Absolute Reality in the Qur'an - Masudul Alam

Choudhury 2016-09-14
This book studies the absolute reality of the Qur'an, which is signified by the struggle of truth against falsehood in the framework of monotheistic unity of knowledge and the unified world-system induced by the consilience of knowledge. In such a framework the absolute reality reveals itself not by religious dogmatism. Rather, the methodology precisely comprises its distinctive parts. These are namely the 'primal ontology' as the foundational explained axiom of monotheistic unity; the 'secondary ontologies' as explanatory replications of the

law of unity in the particulars of the world-system; 'epistemology' as the operational model; and 'phenomenology' as the structural nature of events induced by the monotheistic law, that is by knowledge emanating from the law. The imminent methodology remains the unique explanatory reference of all events that take place, advance, and change in continuity across continuums of knowledge, space, and time.

Public Relations As Relationship Management -

John A. Ledingham 2000-01-01
The emergence of relationship management as a paradigm for

public relations scholarship and practice requires a close examination of just what is achieved by public relations--its definition, function and value, and the benefits it generates. Initiated by the editors' interest in cross-disciplinary exploration, this volume evolved to its current form as a result of the need for a framework for understanding public relations and the potential impact of organization-public relationships on the study, practice, and teaching of public relations. Ledingham and Bruning include contributions that present state-of-the-art research in relationship management, applications of the relational perspective to various components of public relations, and the implications of the approach to influence further research and practice. The discussion conducted here is certain to influence and promote future theory and practice on the concept of relationship management.

The Ah Ha's of Effective Relationships - Gerald Prince

2005-11

Alex Boden did everything Rivonia Technology asked him to do. He streamlined his staff; he increased sales. He was a company man. His clients remained loyal and appreciated Alex's honesty and devotion. But there was a buyout, and Alex's job may be in jeopardy. The 'Ah Ha's' of Effective Relationships follows Alex through a journey of self-discovery. He wants a challenging job, one he can fully enjoy, but first he must learn how best to manage his relationships. His sources-a Board of Directors-are an unlikely and widely diverse group: a veterinarian, a CEO, a lawyer, an antiques dealer, and a principal. What Alex learns makes him a better sales manager, a better father, and a better husband. He comes to understand that, in the words of Gerald Prince, 'versatility is not an act; it's a habit practiced everyday.'" Explore these questions and find the answers with Alex: If people disagree with me what keeps them from speaking up?

Healing with Art and Soul -

Kathy Luethje 2008-12-18

This fascinating collection of essays contains a variety of perspectives about the use of expressive arts for facilitating physical and emotional healing. Each author within brings a fresh approach and unique experiences to their writing. Within these pages, you will find many ideas for the use of the arts and can learn how to engage the inner layers of the self that allow natural healing processes of the body and soul to flourish. When we fully engage an art modality, we find ourselves in a place in our consciousness that could be called 'healingspace,' where we feel ourselves whole and remember ourselves as well. From psychic trauma to physical illness, dis-ease of many kinds may be addressed through the various techniques discussed here. The tools offered by some authors are

population specific and age appropriate, while several authors have given us the philosophical underpinnings for it all. While the authors within represent the grassroots voices of this new and rapidly expanding field, several of them have developed their own methods for using the arts, and have thriving practices. Our approach is wholistic. Music, visual arts, movement, dance, and poetry are discussed as separate modalities and in combination with one another in a process or flow. The reader will engage in our experiences with these modalities as they have been lived. The complementary CD that accompanies this book will allow the listener to have a full sound experience of toning. If a rationale is needed for establishing arts programs in medical centers or other health facilities, it can be found here. The book offers tools for self development and for group facilitation. Those wanting to expand their healing practice through the use of the arts will find the book to be a faithful

guide. Anyone wishing for a fuller understanding of how the arts may work to facilitate healing will find much food for thought within these pages.
