Interpersonal Relationships in Education: From Theory to Practice - David Zandvliet 2014-08-07

This book brings together recent research on interpersonal relationships in education from a variety of perspectives including research from Europe, North America and Australia. The work clearly demonstrates that positive teacher-student relationships can contribute to student learning in classrooms of various types. Productive learning environments are characterized by supportive and warm interactions throughout the class: teacher-student and student-student. Similarly, at the school level, teacher learning thrives when there are positive and mentoring interrelationships among professional colleagues. Work on this book began with a series of formative presentations at the second International Conference on Interpersonal Relationships in Education (ICIRE 2012) held in Vancouver, Canada, an event that included among others, keynote addresses by David Berliner, Andrew Martin and Mieke Brekelmans. Further collaboration and peer review by the editorial team resulted in the collection of original research that this book comprises. The volume (while eclectic) demonstrates how constructive learning environment relationships can be developed and sustained in a variety of settings. Chapter contributions come from a range of fields including educational and social psychology, teacher and school effectiveness research, communication and language studies, and a variety of related fields. Together, they cover the important influence of the relationships of teachers with individual students, relationships among peers, and the relationships between teachers and their professional colleagues.

Communication Among Grandmothers, Mothers, and Adult Daughters - Michelle A. Miller-Day 2004-09-22

This volume examines communication processes within the grandmother-mother-daughter relationship, emphasizing an intergenerational perspective. Using observations of and extensive interviews with six sets of middle-income, Caucasian female family members, this book offers a heuristic account of intergenerational mother-daughter relational communication. Author Michelle Miller-Day integrates and juxtaposes alternative experiences of social interaction, situating readers in the world of grandmothers, mothers, adult daughters, and granddaughters as they experience, describe, and analyze their family communication. Miller-Day incorporates aged mothers and younger mid-life mothers and their adult daughters into the research to illustrate how this type of maternal relationship is experienced at different points in a woman's life. With the inclusion of three generations of women, Miller-Day offers multigenerational perspectives on family, and examines them for patterns of maternal interaction, providing symbolic links across generational boundaries. *Communication Among Grandmothers, Mothers, and Adult Daughters* enables readers to understand more completely the richly textured nature of maternal relationships. It will be an invaluable resource for scholars and researchers in the areas of communication and relationships, including family communication, intergenerational communication, women's studies, family studies, interpersonal communication, and relationships, as well as social workers, psychologists, and counselors, who strive to understand family communication processes and their dynamics across generational lines.

Personal Relationships and Personal Networks - Malcolm R. Parks 2017-09-25

The effort to understand personal relationships has traditionally focused on the individual characteristics of participants. *Personal Relationships and Personal Networks* takes this analysis a step further, focusing on research linking participants' feelings and actions within a given personal relationship to the larger social context surrounding it. Author Malcolm R. Parks expands on the idea that the initiation, development, maintenance, and dissolution of relationships are inextricably connected to each participant's social network—a perspective that allows for a better appreciation of our connection to the world, and a greater understanding our significant power as social actors. This book offers a new way to consider basic notions about how relationships form, such as how particular people meet, and how relationships are started. Among many findings, the volume demonstrates that individuals in relationships feel closer and generally more connected when they also have a greater amount of contact with the members of each other's personal networks and when they believe that network members support their relationship. Additional topics discussed include how this social context model is applicable to different types of relationships; how

participants interact with network members; how social networks are involved in the deterioration of personal relationships; and what drives change in relationships. Students, researchers, and professionals in a wide variety of disciplines such as communication, psychology, sociology, anthropology, family studies, clinical psychology, public health nursing, education, and social work will find this book useful, as will anyone seeking to better understand their own personal relationships.

Reimagining our futures together - International Commission on the Futures of Education 2021-11-06

The interwoven futures of humanity and our planet are under threat. Urgent action, taken together, is needed to change course and reimagine our futures.

A Lifetime of Communication - Julie Yingling 2004-07-21

Julie Yingling considers communication and relationships through the lens of human development.

Beginning with infancy and moving through adolescence to adulthood, the chapters examine communication and cognition in the various stages of human development.

Bulletin of the Atomic Scientists - 1970-06

The *Bulletin of the Atomic Scientists* is the premier public resource on scientific and technological developments that impact global security. Founded by Manhattan Project Scientists, the *Bulletin's* iconic "Doomsday Clock" stimulates solutions for a safer world.

The Basics of Communication - Steve Duck 2008-08-11

Can an understanding of communication concepts improve relationships with others? Conversely, how do our connections with others influence how we converse with them? Written in a warm and lively style and packed with teaching tools, *The Basics of Communication: A Relational Perspective* offers a unique look at the inseparable connection between relationships and communication and highlights the roles that those interpersonal connections play in public speaking as well as in casual discussions. This groundbreaking text offers a hybrid approach of theory and application by introducing students to fundamental communication concepts and providing practical instruction on making effective formal presentations. The authors encourage students to employ critical thinking on key topics, to link communication theory to their own experiences, and to improve their communication skills in the process. Key Features: Stresses the vital intersection of communication and relational contexts and how they interact and influence one another. Offers a refreshing and original approach that engages students with lively, topical examples to challenge them and to enliven classroom discussion. Provides up-to-date communication topics in a way that easily fits within a traditional course outline. Integrates effective pedagogical tools throughout, addressing ethics, media links, and questions for students to discuss with friends, among others. Devotes two chapters to the use of media and relational technology such as cell phones, iPods, Blackberries, MySpace, and Facebook in daily communications. Ancillaries: Includes an Instructor's Resource on CD-ROM that features PowerPoint slides, a test bank, suggestions for course projects and activities, Internet resources, and more. (Contact Customer Care at 1-800-818-7243 to request a copy.) The robust online Student Study Site (www.sagepub.com/bocstudy) includes e-flashcards, video and audio clips, SAGE journal articles, links to a Facebook page for the text, and other interactive resources. Intended Audience: Designed as a core textbook for undergraduate students of communication studies, this book is also an excellent resource for business students or others who are interested in learning more about the pervasive role of communication concepts in everyday life.

Nonverbal Communication in Close Relationships - Laura K. Guerrero 2006-08-15

Focuses on nonverbal messages and their role in close relationships - friends, family, and romantic partners. This book takes a functional perspective in its examination of how nonverbal messages work to signal affection, romantic interest, sexual attraction, dominance, and other roles.

Bulletin of the Atomic Scientists - 1972-10

The *Bulletin of the Atomic Scientists* is the premier public resource on scientific and technological developments that impact global security. Founded by Manhattan Project Scientists, the *Bulletin's* iconic "Doomsday Clock" stimulates solutions for a safer world.

Dialogue as a Means of Collective Communication - Bela H. Banathy 2006-02-28

Dialogue as a Means of Collective Communication offers a cross-disciplinary approach to examining dialogue as a communicative medium. Presented in five parts, the book takes the reader on a journey of exploring the power and potential of dialogue as a means for communication. In particular, this volume comes at a time when the global society's attention has been directed to creating more productive conversations in the name of world peace and harmony. It provides a unique new work on dialogue that brings the reader into a "dialogue with dialogue", offering an opportunity to understand the communicative potential of dialogue. In the book, readers are introduced to five sections: Section I examines the historical and cultural perspectives of conversation. This examination helps to create a foundation for a deeper study of the emergent and salient aspects of conversation as it relates to cultural creativity and human systems design. Section II offers the reader an examination of dialogue through different philosophical and theoretical perspectives as well as methodological ideas related to conversation. Section III explores different modalities of conversation and the application of design conversation within and across various types of design settings and human experiences. Section IV examines the field of practice as related to use of different forms of conversation. Here various authors will share their different approaches to conversation and their reflections and insights in using conversation in a variety of settings. Concluding the book, Section V reflectively examines the authors' contributions to the book and provides the reader with a focus on the future.

Bulletin of the Atomic Scientists - 1959-02

The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security. Founded by Manhattan Project Scientists, the Bulletin's iconic "Doomsday Clock" stimulates solutions for a safer world.

The Advocate - 2001-08-14

The Advocate is a lesbian, gay, bisexual, transgender (LGBT) monthly newsmagazine. Established in 1967, it is the oldest continuing LGBT publication in the United States.

Relationship Power in Health Care - John B. Livingstone, M.D. 2016-04-19

The personal interface between clinician and patient is a misunderstood subject which can impact all areas of health care. Without adequate training in relationship science clinicians inadvertently contribute to empathic failure, poor medical decision process, difficulty changing health-related behavior, costly variation and derailment of care, extra litigation, and clinician burnout. Relationship Power in Health Care presents new knowledge and skills that empower health care and wellness professionals to become competent facilitators of behavior and lifestyle change, information transfer, and medical decision making in collaboration with their patients. The new approaches are supported by a wide variety of research and clinical evidence, derived from modern psychotherapy, brain biology, and the latest advances in health coaching and nursing science. Putting them to work to improve health care makes good sense both scientifically and ethically. This comprehensive text integrates past health psychology models starting from the 1950s with recent advances made since the 1990s in relationship psychology and interpersonal neurobiology. It also includes videos of brief medical interviews along with analysis of the strategies and tactics used. The tactics outlined and the interview demonstrations, conducted by a highly experienced clinical social worker and nurse Joanne Gaffney, offer a unique opportunity for all clinicians to acquire valuable skills in both clinician self-care and patient care.

Ebony - 2005-11

EBONY is the flagship magazine of Johnson Publishing. Founded in 1945 by John H. Johnson, it still maintains the highest global circulation of any African American-focused magazine.

American Book Publishing Record - 2003**Forthcoming Books** - Rose Arny 2003-12The British National Bibliography - Arthur James Wells 2006Working with Conflict 2 - Simon Fisher 2020-10-29

Working with Conflict 2 reflects the accumulated wisdom of over 3000 peacebuilding practitioners from 70 countries over the 20 years since the first Working with Conflict book was published. Its focus is on understanding and transforming conflict, building practical strategies for constructive change, analysing power, addressing violence, healing wounds and building movements for change. It is relevant to all who are trying to bring about change in intractable situations, from grassroots to policy level, including those working in the fields of peacebuilding, humanitarian assistance, development, climate change, human rights, gender equality, trauma healing and democracy. Working with Conflict 2 is an accessible practical resource, for both individuals and organisations working and researching how to work in conflict-prone and unstable parts of the world. Easy to use, including helpful visual materials, it provides a range of practical tools – processes, ideas, techniques – for tackling conflict, as well as providing links to other key conflict-related and peacebuilding resources, including organisations, publications and websites.

Safer Sex in Personal Relationships - Tara M. Emmers-Sommer 2004-12-13

This book focuses on safer sex discussion and practice in close, personal relationships, emphasizing research on individuals in personal relationship types that are experiencing a rise in HIV infection and AIDS. Moving beyond studies of gay adult males and IV drug-users, this work paints a clear picture of the very real risk that exists for these less-studied, more general populations, so individuals may better personalize the risk and engage in more preventative measures. Authors Tara M. Emmers-Sommer and Mike Allen examine issues surrounding safer sex, utilizing research that focuses on how individuals struggle with personalizing the HIV and AIDS risk and how they cope with safer sex issues. Safer Sex in Personal Relationships takes readers on a journey through a variety of close relationship types. It begins by highlighting awareness to the global enormity of HIV and AIDS and providing a link between the global and personal, and the need to make HIV and AIDS awareness part of everyday talk and personal relationship structure. It then focuses on: *safer sex in close relationships, both heterosexual and homosexual; *marital relationships and the importance of safe sex discussion and awareness in marriages; *HIV and AIDS from a multicultural perspective; *HIV and AIDS in aged populations; and *increasing awareness, understanding, and compassion of those living with HIV and AIDS. This book will appeal to scholars and students concerned with HIV and AIDS in personal relationships. It will be an invaluable text for courses on interpersonal communication and relationships; family, marital, human sexuality, sex and gender, gay and lesbian relationships, and sexual education; and relational conflict across communication, psychology, and sociology disciplines.

Relating Difficulty - D. Charles Kirkpatrick 2013-09-13

Relating Difficulty offers insight into the nature of difficulty in relationships across a broad range of human experience. Whether dealing with in-laws or ex-spouses, long-distance relationships or power and status in the workplace, difficulty is an all too common feature of daily life. Relating Difficulty brings the academic understanding of relational processes to the everyday problems people face at home and at work. These essays represent a groundbreaking collection of the multidisciplinary conceptual and empirical work that currently exists on the topic. Along with issues such as chronic illness and money problems, contributors investigate contexts of relational difficulty ranging from everyday gossip, the workplace and shyness to more dangerous sexual "hookups" and partner abuse. Drawing on evidence presented in the volume, editors D. Charles Kirkpatrick, Steve Duck, and Megan K. Foley explain how relational problems do not emerge solely from individuals or even from the relationship itself. Instead, they arise from triangles of connection and negotiation between relational partners, contexts, and outsiders. The volume challenges the simple notion that relating difficulty is just about problems with "difficult people" and offers some genuinely novel insights into a familiar everyday experience. This exceptional volume is essential reading for practitioners, researchers and students of relationships across a wide range of disciplines as well as anyone wanting greater understanding of relational functioning in everyday life and at work.
