*Killing McVeigh* - Jody Lyneé Madeira 2012-06-11

On April 19, 1995, Timothy McVeigh detonated a two-ton truck bomb that felled the Alfred P. Murrah Federal Building in Oklahoma City, killing 168 people. On June 11, 2001, an unprecedented 242 witnesses watched him die by lethal injection. In the aftermath of the bombings,

American public commentary almost immediately turned to “closure” rhetoric. Reporters and audiences alike speculated about whether victim’s family members and survivors could get closure from memorial services, funerals, legislation, monuments, trials, and executions. But what does “closure” really mean for those who survive—or lose loved ones in—traumatic acts? In the wake of such terrifying events, is closure a realistic or appropriate expectation? In *Killing McVeigh*, Jody Lyneé

Madeira uses the Oklahoma City bombing as a case study to explore how family members and other survivors come to terms with mass murder. As the fullest case study to date of the Oklahoma City Bombing survivors' struggle for justice and the first-ever case study of closure, this book describes the profound human and institutional impacts of these labors to demonstrate the importance of understanding what closure really is before naively asserting it can or has been reached.

**Law, Literature, and the Transmission of Culture in England, 1837-1925** - Dr Cathrine O Frank 2013-04-28

Focusing on the last will and testament as a legal, literary, and cultural document, Cathrine O. Frank examines fiction of the Victorian and Edwardian eras alongside actual wills, legal manuals relating to their creation, case law regarding their administration, and contemporary accounts of "curious wills" in periodicals. Her study begins with the Wills Act of 1837 and poses two basic questions: What picture of Victorian culture and personal subjectivity emerges from competing legal and literary narratives about the will, and how does the shift from realist to modernist representations of the will accentuate a growing divergence between law and literature? Frank's examination of works by Emily Brontë, George Eliot, Charles Dickens, Wilkie Collins, Anthony Trollope, Samuel Butler, Arnold Bennett, John Galsworthy, and E.M. Forster reveals the shared rhetorical and cultural significance of the will in law and literature while also highlighting the competition between these discourses to structure a social order that emphasized self-determinism yet viewed individuals in relationship to the broader community. Her study contributes to our knowledge of the cultural significance of Victorian wills and creates intellectual bridges between the Victorian and Edwardian periods that will interest scholars from a variety of disciplines who are concerned with the laws, literature, and history of the nineteenth and early twentieth centuries.

**History and Ideology in Charles Dickens's and Orhan Kemal's Selected Novels** - Erol Gülüştür 2023-08-31

History and ideology are important concepts to consider when going through a literary work. Since ancient times, they have been key tools for

the examination of literature. By means of these two concepts, a given work is analyzed and evaluated more profoundly. Both English and Turkish literature show traces of history and contesting ideologies. Charles Dickens and Orhan Kemal are prominent authors, the works of whom reveal the historical and ideological background of their respective contexts. This book extensively accounts for history and Althusser's ideology in Charles Dickens's and Orhan Kemal's selected novels.

\*\*Winner of the Man Booker Prize for Fiction 2011\*\* Tony Webster and his clique first met Adrian Finn at school. Sex-hungry and book-hungry, they would navigate the girl-less sixth form together, trading in affectations, in-jokes, rumour and wit. Maybe Adrian was a little more serious than the others, certainly more intelligent, but they all swore to stay friends for life. Now Tony is retired. He's had a career and a single marriage, a calm divorce. He's certainly never tried to hurt anybody. Memory, though, is imperfect. It can always throw up surprises, as a lawyer's letter is about to prove. Now a major film

**Victims' Stories and the Advancement of Human Rights** - Diana Tietjens Meyers 2016-04-12

Victim's Stories and the Advancement of Human Rights takes on a set of

questions suggested by the worldwide persistence of human rights abuse and the prevalence of victims' stories in human rights campaigns, truth commissions, and international criminal tribunals: What conceptions of victims are presumed in contemporary human rights discourse? How do conventional narrative templates fail victims of human rights abuse and resist raising novel human rights issues? What is empathy, and how can victims frame their stories to overcome empathetic obstacles and promote commitment to human rights? How can victims' stories be used ethically in the service of human rights? The book addresses these concerns by analyzing the rhetorical resources for and constraints on victims' ability to articulate their stories and by clarifying how their stories can contribute to enlarged understandings of human rights protections and deepened commitments to realizing human rights. It theorizes the normative content that victims' stories can convey and the bearing of that normative content on human rights. Throughout the book, published victims' stories-including stories of torture, slavery, genocide, rape in wartime, and child soldiering-are analyzed in conjunction with philosophical arguments. This book mobilizes philosophical theory to illuminate victims' stories and appeals to victims' stories to enrich the philosophy of human rights.

*Ends*. - Joe MacLeod 2017-06-03

As consumers and providers we overlook the importance of healthy, coherent endings. There was once a rich culture of reflection and responsibility, but over recent centuries this has been lost. Producing a mixture of long term societal oversight, and short term denial. We are left with a bias customer lifecycle that is limited to the exciting vocabulary geared strictly around all things new. Giving rise to guilt-free consumers, an overly-blamed business sector and a society which finds itself at a loss when it needs to grapple with responsibility and consumptions biggest ills. In a world awash with start-ups and new tech, this book tells you why its critical we start considering endings. 'Right to be Forgotten', is the ambitious law of the European Union that protects a persons rights in a digital world that can't acknowledge removal of the items we have been encouraged to share. Nearly 30 years of Climate Change discussion and we still fail to accept the implications of ending our carbon consumption. Revenge porn, rising anxiety rates in young adults and increasing use of VPNs are reactions from a digital society without a foreseeable end to their digital content. Lacking a vocabulary to safely dispose of electronics, is there any surprise we only achieve 12.5% recycling of e-waste, despite an increase in sales of consumer electronics and a faster turnover of usage. Our homes are cluttered with on average 300,000 items. Instead of ending these product relationships, we prefer to seek alternatives in off-site storage - the largest growing real estate sector, according to the New York Times. We fail to consider endings in services that specifically deal with the end of our lives. In the UK we have on average 11 employers throughout our career, each provides us with a pension pot. According to Age Concern, a UK charity, 1 in 4 of these goes missing just when people need it most. Ends makes a compelling case that demonstrates how, over centuries, our changing

relationship with death has led to the loss of our relationship with endings. Giving rise to guilt-free consumers, an overly-blamed business sector and a society which finds itself at a loss when it needs to grapple with responsibility. Drawing on a plethora of sources in history, sociology, psychology and industry, Ends argues that we are taking the wrong approach to challenging the impact of consumption and that we need to create coherent endings in our product, service and digital experiences to rebalance this.

**Narrative Mortality** - Catherine Russell 1995

What seems like closure might be something more, as Catherine Russell shows us in this book about death in narrative cinema since the 1950s. Analyzing the structural importance of death in narrative endings, as well as the thematics of loss and redemption, Russell identifies mortality as a valuable critical tool for understanding the cinema of the second half of the twentieth century. Her work includes close textual readings of films by Fritz Lang, Wim Wenders, Oshima Nagisa, Jean-Luc Godard, and Robert Altman, among others. In these analyses, Russell reveals an uneasy relationship between death and closure, which she traces to anxieties about identity, gender, and national-cultural myths, and also to the persistence of desire. Drawing on the work of Walter Benjamin, she shows us death as a fundamentally allegorical structure in cinema - and as a potential sign of historical difference, with crucial implications for theories of film narrative and spectatorship. "Narrative Mortality" provides an insight into the dynamics of postmodern cinema as it emerged from the modernist preoccupation with existential mortality. By tracing the role of death from a work that precedes the Brechtian cinema of the 60s ("Beyond a reasonable doubt") to several that succeed it ("Nashville", "The State of things"), the book expands the narrative project of new wave cinema and ushers it onto a broad historical plane.

**New Beginnings** - Bill Kissane 2011

"New Beginnings" covers Irish constitutional development from Home Rule to the Good Friday Agreement, focusing on turning points where radical constitutional change was discussed, attempted, or implemented. It asks what Irish constitution-makers were trying to do in drafting constitutional documents, or significantly amending existing constitutions. It deals with the 1919, 1922, and 1937 constitutions, debates over the 1937 constitution since 1969, and the 1998 Belfast peace agreement. Taking the relationship between constitutionalism and democracy as its key issue, it asks why Irish politicians have seen constitutions as ways of making democracy more manageable, rather than of furthering democracy. It is intended for students of politics and

constitutional law, as well as the general reader, and written in an

accessible style that assumes no prior knowledge of Irish constitutional history or law.
