The Wretched of the Earth - Frantz Fanon 2019-12-23
A distinguished psychiatrist from Martinique who took part in the Algerian Nationalist Movement, Frantz Fanon was one of the most important theorists of revolutionary struggle, colonialism, and racial difference in history. Fanon's masterwork is a classic alongside Edward Said's Orientalism or The Autobiography of Malcolm X, and it is now available in a new translation that updates its language for a new generation of readers. The Wretched of the Earth is a brilliant analysis of the psychology of the colonized and their path to liberation. Bearing singular insight into the rage and frustration of colonized peoples, and the role of violence in effecting historical change, the book incisively attacks the twin perils of postindependence colonial politics: the disenfranchisement of the masses by the elites on the one hand, and intertribal and interfaith animosities on the other. Fanon's analysis, a veritable handbook of social reorganization for leaders of emerging nations, has been reflected all too clearly in the corruption and violence that has plagued present-day Africa. The Wretched of the Earth has had a major impact on civil rights, anticolonialism, and black consciousness movements around the world.

The World of UCL - Negley Harte 2018-05-21
From its foundation in 1826, UCL embraced a progressive and pioneering spirit. It was the first university in England to admit students regardless of religion and made higher education affordable and accessible to a much broader section of society. It was also effectively the first university to welcome women on equal terms with men. From the outset UCL showed a commitment to innovative ideas and new methods of teaching and research. This book charts the history of UCL from 1826 through to the present day, highlighting its many contributions to society in Britain and around the world. It covers the expansion of the university through the growth in student numbers and institutional mergers. It documents shifts in governance throughout the years and the changing social and economic context in which UCL operated, including challenging periods of reconstruction after two World Wars. Today UCL is one of the powerhouses of research and teaching, and a truly global university. It is currently seventh in the QS World University Rankings. This completely revised and updated edition features a new chapter based on interviews with key individuals at UCL. It comes at a time of ambitious development for UCL with the establishment of an entirely new campus in East London, UCL East, and Provost Michael Arthur's 'UCL 2034' strategy which aims to secure the university's long-term future and commits UCL to delivering global impact.

My Booky Wook - Russell Brand 2008-11-13
Russell Brand grew up in Essex. His father left when he was three months old, he was bulimic at 12 and left school at 16 to study at the Italia Conti stage school. There, he began drinking heavily and taking drugs. He regularly visited prostitutes in Soho, began cutting himself, took drugs on stage during his stand-up shows, and even set himself on fire while on crack cocaine. He has been arrested 11 times and fired from 3 different jobs - including from XFM and MTV - and he claims to have slept with over 2,000 women. In 2003 Russell was told that he would be in prison, in a mental hospital or dead within six months unless he went in to rehab. He has now been clean for three years. In 2006 his presenting career took off, and he hosted the NME awards as well as his own MTV show, 1 Leicester Square, plus Big Brother's Big Mouth on Channel 4. His UK stand-up tour was sold out and his BBC Radio 6 show became a cult phenomenon, the second most popular podcast of the year after Ricky Gervais. He was awarded Time Out's Stand Up Comedian of the Year and won Best Newcomer at the British Comedy Awards. In 2007 Russell hosted both the Brit Awards and Comic Relief, and continued to front Big Brother's Big Mouth. His BBC2 radio podcast became the UK's most popular. The Age of Surveillance Capitalism - Shoshana Zuboff 2019-01-31
THE TOP 10 SUNDAY TIMES BESTSELLER Shortlisted for the FT Business Book of the Year Award 2019 'Easily the most important book to be published this century. I find it hard to take any young activist seriously who hasn't at least familiarised themselves with Zuboff's central ideas.' - Zadie Smith, The Guardian The challenges to humanity posed by the digital future, the first detailed examination of the unprecedented form of power called "surveillance capitalism," and the quest by powerful corporations to predict and control us. The heady optimism of the Internet's early days is gone. Technologies that were meant to liberate us have deepened inequality and stoked divisions. Tech companies gather our information online and sell it to the highest bidder, whether government or retailer. Profits now depend not only on predicting our behaviour but modifying it too. How will this fusion of capitalism and the digital shape our values and define our future? Shoshana Zuboff shows that we are at a crossroads. We still have the power to decide what kind of world we want to live in, and what we decide now will shape the rest of the century. Our choices: allow technology to enrich the few and impoverish the many, or harness it and distribute its benefits. The Age of Surveillance Capitalism is a deeply-reasoned examination of the threat of unprecedented power free from democratic oversight. As it explores this new capitalism's impact on society, politics, business, and technology, it exposes the struggles that will decide both the next chapter of capitalism and the meaning of information civilization. Most critically, it shows how we can protect ourselves and our communities and ensure we are the masters of the digital rather than its slaves.

Marini, Glover-Graf and Millington have done a remarkable job in the design of this highly unique book, that comprehensively and very thoughtfully addresses the psychosocial aspects of the disability experience. These highly respected scholars have produced a major work that will be a central text in rehabilitation education for years to come." From the Foreword by Michael J. parts are the stories of the disabled, which give readers insights into their struggles and triumphs." Score: 94, 4 Stars--Doody's Medical Reviews What are the differences between individuals with disabilities who flourish as opposed to those who never really adjust after a trauma? How are those born with a disability different from individuals who acquire one later in life? A wealth of counseling guidelines and useful strategies are geared specifically to individual disabilities. Key Features: Contains narratives of people living with blindness, hearing impairments, spinal cord injuries, muscular dystrophy, polio, mental illness, and other disabilities Provides counseling guidelines and strategies specifically geared toward specific disabilities, including "dos and don'ts" Includes psychological and sociological research relating to individual disabilities Discusses ongoing treatment issues and ethical dilemmas for rehabilitation counselors Presents thought-provoking discussion questions in each chapter Authored by prominent professor and researcher who became disabled as a young adult

I Love Jesus, But I Want to Die - Sarah J. Robinson 2021-05-11

A compassionate, shame-free guide for your darkest days "A one-of-a-kind book . . . to read for yourself or give to a struggling friend or loved one without the fear that depression and suicidal thoughts will be minimized, medicalized or over-spiritualized."—Kay Warren, cofounder of Saddleback Church What happens when loving Jesus doesn't cure you of depression, anxiety, or suicidal thoughts? You might be crushed by shame over your mental illness, only to be told by well-meaning Christians to "choose joy" and "pray more." So you beg God to take away the pain, but nothing eases the ache inside. As darkness lingers and color drains from your world, you're left wondering if God has abandoned you. You just want a way out. But there's hope. In *I Love Jesus, But I Want to Die*, Sarah J. Robinson offers a healthy, practical, and shame-free guide for Christians struggling with mental illness. With unflinching honesty, Sarah shares her story of battling depression and fighting to stay alive despite toxic theology that made her afraid to seek help outside the church. Pairing her own story with scriptural insights, mental health research, and simple practices, Sarah helps you reconnect with the God who is present in our deepest anguish and discover that you are worth everything it takes to get better. Beautifully written and full of hard-won wisdom, *I Love Jesus, But I Want to Die* offers a path toward a rich, hope-filled life in Christ, even when healing doesn't look like what you expect.

The Secret of Our Success - Joseph Henrich 2017-10-17

How our collective intelligence has helped us to evolve and prosper Humans are a puzzling species. On the one hand, we struggle to survive on our own in the wild, often failing to overcome even basic challenges, like obtaining food, building shelters, or avoiding predators. On the other hand, human groups have produced ingenious technologies, sophisticated languages, and complex institutions that have permitted us to successfully expand into a vast range of diverse environments. What has enabled us to dominate the globe, more than any other species, while remaining virtually helpless as lone individuals? This book shows that the secret of our success lies not in our innate intelligence, but in our collective brains—on the ability of human groups to socially interconnect and learn from one another over generations. Drawing insights from lost European explorers, clever chimpanzees, mobile hunter-gatherers, neuroscientific findings, ancient bones, and the human genome, Joseph Henrich demonstrates how our collective brains have propelled our species' genetic evolution and shaped our biology. Our early capacities for learning from others produced many cultural innovations, such as fire, cooking, water containers, plant knowledge, and projectile weapons, which in turn drove the expansion of our brains and altered our physiology, anatomy, and psychology in crucial ways. Later on, some collective brains generated and recombined powerful concepts, such as the lever, wheel, screw, and writing, while also creating the institutions that continue to alter our motivations and perceptions. Henrich shows how our genetics and biology are inextricably interwoven with cultural

evolution, and how culture-gene interactions launched our species on an extraordinary evolutionary trajectory. Tracking clues from our ancient past to the present, *The Secret of Our Success* explores how the evolution of both our cultural and social natures produce a collective intelligence that explains both our species' immense success and the origins of human uniqueness.
