Sound System Engineering - Don Davis
2014-06-20

Sound System Engineering Third Edition is a complete revision and expansion of the former work. Written by two leading authorities in the field of audio engineering, this highly respected guide covers the fundamentals necessary for the understanding of today's systems as well as for those systems yet to come. The space formerly occupied by outdated photographs of manufacturers' product and of older system

installations has now been filled with new measurements and discussions of the measurement process. The "Mathematics for Audio" chapter has been expanded to include the mathematics of phasors. The "Interfacing Electrical and Acoustic Systems" chapter has a completely new section covering the analysis of alternating current circuits. Additionally, system gain structure is now treated by both the available input power method and the voltage only method, complete with illustrations of each.

All chapters dealing with loudspeaker directivity and coverage, the acoustic environment, room acoustics, speech intelligibility, and acoustic gain appear in up to date versions. In addition there is new material on signal delay and synchronization and equalization. There are completely new chapters on microphones, loudspeakers and loudspeaker arrays including line arrays with steering and beam-width control, and signal processing, both analog and digital. The book runs the gamut of sound system design from the simplest all-analog paging system to the largest multipurpose digital systems. In writing this third edition, the authors kept in mind the needs of sound system installers, sound system service technicians, and sound system designers. All three groups will find the material to be useful for everyday work as well as beneficial in the furtherance of their overall audio education.

Re/reading the Past - J. R. Martin 2003-01-01
"Re/reading the Past "is concerned with the discourses of history, from the complementary perspectives of Critical Discourse Analysis (CDA) and Systemic Functional Linguistics (SFL). The papers in the book stress the discursive construction of the past, focussing on the different social narratives which compete for official acknowledgement. Issues of collective and cultural memory are addressed, reflecting the "linguistic turn" in the Social Sciences. The book covers a range of discourses, interpreting texts from popular culture to academic discourse including the construction and evaluation of past events in a variety of places around the world. It is especially timely in its focus on the construction of time and value in a post-colonial world where history discourses are central to on-going processes of reconciliation, debates on war crimes, and the issues of amnesty and restitution. As such the book fills a significant gap in interdisciplinary debates as well as in

Medicating Modern America - Andrea Tone
2007-01-08

With Americans paying more than \$200 billion each year for prescription pills, the pharmaceutical business is the most profitable in the nation. The popularity of prescription drugs in recent decades has remade the doctor/patient relationship, instituting prescription-writing and pill-taking as an integral part of medical practice and everyday life. *Medicating Modern America* examines the meanings behind this pharmaceutical revolution through the interconnected histories of eight of the most influential and important drugs: antibiotics, mood stabilizers, hormone replacement therapy, oral contraceptives, tranquilizers, stimulants, statins, and Viagra. All of these drugs have been popular, profitable, influential, and

controversial, and the authors take a historical approach to studying their development, prescription, and consumption. This perspective locates the histories of prescription medicines in specific cultural contexts while revealing the extent to which contemporary debates about pharmaceutical drugs echo concerns voiced by Americans in the past. Exploring the rich and multi-faceted history of pharmaceutical drugs in the United States, *Medicating Modern America* unveils the untold stories behind America's pharmaceutical obsession. Contributors include: Robert Bud, Jennifer R. Fishman, Jeremy A. Greene, David Healy, Suzanne White Junod, Ilina Singh, Andrea Tone, and Elizabeth Siegel Watkins.
