THE POROUS DESERT is an extraordinarily rich collection of poems from the Arizona desert.

The Cyber Revelation - R. Jackson Abbott 2007-03

A technological-religious thriller, THE CYBER REVELATION, is a powerful prescient work of fiction and should be read by the rest of the world today as it may have just enough time to prepare for its fate tomorrow. The next world war begins over the Internet. By early summer 2011, Ali Omar, a former U.S. intelligence officer, resurfaces as the leader of a rogue cabal of computer experts operating inside Chechnya. Their creation, The Third Millennium, a computer virus designed to manipulate the Internet and shape a new world destiny, is usurped by a malevolent presence initiating the assault on the Holy Land foretold in biblical prophecies. Unsealing the ancient prophecies, the presence molds the behavior of all who view a computer screen into evil incarnate through the commission of acts of violence. John Granger, computer forensics expert and special assistant to the Department of Homeland Security, races against time to locate and eliminate the source of the new cyber-evil tracing its footprints by deciphering a series of messages deposited on compromised government computers. As he investigates the scenes of the victims, Granger is unaware he has made himself a target for assassination. EXCERPT: "Site R continuity of operations are complete Mr. President," reported the Chairman of the Joint Chiefs of Staff from the subterranean room in Raven Rock. The President's image from the White house filled the screen on the near wall. "Video conferencing with Greenbrier and Mt. Weather have confirmed standby procedures of the relocation system. The emergency preparedness centers are fully operational. I expect to hear from infectious diseases in Detrick within the hour." "I want a full report in 8 hours," snapped the President. "What's causing the violence? Is the source biological? Is it psychological? Has an unknown pathogen been released into the population? The best experts in the world are working around the clock and still we have no answers. All we know is people are dying en masse." "Anything definitive come back from Homeland Security on the Third Millennium virus?" asked the Chairman. "No. The Cyber Security Division is coordinating with Computer Emergency Response teams" the President replied. "Since the virus began to swamp the Internet, they've developed a strategy to secure it from the cyber rage. To lighten public concern, a series of alerts have been posted categorizing the virus as a low threat. The strategy appears to be working. While the technology community sifts and analyzes data on the Third Millennium, the media's ignoring the spread of a low-threat cyber event. We're reaching a critical point. I've read preliminary reports from CERTs theorizing a relationship between the Third Millennium and the violence. The dots haven't been completely connected but, if true, the destruction of our culture may be delivered by the one solution we designed to promote global unity."

Not Too Far From My Back Back Door - Tania Smith 2019-11-21

Not Too Far From My Back Door has children acknowledging and releasing their BIG emotions that many children struggle with. Through encounters with characters of mother nature, children are empowered with a toolkit for resilience. They learn along the journey that this has and always has been within them. A book of self appreciation, self discovery and self nurturing whilst reflecting on the abundance of mother nature. This book was written by Social Worker Tania Louise Smith who has worked in child protection and mental health both in Australia and the United Kingdom. Tania believes this book creates a jumping off point for discussions about feeling, emotions and the building blocks for resilience and empowerment. These are important discussions to be had with every child in promoting positive mental health and addressing the ever increasing mental health concerns for children world wide. The book is a beautiful read for all children, as everyone struggles with times of high emotions. Especially nurturing for children with anxiety, depression, post traumatic stress, bullying, abuse, learning difficulties, accepting differences, et and well as for those nature loving, wilderness seeking children.

The Old Regime Police Blotter II - Jim Chevallier 2010-05-18

In Pre-Revolutionary France, sodomy (in all its different meanings) was, in theory, a capital crime, whether practiced between men (sodomites), women (tribads), heterosexual couples or (since it included masturbation) alone. In practice, most sodomy cases involved men, though this collection includes two legal cases involving women with a "monstrous attachment" to their own sex and a general glance at "unnatural" practices between heterosexuals. In some famous cases - Chausson and Fabri, Deschauffours, Pascal, etc. - the men were indeed burned at the stake, though most (not all) of these cases also involved crimes of violence. But more often, those arrested were exiled, locked up or... sent to a regiment. This second volume of the Old Regime Police Blotter - a series of period sourcebooks - presents a number of these cases, including, for the first time in English, most of the trial transcripts for the Chausson and Deschauffours cases and extensive material from the abbé Desfontaines' case (which briefly involved Voltaire), as well as an overview of Old Regime law on this subject and a look at some of the applicable slang. A rich parade of characters - some sordid, some admirable, some a touch comic - appears in this material, as well as a great deal of very human drama.

Myth and Madness - Daniel Hryhorczuk 2016-12-13

During Ukraine's Revolution of Dignity in the winter of 2013-14, Dr. Natalka Slovyanka, a beautiful, young psychiatrist from Donbas, tries to cure her mysterious patient of his "philosophical intoxication." Telesyk is a storyteller who hears voices in the wind. His mind drifts between the immuring reality of the psikhushka and an imaginary world inhabited by witches, nymphs, and dragons. He engages the other patients in a fairy tale of the quest for a horse that eats burning embers and drinks fire, a myth that parallels Ukraine's search for its identity. Both patient and therapist embark on their own quests--Telesyk, to free himself from the prison of his mind and Natalka, to escape the dark secrets of her past. As different as East and West, they realize that they must unite to slay the family of dragons that are threatening their existence. Myth and Madness blends magical realism with historical events on the Maidan to tell the story of a nation's quest for its identity.

Going Forth by Day - Bill Viola 2002

Introduction by John G. Hanhardt.

Growth of Love - Phil Lesbirel 2009-12-03

Raymond wakes up at the bottom of a steep escarpment, battered, bruised and with no memory of how he got there. He cannot remember who he is or where he is. Through sheer willpower, he climbs out and finds a lift to Sydney where the Salvation Army help him to recover and survive. He is put up at a Salvation Army Hostel for men, taking the name of David and shares a room with Grant, an ex convict and

recovering alcoholic. Through circumstances they form a bond comforting each other, and finally find love together. This is their story and how their love grows, how they survive being a gay couple in the late 70s in Australia, and how through the death of Raymonds younger brother they become a family. The story line is based on truth; the story uses fiction to offer a more interesting reading, but the happenings to David did occur and at similar times to the story line. However David never did have a family so please excuse this little piece of fiction.

Two Period Plays - Mary Anneeta Mann 2019-06-29

Each person owns their own name and no one else has a valid right to use it. DIANA DEVEREAUX (To Marilyn with Love) explores the journey of a rare woman whose only real freedom was in her singular essence that could never be taken away from her while all the outward manifestations of it, (with a few exceptions), her beauty, her wisdom, and her boundless love, were misunderstood, exploited for money, degraded for lust. Born within the physical boundary of a city yet bereft of any spiritual connection to it, a child to woman's magnificent isolated spirit soared far beyond even the imagination of those who surrounded her. Assisting her self-understanding is an imaginary character drawn from the the art that is her calling - the theatre. THE SENATOR'S DAUGHTER IN A PARALLEL UNIVERSE. This play addresses, through an imaginary parallel universe, the disconnect between aspects of government manifested at that time, and it exposes a deep flaw in a process determined more by money and male dominance than by empathy with all of the people, thus unwittingly or wittingly mutilating democracy. A woman's body belongs to her alone, just as a man's body is his alone. The parallel universes of nature are understood by indigenous women as well as suppressed civilized women. A self-disappearing Referendum shows that all life is sacred. The life of each human being cannot be relegated to civilized acceptance, which is, in any way, less than that bestowed by nature.

Villains Pride - M. K. Gibson 2017-11-24

The Shadowmaster is back . . . whether you wanted him to be or not! Jackson Blackwell, The Shadowmaster, is in over his head this time. After his last adventure, where he tore fantasy novels a new one, Jackson has to deal with the repercussions of angry gods, angrier conspirators, and the wrath of his pregnant girlfriend! (I know . . . actual consequences in a comedy/action series? How avant-garde! --I think. Okay look, I really don't know what that means. I've always just wanted to say it and I'm too lazy to look it up.) Thanks to a godly decree and a crafty clause, Jackson has been banished from his home. And the only universe kindly enough to take him in is one infested with comic-book-style superheroes and supervillains. A perfect place to cause mayhem, right? Well, it wouldn't be much of a book if it were. Comics don't play by the rules and Jackson has been tasked to do something "unique." Whatever is a villain to do? Follow the adventure of Jackson Blackwell as he attempts to manipulate his way back to the top while dealing with all manner of dark detectives, godly aliens, expensive power suits, and the most daunting challenge of all . . . looming parenthood.

How Language Speaks to Music - Mathias Scharinger 2022-09-06

Prosody as a system of suprasegmental linguistic information such as rhythm and intonation is a prime candidate for looking at the relation between language and music in a principled way. This claim is based on several aspects: First, prosody is concerned with acoustic correlates of language and music that are directly comparable with each other by their physical properties such as duration and pitch. Second, prosodic accounts suggest a hierarchical organization of prosodic units that not

only resembles a syntactic hierarchy, but is viewed as (part of) an interface to syntax. Third, prosody provides a very promising ground for evolutionary accounts of language and music. Fourth, bilateral transfer effects between language and music are best illustrated on the level of prosody. Highlighting the first two aspects, this book shows that it is a fruitful endeavor to use prosody for a principled comparison of language and music. In its broader sense, prosody as sound structure of communicative systems may be considered a »meta«-language that formalizes the way of "how music speaks to language and vice versa". Prosody is firmly established within linguistic theory, but is also applied in the musical domain. Therefore, prosody is not just a field of inquiry that shares elements or features between music and language, but can additionally provide a common conceptual ground.

Romancing the Defense - Melissa Stevens

Stacy felt that pull the first time he saw her. But his brother had seen her, and asked her out, first. It's tricky water but Stacy suspects it will be worth the risk to get to know Denni. But is she willing? See if Denni and Stacy can figure things out if their own hang ups will keep them from finding out what could be. Welcome to Highland County, where we take our heroes seriously.

Prarie Farmers - Susanne Weid 2005-11-20

Seminar paper from the year 2004 in the subject History - America, grade: 2, University of Würzburg, course: History of the American West, language: English, abstract: The story of people who are moving and settling in order to find a suitable place for living in the Great Plains has always been a central experience in American agricultural history. As Jackson Turner points out in his famous essay: "Up to our own day American history has been in a large degree the history of the colonization of the Great West. The existence of an area of free land, is continuous recession, and the advance of American settlement westward, explain American development... American social development has been continually beginning over again on the frontier. This perennial rebirth, this fluidity of American life, this expansion westward with its new opportunities, its continuous touch with the simplicity of primitive society, furnish the forces dominating American character. The true point of view in the history of this nation is not the Atlantic coast, it is the Great West." From the nation's earliest days, farming has had a very important place in the U.S. economy. Throughout frontier literature the virtues of the farmers, their initiative, hard work and selfsufficiency, were praised as being unequalled in American history. But this heroic picture forgets that there farmers have always been dependent upon some uncontrollable facts as the weather, prices or government policy. American farmers are known to produce large yields per hectare, what has to be charged to the abundance of natural benefits. "Some of the richest farmland in the world can be found in the American West." Between the close of the Civil War and 1900, the United States developed as one of the world's leading economic powers. Revolutionary methods of production, vast new markets, and new forms of corporate organization were created by successful industrialists. A rapidly expanding railroad system as well as innovations in farm machinery led to a ubiquitous growth of agricultural productivity. To sum it up, farmers embody the real hero of the New World, as they were bringing civilization in their wagons into that unknown land. Though there were many obstacles hindering their movement, the farmers learned to adapt to the special demands of the nature and established villages, roads, railroads, schools and churches. "Americans were a pioneering and an agricultural people who had experienced a constant love affair with the land." This research paper tries to analyse environmental backgrounds as well as the history of the western movement including typical farm life examples.
