relationship with their spouse will improve the marriage by reducing stress and frustration in that area, which will reduce stress in other areas of marriage as well. Each chapter contains questions for reflection and questions for couples to discuss. Juli Slattery has extensive experience speaking to women about marriage, parenting, and family issues at retreats and conferences as well as on television and radio.

Exploring the Biological Contributions to Human Health - Institute of Medicine 2001-07-02

It's obvious why only men develop prostate cancer and why only women get ovarian cancer. But it is not obvious why women are more likely to recover language ability after a stroke than men or why women are more apt to develop autoimmune diseases such as lupus. Sex differences in health throughout the lifespan have been documented. *Exploring the Biological Contributions to Human Health* begins to snap the pieces of the puzzle into place so that this knowledge can be used to improve health for both sexes. From behavior and cognition to metabolism and response to chemicals and infectious organisms, this book explores the health impact of sex (being male or female, according to reproductive organs and chromosomes) and gender (one's sense of self as male or female in society). *Exploring the Biological Contributions to Human Health* discusses basic biochemical differences in the cells of males and females and health variability between the sexes from conception throughout life. The book identifies key research needs and opportunities and addresses barriers to research. *Exploring the Biological Contributions to Human Health* will be important to health policy makers, basic, applied, and clinical researchers, educators, providers, and journalists-while being very accessible to interested lay readers.

Adams and Victor's Principles of Neurology - Maurice Victor 2001

A modernizing revision will make it one of the most comprehensive books that incorporate new findings in growing areas of neurology, memory, genetics, imaging and biochemistry - while retaining the book's traditional size, scope, focus, and successful uniform organization. New research findings, combined with several new and updated tables and figures, the book provides reliable guidelines on diagnosis and treatment of all neurological conditions and disorders.

Whiplash and Related Headaches - Bernard Swerdlow 1998-12-23

This book explains the physical reasons for continued pain caused by whiplash and related head trauma, which affects an estimated 7 to 12 million Americans each year and costs the U.S. approximately \$20 billion annually in lost work days and medical and legal expenses. The author was one of the foremost headache specialists in the U.S. This is a useful book for the medical and legal professions, the insurance industry, the headache sufferer, and anyone with a curiosity about headaches and why they can totally disrupt the quality of life in some patients, at times even to the point of total incapacitation.

Pathophysiology of Headaches - Messoud Ashina 2015-04-14

This book provides a detailed overview of the current state of knowledge regarding the pathophysiology of both primary headaches - migraine, tension-type headache (TTH), and cluster headache - and the very important and frequent type of secondary headache, medication overuse headache (MOH). After an introductory chapter describing relevant neuroanatomy and vascular anatomy, the evidence gained from animal models regarding the pathophysiology of migraine and the other primary headaches is reviewed. Knowledge of the genetic component in the different types of headache is then examined with reference to recent evidence, for example regarding the implication of the trigeminovascular system and cortical spreading depression in migraine. Detailed information is provided on insights into primary headaches from imaging studies, including functional magnetic resonance imaging and positron emission tomography and on their neurophysiology and biochemistry. A further series of important chapters describe present knowledge of the pathophysiology of each specific type of headache and consider future directions. Written by acknowledged experts in their fields from Europe and the United States, clinicians and students will find *Pathophysiology of Headaches* to be an excellent source of up-to-date information on why patients experience headaches. In addition, it will be of value for pain researchers investigating the underlying mechanisms of headache.

Sex- and Gender-Based Women's Health - Sarah A. Tilstra 2021-01-19

This book provides primary care clinicians, researchers, and educators with a guide that helps facilitate comprehensive, evidenced-based healthcare of women and gender diverse populations. Many primary care training programs in the United States lack formalized training in women's health, or if they do, the allotted time for teaching is sparse. This book addresses this learning gap with a solid framework for any program or individual interested in learning about or teaching women's health. It can serve as a quick in-the-clinic reference between patients, or be used to steer curricular efforts in medical training programs, particularly tailored to internal medicine, family medicine, gynecology, nursing, and advanced practice provider programs. Organized to cover essential topics in women's health and gender based care, this text is divided into eight sections: Foundations of Women's Health and Gender Based Medicine, Gynecologic Health and Disease, Breast Health and Disease, Common Medical Conditions, Chronic Pain Disorders, Mental Health and Trauma, Care of Selected Populations (care of female veterans and gender diverse patients), and Obstetric Medicine. Using the Maintenance of Certification (MOC) and American Board of Internal Medicine blueprints for examination development, authors provide evidence-based reviews with several challenge questions and annotated answers at the end of each chapter. The epidemiology, pathophysiology, evaluation, diagnosis, treatment, and prognosis of all disease processes are detailed in each chapter. Learning objectives, summary points, certain exam techniques, clinical pearls, diagrams, and images are added to enhance reader's engagement and understanding of the material. Written by experts in the field, Sex and Gender-Based Women's Health is designed to guide all providers, regardless of training discipline or seniority, through comprehensive outpatient women's health and gender diverse care.

Sex Wise - Pete Eaton, Ph.D. 2016-07-18

The answer to divorce based on satisfying individual sexual hunger for a happy marriage. He says, "My wife doesn't want sex." She says, "My husband doesn't want sex." Myth buster: It has nothing to do with loss of libido Excuses, excuses... Excuses, excuses... We can't have sex now because I'm too tired My back hurts I have a headache I'm going through the change o(Men on pause) I'm not in the mood I have too much on my mind, right now If I'm not going to have an orgasm, then why? I feel bloated and fat I don't want to feel pressured for sex Just not interested, right now Diminishing libido I'm too upset Representing a few of the most popular excuses. Why does my spouse, mate or partner have no interest in sex? What's really going on? Can it be fixed? In this brief book, Dr. Eaton explains Why it's happening How to prevent it What to do about it, if you're already there No psychological mumbo jumbo, because lack of sexual desire or psychology has nothing to do with it. There are two distinct physical types of humans in regard to sex. Dr. Pete explains how to tell the difference, how to find your own type and possible ways to proceed if you've paired up with the opposite type. A real how to book. In the matching of men and women in couples possibly leading to marriage, even though marriage is the leading cause of divorce and the most popular outcry amidst the divorce controversy with voices ringing in the halls of justice and accusations of infidelity and private investigators documenting the marital affairs of cheaters committing acts of adultery, etc, etc, etc... Women are often left wondering why men cheat? The truth of the matter is that it is not as rudimentary as being a men versus women issue at all. Even though the women get much less press than the men, the unfaithful wife is actually much more popular, but is much more stealthy in her approach to conducting her extramarital affairs. Dr. Pete Eaton reveals all in his book, Sex Wise, and tells the truth about relationship problems - especially when related to areas of sexual conduct - unraveling the secret to why men cheat and (even more) why women cheat, and it's not what you might expect, and it has nothing to do with lack of love! Dr. Eaton clearly explains that it is not the differences between men and women that are the reasons for divorce, rather it is due to a difference in the amount of innate sexual hunger which has nothing to do with men vs women, because both men and women are either hungry for sex, or not, and each have all different degrees of that hunger. Marriage problems are more due to compatibility issues due to mismatched sexual hunger. The insatiable desires of women and men are better of appropriately matched to other mates with the same sexual desires. The problem is with our mating methods when selecting a potential mate our species tends to put on its best face to impress and seduce potential mates to seal the deal. This leads to misrepresentation, i.e. women and men misrepresenting themselves as being sexually proficient with high levels of sexual desire, enough to satisfy any mate. You may have noticed that many of these sexually desirous individuals revert to their standard level of sexual desire. Also, presented are solutions for couples experiencing relationship problems due to differences in sexual hunger, breaking through the age old idea of infidelity and presenting ideas and examples of how to have and maintain a happy marriage, even if you are unequally matched in terms of sexual desire. Get prepared to enjoy the full satisfaction from your personal level of sexual desire, enjoy all the sexual activity to match the libido that you were born with, even if you are in a mismatched relationship. This could be the only real answer to how to save your marriage, even if you share sexual hungers on opposite ends of the spectrum."

Transient Global Amnesia - A.J. Larner 2017-05-01

This brief, accessible book covers all aspects of transient global amnesia (TGA). First, it deals with the history of TGA before moving on to clinical and diagnostic features, and differential diagnosis. The investigation and management of TGA is then discussed, followed by treatment and prognosis. Each of the chapters is devoted to a practical and structured overview of the particular topic, with use of case studies to illustrate the material. Based in part on the author's experience of TGA cases over 15 years and in part on a review of the published literature, this book will hopefully enlighten clinicians from a broad range of medical backgrounds on the clinical features, investigation, and pathogenesis of TGA. Transient Global Amnesia is aimed at any clinician with an interest in, or who encounters patients with, acute amnesia: neurologists, general physicians, old age psychiatrists, geriatricians, clinical neuropsychologists, and primary care physicians, as well as other professions allied to medicine with similar interests, such as members of memory assessment teams.
