A Practitioners' Tool for the Assessment of Adults who Sexually Abuse Children - Jeff Fowler 2008-03-15

This book is a practical tool for the assessment of adults who sexually abuse children. It examines the impact of sexual abuse on children, enables professionals to evaluate the risk presented by adults who have sexually abused children, and provides a framework for the assessment of parents or

carers and their ability to protect their children. The book includes checklists that practitioners can use to interpret the information they collect, and is illustrated with a central case study that demonstrates how the assessment profile can be used. This book is a helpful resource for anyone undertaking assessments that have involved the sexual abuse of children. It is also of interest to others involved in child protection, such as social workers, health professionals, teachers, and legal and criminal justice professionals.

[A Man's Guide to Healthy Aging](#) - Edward H. Thompson Jr. 2013-11-25

Explores all aspects of health as men reach middle age and beyond. As they reach middle age, most men begin looking

forward to "what's next." They gear up to experience renewed productivity and purpose and are more conscious of their health. *A Man's Guide to Healthy Aging* is an authoritative resource for them, and for older men, as well. In collaboration with a variety of medical experts, the authors provide a comprehensive guide to healthy aging from a man's perspective. Edward H. Thompson, Jr., and Lenard W. Kaye—a medical sociologist and a gerontologist and social worker—offer invaluable information in four parts:

- "Managing Our Lives" describes the actions men can take to stay healthy. Here is information about how to eat well, reduce stress, and stay active for better overall health.
- "Mind and Body" considers how physical health and state of mind are connected. It explores sleep, drug and alcohol use, spirituality, and attitudes about appearance—and explains how all of these factors affect mental health.
- "Bodily

Health" examines how body systems function and what changes may occur as men age. It covers the body from head to toe and reviews how to manage chronic diseases such as cancer, diabetes, and heart conditions.

- "Living with Others" shows the importance of interacting with friends and family. Topics include sexual intimacy, friendship, and caregiving, as well as how men can make the best decisions about end-of-life issues for themselves and their loved ones. Refuting the ageist stereotype that men spend their later years "winding down," this book will help men reinvent themselves once, twice, or more—by managing their health, creating new careers, and contributing their skills and experiences to their communities.

Encyclopedia of Relationships Across the Lifespan - Jeffrey S. Turner
1996

Illustrating how relationships change throughout the course of human development from family interactions and

friendships to dating and work relationships, this study encompasses a range of topics including ageing experiences, divorce, family violence, gender roles and parenthood.

Exploring Sexuality and Disability - Shanna Katz Kattari
2023-09-01

Offering a current, comprehensive, and intersectional guide for students, practitioners, and researchers, this book synthesizes existing scholarship on culturally responsive practices that assist in exploring, understanding, and affirming the sexuality(ies) of disabled, chronically ill, neurodivergent, and Mad individuals. Drawing on an intersectional framework, it integrates insights drawn from an interdisciplinary body of scholarship including psychology, social work, sociology, history, political science, women and gender studies, cultural studies, and education along with perspectives from the practitioners who are actively defining the next generation of

best practices. By highlighting the incredible resilience and resistance of disabled individuals' and communities' sexuality and sexual well-being, this book challenges narratives that rely primarily on a one-dimensional view derived from the medical model and the view of disability as something to be "fixed" - or at least tolerated - rather than celebrated. In a world that pathologizes and devalues the sexual existence of disabled individuals, it illustrates how to create thriving communities and relationships, and how they can organize to find their voice, providing a counter-narrative of empowerment that fosters hopefulness, power, and health. It will be of interest to all scholars, students, and professionals across a variety of professions, including social work, psychology, counseling, policy, healthcare, education, community organizing, and multiple social service settings.

Sexuality Education Curricula -

Roberta J. Ogletree 1994

This guide provides information about 26 school-based sexuality education curricula. Sexuality educators, curriculum planners, administrators, and classroom teachers can use the material to: (1) quickly determine what is published in the area of school-based sexuality curricula; (2) identify specific attributes of sexuality curricula; (3) build a list of ideal curriculum attributes, based on community needs and concerns; (4) gain insight from evaluations, compiled by sexuality educators, curriculum specialists, and teachers; and (5) use blank charts and worksheets to evaluate and/or enhance curricula. The guide presents developmentally appropriate curricula covering: childhood, ages 5-8; preadolescence, ages 9-12; early adolescence ages 12-15; adolescence, ages 15-18; and special education students. Each curriculum description lists author, year published, latest revision, target grade level, package contents, and

where to order. Charts identify content, underlying philosophies, and skill-building and teaching strategies. Each curriculum is evaluated using key criteria, including comprehensiveness, content, accuracy and currency, skill-building, teaching methods, and ease of implementation. Two appendixes provide evaluation matrixes and worksheet, and a list of programs not included in the guide. (Contains 21 references.) (LL)

Beyond Condoms - Ann O'Leary, PhD 2007-05-08

This book reflects cutting-edge science that has only recently become available. It is a comprehensive assortment of new approaches to HIV prevention. It describes a set of prevention strategies that do not solely rely on male condoms, including: the use of HIV antibody testing and 'negotiated safety', abstinence, control of sexually transmitted diseases, treatment advances as prevention, and psychopharmacology to assist with behavior change. It is of

interest to HIV prevention scientists, health psychologists, health educators, and public health workers in the communities at risk.

Online Child Sexual Abuse -

Elena Martellozzo 2013-06-17
Online Child Sexual Abuse: Grooming, Policing and Child Protection in a Multi-Media World addresses the complex, multi-faceted and, at times, counter-intuitive relationships between online grooming behaviours, risk assessment, police practices, and the actual danger of subsequent abuse in the physical world. Online child sexual abuse has become a high profile and important issue in public life. When children are victims, there is clearly intense public and political interest and concern. Sex offenders are society's most reviled deviants and the object of seemingly undifferentiated public fear and loathing. This may be evidenced in ongoing efforts to advance legislation, develop police tactics and to educate children and their carers to engage with multi-media and

the internet safely.

Understanding how sex offenders use the internet and how the police and the government are responding to their behaviour is central to the development of preventative measures. Based on extensive ethnographic research conducted with the police and a specialist paedophile unit, here Elena Marellozzo presents an informed analysis of online child sexual abuse: of the patterns and characteristics of online grooming, and of the challenges and techniques that characterize its policing. Connecting theory, research and practice in the field of policing, social policy, victimology and criminology, this book adds significantly to our understanding and knowledge of the problem of online child sexual abuse, the way in which victims are targeted and how this phenomenon is, and might be, policed.

The Promise of Adolescence -
National Academies of
Sciences, Engineering, and
Medicine 2019-08-26

Adolescenceâ€"beginning with the onset of puberty and ending in the mid-20sâ€"is a critical period of development during which key areas of the brain mature and develop. These changes in brain structure, function, and connectivity mark adolescence as a period of opportunity to discover new vistas, to form relationships with peers and adults, and to explore one's developing identity. It is also a period of resilience that can ameliorate childhood setbacks and set the stage for a thriving trajectory over the life course. Because adolescents comprise nearly one-fourth of the entire U.S. population, the nation needs policies and practices that will better leverage these developmental opportunities to harness the promise of adolescenceâ€"rather than focusing myopically on containing its risks. This report examines the neurobiological and socio-behavioral science of adolescent development and outlines how this knowledge can be applied, both to promote adolescent well-being,

resilience, and development, and to rectify structural barriers and inequalities in opportunity, enabling all adolescents to flourish.

Dyslexia in Adults - Kathleen Nosek 1997-04

Sexuality in Emerging Adulthood - Elizabeth M. Morgan 2021

"Scientific theory is essential to research on sexuality and sexual experiences in emerging adulthood. Theory serves a number of important functions for research, including prediction and explanation. Research has often utilized theory to help enhance what we know about sexuality among those in the developmental period of emerging adulthood. In this chapter we offer a primer on theories that have been used regularly when studying sex and relationships using

emerging adult samples, including Life Course Development Theory, Symbolic Interactionism, Social Exchange Theory, and The Theory of Sexual Possible Selves. At the conclusion of our discussion of these theories and their role in guiding research and explaining findings on sex and sexuality, we offer theoretical directions to enhance the rigor of the use of theory in future research on sexual experiences among emerging adults"--

Child Sexual Abuse Reported by Adult Survivors - Sinéad

Ring 2022-04-28

Child Sexual Abuse Reported by Adult Survivors is a wide-ranging and timely critical history and analysis of legal responses to 'historical' or 'non-recent' child sexual abuse (NRCSA) in England and Wales, Ireland and Australia, each of which represents an evolving and progressive approach to this important and complex issue. The book examines the emergence of NRCSA as a distinctive social, political and legal phenomenon in each country and explores the legal responses developed to address its unprecedented challenges. Courts and parliaments in each country have reformed existing doctrine and practice and have created new ways of holding state and private actors accountable and new ways of addressing survivors' injuries. Criminal law, tort law, public inquiries and state reparations have all been to the forefront of these new legal responses, which have transformed law's engagement with NRCSA survivors and understandings of justice itself. However,

despite this undeniable progress, the book identifies ways in which the legal responses developed in each country fail to deliver accountability and recognition to NRCSA survivors and argues that such failures betray the law's inherent ambivalence to delivering justice for these survivors. Creating new insights into legal responses to this complex contemporary legal, social and political

problem, this book will be of great interest to academic lawyers, political scientists and historians, as well as those working on related topics in criminology, sociology, social policy, cultural studies and gender studies.
