Black Swan Green - David Mitchell 2007-02-27

By the New York Times bestselling author of *The Bone Clocks* and *Cloud Atlas* | Longlisted for the Man Booker Prize Selected by Time as One of the Ten Best Books of the Year | A New York Times Notable Book | Named One of the Best Books of the Year by The Washington Post Book World, The Christian Science Monitor, Rocky Mountain News, and Kirkus Reviews | A Los Angeles Times Book Prize Finalist | Winner of the ALA Alex Award | Finalist for the Costa Novel Award From award-winning writer David Mitchell comes a sinewy, meditative novel of boyhood on the cusp of adulthood and the old on the cusp of the new. *Black Swan Green* tracks a single year in what is, for thirteen-year-old Jason Taylor, the sleepest village in muddiest Worcestershire in a dying Cold War England, 1982. But the thirteen chapters, each a short story in its own right, create an exquisitely observed world that is anything but sleepy. A world of Kissingeresque realpolitik enacted in boys' games on a frozen lake; of "nightcreeping" through the summer backyards of strangers; of the tabloid-fueled thrills of the Falklands War and its human toll; of the cruel, luscious Dawn Madden and her power-hungry boyfriend, Ross Wilcox; of a certain Madame Eva van Outryve de Crommelynck, an elderly bohemian emigré who is both more and less than she appears; of Jason's search to replace his dead grandfather's irreplaceable smashed

watch before the crime is discovered; of first cigarettes, first kisses, first Duran Duran LPs, and first deaths; of Margaret Thatcher's recession; of Gypsies camping in the woods and the hysteria they inspire; and, even closer to home, of a slow-motion divorce in four seasons. Pointed, funny, profound, left-field, elegiac, and painted with the stuff of life, *Black Swan Green* is David Mitchell's subtlest and most effective achievement to date. Praise for *Black Swan Green* "[David Mitchell has created] one of the most endearing, smart, and funny young narrators ever to rise up from the pages of a novel. . . . The always fresh and brilliant writing will carry readers back to their own childhoods. . . . This enchanting novel makes us remember exactly what it was like."—The Boston Globe "[David Mitchell is a] prodigiously daring and imaginative young writer. . . . As in the works of Thomas Pynchon and Herman Melville, one feels the roof of the narrative lifted off and oneself in thrall."—Time

Eleanor Oliphant Is Completely Fine - Gail Honeyman 2018-05-22

Endocrine Disruption and Human Health - Philippa D. Darbre 2021-09-19

Updated with new and expanded chapters, *Endocrine Disruption and Human Health, Second Edition* provides an introduction to what endocrine disruptors are, the issues surrounding them, the source of these chemicals in the ecosystem and the mechanisms of action and assay systems. Contributions by specialists are included to discuss the

varying effects of endocrine disruption on human health, and procedures for risk assessment of endocrine disruptors, and current approaches to their regulation are also covered. With new material on topics such as low-term, low dose mixtures, windows of susceptibility, epigenetics, EDCs effect on the gut microbiome, EDCs in from polluted air and oral exposures, green chemistry, and nanotechnology, the new edition of *Endocrine Disruption and Human Health* is a valuable and informative text for academic and clinical researchers and other health professionals approaching endocrine disruption and its effects on human health for the first time, graduate students, and advanced undergraduate students. Provides readers with access to a range of information from the basic mechanisms and assays through to cutting-edge research investigating concerns for human health Presents a comprehensive, translational look at all aspects of endocrine disruption and its effects on human health Offers guidance on the risk assessment of endocrine disruptors and current relevant regulatory considerations Newly added content on topics like low-term, low dose mixtures, windows of susceptibility to EDCs, EDCs effect on the gut microbiome, green chemistry, and nanotechnology

Surf poems and drawings

The Psychological Basis of Perfumery - J. Stephan Jellinek 2012-12-06

During the many years of its publication and subsequent revisions, Paul Jellinek's book has been the standard work on its subject. This new edition, translated into English for the first time, was conceived in response to the increased interest in recent years in perfumes and the sense of smell. This interest has come not only from within the highly competitive perfumery industry, but also from psychologists and market researchers. The original text has impressively withstood the test of time and the approach of this new book has been to supplement it with chapters that are now of critical importance, but which were only touched upon in the original book. A market researcher looks at why people use perfumes; a psychologist examines the motivation of perfume choice; another psychologist discusses odours and a perfumer looks at the effects of odours on human experience and behaviour. In the final chapter the editor compares the original author's views with those of today's experts and suggests which aspects are still valid and in what areas divergent views now prevail. This book is written principally to provide a scientific basis to the craft of perfumery and to enable formulators and marketers to understand why the smells they create and sell have the effect they do. It allows a systematic approach to the development of these products. Others outside the industry, including psychologists in academia, will find the book an essential reference source.

Creating Healthy and Sustainable Buildings - Mateja Dovjak 2019-05-28

The open access book discusses human health and wellbeing within the context of built environments. It provides a comprehensive overview of relevant sources of literature and user complaints that clearly demonstrate the consequences of lack of attention to health in current building design and planning. Current designing of energy-efficient buildings is mainly focused on looking at energy problems and not on addressing health. Therefore, even green buildings that place environmental aspects above health issues can be uncomfortable and unhealthy, and can lead to public health problems. The authors identify many health risk factors and their parameters, and the interactions among risk factors and building design elements. They point to the need for public health specialists, engineers and planners to come together and review built environments for human wellbeing and environmental sustainability. The authors therefore present a tool for holistic decision-making processes, leading to short- and long-term benefits for people and their environment.

Perfumes - P.M. Muller 2012-12-06

The idea of publishing this book on *Perfumes: Art, Science and Technology* grew out of the observation that, on the verge of the 1990s, there was really no state-of-the-art compilation of the relevant know-how on which the fragrance industry is based. It was obvious that such a compilation would be well received, not only by perfumers and fragrance chemists, but also by those involved in related trade and marketing or in the development and distribution of consumer products, by researchers from other fields, by students and, finally, by amateurs of perfumes in general. Therefore, we set out to find competent authors who were willing to contribute to the endeavour, and we did not do this unselfishly; on the contrary, we selected a wish-list of specialists who would provide us with new insight and characterize the trends and research priorities determining the future. Thus, we were counting on learning much

ourselves in the course of the project. We were more than pleasantly surprised by the reactions to our first letter-and so was Elsevier. We certainly had not expected perfumers who are usually much more 'doers' than 'writers' to react in such an enthusiastic way; especially, the spontaneous affirmative answer from the famous E. Roudnitska created a momentum which contributed significantly to the successful completion of this book. But, of course, we should not create the impression that the other authors' chapters are less important, and we thank all of them heartily for their invaluable effort.

Serial Killer Quiz Book - Killian H Gore 2020-03-13

It's the world's most twisted quiz book! Featuring 300 killer multiple-choice questions! Do you have the stomach to endure getting inside the minds of some of the world's most depraved serial killers? Which TV show did serial killer Rodney Alcala appear on as a contestant? How did the Giggling Granny serial killer get her strange nickname? What grisly thing was serial killer Peter Bryan cooking when police broke into his home to arrest him? Which serial killer's final words were, "Kiss my ass"? And who was the famous filmmaker who once planned to dig up Ed Gein's mother?! Plus, read the first few chapters of Killian H. Gore's gruesome serial killer story, *The Horror Movie Massacre*. It's the must-have book for fans of true crime! PLEASE BE ADVISED - THIS QUIZ IS NOT FOR THE FAINT-HEARTED

The Chemistry of Fragrances - Charles S Sell 2015-11-09

Ever wondered how perfumes are developed? Or why different scents appeal to different people? *The Chemistry of Fragrances 2nd Edition* offers answers to these questions, providing a fascinating insight into the perfume industry, from the conception of an idea to the finished product. It discusses the technical, artistic and commercial challenges of the perfume industry in an informative and engaging style, with contributions from leading experts in the field. The book begins with a historical introduction and covers all aspects of the development process - from customer brief to producing a fragrance including; * Ingredients acquisition * Ingredient design and manufacture * Design and analysis of fragrance * Sensory aspects including odour perception * Psychological impact of fragrance * Technical challenges * Safety An updated section on the measurement of fragrance discusses the role of senses in marketing consumer products. This book will appeal to anyone with an interest in the perfumery business and includes an extensive bibliography to enable those interested to explore the field further. It also comes complete with a selection of colour illustrations and a fragranced page.

Perfumery - Steve Van Toller 2013-04-17

THE SENSE OF SMELL The nose is normally mistakenly assumed to be the organ of smell reception. It is not. The primary function of the nose is to regulate the temperature and humidity of inspired air, thereby protecting the delicate linings of the lungs. This is achieved by the breathed air passing through narrow passageways formed by three nasal turbinates in each nostril. The turbinates are covered by spongy vascular cells which can expand or contract to open or close the nasal pathways. The olfactory receptors, innervated by the 1st cranial nerve, are located at the top of the nose. There are about 50 million smell receptors in the human olfactory epithelia, the total size of which, in humans, is about that of a small postage stamp, with half being at the top of the left and half at the top of the right nostril. The receptive surfaces of olfactory cells are ciliated and extend into a covering layer of mucus. There is a constant turnover of olfactory cells. Their average active life has been estimated to be about 28 days.

The Big Book of Magical Incense - Sara L. Mastros 2021-12-01

"A masterwork of botanical lore. --Amy Blackthorn, author of *Blackthorn's Botanical Magic* *The Big Book of Magical Incense* is an invaluable hands-on guide to the vast world of magical incense. It provides tried-and-true recipes, advice on how to create your own formulas, and instructions on how to use incense in all sorts of magical practice. While the book requires no prerequisite knowledge, it is also appropriate for experienced magicians and learned pagans. The chapters are scaffolded, teaching about basic ingredients and skills, both practical and magical, in early chapters, and gently leading the reader to develop their own recipes, spells, and ritual practices as they move through the book. Presented in a paradigm-agnostic way, the book should appeal to people on numerous paths. Ceremonial magicians and sorcerers will appreciate the planetary incense recipes and translations from the Greek magical papyri and other classical magic texts. Folk magicians will appreciate the many magical incense formulas, such as *Go Away!* and *Money Magnet*. Animists will love the focus on ingredients native to the United States, and the instructions for working with the dead and the

spirits of the land. Devotional pagans will find recipes for a variety of gods, particularly those of the Eastern Mediterranean traditions, some of whose chapters include original translations of the Orphic hymns and other devotional poetry. Chaos magicians will be excited about the flexibility to mix and match practices and recipes throughout the book.

The Case Against Fragrance - Kate Grenville 2017-01-30

Read *The Case Against Fragrance* and you will never think about fragrance in the same way again. If you have been suffering fragrance in silence, you will know you are not alone.' Conversation Kate Grenville had always associated perfume with elegance and beauty. Then the headaches started. Like perhaps a quarter of the population, Grenville reacts badly to the artificial fragrances around us: other people's perfumes, and all those scented cosmetics, cleaning products and air fresheners. On a book tour in 2015, dogged by ill health, she started wondering: what's in fragrance? Who tests it for safety? What does it do to people? The more Grenville investigated, the more she felt this was a story that should be told. The chemicals in fragrance can be linked not only to short-term problems like headaches and asthma, but to long-term ones like hormone disruption and cancer. Yet products can be released onto the market without testing. They're regulated only by the same people who make and sell them. And the ingredients don't even have to be named on the label. This book is based on careful research into the science of scent and the power of the fragrance industry. But, as you'd expect from an acclaimed novelist, it's also accessible and personal. *The Case Against Fragrance* will make you see—and smell—the world differently. When I was little, my mother had a tiny, precious bottle of perfume on her dressing-table and on special occasions she'd put a dab behind her ears. The smell of Arpege was always linked in my mind with excitement and pleasure—Mum with her hair done, wearing her best dress and her pearls, off for a night out with Dad. When I got old enough to have my own special occasions I also had my favourite perfume. I loved the bottles: those sensuous shapes. I loved the names and the labels, so evocative of all things glamorous. Kate Grenville is one of Australia's most celebrated writers. Her bestselling novel *The Secret River* received the Commonwealth Writers' Prize, and was shortlisted for the Man Booker Prize and the Miles Franklin Literary Award. *The Idea of Perfection* won the Orange Prize. Grenville's other novels include *Sarah Thornhill*, *The Lieutenant*, *Lilian's Story*, *Dark Places* and *Joan Makes History*. Kate lives in Sydney and her most recent works are the non-fiction books *One Life: My Mother's Story* and *The Case Against Fragrance*. 'One spritz of aftershave or perfume can leave other people retching and clutching their heads—you never see that in the ads.' Kaz Cooke 'Beginning with her own physical reaction to fragrance that begins with a headache a lot of us know ourselves, she investigates the fragrance industry and its side-effects and interweaves these facts with the personal to create an accessible work of non-fiction.' ArtsHub 'Fact-dense and extensively referenced, the book is a delight to read and never gets bogged down...While some of the science has been simplified, the book generally conveys the sense of it correctly...Well developed and thoughtful. Read *The Case Against Fragrance* and you will never think about fragrance in the same way again. If you have been suffering fragrance in silence, you will know you are not alone.' Conversation 'Grenville sets out to unlock the dark science—the volatile compounds, conspiracies and carcinogens—hiding in perfume, the ingredients of which are regularly listed as alcohol, water and the mysterious catch-all "fragrance".' New Statesman 'In this appealingly written exploration, Kate uncovers the dark side of the fragrance industry, from the carcinogens in after-shave to the hormone disruptors in perfume that mimic oestrogen.' Child 'An insightful and frightening book.' Readings 'Readable, interesting and informative.' Big Book Club 'Grenville expresses hope though that our society will find solutions to the fragrant violation of personal space based on courtesy and civility rather than on regulation and policy.' Australian Book Review 'You may be familiar with Australian novelist Kate Grenville's work but she enters new territory here. After exposure to perfumes and scents delivered ill-health her way, Grenville got curious as to why...The result is a fascinating (and worrying) exposé of the potentially damaging health effects of fragrances and the laxity of their regulation. Grenville digs into the science of scent as well as the intrigue of a multi-billion-dollar industry and makes it beautifully accessible in the process.' WellBeing 'The Orange Prize-winning novelist's discovery that she reacts badly to the artificial fragrances all around us led her to investigate what is in fragrances, what it does to people and whether it is properly tested for safety...The result is this accessible and personal book on the science of fragrance' Bookseller '[Grenville] raises valuable questions about the potentially

harmful chemicals surrounding us every day and why we so unabashedly live in ignorance of them.' Reader's Digest UK, Best New Books to Read This Summer 'In some places, though, the danger [of fragrance] is beginning to be taken as seriously as passive smoking 30 years ago...it sounds silly, until you read Kate Grenville's explosive exposé and wonder why no one ever told you this stuff before.' Mail on Sunday 'An accessible, intelligent, seriously researched—and terrifying—book' Daily Mail UK

The Perfume Handbook - N. Groom 2012-12-06

In 1948 I was posted, as a Political Officer, to a remote part of south-west Arabia on the edge of the great desert called the Empty Quarter. In valleys made fertile by seasonal flood-waters lay the remains of an ancient civilization. I found inscriptions and the ruin sites of towns, palaces and temples. Almost buried under the sand dunes were the tumbled walls of a great city. From here, two thousand years before, huge camel caravans had trudged their way along 1600 miles of burning sand and rocks to Petra and Gaza, burdened with a most precious cargo - frankincense, myrrh and other perfume materials for the courts, temples and perfume shops of Rome. My book *Frankincense and Myrrh* delved into the details of this romantic trade and led to a broader interest in the perfumes of ancient times. Then, researching on behalf of a perfume house into the Arab contribution to perfumery, I came across the collection of perfume recipes assembled by the Arab philosopher-scientist Yaqub al-Kindi, which have never been translated into English (some, which I have translated myself, are now included in an appendix to this book). I realized that in that work I had found key evidence to demonstrate how the medieval Arab perfume makers had been the bridge in perfume history between ancient and modern times. Perfumery could now be seen as an art with a continuous history of development since the dawn of civilization.

Ask a Manager - Alison Green 2018-05-01

'I'm a HUGE fan of Alison Green's "Ask a Manager" column. This book is even better' Robert Sutton, author of *The No Asshole Rule* and *The Asshole Survival Guide* 'Ask A Manager is the book I wish I'd had in my desk drawer when I was starting out (or even, let's be honest, fifteen years in)' - Sarah Knight, New York Times bestselling author of *The Life-Changing Magic of Not Giving a F*ck* A witty, practical guide to navigating 200 difficult professional conversations Ten years as a workplace advice columnist has taught Alison Green that people avoid awkward conversations in the office because they don't know what to say. Thankfully, Alison does. In this incredibly helpful book, she takes on the tough discussions you may need to have during your career. You'll learn what to say when: · colleagues push their work on you - then take credit for it · you accidentally trash-talk someone in an email and hit 'reply all' · you're being micromanaged - or not being managed at all · your boss seems unhappy with your work · you got too drunk at the Christmas party With sharp, sage advice and candid letters from real-life readers, *Ask a Manager* will help you successfully navigate the stormy seas of office life.

The Encyclopedia of Surfing - Matt Warshaw 2005

With 1,500 alphabetical entries and 300 illustrations, this resource is a comprehensive review of the people, places, events, equipment, vernacular, and lively history of this fascinating sport.

The Cyber Spellbook - Sirona Knight 2002

Shows how to effectively marry all the magickal potential and powers of modern mechanical gadgetry with traditional metaphysics.

UnDiet - Meghan Telpner 2013-04-02

A toolbox for a complete lifestyle transformation -- from a holistic nutritionist with an inspiring and practical message. Is it possible to look and feel your absolute best while eating the most delicious food and avoiding the trap of diet deprivation and calorie counting? Meghan Telpner's *UnDiet* reimagines the way we look at our health and our ability to change it. Infused with her signature humor, enthusiasm, and accessibility, Meghan inspires readers to question paradigms; take ownership over their health; and join her in reinventing their lives, one small change at a time. *UnDiet* offers a motivating lifestyle makeover that is more fun than any other diet -- with lifelong, life-changing results. Featuring: • Practical nutrition information • 40 easy and delectable gluten-free recipes • Comprehensive meal plan • Complete 8-week transition program • Lifestyle advice from a posse of experts *Handbook of Essential Oils* - K. Husnu Can Baser 2009-12-28 Egyptian hieroglyphs, Chinese scrolls, and Ayurvedic literature record physicians administering aromatic oils to their patients. Today society looks to science to document health choices and the oils do not disappoint. The growing body of evidence of their efficacy for more than

just scenting a room underscores the need for production standards, quality control parameters for raw materials and finished products, and well-defined Good Manufacturing Practices. Edited by two renowned experts, the Handbook of Essential Oils covers all aspects of essential oils from chemistry, pharmacology, and biological activity, to production and trade, to uses and regulation. Bringing together significant research and market profiles, this comprehensive handbook provides a much-needed compilation of information related to the development, use, and marketing of essential oils, including their chemistry and biochemistry. A select group of authoritative experts explores the historical, biological, regulatory, and microbial aspects. This reference also covers sources, production, analysis, storage, and transport of oils as well as aromatherapy, pharmacology, toxicology, and metabolism. It includes discussions of biological activity testing, results of antimicrobial and

antioxidant tests, and penetration-enhancing activities useful in drug delivery. New information on essential oils may lead to an increased understanding of their multidimensional uses and better, more ecologically friendly production methods. Reflecting the immense developments in scientific knowledge available on essential oils, this book brings multidisciplinary coverage of essential oils into one all-inclusive resource.

Flavours and Fragrances - Ralf Günter Berger 2007-03-06

This book is an introduction to the world of aroma chemicals, essential oils, fragrances and flavour compositions for the food, cosmetics and pharmaceutical industry. Present technology, the future use of resources and biotechnological approaches for the production of the respective chemical compounds are described. The book has an integrated and interdisciplinary approach on future industrial production and the issues related to this topic.
