Telework in the 21st Century - Jon C. Messenger
2019

Technological developments have enabled a dramatic expansion and also an evolution of telework, broadly defined as using ICTs to perform work from outside of an employer's premises. This volume offers a new conceptual framework explaining the evolution of telework over four decades. It reviews national experiences from Argentina, Brazil, India, Japan,

the United States, and ten EU countries regarding the development of telework, its various forms and effects. It also analyses large-scale surveys and company case studies regarding the incidence of telework and its effects on working time, work-life balance, occupational health and well-being, and individual and organizational performance.

Governing the Ungovernable - Ishrat Husain
2018

Pakistan, since its independence in 1947, had to face tumultuous years for the first four decades. Despite the many challenges, both internal and external, the country was able to register a 6 per cent average annual growth rate during the first forty years of its existence. The country was ahead of India and Bangladesh in all economic and social indicators. Since 1990, the country has fallen behind its neighbouring countries and has had a decline in the growth rate. This book attempts to examine the reasons behind this slowdown, the volatile and inequitable growth of

the last twenty-five years, and through a process of theoretical and empirical evidence argues that the most powerful explanatory hypothesis lies in the decay of institutions of governance. It also suggests a selective and incremental approach of restructuring some key public institutions that pertain to accountability, transparency, security, economic growth, and equity.
