

La Sexualidad Humana Un Estudio Comparativo De Su Evolucion

El orden femenino - José Lorite Mena 2011-02
La mujer ha existido históricamente en la tensión de una paradoja inquietante, abismal: al no existir sino como seducción, la mujer no debía tener un ser propio para poder existir. Una ausencia de ser: una existencia en simulacro. Tradicionalmente, la mujer ha deseado ser mujer, pero en su recorrido ese deseo siempre ha encontrado al hombre, al deseo del hombre que la hacía mujer.(...) Preguntemos simplemente: ¿cómo comienza el orden de los signos que ha determinado el no-ser histórico de la mujer? ¿tiene historia un no-ser?

Mas alla del examen de las realidades y practicas sexuales o eroticas, los ensayos reunidos en esta obra intentan ofrecer luz sobre el vasto territorio de las identidades genericas y las conductas colectivas que estas conforman y determinan.

Los hábitos sexuales de los adolescentes estudiantes y universitarios. Un estudio de cohortes generacionales - Carmen García Gálvez 2005-11-03

Esta tesis ofrece una descripción de algunos de los aspectos que intervienen en la sexualidad de nuestros jóvenes, así como la evolución que presentan, dichos aspectos. Se realiza a lo largo de los años 1996, 2000 y 2004. El grupo de jóvenes seleccionado es el conformado por chicos y chicas que comparten la condición de

estudiantes de institutos y la universidad de la provincia de Almería La tesis está organizada en siete capítulos. En el capítulo primero se presenta una descripción de la sexualidad, con un breve acercamiento a las dimensiones implicadas en ella; un repaso puntual por los estudios antropológicos de la misma, deteniéndonos en aspectos concretos y manifestaciones externas que se han contemplado a lo largo de la historia. El capítulo segundo, ofrece un breve repaso por la sexualidad en las diferentes culturas y civilizaciones. El tercer y cuarto capítulo, retoman las dimensiones implicadas en la sexualidad, a fin de profundizar más en ellas. El capítulo quinto, ya en la segunda parte, está dedicado a la metodología. El capítulo sexto, se ocupa del análisis e interpretación de los resultados, incluyendo las tablas y gráficos que hemos considerado imprescindibles para comprender dichos resultados. Por último, en el capítulo séptimo recopila la discusión de los resultados y las conclusiones derivadas, relacionadas con las hipótesis y objetivos planteados. Se incluye, para completar el trabajo, un anexo con las tablas que no han sido comentadas pero que pueden ilustrar al lector; ayudando a comprender los resultados concluidos.

The Way It Turned Out - Herant Katchadourian 2018-10-03

This memoir is the account of the life of the author's spanning seven decades lived on three continents: The Middle East, Europe and the United States. What sets this memoir apart from so many others is the breadth of its cultural dimensions and the depth of its psychological insights. Many memoirs are written by celebrities or those by pervasive traumas in their lives have a voyeuristic quality. However, there is very little in these lives with which people can identify. The author's memoir is highly distinctive, but the issues he focuses on have many features that are common with other people's lives, such as the role of chance and the reconstruction of past events in the light of the present. These issues are presented in a way that readers can learn and benefit from it. This book is the account of a fascinating life that is not only interesting to read but instructive by placing the various stages and facets of life in their historical and cultural contexts such as the history and culture of the Middle East, which are important but not well known.

Homo Sapiens - Antonio Vélez Montoya 2013-08-20

The themes discussed in this book, translated to English by Australian Kieran Tapsell, form part of a revolutionary discipline known under the name of evolutionary psychology, a discipline that has become the most powerful tool discovered to date for man to understand himself. Much of the knowledge revealed by human science is explained as a result of the evolutionary process, using as a premise the theory that the majority of modern man's desires, impulses, interests and inclinations, and mental faculties were designed by the evolutionary process of the species. This new focus allows us to synthesize a group of already established findings, coming from such diverse disciplines as genetics, evolution, ethology, anthropology, psychology, neurology and epistemology. In this way, it is possible to explain an important part of complex human behavior under one sole, unifying principle: the direct or indirect search for a greater reproductive efficacy. With this work, easily readable by the general public, the author completes a cycle of subjects that he had begun with *From the Big Bang to Homo Sapiens* (2004), a book published in Spanish by Villegas Editores.
