Bioterrorism and Biocrimes W. Seth Carus 2002 The working paper is divided into two main parts. The first part is a descriptive analysis of the illicit use of biological agents by criminals and terrorists. It draws on a series of case studies documented in the second part. The case studies describe every instance identifiable in open source materials in which a perpetrator used, acquired, or threatened to use a biological agent. While the inventory of cases is clearly incomplete, it provides an empirical basis for addressing a number of important questions relating to both biocrimes and bioterrorism. This material should enable policymakers concerned with bioterrorism to make more informed decisions. In the course of this project, the author has researched over 270 alleged cases involving biological agents. This includes all incidents found in open sources that allegedly occurred during the 20th Century. While the list is certainly not complete, it provides the most comprehensive existing unclassified coverage of instances of illicit use of biological agents.

Investigative Aesthetics Matthew Fuller 2021-08-24 Today, artists are engaged in investigation. They probe corruption, state violence, environmental destruction and repressive technologies. At the same time, fields not usually associated with aesthetics make powerful use of it. Journalists and legal professionals pore over open source videos and satellite imagery to undertake visual investigations. This combination of diverse fields is what the authors call "investigative aesthetics": mobilising sensibilities often associated with art, architecture and other such practices to find new ways of speaking truth to power. This book draws on theories of knowledge, ecology and technology, evaluates the methods of citizen counter-forensics, micro-history and art, and examines radical practices such as those of Wikileaks, Bellingcat, and Forensic Architecture. Investigative Aesthetics takes place in the studio and the laboratory, the courtroom and the gallery, online and in the streets, as it strives towards the construction of a new 'common sensing'. The book is an inspiring introduction to a new field that brings together investigation and aesthetics to change how we understand and confront power today. Occupational Health and Safety for the 21st Century Robert H. Friis 2014-09 This book discusses occupational health and safety, including occupational policies, legislative acts, and laws for protection of workers. Epidemiology and toxicology are examples of two fields that make contributions to exposure assessments and illuminate the adverse health effects associated with work-related exposures. Among the adverse health

outcomes that have been linked with the work environment are cancer, respiratory illness, and reproductive abnormalities. Unintentional injuries are one of the leading causes of work-related morbidity and mortality, but the psychological and social environment can also affect the health of workers by influencing levels of stress and morale. Methods have been developed to reduce exposures to hazards and increase occupational safety through redesign of the work environment, introduction of engineering controls, and limiting exposures to physical, microbial, and chemical agents. --

Fortunately this is Germany, where there are procedures for everything. Enter Investigator Tobias Winter, whose aim is to get in, deal with the problem, and get out with the minimum of fuss, personal danger and paperwork. Medicinal Orchids of Asia Eng Soon Teoh 2016-08-30 This unique book brings together a wealth of data on the botanical, ethno-medicinal and pharmacological aspects of over 500 species of Asian medicinal orchids. It starts off by explaining the role and limitations of complimentary and

herbal medicines, and how traditional Asian medicine differs from Western, “scientific” medicine. The different Asian medical traditions are described, as well as their modes of preparing herbal remedies. The core of the book presents individual medicinal orchid species arranged by genera. Each species is identified by its official botanical name, synonyms, and local names. Its distribution, habitat and flowering season, uses and pharmacology are described. An overview sums up the research findings on all species within each genus. Clinical observations are discussed whenever available, and possible therapeutic applications are highlighted. The book closes with chapters on the conservation of medicinal orchids and on the role of randomized clinical trials.

Moon Over Soho Ben Aaronovitch 2022-11-28 'Moon Over Soho cements [the Rivers of London] series as my favorite urban fantasy series. The humor, the world-building, the action, the magic, the mystery, the procedural—all are top-notch.' — Ranting Dragon My name is Peter Grant, and I'm a Police Constable in that mighty army for justice known as the Metropolitan Police (a.k.a. the Filth). I'm also an apprentice wizard, the first in fifty years. When your dad is an almost famous jazz trumpeter, you know the classics. And that's why, when Dr Walid called me down to the morgue to listen to a corpse, I recognized the tune it was playing as the jazz classic 'Body and Soul.' Something violently supernatural had happened to the victim, strong enough to leave its imprint on his corpse as if it were a wax cylinder recording. The former owner of the body, Cyrus Wilkinson, was a part-time jazz saxophonist and full-time accountant who had dropped dead of a heart attack just after finishing a gig. He wasn't the first, but no one was going to let me exhume corpses just to see if they were playing my tune. So it was back to old-fashioned police legwork, starting in Soho, the heart of the scene, with the lovely Simone - Cyrus's ex-lover, professional jazz kitten and as inviting as a Rubens portrait - as my guide. And it didn't take me long to realise there were monsters stalking Soho, creatures feeding off that special gift that separates the great musician from someone who can raise a decent tune. What they take is beauty. What they leave behind is sickness, failure and broken lives. Reviews for *Moon Over Soho* Mr. Aaronovitch is, in short, writing the best contemporary occult detective series on the shelf today, and that's by a substantial margin.' — Pornokitsch

'Moon Over Soho is a gripping continuation of River of London's well executed blend of police-procedural and fantasy with a good splash of horror thrown in. This is urban fantasy done with a loving attention to detail and enlivened by an ever present wit making this series a must-read for anyone who likes their fantasy with a strong edge of realism.' — SF Book Reviews

Vincent Van Gogh: Wilfred Niels Arnold 1992-11 As a five year old I encountered a picture of a young man in a rakish hat and a yellow coat, on the wall of a large classroom. There was something instantly intriguing about the image, but it was also puzzling because it represented neither politician nor prince, the usual fare for Australian school decorations. I was eventually told that this was a reproduction of a painting, the artist was Vincent van Gogh, and that the subject was some young Frenchman. On special days we assembled in that room and during the next several years I found myself gazing beyond visiting speakers at the fellow in the yellow jacket. It was almost another fifty years before I felt properly conversant with the portrait and realized that van Gogh's subject, Armand Roulin, was seventeen at the time of the original painting and had died at seventy-four during my schoolboy contemplations. In the interim my enjoyment of the works of the Impressionists and Post Impressionists had grown and I occasionally ran into the name of Dr. Gachet, Vincent's last attending physician, in books and catalog essays. The doctor was my entree to the overlapping charms of medical and art histories. In 1987 I had the good fortune to participate as a biochemist in the centenary celebration of the Pasteur Institut in Paris. *Angel of Death* G. Burial Plots in British Detective Fiction Lisa Hopkins 2021-01-24 Burial Plots in British Detective Fiction offers an overview of the ways in which the past is brought back to the surface and influences the present in British detective fiction written between 1920 and 2020. Exploring a range of authors including Agatha Christie, Patricia Wentworth, Val McDermid, Sarah Caudwell, Georgette Heyer, Dorothy Dunnnett, Jonathan Stroud and Ben Aaronovitch, Lisa Hopkins argues that both the literal and literary disinterment of the past use elements of the national past to interrogate the present. As such, in the texts discussed, uncovering the truth about an individual crime is also typically an uncovering of a more general connection between the present and the past. Whether detective novels explore murders on archaeological digs, hauntings, cold crimes or killings at Christmas, Hopkins explores the underlying message that you cannot understand the present unless you understand the past.

The Ancient and Present State of the County and City of Cork Charles Smith 1815

The Alphabet Versus the Goddess Leonard Shlain 1999-09-01 This groundbreaking book proposes that the rise of alphabetic literacy reconfigured the human brain and brought about profound changes in history, religion, and gender relations. Making remarkable connections across brain function, myth, and anthropology, Dr. Shlain shows why pre-literate cultures were principally informed by holistic, right-brain modes that venerated the Goddess, images, and feminine values. Writing drove cultures toward linear left-brain thinking and this shift upset the balance between men and women, initiating the decline of the feminine and ushering in patriarchal rule. Examining the cultures of the Israelites, Greeks, Christians, and Muslims, Shlain reinterprets ancient myths and parables in light of his theory. Provocative and inspiring, this book is a paradigm-shattering work that will transform your view of history and the mind.

Deep Time of the Media Siegfried Zielinski 2008-02-15 A quest to find something new by excavating the "deep time" of media's development—not by simply looking at new media's historic forerunners, but by connecting models, machines, technologies, and accidents that have until now remained separated. Deep Time of the Media takes us on an archaeological quest into the hidden layers of media development—dynamic moments of intense activity in media design and construction that have been largely ignored in the historical-media archaeological record. Siegfried Zielinski argues that the history of the media does not proceed predictably from primitive tools to complex machinery; in Deep Time of the Media, he illuminates turning points of media history—fractures in the predictable—that help us see the new in the old. Drawing on original source materials, Zielinski explores the technology of devices for hearing and seeing through two thousand years of cultural and technological history. He discovers the contributions of "dreamers and modelers" of media worlds, from the ancient Greek philosopher Empedocles and natural philosophers of the Renaissance and Baroque periods to Russian avant-gardists of the early twentieth century. "Media are spaces of action for constructed attempts to connect what is separated," Zielinski writes. He describes models and machines that make this connection: including a theater of mirrors in sixteenth-century Naples, an automaton for musical composition created by the seventeenth-century Jesuit Athanasius Kircher, and the eighteenth-century electrical tele-writing machine of Joseph Mazzolari, among others. Uncovering these moments in the media-archaeological record, Zielinski says, brings us into a new relationship with present-day moments; these discoveries in the "deep time" media history shed light on today's media landscape and may help us

map our expedition to the media future.

Healing Logics Erika Brady 2001-04-01 Scholars in folklore and anthropology are more directly involved in various aspects of medicine—such as medical education, clinical pastoral care, and negotiation of transcultural issues—than ever before. Old models of investigation that artificially isolated "folk medicine," "complementary and alternative medicine," and "biomedicine" as mutually exclusive have proven too limited in exploring the real-life complexities of health belief systems as they observably exist and are applied by contemporary Americans. Recent research strongly suggests that individuals construct their health belief systems from diverse sources of authority, including community and ethnic tradition, education, spiritual beliefs, personal experience, the influence of popular media, and perception of the goals and means of formal medicine. *Healing Logics* explores the diversity of these belief systems and how they interact—in competing, conflicting, and sometimes remarkably congruent ways. This book contains essays by leading scholars in the field and a comprehensive bibliography of folklore and medicine.

It only lies sleeping... Martin Chorley - aka the Faceless Man - wanted for multiple counts of murder, fraud and crimes against humanity, has been unmasked and is on the run. Peter Grant, Detective Constable and apprentice wizard, now plays a key role in an unprecedented joint operation to bring Chorley to justice. But even as the unwieldy might of the Metropolitan Police bears down on its foe, Peter uncovers clues that Chorley, far from being finished, is executing the final stages of a long-term plan. A plan that has its roots in London's two thousand bloody years of history, and could literally bring the city to its knees. To save his beloved city Peter's going to need help from his former best friend and colleague - Lesley May - who brutally betrayed him and everything he thought she believed in. And, far worse, he might even have to come to terms with the malevolent supernatural killer and agent of chaos known as Mr Punch...
