**China and International Theory** CHIH-YU. SHIH ET AL. 2020-12-18 Major IR theories, which stress that actors will inevitably only seek to enhance their own interests, tend to contrive binaries of self and other and 'inside' and 'outside'. By contrast, this book recognizes the general need of all to relate, which they do through various imagined resemblances between them. The authors of this book therefore propose the 'balance of relationships' (BoR) as a new international relations theory to transcend binary ways of thinking. BoR theory differs from mainstream IR theories owing to two key differences in its epistemological position. Firstly, the theory explains why and how states as socially-interrelated actors inescapably pursue a strategy of self-restraint in order to join a network of stable and long-term relationships. Secondly, owing to its focus on explaining bilateral relations, BoR theory bypasses rule-based governance. By positing 'relationality' as a key concept of Chinese international relations, this book shows that BoR can also serve as an important concept in the theorization of international relations, more broadly. The rising interest in developing a Chinese school of IR means the BoR theory will draw attention from students of IR theory, comparative foreign policy, Chinese foreign policy, East Asia, cultural studies, post-Western IR, post-colonial studies and civilizational politics.

**Interpersonal Relationships in Education: From Theory to Practice** David Zandvliet 2014-08-07 This book brings together recent research on interpersonal relationships in education from a variety of perspectives including research from Europe, North America and Australia. The work clearly demonstrates that positive teacher-student relationships can contribute to student learning in classrooms of various types. Productive learning environments are characterized by supportive and warm interactions throughout the class: teacher-student and student-student. Similarly, at the school level, teacher learning thrives when there are positive and mentoring interrelationships among professional colleagues. Work on this book began with a series of formative presentations at the second International Conference on Interpersonal Relationships in Education (ICIRE 2012) held in Vancouver, Canada, an event that included among others, keynote addresses by David Berliner, Andrew Martin and Mieke Brekelmans. Further collaboration and peer review by the editorial team resulted in the collection of original research that this book comprises. The volume (while eclectic) demonstrates how constructive learning environment relationships can be developed and sustained in a variety of settings. Chapter contributions come from a range of fields including educational and social psychology, teacher and school effectiveness research, communication and language studies, and a variety of related fields. Together, they cover the important influence of the relationships of teachers with individual students, relationships among peers, and the relationships between teachers and their professional colleagues.

**Imago Relationship Therapy** Rick Brown 1999 Developed by renowned therapist and bestselling author Harville Hendrix, Ph.D, Imago Therapy is a groundbreaking approach to working with couples. The "Imago" is the unconscious image we hold of our parents. According to Hendrix, people select their mates by seeking "Imago matches" - individuals who resemble their parents in salient ways. A couple's relationship dynamic is created and shaped as each partner interacts with his or her Imago match, revisiting unfinished or unresolved issues from childhood. The first clinical primer to this innovative approach to couples therapy, Imago Relationship Therapy brings therapists a comprehensive and practical exploration of one of the most talked about approaches in the field.

**Development and Vulnerability in Close Relationships** Gil G. Noam 1996 How do people develop in their important relationships? How do two people come together to form a new, close relationship? How do relationships affect or determine who we are and who we become? These questions should be central to the study of mind and development, but most researchers neglect relationships and focus instead on analyses of individuals, as if people were basically alone, experiencing occasional fleeting moments with other people. Research based on this individualist assumption has dominated the behavioral and clinical sciences, but there are other voices, and they are growing. In this book, many of the scholars who are moving relationships and attachments back to the center of human development outline their central concepts, findings, and perspectives. People are fundamentally social, and relationships are part of the fabric of being human, forming an essential foundation that molds each person's mind and action. A mind does not reside in one person but in relationships and communities, composed of many people's interconnected minds, which mutually support and define each other. From the start and throughout life, each person develops strengths and vulnerabilities in important relationships in communities and cultures. Those relationships are so central to each person's activity and experience that without them, no scientific explanation can even begin to analyze mind and action. There is no mind without other people. There is no psychological vulnerability that does not involve others. The contributors to this book aim to establish a firm foundation for the role of relationships in human activity and health and to promote strong research by bringing together in one place most of the best research and theory on development and relationships. Their goal is to stimulate a more radical inclusion of relationships in mind, an ecological focus on the ways that relationships constitute action, feeling, and thought.

**Human Motivation and Interpersonal Relationships** Netta Weinstein 2014-07-08 This volume summarizes and organizes a growing body of research supporting the role of motivation in adaptive and rewarding interpersonal interactions with others. The field of human motivation is rapidly growing but most studies have focused on the effects of motivation on individuals' personal happiness and task engagement. Only recently have theorists and empiricists begun to recognize that dispositional and state motivations impact the ways individuals approach interpersonal interactions. In addition, researchers are now recognizing that the quality of interpersonal interactions influences consequent happiness and task engagement, thus helping to explain previous findings to this end. Similarly social psychology and relationships researchers have focused on the impact of cognitions, emotions, and behaviors on people's relationships. In their work, relationships researchers demonstrate that both contextual characteristics and individual differences influence the quality of interactions. Many of these studies seek to understand which characteristics strengthen the bonds between people, encourage empathy and trust and create a sense of well-being after a close interaction. This work seeks to integrate the field of human motivation and interpersonal relationships. Both fields have seen extensive growth in the past decade and each can contribute to the other. However, no single compiled work is available that targets both fields. This is the case, in part because only now is there enough work to make a strong and compelling case for their integration. In the previous years, research has been conducted to show that motivation is relevant and important for interactions among strangers and in close relationships. In addition developmental mechanisms for these relations are identified and mechanisms by which motivation strengthens people's relationships. Finally recent work has demonstrated the many implications for interpersonal relationships, showing that motivation impacts a range of interpersonal processes from prejudice regulation and objectification of others to empathy and care. This book seeks to summarize and organize all these findings and present them in a way that is relevant to both motivation researchers and social and relationship researchers.

**The Art of Open Relating** Carl/E Stevens Jr 2017-06-11 The Art of Open Relating Volume 1: Theory, Philosophy, & Foundation explores the many dynamics of open relationships and what anyone should consider before considering this relationship style. What's also defined is the difference between open relationships, monogamy, polyamory, and polygamy. It's of critical importance we understand the various relationship dynamics and their accurate definitions so we can make the best choices for our own personal relationships. Learn about the many open relationship structures and how they change and what we should be mindful of inside of each of these structures. This is critically important due to the fluid nature of open relationships. In addition, the individual profiles of people who participate in open relationships are also defined to support each participant in understanding some of the risk factors each person brings to the open relationship structures they're participating in. How does a married couple fair versus someone who isn't married? Why are guiding principles the backbone of open relating rather than rules and protocols that we find in polyamory? Why isn't open relating for most people, but only a small minority of the population? This book also offers some insight into the challenges with monogamy and even some strategies for monogamous couples to strengthen their bonds. Monogamy has some very specific characteristics that must be recognized and accounted for in order to avoid the traps leading to infidelity and divorce. Learn the three phases of opening your relationship and why each phase is critical for success. Generally, the people who fail in opening their relationship have skipped one or more of these steps and instead jumped right in. Overall, The Art of Open Relating Volume 1: Theory, Philosophy, & Foundation is an critical read in helping define the relationship landscape whether you're into open relationships or not. It's job at identifying the possibilities for how to live your relationship life is of major value and good to know if nothing else.

**Consumer-Brand Relationships** Susan Fournier 2012-03-29 The creation and management of customer relationships is fundamental to the practice of marketing. Marketers have long maintained a keen interest in relationships: what they are, why they are formed, what effects they have on consumers and the marketplace, how they can be measured and when and how they evolve and decline. While marketing research has a long tradition in the study of business relationships between manufacturers and suppliers and buyers and sellers, attention in the past decade has expanded to the relationships that form between consumers and their brands (such as products, stores, celebrities, companies or countries). The aim of this book is to advance knowledge about consumer-brand relationships by disseminating new research that pushes beyond theory, to applications and practical implications of brand relationships that businesses can apply to their own marketing strategies. With contributions from an impressive array of scholars from around the world, this volume will provide students and researchers with a useful launch pad for further research in this blossoming area.

From Self to Social Relationships Martijn van Zomeren 2016 Martijn van Zomeren develops 'selvations theory', and proposes that human motivation is based around changes in social relationships.

**Knowledge Structures in Close Relationships** Garth J.O. Fletcher 2014-03-05 Thirty-three of the top scholars in this fast moving domain present a picture of work at the cusp in social psychology -- work that deals with cognition and affect in close relationships. The present volume contains a wealth of research findings and influential theoretical accounts that spring as much from indigenous work in the close relationship field as from purebred social cognition. The chapters introduce theories and research programs concerned with the role of individual and couple differences in close relationship knowledge structures. They deal with the role of emotion and affect in close relationships. And they discuss the function of cognition and knowledge structures in relation to the developmental course of close relationships. Each section is accompanied by a critical review written by an expert in the field. This volume is a must for any close relationship scholar interested in the latest research and theorizing about close relationships that adopt a social psychological perspective. It will also be of interest to scholars and students working in clinical psychology, social cognition, communication, individual differences, and family studies.

**Triangle Of Love** Robert J. Sternberg 1988-11-08 A psychologist's view of the 3 essential core ingredients of love: intimacy, passion and commitment.

**Interpersonal Relationships** Diana Jackson-Dwyer 2013-10-15 With a more specific focus than the all-encompassing textbook, each title in the Foundations of Psychology series enables students who are new to psychology to get to grips with a key area of psychological research, while also developing an understanding of basic concepts, debates, and research methodologies. In this book Diana Jackson-Dwyer presents an introductory survey of classic and recent research on relationships and the theories that underpin them. The book starts with a brief overview of the place of relationships within the history of psychology and of their

evolutionary roots: our need to belong, to attach and to affiliate. After a look at methodology, it considers different types of relationships: kinship, friendship, loving and mating. Theories are advanced to explain the formation, maintenance and breakdown of relationships. The book draws on a wide array of contemporary research, and covers issues ranging from rising divorce rates to cultural variations in mating patterns, the issue of gay marriage, and the effect of the internet on relationships. Each chapter contains numerous pedagogical features which will help students to engage with the material: Chapter-specific learning objectives and summaries of key points Study boxes presenting reflective exercises, research questions, and issues for discussion Glossaries and suggestions for further reading Assuming no prior knowledge of the subject, *Interpersonal Relationships* provides an accessible and up-to-date overview of this vibrant area of psychology. The book will be ideal reading for students who are new to higher-level study - whether at school, college or university, and will also be useful for first-year undergraduate students taking introductory courses in psychology.

*Conflict and Decision-making in Close Relationships* Erich Kirchler 2001 "Central to the authors' research is a unique diary study of 40 couples, who kept a daily record of their joint decisions over the course of a year. The diaries show how challenging, varied and complex the conflicts and decision making of normal everyday life can be and reveal that frequently goals change during the decision-making process with the result that the final outcome often achieves a goal distinct from the original intention. Furthermore, the dynamics of decision-making differ with the problem at stake, the decision-making history of the couple, and the quality of the partnership. The results of the diary study are discussed within the overall context of current research in the field as a whole including discussion of joint decision-making case studies, close relationships, decision-making research in general and special research methods.

**The Story of WE** Dimitra Doumpioti 2021-04-17 "Smart, well-written, a refreshing encounter with new ideas." --Boris Cyrulnik, Best-selling author of *Resilience* and *Talking of Love*. "If the couple is a 'sentimental organism,' as I like to call it, Dimitra Doumpioti describes its anatomy and its physiology, making it worthy of scientific exploration. Reading the book and following her ideas, we will learn about the unique poetry of every couple emerging as a chant, derived from the struggling of internal and external forces, where the voices of I's and of the WE are smoothly blended. Please, take a seat, the 'WE' is on the stage and the drama involves all of us." --Maria Laura Vittori, Professor of Psychology, Guglielmo Marconi University, Rome "A new conceptual approach, brilliantly explained, and widely applicable. Indispensable book." --Alberto Gimeno, PhD, Associate Professor for Family Business, ESADE Business School, Barcelona Love may be the blindest spot of our civilization. We talk, write, and sing about it, live for it, die for it, and yet love does not directly inform the way we structure our society. We have managed to digitally connect the whole planet but still struggle when it comes to understanding how our relationships work. In this ground-breaking new synthesis of psychological theory, psychotherapy expert Dimitra Doumpioti brings a fundamental expression of human life into the spotlight: the couple. Drawing on decades of psychological research, training, and clinical practice, she provides insight into the workings of this unique bond and sheds light into questions relevant to all: What makes romantic relationships so important, powerful, special, or painful to those who experience them? How come we feel trapped in them so often, and why do attempts at communication fail so frequently? How can we preserve our bonds while pushing one another to become the best versions of ourselves? How do external factors, third parties-and the world in general-impact couples, and in what ways the human society may be defined by our most intimate relationships? You will find an abundance of insight on such questions in these pages. This book will not only change the way you view couples but will transform and enhance your understanding of all human relationships. "A decisive step forward in the work of relational therapists, Doumpioti shifts the discourse of intimate relationships to the WE, the couple as an entity in itself, endowed with its own voice and special ability to influence every life that it touches."--Luigi Cancrini, M.D, Professor of Psychiatry, La Sapienza, Rome. "A true page turner that will make you understand relationships from a whole new perspective and take them to the next level. A book you'll find yourself referring back to again and again." --Nina Frerich, PhD, Clinical Psychologist "Using a simple yet powerful conceptual framework, Doumpioti reconciles classic and modern theories. A fascinating and inspiring book." --Elena Galatsopoulou, PhD, Couple and Family Therapist

*From Self to Social Relationships* Martijn van Zomeren 2016-07-07 Martijn van Zomeren develops 'selvations theory', and proposes that human motivation is based around changes in social relationships.

*Relationship Maintenance* Brian G. Ogolsky 2021-11-18 Relationship maintenance encompasses a wide range of activities that partners use to preserve their relationships. Despite the importance of these efforts, considerably more empirical focus has been devoted to starting (i.e. initiation) and ending (i.e. dissolution) relationships than on maintaining them. In this volume, internationally renowned scholars from a variety of disciplines describe diverse sets of relationship maintenance efforts in order to show why some relationships endure, whereas others falter. By focusing on 'what to do' rather than 'what not to do' in relationships, this book paints a more comprehensive picture of the forms, functions, and contexts of relationship maintenance. It is essential reading for scholars and students in psychology, communication, human development and family science, sociology, and couple/marriage and family therapy.

*Close Romantic Relationships* John H. Harvey 2001-06 With contributions from the leading experts on relationships, this book covers important issues, such as love as self-expansion, equity in maintaining close relationships, commitment, social support, self-verification, and minding the relationship. The end result is a comprehensive account of the reasons why close relationships are or are not maintained and the manner in which these principles can be applied to current social issues and clinical interventions. Divided into two sections, Part I describes models developed to characterize how relationships are maintained over time, accounts of specific mechanisms at work in close relationships, and conceptualizations of the maintenance and enhancement of close relationships using existing theoretical paradigms. Part II addresses contemporary social issues, as well as clinical applications. *Close Romantic Relationships* will appeal to students, researchers, and professionals due to its broad sampling of theory and research on relationship maintenance and enhancement.

*Attachment Theory for Social Work Practice* David Howe 1995-07-05 The quality of early social relationships has a deep bearing on our psychological and social development; adversity in childhood can lead to adult relationships that may be difficult and distressing. This book addresses the needs of social workers in understanding and assessing the nature and origins of such disturbed social relationships. Taking a comprehensive and wide-ranging look at the theories emerging in and around attachment theory, it provides a sophisticated but accessible base from which social workers can make sensitive assessments and develop humane practices.

*Lambda Unveiled* Barbara Hero 1992

*Family Relationships* Francis Ivan Nye 1982 This volume collects some of the work of F Ivan Nye and that of some of his colleagues, that describes a theory -- which Nye call Choice and Exchange Theory, and its application to various types of family relationships. The theory is an extension and expansion of 'Exchange Theory' originated in the late 1950s by psychologists such as Thibaut and Kelley and sociologist George Homans. The result, a mixture of both new and previously published articles, is a succinct description of Choice and Exchange Theory that will be of value to researchers and students in family studies and related disciplines.

**Change Processes in Relationships** Alan Fogel 2006-05-25 Just as each person develops from infancy to adulthood, all interpersonal relationships have a life history that encompasses the changes in how people communicate with each other. This book is about how a relationship transforms itself from one pattern of communication to another. The authors present a unique research method called 'relational-historical research', based on advances in dynamic systems theory in developmental psychology, and qualitative methods in life history research. It rests on three premises: that the developing relationship (not the individual) is the unit of analysis; that change emerges from, but is not entirely constrained by, the patterns of the past; and that the developmental process is best revealed by making frequent observations within a particular case before,

during, and after a key developmental transition. Looking specifically at the mother-infant relationship, this is a compelling piece of research that will appeal to an international audience of intellectuals and practitioners.

**Attachment Theory and Close Relationships** Jeffrey A. Simpson 1997-01-09 In the last decade, few topics in social and personality psychology have attracted more interest than the application of attachment theory to adult relationships. Comprehensive and up-to-date, this book integrates the most important theoretical and empirical advances in this growing area of study and suggests new and promising directions for future investigation. Its balanced coverage of measurement issues, affect regulation, and clinical applications makes this a valuable sourcebook for scholars, students, and clinicians.

**Love Is a Story** Robert J. Sternberg 1999-06-03 In this groundbreaking work, Robert Sternberg opens the book of love and shows you how to discover your own story--and how to read your relationships in a whole new light. What draws us so strongly to some people and repels us from others? What makes some relationships work so smoothly and others burst into flames? Sternberg gives us new answers to these questions by showing that the kind of relationship we create depends on the kind of love stories we carry inside us. Drawing on extensive research and fascinating examples of real couples, Sternberg identifies 26 types of love story--including the fantasy story, the business story, the collector story, the horror story, and many others--each with its distinctive advantages and pitfalls, and many of which are clashingly incompatible. These are the largely unconscious preconceptions that guide our romantic choices, and it is only by becoming aware of the kind of story we have about love that we gain the freedom to create more fulfilling and lasting relationships. As long as we remain oblivious to the role our stories play, we are likely to repeat the same mistakes again and again. But the enlivening good news this book brings us is that though our stories drive us, we can revise them and learn to choose partners whose stories are more compatible with our own. Quizzes in each chapter help you to see which stories you identify with most strongly and which apply to your partner. Are you a traveler, a gardener, a teacher, or something else entirely? *Love is a Story* shows you how to find out.

**Intimate Relationships** Ralph Erber 2016-01-08 *Intimate Relationships* covers both classic and current material in a concise yet thorough and rigorous manner. Chapters range from attraction to love, attachment to jealousy, conflict to relationship dissolution — all written in a warm, personal, and engaging voice. Each chapter is organized around the major issues and relevant theories, in addition to a critical evaluation about the research. When appropriate, the authors discuss and evaluate popular ideas about relationship processes in the context of scientific research. This includes critical evaluations of evolutionary approaches to attraction, victim-based accounts of abuse, and the separate-cultures view of the sexes.

**Handbook of Personal Relationships** Steve Duck 1997 As the field of social relationships has grown enormously, this edition has been revised to include a new section on family relationships, focusing on the central truth that the dynamics of personal relationships are a key basis of social life.

**Attachment Theory and Research** Jeffrey A. Simpson 2015-02-02 This volume showcases the latest theoretical and empirical work from some of the top scholars in attachment. Extending classic themes and describing important new applications, the book examines several ways in which attachment processes help explain how people think, feel, and behave in different situations and at different stages in the life cycle. Topics include the effects of early experiences on adult relationships; new developments in neuroscience and genetics; attachment orientations and parenting; connections between attachment and psychopathology, as well as health outcomes; and the relationship of attachment theory and processes to clinical interventions.

**Transformative Relationships** George Silberschatz 2013-02-01 The control-mastery theory, developed by Dr. Joseph Weiss over the second half of the twentieth century, is an attempt to integrate an understanding of how the mind works, how psychopathologies develop, and how psychotherapy can effectively help. Control-Mastery theory assumes that the patient's problems are rooted in the grim, constricting pathogenic beliefs that the patient acquires in the traumatic experiences of childhood. The driving force behind the psychotherapeutic process is the patient's conscious and unconscious desire to recover the capacity to pursue life goals by gaining control and mastering self destructive patterns of thoughts and behaviors. Underlying this theory is the conception that the client structures (both consciously and unconsciously) the psychotherapeutic process in order to clearly and quickly address her own goals. Following this line of thought, the practitioner must be able to identify a client's aims, respond to and encourage these thoughts, and develop a strategic therapeutic plan to effectively address the needs and wants of each individual. This book aims to present the control-mastery theory in a more accessible format, and introduce it to a wider audience, expanding the scope of the theory beyond simply a comparison to Freudian analysis. The text presents an integrated cognitive-psychodynamic-relational approach to therapy, addressing issues surrounding psychopathology and pathogenic constructions. Organized into three distinct sections, the book first considers theoretical underpinnings before moving into in-depth discussions of clinical and practical application of these valuable therapeutic tools and techniques, drawing heavily on detailed descriptions of entire therapy sessions. The final section of the book covers current and developing empirical research, presenting convincing arguments in support of the theory and practice earlier discussed. The editor has extensive research and clinical experience with both the conceptual and practical aspects of the theory, and has worked with Joseph Weiss and Hal Sampson - the two pioneers of the control-mastery approach - who each contributes a chapter to the book. *Transformative Relationships* advances this integrative approach to therapy beyond its current scope, introducing these valuable concepts and techniques to a wider audience of practitioners of all backgrounds.

**Facework** William R. Cupach 1994-05-23 Designed to acquaint readers with the most up-to-date information on close relationship theory and research, *Facework* provides a thorough examination of the authors' research, as well as that of others, on the self-aspects of communication in intimate relationships. Gaining face, maintaining face, and losing face all have numerous implications in the management of close relationships.

Cupach and Metts make a compelling case for facework as basic relationship currency at any stage of a relationship, whether it be formation, maintenance, or disengagement. Written in a clear, humorous style, Facework offers the reader a very pleasurable learning experience and the opportunity to gain deeper insight into the management of problematic situations occurring in close relationships. Professionals and scholars in psychology, sociology, communication, family studies, and social work will find Facework a stimulating, informative, and indispensable volume.

*Relationships* Robert A. Hinde St John's College, University of Cambridge. 2015-01-28 This volume on close relationships in adulthood discusses the central issues in the field and points the way towards the construction of an integrated body of knowledge about human relationships. The self, interactions, relationships and groups are treated as dynamic processes in dialectical relations with each other and with the socio-cultural structure of norms, values, beliefs and institutions.; Early chapters introduce aspects of the self relevant to the dynamics of interactions and relationships: Intrapsychic Processes Of Cognition And Emotion Are Emphasized. These are followed by chapters discussing the principle characteristics of relationships. Seven further chapters focus on the processes involved in the dynamics of relationships, and later chapters synthesize previous ones in discussions of love and friendship, and the nature of relationship change. The focus throughout the text is on current work and current controversy, placed against a background of knowledge that has been built up in recent decades.
