Inside of a Dog Alexandra Horowitz 2010-02-18 As an unabashed dog lover, Alexandra Horowitz is naturally curious about what her dog thinks and what she knows. As a cognitive scientist she is intent on understanding the minds of animals who cannot say what they know or feel. This is a fresh look at the world of dogs -- from the dog's point of view. The book introduces the reader to the science of the dog -- their perceptual and cognitive Abilities -- and uses that introduction to draw a picture of what it might be like to be a dog. It answers questions no other dog book can -- such as: What is a dog's sense of time? Does she miss me? Want friends? Know when she's been bad? Horowitz's journey, and the insights she uncovered from studying her own dog, Pumpernickel, allowed her to understand her dog better, and appreciate her more through that understanding. The

When Pets Come Between Partners Joel Gavriale-Gold 2000-02-21 How to Keep Love—And Romance—In the Human/Animal Kingdom of Your Home When you're fighting about the dog, is it really about your in-laws? When your boyfriend says, "It's either me or the cat," isn't there a way you can keep both? And what can you do when your girlfriend's Chihuahua can't get along with your Boxer, but you want to move in together? Dr. Gold to the rescue, with a practical guide for couples who just want a peaceable kingdom. Sometimes animals take the place of people in relationships, so when we argue about the hamster, we may really be arguing about the children or an old boyfriend. Feelings of jealousy, anger, control, guilt, and fear can all play themselves out through our pets. Dr. Gold explains how conflicts over pets are often signs of deeper conflicts between couples, and shows how you can get at the root of these conflicts, bring them into the open and resolve them."

chewing, and other behavioral issues • Health care essentials like finding a vet and selecting the right food • Cool tricks, traveling tips, and activities to enjoy with your dog • Topics with corresponding videos on Zak's YouTube channel so you can see his advice in action Packed with everything you need to know to raise and care for your dog, this book will help you communicate and bond with one another in a way that makes training easier, more rewarding, and—most of all—fun! Tails Are Not for Pulling Elizabeth Verdick 2005-09-15 Pets may not have words, but they can communicate. Paying attention to an animal's cues—a joyful bark, a scary growl, a swishing tail—can help a child understand what the animal is “saying” and what an appropriate response might be. That's part of what this book is about. But mostly it's about showing children how to love pets gently—because pets are for loving, after all. Kids learn that teasing isn't nice, that they can choose to be kind to animals, and that if you want to touch someone else's pet, there's one important rule you should know: Ask the owner first! A special section for adults includes ideas for teaching kindness to animals, activities, and discussion starters.

Our Dogs, Ourselves Alexandra Horowitz 2019-09-03 From Alexandra Horowitz, #1 New York Times bestselling author of *Inside of a Dog*, an eye-opening, informative, and wholly entertaining examination and celebration of the human-canine relationship for the curious dog owner and science-lover alike. We keep dogs and are kept by them. We love dogs and (we assume) we are loved by them. We buy them sweaters, toys, shoes; we are concerned with their social lives, their food, and their health. The story of humans and dogs is thousands of years old but is far from understood. In *Our Dogs, Ourselves*, Alexandra Horowitz explores all aspects of this unique and complex interspecies pairing. As Horowitz considers the current culture of dogdom, she reveals the odd, surprising, and contradictory ways we live with dogs. We celebrate their individuality but breed them for sameness. Despite our deep emotional relationships with dogs, legally they are property to

be bought, sold, abandoned, or euthanized as we wish. Even the way we speak to our dogs is at once perplexing and delightful. In thirteen thoughtful and charming chapters, *Our Dogs, Ourselves* affirms our profound affection for this most charismatic of animals—and opens our eyes to the companions at our sides as never before.

For the Love of a Dog Patricia McConnell, Ph.D. 2007-08-28 Yes, humans and canines are different species, but current research provides fascinating, irrefutable evidence that what we share with our dogs is greater than how we vary. As behaviorist and zoologist Dr. Patricia McConnell tells us in this remarkable new book about emotions in dogs and in people, more and more scientists accept the premise that dogs have rich emotional lives, exhibiting a wide range of feelings including fear, anger, surprise, sadness, and love. In *For the Love of a Dog*, McConnell suggests that one of the reasons we love dogs so much is that they express emotions in ways similar to humans. After all, who can communicate joy better than a puppy? But not all emotional expressions are obvious, and McConnell teaches both beginning dog owners and experienced dog lovers how to read the more subtle expressions hidden behind fuzzy faces and floppy ears. For those of us who deeply cherish our dogs but are sometimes baffled by their behavior, *For the Love of a Dog* will come as a revelation—a treasure trove of useful facts, informed speculation, and intriguing accounts of man’s best friend at his worst and at his very best. Readers will discover how fear, anger, and happiness underlie the lives of both people and dogs and, most important, how understanding emotion in both species can improve the relationship between them. Thus McConnell introduces us to the possibility of a richer, more rewarding relationship with our dogs. While we may never be absolutely certain what our dogs are feeling, with the help of this riveting book we can understand more than we ever thought possible. Those who consider their dogs part of the family will find *For the Love of a Dog* engaging,

The Cabin in the Woods Ed Kenerson 2008-09 "Cabin In The Woods" is a collection of true-life adventures with spiritual insights for young people. It focuses around the time my parents moved our family to a rural, Connecticut town called Cheshire. We took up residence in an old, rustic cabin sitting deep in the woods. There was no running water, no bathroom, no heat and no electricity, only a huge stone fireplace for cooking. But, it was there during that first summer that my parents began to build their "dream house." For me, it was the adventure of a lifetime, and the things I learned about life and God were immeasurable. From living in a pine bark cabin to building a house in the woods; from cornering wild woodchucks to getting squirted by skunks; from raising dogs to chasing weasels. I'd like to share these early, "cabin adventures" with young people of all ages to enjoy. Ed Kenerson attended Gordon College (B.A. Psychology) and Gordon Conwell Seminary (Masters of Religious Education) and has over 10 years experience in Christian Education and Youth Ministry. At present, he manages his own training and communications business called Steps To Success, delivering multi-media presentations to businesses in areas of career management, customer service, and time management. In addition, he reaches out to teenagers in high schools through Career Coach, USA, a strategic ministry designed to teach young people the principles of both personal and professional success. Ed is married to Kathy with two children and eight grandchildren.

The Other End of the Leash Patricia McConnell, Ph.D. 2009-02-19 Learn to communicate with your dog—using their language “Good reading for dog lovers and an immensely useful manual for dog owners.”—The Washington Post An Applied Animal Behaviorist and dog trainer with more than twenty years' experience, Dr. Patricia McConnell reveals a revolutionary new perspective on our relationship with dogs—sharing insights on how “man's best friend” might interpret our behavior, as well as essential advice on how to interact with our four-legged friends in ways that bring out the best in them. After all, humans and dogs are two entirely different species, each shaped by its individual evolutionary heritage. Quite simply, humans are primates and dogs are canids (as are

wolves, coyotes, and foxes). Since we each speak a different native tongue, a lot gets lost in the translation. This marvelous guide demonstrates how even the slightest changes in our voices and in the ways we stand can help dogs understand what we want. Inside you will discover: • How you can get your dog to come when called by acting less like a primate and more like a dog • Why the advice to “get dominance” over your dog can cause problems • Why “rough and tumble primate play” can lead to trouble—and how to play with your dog in ways that are fun and keep him out of mischief • How dogs and humans share personality types—and why most dogs want to live with benevolent leaders rather than “alpha wanna-bes!” Fascinating, insightful, and compelling, *The Other End of the Leash* is a book that strives to help you connect with your dog in a completely new way—so as to enrich that most rewarding of relationships.

Minding Dogs Michele Merritt 2021-04-01 While the past decade has seen a surge of research regarding canine cognition, this newfound interest has not caught the attention of many philosophers. Studies pertaining to dog minds have been pouring out of canine cognition labs all over the world, but they remain relatively ensconced within the scientific, sociological, and anthropological communities, and very little philosophical thought on dog cognition exists. Philosophers certainly have not shied away from theorizing about the nature of nonhuman animal cognition generally. Theories range from Cartesian disavowal of all nonhuman intelligence to arguments that even fish have complex minds and therefore humans should not eat them. Serious philosophical considerations about dogs and their relationship to humans, however, remain incredibly rare. Even less common, if not entirely nonexistent, is a critical examination of the question “What are dogs thinking?” and what asking and attempting to answer this question reveals, not so much about dogs, but about us. With *Minding Dogs* Michele Merritt attempts to fill two

significant gaps in the philosophy of animal cognition. First, she adds to the growing discussion on canine cognition, which has been overlooked until recently and requires more consideration. Second, she takes seriously our dynamic collaborations with our canine friends as crucial to understanding both their minds and our own.
