Love Your Lady Landscape -

Lisa Lister 2016-07-05

Love Your Lady Landscape is a healing journey through the terrain of what it is to be a woman. When a woman isn't in alignment with her feminine essence, she may experience exhaustion and overwhelm, lack sexual desire or passion for life, and generally feel "out of sync". In this book, Lisa Lister uses a myriad of tools and practices such as Earth based spirituality, shamanic teachings, movement and dance, and breath and sound work to teach women how to reconnect to their feminine wisdom in order to start rebalancing all aspects of their lives. Based on Lisa's own 11-year journey of healing and

reconnecting with her body, this book will help you: • release guilt and shame from the past • explore self-pleasure and sensuality • understand, read, and connect with your body's signs and signals • learn about your menstrual cycle and its connection with the rhythms of nature and the universe • discover the sacred art of receiving • express your creativity • find your voice to communicate your needs, wants, and desires Love Your Lady Landscape will move women into a fiercely loving and healing relationship with their body and will teach them how to use its cycles and signs to create a life of vitality, fulfillment, and creation.

What To Say To A Girl When Shes On Her Period

in Girls - Stacy Billows

2015-03-22

As your daughter starts to face the changes and challenges that come with puberty - the most trying point of her young life so far - she will need you to be there and guide her. In order to do so, you must equip yourself to talk with her about puberty, her first period, her body's changes, and physical interactions with the opposite sex. This is one of the most important duties you'll have as a parent. You'll need to be prepared with what to say, when to say it, and how to say it, so that your daughter will know what to expect, she will understand the changes that are happening, and she will be more capable of handling it all. If a young girl is educated about the physical and emotional effects brought on by adolescence, then her chances of turning into a well-adjusted young lady with minimal drama are much improved. This book is a guide for every parent out there who's blessed with a daughter. Now that your little princess

isn't so little anymore, it's time to help guide her through this pivotal moment as she journeys into the next phase of her life. If you do it right, she will trust you as a confidant, and this time in her life will be much easier, since she'll realize that puberty is just an awkward stage that will pass and that she will soon become a beautiful, confident woman.

Good Trouble - Joe Biel

2016-03-15

In 1996, everything about Joe Biel's life seemed like a mistake. He was 18, he lived in Cleveland, he got drunk every day, and he had mystery health problems and weird social tics. All his friends' lives were as bad or worse. To escape a nihilistic, apocalyptic worldview and to bring reading and documentation into a communal punk scene, he started assembling zines and bringing them in milk crates to underground punk shows. Eventually this became Microcosm Publishing. But Biel's head for math was stronger than his ability to relate to people, and it wasn't

until he was diagnosed with Asperger's Syndrome that it all began to fall into place. This is the story of how, over 20 years, one person turned a litany of continuing mistakes and seeming wrong turns into a happy, fulfilled life and a thriving publishing business that defies all odds.

The Autism-Friendly Guide to Periods - Robyn Steward

2019-04-18

Written by autistic author Robyn Steward, this is a detailed guide for young people aged 9 to 16 on the basics of menstruation. Created in consultation with young people, an online survey and a group of medical professionals, this is a book that teaches all people about periods, which can be a scary and overwhelming issue. Promoting the fact that everyone either

has periods or knows someone who does, the book reduces the anxiety girls face in asking for help. It offers direct advice on what periods look and feel like and how to manage hygiene and pain. It also breaks up information using flaps and step-by-step photos of how to change pads and tampons, it discusses alternatives to tampons and pads, and gives information about possible sensory issues for people with autism.

Paula Wants to be Free -

David E. Golden 2021-09-07

This could be a love story of the author and an interesting and remarkable woman who wants to be free to do what she wants to do. However, there is more. Fear of dying is hard for a little girl, being her father's runner at 6 and 7 as he was smuggling people out of concentrations camps and they were surviving the war. As a runner, she had to remember 20 or more names and addresses without any notes. That usually leaves marks, but for Paula, after going through all that and more, she still

wanted to be free to do what she wanted to do, and nothing could stop her from going on to succeed and become a leader for positive change. Paula, not yet seven, became her father's runner (when he was in the resistance against the German Nazis during WWII) to contact people and have them come to meetings for things he needed to share with them. Paula, as a child, was able to see the humanity in everyone, and therefore, she was able to forgive even someone who might want to harm her. Paula, as a physicist, wrote the most cited paper in science in a ten-year period. After that, she was fired as a physicist for having a baby and refusing to have an abortion in her seventh month that was required by the head of her research division to keep her job. She changed her course to become a psychologist to help men and women understand that everyone should be equal. As a psychologist, after she wrote her PhD dissertation, she wrote a paper, "Female Sexual Arousal and the Menstrual

Cycle," in 1985. That paper has been cited over twenty-one thousand times from 1987 to 2020, and it still receives many citations per month. She still wants to be free to do what she wants to do. She has given hundreds of talks and workshops about men's and women's sex role differences, men's and women's sick leave differences, prevention, addiction, and she created Say It Straight Training and has taught this in the United States, Canada, Mexico, Costa Rica, Malta, Egypt, Israel, the Czech Republic, the Slovak Republic, France, Holland, Norway, and Hong Kong, as well as on Army and Airforce bases in the United States and abroad in Germany, Guam, and South Korea. As time went on, she got her husband to work with her more and more. By the nineties, he was working with her a lot, and they also have fourteen master Say It Straight trainers. In 2014, Paula told her husband she wanted to stop traveling, and he and the master trainers can do the training. They currently

live together in Austin, Texas.

The Girl in Her Teens -

Margaret Slattery 2016-01-07

THE TEEN PERIOD She was a beautiful, well-developed girl of thirteen. Her bright, eager face, with its changing expression, was a fascination at all times. It seemed unusually earnest and serious that particular morning as she stood waiting the opportunity to speak to me. She had asked to wait until the others had gone, and her manner as she hesitated even then to speak made me ask, "Are you in trouble, Edith?" "No, not exactly trouble,—I don't know whether we ought to ask you, but all of us girls think,—well, we wish we could have a mirror in the locker-room. Couldn't we? It's dreadful to go into school without knowing how your hair looks or anything!" I couldn't help laughing. Her manner was so tragic that the mirror seemed the most important thing in the educational system just then. I said I would see what could be done about it, and felt sure that what "all the girls" wanted

could be supplied. She thanked me heartily, and when she entered her own room nodded her head in answer to inquiring glances from the other girls. As I made a note of the request, I remembered the Edith of a year or more ago. Edith, whose mother found her a great trial; she didn't "care how she looked." It was true. She wore her hat hanging down over her black braids, held on by the elastic band around her neck; she lost hair ribbons continually, and never seemed to miss them. She was a good scholar, wide-awake, alert, always ready for the next thing. She loved to recite, and volunteered information generously. In games she was the leader, and on the playground always the unanimous choice for the coveted "it" of the game. She was never in the least self-conscious, and, as her mother had said, how she looked never seemed to occur to her.

Oil C - Dr Vincent Ellwood
2019-03-04

The term "period" in reference to menstruation dates from 1822 and means an "interval of time" or a "repeated cycle of events." Another word for menstruation is "catamenia," from the Greek *katamenia* (*kata* = by + *menia* = month). A "catamenia cup" is a firm, flexible cup worn inside the vagina to catch menstrual blood. Menstruation may have led to humanity's sense of time as most early lunar calendars were based on the length of a women's menstrual cycle. Some cultures believed that menstrual blood could cure ailments such as warts, birthmarks, gout, goiters, hemorrhoids, epilepsy, worms, leprosy, and headaches. Menstrual Blood was also used to create love charms and to ward off demons. Additionally, a virgin's first menstrual napkin was thought to be a cure for the plague. A girl's first menstrual period is called a menarche (from the Greek

word *men* = month + *arkhe* = beginning). After the menarche, ovulation does not usually occur with menstruation for approximately the first year to 18 months. When a girl is born, her complete potential egg supply is born with her. In the womb, she creates about seven million egg cells. At birth, she has two million. By puberty, there are only about 400,000 left, of which fewer than 500 are actually released. Menstruation is the process where an unfertilised egg, or a fertilised egg that has not become embedded in the uterus lining, is removed from the body via blood flow through the vagina. Humans are very rare among species in having the trait of menstruation, as most animals do not bleed on a regular basis to remove the uterus lining and unfertilised egg or underdeveloped embryo. Only humans, monkeys, apes and free-tailed and leaf-nosed bats, and elephant shrews menstruate. In most animals, the uterus lining is reabsorbed into the body if a

female does not become pregnant after releasing an egg from the ovary. Women get menstruation every month, but we also don't know everything that we should know about our periods or what happens when we get it. The average woman starts menstruating at the age of 13 and stops at the age of 51 with an average menstruation of 3-7 days per month. This means that the average woman has 456 periods over the span of 38 years; that's roughly 2,280 days or 6.25 years of the average woman's life. Now, think about how much money you spend on your survival pack you require for each menstruation—all the pads, tampons, food, pain pills, heating pads, panties, and so on. It's crazy how expensive periods can be! I'm not going to lie: this is the one time I hope to be average. Read on to learn all about your menstruation, you may think you know it all, but you'll probably learn a thing or two. If you're a female, at some point in time, you'll most likely experience menstrual cramps -

a symptom that usually accompanies your monthly reminder of womanhood, better known as your 'period.' Medically referred to as "dysmenorrhea," menstrual cramps causes dull or throbbing pains that take place in the lower region of the stomach. Most women encounter this kind of cramping just before and during their menstrual periods. While nagging for most, some women battle unbearable pain. The good news is that there is another way to take care of those frustrating menstrual pains. Ever heard of cannabidiol (CBD)? Consider using CBD for menstrual cramps during your next cycle. A few scientific pieces of research and studies on the usefulness of CBD in relieving menstrual cramps have supported the benefits of CBD. There are other options like THC tampons, but since most of us want relief without getting high, CBD is an ideal option. It does wonders! It is neither psychoactive nor intoxicating. CBD is the best

relief for your menstrual cramps. It's time to say goodbye to the feeling of wear and tear in your lower abdomen. If you have never used CBD products before, don't worry. This book is all you need. Get a copy now!

Flow - Elissa Stein 2009-11-10

In this hip, hilarious and truly eye-opening cultural history, menstruation is talked about as never before. Flow spans its fascinating, occasionally wacky and sometimes downright scary story: from mikvahs (ritual cleansing baths) to menopause, hysteria to hysterectomies—not to mention the Pill, cramps, the history of underwear, and the movie about puberty they showed you in 5th grade. Flow answers such questions as: What's the point of getting a period? What did women do before pads and tampons? What about new drugs that promise to end periods—a hot idea or not? Sex during your period: gross or a turn-on? And what's normal, anyway? With color reproductions of (campy) historical ads and early

(excruciating) femcare devices, it also provides a fascinating (and mind-boggling) gallery of this complex, personal and uniquely female process. As irreverent as it is informative, Flow gives an everyday occurrence its true props - and eradicates the stigma placed on it for centuries.

[Susan's Growing Up](#) - Sheila Hollins 2018-06-11

This is a story about what can happen to a girl when she starts her period. People do not need to be able to read in order to understand the story. Susan does not understand what is happening to her when she finds blood on her sheets and clothes. She does not tell her mother, but goes straight to school. In the playground, other girls giggle and point at the blood stains. Susan doesn't know why they are laughing at her. A teacher notices what is happening and calls Susan aside to explain what menstruation is, and how she should look after herself. Susan's mother provides further reassurance on her

return home from school. She shows Susan how to keep herself clean and comfortable. Susan has become a woman, and her mother takes her shopping to celebrate.

[The Palgrave Handbook of Critical Menstruation Studies](#) - Chris Bobel 2020-07-24

This open access handbook, the first of its kind, provides a comprehensive and carefully curated multidisciplinary and genre-spanning view of the state of the field of Critical Menstruation Studies, opening up new directions in research and advocacy. It is animated by the central question: “what new lines of inquiry are possible when we center our attention on menstrual health and politics across the life course?” The chapters—diverse in content, form and perspective—establish Critical Menstruation Studies as a potent lens that reveals, complicates and unpacks inequalities across biological, social, cultural and historical dimensions. This handbook is an unmatched resource for researchers, policy makers,
