*Selected Practice Recommendations for Contraceptive Use* World Health Organization. Reproductive Health and Research 2005 This document is one of two evidence-based cornerstones of the World Health Organization's (WHO) new initiative to develop and implement evidence-based guidelines for family planning. The first cornerstone, the Medical eligibility criteria for contraceptive use (third edition) published in 2004, provides guidance for who can use contraceptive methods safely. This document, the Selected practice recommendations for contraceptive use (second edition), provides guidance for how to use contraceptive methods safely and effectively once they are deemed to be medically appropriate. The recommendations contained in this document are the product of a process that culminated in an expert Working Group meeting held at the World Health Organization, Geneva, 13-16 April 2004.

*Medical Eligibility Criteria for Contraceptive Use* World Health Organization 2010 Medical Eligibility Criteria for Contraceptive Use reviews the medical eligibility criteria for use of contraception, offering guidance on the safety and use of different methods for women and men with specific characteristics or known medical conditions. The recommendations are based on systematic reviews of available clinical and epidemiological research. It is a companion guideline to Selected Practice Recommendations for Contraceptive Use. Together, these documents are intended to be used by policy-makers, program managers, and the scientific community to support national programs in the preparation of service delivery guidelines. The fourth edition of this useful resource supersedes previous editions, and has been fully updated and expanded. It includes over 86 new recommendations and 165 updates to recommendations in the previous edition. Guidance for populations with special needs is now provided, and a new annex details evidence on drug interactions from concomitant use of antiretroviral therapies and hormonal contraceptives. To assist users familiar with the third edition, new and updated recommendations are highlighted. Everyone involved in providing family planning services and contraception should have the fourth edition of Medical Eligibility Criteria for Contraceptive Use at hand.

**Just Get on the Pill** Krystale E. Littlejohn 2021-08-31 "The average woman concerned about pregnancy spends approximately thirty years trying to prevent conception. She largely does so alone using prescription birth control, a phenomenon often taken for granted as natural and beneficial in the United States. In *Just Get on the Pill*, Littlejohn draws on interviews to show how young women come to take responsibility for prescription birth control as the "woman's method" and relinquish control of external condoms as the "man's method." She uncovers how gendered compulsory birth control-in which women are held accountable for preventing and resolving pregnancies in gender-constrained ways-encroaches on women's reproductive autonomy and erodes their ability to protect themselves from disease. In tracing the gendered politics of pregnancy prevention, Littlejohn argues that the gender division of labor in birth control is not natural. It is unjust"--

*If Men Got Pregnant, Abortion Would be a Sacrament* 1991 Under this provocative title, Helen Forelle has carefully condensed the responses of more than 200 women who have had abortions at some time in their lives. At the time of their abortions, they ranged in age from fifteen to forty-four. These women wrote letters expressing their physical, mental & emotional reactions to their abortions & their aftermaths. The letters were sent in response to an appeal placed in 28 national publications, asking women who had experienced abortion without adverse physical or emotional effects to share a part of their private lives on behalf of other women & women to come, & to shed more of the light of understanding on the emotionally-charged abortion issue. Among respondents were doctors, teachers, students, housewives, many of them highly educated. Their testaments are moving, compelling, candid, heart-&-mind felt, often revealing intelligence, thoughtfulness, sensitivity & depth. They provide evidence that the decision is not an easy, frivolous one, nor is the issue a simple one, black & white, with one very simple answer. To my knowledge no one has elicited direct & honest responses from a group of women about this serious, personal decision, & then presented them in readable length for the reader privileged to share these experiences. I recommend the book as an authentic record, thoughtfully compiled, & a contribution to our understanding. I salute the women for their courage in breaking the silence.

**Pregnancy, Childbirth, Postpartum, and Newborn Care** World Health Organization 2003 This guide provides a full range of updated, evidence-based norms and standards that will enable health care providers to give high quality care during pregnancy, delivery and in the postpartum period, considering the needs of the mother and her newborn baby. All recommendations are for skilled attendants working at the primary level of health care, either at the facility or in the community. They apply to all women attending antenatal care, in delivery, postpartum or post-abortion care, or who come for emergency care, and to all newborns at birth and during the first week of life (or later) for routine and emergency care. This guide is a guide for clinical decision-making. It facilitates the collection; analysis, classification and use of relevant information by suggesting key questions, essential observations and/or examinations, and recommending appropriate research-based interventions. It promotes the early detection of complications and the initiation of early and appropriate treatment, including time referral, if necessary. Correct use of this guide should help reduce high maternal and perinatal mortality and morbidity rates prevalent in many parts of the developing world, thereby making pregnancy and childbirth safer.

When family planning officers storm the village to arrest violators of the population control policy, mother, father and daughter escape to the Yangtze River and begin a fugitive life. For years they drift south through the poisoned waterways and ruined landscapes of China, picking up work as they go along, scavenging for necessities and flying from police detection. **One Thousand Two Hundred and Fifty Health-Care Questions Women Ask** Joe S. McIlhaney 1988-07

**A Review of the HHS Family Planning Program** Institute of Medicine 2009-08-07 A Review of the HHS Family Planning Program provides a broad evaluation of the Title X family planning program since its establishment in 1970. The program successfully provides family planning services to its target audience of low-income individuals, but there is room for improvement. While the program's core goals are apparent, a secondary set of changing priorities has emerged without a clear, evidence-based strategic process. Also, funding for the program has increased in actual dollars, but has not kept pace with inflation or increased costs. Several aspects of the program's structure could be improved to increase the ability of Title X to meet the needs of its target population. At the same time, the extent to which the program meets those needs cannot be assessed without a greater capacity for long-term data collection. A Review of the HHS Family Planning Program recommends several specific steps to enhance the management and improve the quality of the program, as well as to demonstrate its direct contribution to important end results, such as reducing rates of unintended pregnancy, cervical cancer, and infertility. The book will guide the Office of Family Planning toward improving the effectiveness of the program. Other parties who will find the research and recommendations valuable include programs receiving Title X funding from the Office of Family Planning, policy makers, researchers, and professional organizations.

**How Not to Get Pregnant** Sherman J. Silber 1987 Methods covered include natural family planning, breast feeding, birth control pills, the intrauterine device or IUD, barrier methods, vasectomy, tubal ligation or female sterilization, and newer methods.

**Counselling for Maternal and Newborn Health Care** World Health Organization 2010 The main aim of this practical Handbook is to strengthen counselling and communication skills of skilled attendants (SAs) and other health providers, helping them to effectively discuss with women, families and communities the key issues surrounding pregnancy, childbirth, postpartum, postnatal and post-abortion care. Counselling for Maternal and Newborn Health Care is divided into three main sections. Part 1 is an introduction which describes the aims and objectives and the general layout of the Handbook. Part 2 describes the counselling process and outlines the six key steps to effective counselling. It explores the counselling context and factors that influence this context including the socio-economic, gender, and cultural environment. A series of guiding principles is introduced and specific counselling skills are outlined. Part 3 focuses on different maternal and newborn health topics, including general care in the home during

pregnancy; birth and emergency planning; danger signs in pregnancy; post-abortion care; support during labor; postnatal care of the mother and newborn; family planning counselling; breastfeeding; women with HIV/AIDS; death and bereavement; women and violence; linking with the community. Each Session contains specific aims and objectives, clearly outlining the skills that will be developed and corresponding learning outcomes. Practical activities have been designed to encourage reflection, provoke discussions, build skills and ensure the local relevance of information. There is a review at the end of each session to ensure the SAs have understood the key points before they progress to subsequent sessions.

Having a Baby After 30 Elisabeth D. Bing 1980

*Designing Motherhood* Michelle Millar Fisher 2021-09-14 More than eighty designs--iconic, archaic, quotidian, and taboo--that have defined the arc of human reproduction. While birth often brings great joy, making babies is a knotty enterprise. The designed objects that surround us when it comes to menstruation, birth control, conception, pregnancy, childbirth, and early motherhood vary as oddly, messily, and dramatically as the stereotypes suggest. This smart, image-rich, fashion-forward, and design-driven book explores more than eighty designs--iconic, conceptual, archaic, titillating, emotionally charged, or just plain strange--that have defined the relationships between people and babies during the past century. Each object tells a story. In striking images and engaging text, *Designing Motherhood* unfolds the compelling design histories and real-world uses of the objects that shape our reproductive experiences. The authors investigate the baby carrier, from the Snuggli to BabyBjörn, and the (re)discovery of the varied traditions of baby wearing; the tie-waist skirt, famously worn by a pregnant Lucille Ball on *I Love Lucy*, and essential for camouflaging and slowly normalizing a public pregnancy; the home pregnancy kit, and its threat to the authority of male gynecologists; and more. Memorable images--including historical ads, found photos, and drawings--illustrate the crucial role design and material culture plays throughout the arc of human reproduction. The book features a prologue by Erica Chidi and a foreword by Alexandra Lange. Contributors Luz Argueta-Vogel, Zara Arshad, Nefertiti Austin, Juliana Rowen Barton, Lindsey Beal, Thomas Beatie, Caitlin Beach, Maricela Becerra, Joan E. Biren, Megan Brandow-Faller, Khiara M. *Clinical Practice Handbook for Safe Abortion* World Health Organization 2014 The Clinical practice handbook for safe abortion care is intended to facilitate the practical application of the clinical recommendations from the second edition of *Safe abortion: technical and policy guidance for health systems* (World Health Organization [WHO] 2012). While legal, regulatory, policy and service-delivery contexts may vary from country to country, the recommendations and best practices described in both of these documents aim to enable evidence-based decision-making with respect to safe abortion care.

**Abortion, Sin and the State in Thailand** Andrea Whittaker 2004-07-29 This book discusses abortion in a non-Western, non-Christian context - in Thailand, where over 300,000 illegal abortions are performed each year by a variety of methods. The book, based on extensive original research in the field, examines a wide range of issues, including stories of the real-life dilemmas facing women, popular representations of abortion in the media, the history of the debate in Thailand and its links to politics. Overall, the work highlights the voices of women and their subjective experiences and perceptions of abortion, and places these 'women's stories' in an analysis of broader socio-political gender and power relations that structure sexuality and women's reproductive health decisions.

Expecting Better Emily Oster 2013-08-22 FREAKONOMICS meets WHAT TO EXPECT WHEN YOU'RE EXPECTING in this groundbreaking guidebook. Award-winning Emily Oster debunks myths about pregnancy to empower women while they're expecting. Pregnancy is full of rules. Pregnant women are often treated as if they were children, given long lists of items to avoid--alcohol, caffeine, sushi--without any real explanation from their doctors about why. They hear frightening and contradictory myths about everything from weight gain to sleeping on your back to bed rest from friends and pregnancy books. In *EXPECTING BETTER*, Oster shows that the information given to pregnant women is sometimes wrong and almost always oversimplified. When Oster was expecting her first child, she felt powerless to make the right decisions for her pregnancy so Oster drew on her own experience and went in search of the real facts about pregnancy using an economist's tools. Economics is the science of determining value and making informed decisions. To make a good decision, you need to understand the information available to you and to know what it means to you as an individual. *EXPECTING BETTER* overturns standard recommendations for alcohol, caffeine, sushi, bed rest, and induction while putting in context the blanket guidelines for fetal testing, weight gain, risks of pregnancy over the age of thirty-five, and nausea, among others. Oster offers the real-world advice one would never get at the doctor's office. Knowing that the health of your baby is paramount, readers can know more and worry less. Having the numbers is a tremendous relief--and so is the occasional glass of wine. This groundbreaking guidebook is as fascinating as it is practical.
