The Eugenic Marriage, Volume 3 - W. Grant Hague 2016-01-07

THE BEST AGE AT WHICH TO MARRY In order to determine the best age at which to marry, we must be guided by certain fixed standards. We must find out from statistics the average age of the parents of the best babies. We must determine and analyse the qualifications of what constitutes the "best" babies, according to the eugenic ideal. We should give heed to the fixity of temperamental characteristics in order to determine their adaptability to conditions that prevail at certain ages. We should select an age in advance of the period at which science has determined individuals to have outlived any hereditary tendencies. We have abundant proof that the best babies are born of parents between the twenty-third and the twenty-sixth years. We know also that the age which responds, with the fullest degree of plasticity, to temperamental characteristics, is in the early twenties. We know, likewise, that inherited tendencies may be said to have been outlived at or about the twenty-second year. The ideal marrying age, therefore, is, for both male and female, approximately the twenty-third year. The physical, mental and moral development of both men and women, at this period, evidence a high degree of adaptability, and are responsive to the institution of marriage. Their hereditary traits, if any previously existed, assume a dormant form at this age. They have cultivated the temperamental qualities which they will retain, with few modifications, throughout life. On the other hand, their dispositions are responsive to reason, and are capable of readjustment. Their temperamental characteristics are plastic, and under favorable conditions it is possible for both to evidence a degree of sympathy and toleration that bespeaks future harmony and success. No marriage can result in mutual happiness and success if one of the participants is temperamentally incapable of changing his or her convictions.

Sociological Life Course Research - Matthias Wingens 2022-08-04

This introductory book provides an insight into sociological life course research and informs about its theoretical assumptions, analytical concepts and main results. Sociological life course research - like biographical research - has developed into an independent and fruitful field of research since the end of the 1960s. It is true that half a century earlier, in their famous study of "The Polish Peasant in Europe and America" (1918-20), Thomas and Znaniecki had already used life records to examine the connection between social change, social structures, and the life histories of individuals. However, such a research perspective was supplanted by other methodological-conceptual approaches to empirical social research for over fifty years. It was not until the 1960s that sociological interest in life course and biographical theoretical issues reawakened. Today, life course research is considered one of the most important conceptual innovations in sociology in recent decades. The content The life course as a social construction - What is "life course research"? - The life course as an institution - Collective life courses:

generations, cohorts and social change - Structures of the life course - Life course research - a conceptual perspective - Life course research, quo vadis? The author Prof. Dr. Matthias Wingens teaches sociology at the University of Bremen, Bremen International Graduate School of Social Sciences (BIGSSS).

The Structure of the Life Course: Standardized? Individualized? Differentiated? - Ross Macmillan 2005-07-14

Current debates in life course studies increasingly reference theories of individualization, standardization, and differentiation in the structure of the life course. This volume brings together leading scholars from a variety of fields to assess the theoretical underpinnings, the empirical evidence, and the implications of existing arguments. The contributions include comparative-historical work, demographic analysis, and detailed survey research. The topics covered include historical, cross-cultural, and racioethnic variation in the transition to adulthood, the school-to-work transition, educational careers, retirement, activity characteristics over the life span and the life course context of psychological well-being. The various contributions expand our understanding of the contemporary life course and its implications. The authors offer innovative theoretical and methodological approaches that demonstrate the utility of holistic approaches to conceptualizing the life course and understanding its implications for modern society.

To Marry an English Lord - Gail MacColl 2012-03-15

From the Gilded Age until 1914, more than 100 American heiresses invaded Britannia and swapped dollars for titles--just like Cora Crawley, Countess of Grantham, the first of the Downton Abbey characters Julian Fellowes was inspired to create after reading To Marry An English Lord.

Why Smart Men Marry Smart Women - Christine B. Whelan 2006-10-17

For years, it's been "common knowledge" that once a woman hits thirty, her chances of finding a husband diminish to the point of despair. That men are intimidated by a woman's career success, preferring docile helpmates to ambitious achievers. That women are biologically driven to seek a strong provider. That the higher a woman's IQ, the less likely she

is to marry, let alone have babies...leaving single, successful women to ask themselves: Are men intimidated by smart women? In *Why Smart Men Marry Smart Women*, Christine B. Whelan shatters the myth that high-achieving women are at a disadvantage in the marriage market. There's good news for the millions of American SWANS (Strong Women Achievers, No Spouse): that today's smart, successful women marry at the same rates as all other women -- and that more income and education may in fact increase a woman's chances of marriage. What's more, as Dr. Whelan shows through newly released U.S. Census data, a large-scale Harris Interactive survey commissioned especially for this book, plus extended interviews conducted in cities nationwide, this profound demographic shift shows every sign of progressing. That means that the "success penalty" that has endured for generations is, as soon as 2010, destined for the history books. Accomplished daughters, sisters, and friends (not to mention their mothers) can finally stop worrying that the twin pinnacles of personal and professional happiness are inherently unattainable. In fact, smart men do marry SWANS. Ninety percent of high-achieving men surveyed want a woman who is as intelligent or more intelligent than they are. And two-thirds of men said they believed smart women make better mothers. Pairing cutting-edge research with sound advice, Dr. Whelan brings to mind what smart women everywhere have long known in their hearts: that the goal is not just to get married, but to have a good marriage, and to lead a fulfilled life.

Marriage and Cohabitation - Arland Thornton 2008-09-15

In an era when half of marriages end in divorce, cohabitation has become more commonplace and those who do get married are doing so at an older age. So why do people marry when they do? And why do some couples choose to cohabit? A team of expert family sociologists examines these timely questions in *Marriage and Cohabitation*, the result of their research over the last decade on the issue of union formation. Situating their argument in the context of the Western world's 500-year history of marriage, the authors reveal what factors encourage marriage and cohabitation in a contemporary society where the end of adolescence is no longer signaled by entry into the marital home. While some people still choose to marry young, others elect to cohabit with varying degrees of commitment or intentions of eventual marriage. The authors' controversial findings suggest that family history, religious affiliation, values, projected education, lifetime earnings, and career aspirations all tip the scales in favor of either cohabitation or marriage. This book lends new insight into young adult relationship patterns and will be of interest to sociologists, historians, and demographers alike.

Marry Him - Lori Gottlieb 2011-01-31

Wonder why you're still single? Had you imagined you'd be settled down with the perfect man and family by now? Afraid time is running out? You might want to listen to what Lori Gottlieb has to say. When Lori found herself forty and still single, she came to an uncomfortable realization. If so many of her friends were very happily married to 'good enough' guys, the type of men who might not make you weak in the knees but made great partners and fathers, maybe she had been looking for the wrong man. Could her Mr Right have been, well, right in front of her all along? Funny, confronting and very very real, *Marry Him* is Lori Gottlieb's account of her search for a partner and the adjustments she had to make to her own expectations in order to find happiness.

Marriage Guidance - Edwin F Healy Sj 2015-03-13

MARRIAGE GUIDANCE is an attempt to present those facts concerning marriage and family life that should be known by all those who are planning some day to enter the state of matrimony. It is intended to serve principally, though not exclusively, as a textbook. Students in the senior and junior years of college would perhaps derive more benefit from the use of this work than would freshmen and sophomores, for the former will, for the most part, marry sooner, and consequently they may be expected to take greater interest in an analysis of the obligations and the burdens of marriage. Members of adult study clubs who have been denied the advantages of a Catholic college education would undoubtedly find it profitable to discuss the many important topics which are touched upon in these pages. In the first of its three sections MARRIAGE GUIDANCE treats of the remote preparation for marriage. Some of the points which are studied in this section are understanding the opposite sex, the best age at which to marry, fitness to marry, parental approbation, courtship and its dangers, the happiness which children bring to a home, the means to ensure a lasting marriage, and authority in the home. In the second section those points are examined which will be of immediate concern to the couple when they present themselves to their pastor to arrange for the marriage. They will at that time have to attend to such details as procuring their baptismal certificates and the

marriage license and choosing two witnesses for the wedding. Although the young man and the young woman may in the past have studied the matter carefully, they should now reflect at length on the nature and the seriousness of the contract into which they are soon to enter. Because the pastor will question them about possible impediments in their case, a large portion of this section is devoted to those laws of the Church which pertain to the matrimonial contract. The priest will conclude his interview with the couple by giving them a practical instruction on marriage. The third section discusses in detail what parents must do in order to discharge their obligation of protecting their offspring and of promoting their spiritual and temporal welfare. It is not easy to train one's children wisely and effectively amid the many unwholesome influences in our large cities. The Author's purpose is to make the student aware of the problems that so often arise in connection with the proper rearing of children and to acquaint him with the principles on which the solution to these difficulties is founded. The Author's advice and observations on the training of young children are based for the most part on the authoritative writings of specialists in child care. This third section has, moreover, been read carefully and approved by a number of persons who have had many years of actual experience in caring for young children. Some topics, such as the bathing and dressing of infants, preparing milk formulas, and the like, are outside the scope of this book. Subjects of this kind are satisfactorily treated in many manuals on the physical care of infants. At the end of this volume are found two appendices. The first of these is a list of phonograph records which a mother may find useful in her attempt to entertain her young children and to develop in them a love of music. The second appendix gives a list of pamphlets for supplementary reading. Although many of these pamphlets contain but a brief development of the subject matter of the chapter to which they are assigned, they often contain material and points of view that will prove helpful to the student.

The Age of Innocence - Edith Wharton 2014-02-12

The Age of Innocence is Edith Wharton's 12th novel, initially serialized in four parts in the *Pictorial Review* magazine in 1920, and later released by D. Appleton and Company as a book in New York and in London. It won the 1921 Pulitzer Prize for Fiction, making it the first novel written by a woman to win the Pulitzer Prize for Fiction, and making Wharton the first woman to win a Pulitzer Prize for Fiction. The story is set in upper-class New York City in the 1870s. The Age of Innocence centers on an upper-class couple's impending marriage, and the introduction of a woman plagued by scandal whose presence threatens their happiness. Though the novel questions the assumptions and morals of 1870s' New York society, it never devolves into an outright condemnation of the institution. In fact, Wharton considered this novel an "apology" for her earlier novel, *The House of Mirth*, which was more brutal and critical. Plot summary Newland Archer, gentleman lawyer and heir to one of New York City's best families, is happily anticipating a highly desirable marriage to the sheltered and beautiful May Welland. Yet he finds reason to doubt his choice of bride after the appearance of Countess Ellen Olenska, May's exotic and beautiful thirty-year-old cousin. Ellen has returned to New York from Europe after scandalously separating herself (per rumor) from a bad marriage to a Polish count. At first, Ellen's arrival and its potential taint on the reputation of his bride-to-be's family disturbs him, but he becomes intrigued by the worldly Ellen, who flouts New York society's fastidious rules. As Newland's admiration for the countess grows, so does his doubt about marrying May, a perfect product of Old New York society; his match with May no longer seems the ideal fate he had imagined.

The Age of Innocence - Edith Wharton 2006-06-27

Selected by the Modern Library as one of the 100 best novels of all time Newland Archer saw little to envy in the marriages of his friends, yet he prided himself that in May Welland he had found the companion of his needs--tender and impressionable, with equal purity of mind and manners. The engagement was announced discreetly, but all of New York society was soon privy to this most perfect match, a union of families and circumstances cemented by affection. Enter Countess Olenska, a woman of quick wit sharpened by experience, not afraid to flout convention and determined to find freedom in divorce. Against his judgment, Newland is drawn to the socially ostracized Ellen Olenska, who opens his eyes and has the power to make him feel. He knows that in sweet-tempered May, he can expect stability and the steadying comfort of duty. But what new worlds could he discover with Ellen? Written with elegance and wry precision, Edith Wharton's Pulitzer Prize-winning masterpiece is a tragic love story and a powerful homily about the perils of a perfect marriage. Commentary by William Lyon Phelps and E. M. Forster

The Medical circular [afterw.] The London medical press & circular [afterw.] The Medical press & circular - 1883

Social Change and the Family in Taiwan - Arland Thornton 1994

Until the 1940s, social life in Taiwan was generally organized through the family—marriages were arranged by parents, for example, and senior males held authority. In the following years, as Taiwan evolved rapidly from an agrarian to an industrialized society, individual decisions became less dependent on the family and more influenced by outside forces. *Social Change and the Family in Taiwan* provides an in-depth analysis of the complex changes in family relations in a society undergoing revolutionary social and economic transformation. This interdisciplinary study explores the patterns and causes of change in education, work, income, leisure time, marriage, living arrangements, and interactions among extended kin. Theoretical chapters enunciate a theory of family and social change centered on the life course and modes of social organization. Other chapters look at the shift from arranged marriages toward love matches, as well as changes in dating practices, premarital sex, fertility, and divorce. Contributions to the book are made by Jui-Shan Chang, Ming-Cheng Chang, Deborah S. Freedman, Ronald Freedman, Thomas E. Fricke, Albert Hermalin, Mei-Lin Lee, Paul K. C. Liu, Hui-Sheng Lin, Te-Hsiung Sun, Arland Thornton, Maxine Weinstein,

and Li-Shou Yang.

Why Men Marry Some Women and Not Others - John T. Molloy 2008-12-14

A groundbreaking book--based on years of the same thorough research that made the "Dress For Success" books national bestsellers--about how women can statistically improve their chances of getting married.

Alone Together - Paul R. Amato 2009-06-30

Based on two studies of marital quality in America twenty years apart, *Alone Together* shows that while the divorce rate has leveled off, spouses are spending less time together. The authors argue that marriage is an adaptable institution, and in accommodating the changes that have occurred in society, it has become a less cohesive, yet less confining arrangement.

All the Single Ladies - Rebecca Traister 2016-10-11

"Today, only twenty percent of Americans are wed by age twenty-nine, compared to nearly sixty percent in 1960. The Population Reference Bureau calls it a 'dramatic reversal.' [This book presents a] portrait of contemporary American life and how we got here, through the lens of the single American woman, covering class, race, [and] sexual orientation, and filled with ... anecdotes from ... contemporary and historical figures"-
