[Abyssal Sanctuary](#) - Gavin Hetherington 2013-10-09

Witness the Birth of Fear. There has always been something wrong with the sinister and secluded town of Lakefield View. For one, people get murdered on the streets and nobody does anything about it. Even if they hear their screams curse the night skies, the number of saints has diminished. But it isn't the sick and twisted residents of Lakefield View that are the ones who you should avoid... it's the killers, the psychopaths, the witches and the monsters you should watch out for. Five unsuspecting workers of a picturesque cafe get the shock of their lives when a family member is killed before their eyes. A chain of events ensue and they are all catapulted down a spiralling road of mystery and magic, each struggling to overcome constant obstacles that threaten their lives and the safety of their families. They must fight to keep breathing in a world where every dangerous being is out for their heads. The only thing worse than being alone in the dark, is finding out you're not!"

**The Last Ship** - William Brinkley 2013-11-27

Hailed as "an extraordinary novel of men at war" (The Washington Post) this is the book that inspired the TNT television series starring Eric Dane, Rhona Mitra, Adam Baldwin and Michael Bay as Executive Producer. The unimaginable has happened. The world has been plunged into all-out nuclear war. Sailing near the Arctic Circle, the U.S.S. Nathan James is relatively unscathed, but the future is grim and Captain Thomas is facing mutiny from the tattered remnants of his crew. With civilization in ruins, he urges those that remain—one-hundred-and-fifty-two men and twenty-six women—to pull together in search of land. **Doctors** - Sherwin B. Nuland 2011-10-19

From the author of How We Die, the extraordinary story of the development of modern medicine, told through the lives of the physician-scientists who paved the way. How does medical science advance? Popular historians would have us believe that a few heroic individuals, possessing superhuman talents, lead an unselfish quest to better the human condition. But as renowned Yale surgeon and medical historian Sherwin B. Nuland shows in this brilliant collection of linked life portraits, the theory bears little

resemblance to the truth. Through the centuries, the men and women who have shaped the world of medicine have been not only very human, but also very much the products of their own times and places. Presenting compelling studies of great medical innovators and pioneers, *Doctors* gives us a fascinating history of modern medicine. Ranging from the legendary Father of Medicine, Hippocrates, to Andreas Vesalius, whose Renaissance masterwork on anatomy offered invaluable new insight into the human body, to Helen Taussig, founder of pediatric cardiology and co-inventor of the original "blue baby" operation, here is a volume filled with the spirit of ideas and the thrill of discovery.

[Be A Triangle](#) - Lilly Singh 2022-04-14

'We need to create a home to return to. And when I say home, I'm not talking about a physical place or somewhere where pants are optional. I'm talking about a set of beliefs after a day full of, well, anything. We need to dig a foundation so deep that it will exist and thrive even if our surface-level efforts fail.' Ever wondered what the point of all those school maths lessons about triangles was? Youtuber and comedian Lilly Singh has finally discovered the answer: triangles are the perfect model for building your self-esteem and getting to know your own values. Triangles have a strong base, they're hard to knock-over and always retain their own shape, even when they grow. With her incomparable sense of humour and fun, Lilly explains how she has put the ethos of the triangle to work in her own life, and shows how you can do the same. Complete with playful illustrations and inspiring ideas, this book is like a best friend cheering you on as you find your purpose and get to know yourself.

[We Modern People](#) - Anindita Banerjee 2013-01-03

Science fiction emerged in Russia considerably earlier than its English version and instantly became the hallmark of Russian modernity. *We Modern People* investigates why science fiction appeared here, on the margins of Europe, before the genre had even been named, and what it meant for people who lived under conditions that Leon Trotsky famously described as "combined and uneven development." Russian science fiction was embraced not only in literary circles and popular culture, but also by scientists, engineers, philosophers, and political visionaries. Anindita Banerjee explores the handful of well-known early practitioners, such as Briusov, Bogdanov, and Zamyatin, within a much larger continuum of new archival material comprised of journalism, scientific papers, popular science texts, advertisements, and independent manifestos on social transformation. In documenting the unusual relationship between Russian science fiction and Russian modernity, this book offers a new critical perspective on the relationship between science, technology, the fictional imagination, and the consciousness of being modern.
